Environmental Factors Associated With Risk of Crohn's
Crohn's and Colitis Canada - Genetic, Environmental, M

Clinical Gastroenterology and Hepatology

22, 1889-1897.e12

DOI: 10.1016/j.cgh.2024.03.049

Citation Report

#	Article	IF	Citations
1	Healthy First-Degree Relatives From Multiplex Families vs Simplex Families Have Higher Subclinical Intestinal Inflammation, a Distinct Fecal Microbial Signature, and Harbor a Higher Risk of Developing Crohn's Disease. Gastroenterology, 2025, 168, 99-110.e2.	12.5	28
2	It Runs in the Family: What Studying Unaffected Individuals in Simplex and Multiplex Families Tells Us About Inflammatory Bowel Disease Development. Gastroenterology, 2025, 168, 8-10.	12.5	1
3	The Treatment Naïve Microbiome of Pediatric Ulcerative Colitis and Microbial Therapeutics: A Humbling Challenge. Saudi Journal of Gastroenterology, 2025, 31, 1.	2.3	1
4	Wearable Technology in Inflammatory Bowel Disease: Current State and Future Direction. Expert Review of Medical Devices, 2025, 22, 121-126.	3.0	13
5	Gut Microbiome Signature in Predisease Phase of Inflammatory Bowel Disease: Prediction to Pathogenesis to Prevention. Gastroenterology, 2025, 0, 902-913.	12.5	34
6	Hunde Schützten Vor M. Crohn. Zeitschrift Fur Gastroenterologie, 2025, 63, 114-114.	0.6	0
7	Environmental Risk Factors of Inflammatory Bowel Disease: Toward a Strategy of Preventative Health. Journal of Crohn's and Colitis, 2025, .	8.8	49
8	Are Education, Socioeconomic Status, and Household Size Dependent Variables Influencing the Developmental Origins of Inflammatory Bowel Disease?. United European Gastroenterology Journal, 2025, 13, 843-844.	6.1	1
9	Pediatric Inflammatory Bowel Disease in Romania: The First Epidemiological Study of the North-West Region (2000–2020). Children, 2025, 12, 403.	3.0	3
10	Characterization of the Salivary Microbiome of Adults With Inflammatory Bowel Disease. Journal of Oral Microbiology, 2025, 17, 2499923.	7.3	9
11	Диарея как маска болезни Крона. Russian Pediatric Journal, 2025, 28, 103-107.	0.3	0
12	Global Evolution of Inflammatory Bowel Disease Across Epidemiologic Stages. Nature, 2025, 642, 458-466.	54.7	511
13	Si-Ni Decoction as a Potential Treatment for Ulcerative Colitis: Modulation of Gut Microbiota and AKT1 Inhibition Through Network Pharmacology and in Vivo Validation. Journal of Inflammation Research, 2025, 18, 6263-6280.	4.6	3
14	Patient and First-Degree Relatives Perceptions About Prediction and Prevention of Inflammatory Bowel Disease—A Multinational Survey. United European Gastroenterology Journal, 2025, 13, 1226-1238.	6.1	6
15	Identifying Potential Targets for the Interception of Inflammatory Bowel Disease: Toward Precision Prevention. Inflammatory Bowel Diseases, 2025, 31, S51-S60.	5.5	5
16	Metabolomics Reveal Distinct Molecular Pathways Associated With Future Risk of Crohn's Disease. Gut Microbes, 2025, 17, 2546998.	15.6	7
17	Intervention(s) in the Early-Life Period to Modulate Inflammatory Bowel Disease Risk: What Could Be the Impact?. Inflammatory Bowel Diseases, 2025, 31, S27-S40.	5.5	3
18	IBD Prediction Is Possible, but How Far Are We From Implementing It?. Inflammatory Bowel Diseases, 2025, 31, S41-S50.	5.5	3
