MRI and Blood-Based Biomarkers Are Associated With S
With Ileal Crohn's Disease

Inflammatory Bowel Diseases

30, 2181-2190

DOI: 10.1093/ibd/izae101

Citation Report

#	Article	IF	Citations
1	Quantitative Evaluation of Noncontrast Magnetic Resonance Enterography for Active Inflammation in Crohn Disease Using Native T1 and T2 Mapping. Journal of Computer Assisted Tomography, 2025, 49, 10.1097/RCT.0000000000001654.	1.5	3
2	Quantitative MRI in Children With Crohn's Disease – Where Do We Stand?. Pediatric Radiology, 2024, 54, 1-12.	2.8	2
3	Circulating and Magnetic Resonance Imaging Biomarkers of Intestinal Fibrosis in Small Bowel Crohn's Disease. Inflammatory Bowel Diseases, 2025, 31, 1380-1391.	5.5	2
4	SAR Consensus Recommendations for Defining Small Bowel Crohn Disease Strictures at CT and MR Enterography. Radiology, 2025, 316, e243123.	13.1	19
5	Crohn Disease Strictures: Multimodality Imaging to Identify Imaging Biomarkers. Radiographics, 2025, 45, e240226.	5.1	3
6	Magnetic Resonance Enterography for Predicting Poor Prognosis in Crohn's Disease: A Systematic Review With Meta-Analysis. Therapeutic Advances in Gastroenterology, 2025, 18, 17562848251386317.	4.2	1
7	Probable Stricturing in Small Bowel Crohn Disease: In Support of SAR Consensus Recommendations. American Journal of Roentgenology, 2026, 226, e2534245.	5.0	2
8	Probable Stricture Is an Important Imaging Biomarker in Small Bowel Crohn Disease. American Journal of Roentgenology, 2026, 226, e2534496.	5.0	0
9	Precision Imaging for Optimized Crohn's Disease Management: Navigating the Evolution of Objective Healing Goals. iRADIOLOGY, 2026, 4, 113-126.	2.7	0
