Virginia M Weis

List of Publications by Year in Descending Order

Source: https://exaly.com/author-pdf/3269948/virginia-m-weis-publications-by-year.pdf
Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

106 papers	5,492 citations	40 h-index	72 g-index
122 ext. papers	6,728 ext. citations	4.3 avg, IF	6.13 L-index

#	Paper	IF	Citations
106	Tentacle patterning during pedal lacerate development differs between symbiotic and aposymbiotic animals.. *PeerJ*, **2022**, 10, e12770	3.1	0
105	Symbiosis with Dinoflagellates Alters Cnidarian Cell-Cycle Gene Expression. *Cellular Microbiology*, **2022**, 2022, 1-20	3.9	0
104	The metabolic significance of symbiont community composition in the coral-algal symbiosis **2022**, 211-229		
103	The Molecular Language of the Cnidarian-Dinoflagellate Symbiosis. *Trends in Microbiology*, **2021**, 29, 320-333	12.4	20
102	Limitations of Using Cultured Algae to Study Cnidarian-Algal Symbioses and Suggestions for Future Studies. *Journal of Phycology*, **2021**, 57, 30-38	3	8
101	Increasing comparability among coral bleaching experiments. *Ecological Applications*, **2021**, 31, e02262	4.9	24
100	Sub-cellular imaging shows reduced photosynthetic carbon and increased nitrogen assimilation by the non-native endosymbiont Durusdinium trenchii in the model cnidarian Aiptasia. *Environmental Microbiology*, **2020**, 22, 3741-3753	5.2	6
99	N-Linked Surface Glycan Biosynthesis, Composition, Inhibition, and Function in Cnidarian-Dinoflagellate Symbiosis. *Microbial Ecology*, **2020**, 80, 223-236	4.4	5
98	Host and Symbiont Cell Cycle Coordination Is Mediated by Symbiotic State, Nutrition, and Partner Identity in a Model Cnidarian-Dinoflagellate Symbiosis. *MBio*, **2020**, 11,	7.8	12
97	The coral holobiont highlights the dependence of cnidarian animal hosts on their associated microbes **2020**, 91-118		7
96	Phylogenetic analysis of cell-cycle regulatory proteins within the Symbiodiniaceae. *Scientific Reports*, **2020**, 10, 20473	4.9	1
95	Metabolite pools of the reef building coral Montipora capitata are unaffected by Symbiodiniaceae community composition. *Coral Reefs*, **2020**, 39, 1727-1737	4.2	6
94	Proteomics quantifies protein expression changes in a model cnidarian colonised by a thermally tolerant but suboptimal symbiont. *ISME Journal*, **2019**, 13, 2334-2345	11.9	25
93	Cell Biology of Coral Symbiosis: Foundational Study Can Inform Solutions to the Coral Reef Crisis. *Integrative and Comparative Biology*, **2019**, 59, 845-855	2.8	32
92	Inter-partner specificity limits the acquisition of thermotolerant symbionts in a model cnidarian-dinoflagellate symbiosis. *ISME Journal*, **2019**, 13, 2489-2499	11.9	17
91	Ruth D. Gates (1962-2018). *Nature Ecology and Evolution*, **2019**, 3, 10-11	12.3	
90	Symbiont Identity Influences Patterns of Symbiosis Establishment, Host Growth, and Asexual Reproduction in a Model Cnidarian-Dinoflagellate Symbiosis. *Biological Bulletin*, **2018**, 234, 1-10	1.5	26

89	Subtle Differences in Symbiont Cell Surface Glycan Profiles Do Not Explain Species-Specific Colonization Rates in a Model Cnidarian-Algal Symbiosis. *Frontiers in Microbiology*, **2018**, 9, 842	5.7	24
88	Phylogenetic characterization of transporter proteins in the cnidarian-dinoflagellate symbiosis. *Molecular Phylogenetics and Evolution*, **2018**, 120, 307-320	4.1	18
87	Partner switching and metabolic flux in a model cnidarian-dinoflagellate symbiosis. *Proceedings of the Royal Society B: Biological Sciences*, **2018**, 285,	4.4	43
86	The sphingosine rheostat is involved in the cnidarian heat stress response but not necessarily in bleaching. *Journal of Experimental Biology*, **2017**, 220, 1709-1720	3	12
85	Thermal Shock Induces Host Proteostasis Disruption and Endoplasmic Reticulum Stress in the Model Symbiotic Cnidarian Aiptasia. *Journal of Proteome Research*, **2017**, 16, 2121-2134	5.6	40
84	Impacts of temperature and lunar day on gene expression profiles during a monthly reproductive cycle in the brooding coral Pocillopora damicornis. *Molecular Ecology*, **2017**, 26, 3913-3925	5.7	11
83	Linking Ecology and Epidemiology to Understand Predictors of Multi-Host Responses to an Emerging Pathogen, the Amphibian Chytrid Fungus. *PLoS ONE*, **2017**, 12, e0167882	3.7	33
82	Implication of the host TGF-β pathway in the onset of symbiosis between larvae of the coral Fungia scutaria and the dinoflagellate Symbiodinium sp. (clade C1f). *Coral Reefs*, **2017**, 36, 1263-1268	4.2	10
81	Transcription factor NF-κB is modulated by symbiotic status in a sea anemone model of cnidarian bleaching. *Scientific Reports*, **2017**, 7, 16025	4.9	31
80	Optimal nutrient exchange and immune responses operate in partner specificity in the cnidarian-dinoflagellate symbiosis. *Proceedings of the National Academy of Sciences of the United States of America*, **2017**, 114, 13194-13199	11.5	103
79	Sphingolipid Metabolism of a Sea Anemone Is Altered by the Presence of Dinoflagellate Symbionts. *Biological Bulletin*, **2017**, 233, 242-254	1.5	5
78	A diverse host thrombospondin-type-1 repeat protein repertoire promotes symbiont colonization during establishment of cnidarian-dinoflagellate symbiosis. *ELife*, **2017**, 6,	8.9	22
77	Menthol-induced bleaching rapidly and effectively provides experimental aposymbiotic sea anemones (Aiptasia sp.) for symbiosis investigations. *Journal of Experimental Biology*, **2016**, 219, 306-10	3	37
76	Comparative genomics explains the evolutionary success of reef-forming corals. *ELife*, **2016**, 5,	8.9	126
75	The scavenger receptor repertoire in six cnidarian species and its putative role in cnidarian-dinoflagellate symbiosis. *PeerJ*, **2016**, 4, e2692	3.1	25
74	The Role of Complement in Cnidarian-Dinoflagellate Symbiosis and Immune Challenge in the Sea Anemone Aiptasia pallida. *Frontiers in Microbiology*, **2016**, 7, 519	5.7	39
73	Symbiosis induces widespread changes in the proteome of the model cnidarian Aiptasia. *Cellular Microbiology*, **2016**, 18, 1009-23	3.9	62
72	Animal-Symbiodinium Symbioses: Foundations of Coral Reef Ecosystems. *Advances in Environmental Microbiology*, **2016**, 269-294	1.3	7

71	Effect of elevated temperature on fecundity and reproductive timing in the coral Acropora digitifera. *Zygote*, **2016**, 24, 511-6	1.6	30
70	The genome of Aiptasia, a sea anemone model for coral symbiosis. *Proceedings of the National Academy of Sciences of the United States of America*, **2015**, 112, 11893-8	11.5	244
69	De Novo Assembly and Characterization of Four Anthozoan (Phylum Cnidaria) Transcriptomes. *G3: Genes, Genomes, Genetics*, **2015**, 5, 2441-52	3.2	41
68	Elevated temperature alters the lunar timing of Planulation in the brooding coral Pocillopora damicornis. *PLoS ONE*, **2014**, 9, e107906	3.7	15
67	TIR-domain-containing protein repertoire of nine anthozoan species reveals coral-specific expansions and uncharacterized proteins. *Developmental and Comparative Immunology*, **2014**, 46, 480-8	3.2	44
66	EvoDevo meets ecology: the Ninth Okazaki Biology Conference on Marine Biology. *EvoDevo*, **2013**, 4, 18	3.2	
65	Stress and death of cnidarian host cells play a role in cnidarian bleaching. *Journal of Experimental Biology*, **2013**, 216, 2813-20	3	34
64	Identification of biomarkers indicative of barotrauma and recovery in black rockfish Sebastes melanops. *Journal of Fish Biology*, **2012**, 81, 181-96	1.9	4
63	Elevated temperature impairs onset of symbiosis and reduces survivorship in larvae of the Hawaiian coral, Fungia scutaria. *Marine Biology*, **2012**, 159, 633-642	2.5	33
62	Study of cnidarian-algal symbiosis in the "omics" age. *Biological Bulletin*, **2012**, 223, 44-65	1.5	64
61	Cell biology of cnidarian-dinoflagellate symbiosis. *Microbiology and Molecular Biology Reviews*, **2012** , 76, 229-61	13.2	496
60	Regulation of cnidarian-dinoflagellate mutualisms: Evidence that activation of a host TGF innate immune pathway promotes tolerance of the symbiont. *Developmental and Comparative Immunology* , **2012**, 38, 525-37	3.2	53
59	Diel rhythmicity of lipid-body formation in a coral-Symbiodinium endosymbiosis. *Coral Reefs*, **2012**, 31, 521-534	4.2	36
58	Biological bulletin virtual symposium: discoveries in animal symbiosis in the omics age. *Biological Bulletin*, **2012**, 223, 5-6	1.5	1
57	Role of the sphingosine rheostat in the regulation of cnidarian-dinoflagellate symbioses. *Biological Bulletin*, **2011**, 221, 261-9	1.5	27
56	The susceptibility and resilience of corals to thermal stress: adaptation, acclimatization or both?. *Molecular Ecology*, **2010**, 19, 1515-7	5.7	48
55	Coral larvae exhibit few measurable transcriptional changes during the onset of coral-dinoflagellate endosymbiosis. *Marine Genomics*, **2010**, 3, 107-16	1.9	37
54	Symbiosis research, technology, and education: Proceedings of the 6th International Symbiosis Society Congress held in Madison Wisconsin, USA, August 2009. *Symbiosis*, **2010**, 51, 1-12	3	1

53	FLOW-CYTOMETRIC CHARACTERIZATION OF THE CELL-SURFACE GLYCANS OF SYMBIOTIC DINOFLAGELLATES (SYMBIODINIUM SPP.)1. *Journal of Phycology*, **2010**, 46, 525-533	3	39
52	Apoptosis as a post-phagocytic winnowing mechanism in a coral-dinoflagellate mutualism. *Environmental Microbiology*, **2009**, 11, 268-76	5.2	79
51	The diversity of C-type lectins in the genome of a basal metazoan, Nematostella vectensis. *Developmental and Comparative Immunology*, **2009**, 33, 881-9	3.2	41
50	Generation and analysis of transcriptomic resources for a model system on the rise: the sea anemone Aiptasia pallida and its dinoflagellate endosymbiont. *BMC Genomics*, **2009**, 10, 258	4.5	113
49	Physiology. What determines coral health?. *Science*, **2009**, 324, 1153-5	33.3	57
48	Cell biology in model systems as the key to understanding corals. *Trends in Ecology and Evolution*, **2008**, 23, 369-76	10.9	216
47	Response of the symbiotic cnidarian Anthopleura elegantissima transcriptome to temperature and UV increase. *Comparative Biochemistry and Physiology Part D: Genomics and Proteomics*, **2008**, 3, 283-9	2	43
46	Analytical approach for selecting normalizing genes from a cDNA microarray platform to be used in q-RT-PCR assays: a cnidarian case study. *Journal of Proteomics*, **2008**, 70, 985-91		28
45	Cyclophilin and the regulation of symbiosis in Aiptasia pallida. *Biological Bulletin*, **2008**, 215, 63-72	1.5	10
44	Cellular mechanisms of Cnidarian bleaching: stress causes the collapse of symbiosis. *Journal of Experimental Biology*, **2008**, 211, 3059-66	3	544
43	First evidence of maternal transmission of algal endosymbionts at an oocyte stage in a triploblastic host, with observations on reproduction in Waminoa brickneri (Acoelomorpha). *Invertebrate Biology* , **2007**, 126, 113-119	1	25
42	Three party symbiosis: acoelomorph worms, corals and unicellular algal symbionts in Eilat (Red Sea). *Marine Biology*, **2007**, 151, 1215-1223	2.5	51
41	Len Muscatine (1932–2007) and his contributions to the understanding of algal-invertebrate endosymbiosis. *Coral Reefs*, **2007**, 26, 731-739	4.2	8
40	Apoptosis and autophagy as mechanisms of dinoflagellate symbiont release during cnidarian bleaching: every which way you lose. *Proceedings of the Royal Society B: Biological Sciences*, **2007**, 274, 3079-85	4.4	115
39	Knockdown of actin and caspase gene expression by RNA interference in the symbiotic anemone Aiptasia pallida. *Biological Bulletin*, **2007**, 212, 250-8	1.5	36
38	Uptake and partitioning of copper and cadmium in the coral Pocillopora damicornis. *Aquatic Toxicology*, **2007**, 85, 48-56	5.1	56
37	Proteomic and transcriptional analyses of coral larvae newly engaged in symbiosis with dinoflagellates. *Comparative Biochemistry and Physiology Part D: Genomics and Proteomics*, **2007**, 2, 63-73	2	24
36	Characterization of a novel EF-hand homologue, CnidEF, in the sea anemone Anthopleura elegantissima. *Comparative Biochemistry and Physiology - B Biochemistry and Molecular Biology*, **2007**, 146, 551-9	2.3	6

35	Temporal and spatial infection dynamics indicate recognition events in the early hours of a dinoflagellate/coral symbiosis. *Marine Biology*, **2006**, 149, 713-719	2.5	67
34	Highly conserved caspase and Bcl-2 homologues from the sea anemone Aiptasia pallida: lower metazoans as models for the study of apoptosis evolution. *Journal of Molecular Evolution*, **2006**, 63, 95-107	3.1	46
33	Transcriptome analysis of a cnidarian-dinoflagellate mutualism reveals complex modulation of host gene expression. *BMC Genomics*, **2006**, 7, 23	4.5	111
32	Nitric oxide and cnidarian bleaching: an eviction notice mediates breakdown of a symbiosis. *Journal of Experimental Biology*, **2006**, 209, 2804-10	3	130
31	Two atypical carbonic anhydrase homologs from the planula larva of the scleractinian coral Fungia scutaria. *Biological Bulletin*, **2006**, 211, 18-30	1.5	12
30	Lectin/glycan interactions play a role in recognition in a coral/dinoflagellate symbiosis. *Cellular Microbiology*, **2006**, 8, 1985-93	3.9	152
29	Comparative proteomics of symbiotic and aposymbiotic juvenile soft corals. *Marine Biotechnology*, **2006**, 8, 11-6	3.4	32
28	Aspects of the larval biology of the sea anemones Anthopleura elegantissima and A. artemisia. *Invertebrate Biology*, **2005**, 121, 190-201	1	12
27	Motility of zooxanthellae isolated from the Red Sea soft coral Heteroxenia fuscescens (Cnidaria). *Journal of Experimental Marine Biology and Ecology*, **2004**, 298, 35-48	2.1	39
26	Diversity of dinoflagellate symbionts in Red Sea soft corals: mode of symbiont acquisition matters. *Marine Ecology - Progress Series*, **2004**, 275, 89-95	2.6	40
25	Distinct ITS types of Symbiodinium in Clade C correlate with cnidarian/dinoflagellate specificity during onset of symbiosis. *Marine Ecology - Progress Series*, **2004**, 275, 97-102	2.6	71
24	Development and survivorship of zooxanthellate and azooxanthellate primary polyps of the soft coral Heteroxenia fuscescens: laboratory and field comparisons. *Marine Biology*, **2003**, 142, 1055-1063	2.5	15
23	Differential accumulation of cadmium and changes in glutathione levels as a function of symbiotic state in the sea anemone Anthopleura elegantissima. *Journal of Experimental Marine Biology and Ecology*, **2003**, 284, 71-85	2.1	31
22	Localization of a symbiosis-related protein, Sym32, in the Anthopleura elegantissima-Symbiodinium muscatinei Association. *Biological Bulletin*, **2003**, 205, 339-50	1.5	24
21	Differential accumulation of heavy metals in the sea anemone Anthopleura elegantissima as a function of symbiotic state. *Aquatic Toxicology*, **2003**, 64, 317-29	5.1	41
20	Feeding behavior and acquisition of zooxanthellae by planula larvae of the sea anemone Anthopleura elegantissima. *Marine Biology*, **2002**, 140, 471-478	2.5	52
19	CHARACTERIZATION OF A SHORT FORM PERIDININ-CHLOROPHYLL-PROTEIN (PCP) cDNA AND PROTEIN FROM THE SYMBIOTIC DINOFLAGELLATE SYMBIODINIUM MUSCATINEI (DINOPHYCEAE) FROM THE SEA ANEMONE ANTHOPLEURA ELEGANTISSIMA (CNIDARIA) 1. *Journal of Phycology*, **2002**, 38, 157-163	3	21
18	Development of symbiosis-specific genes as biomarkers for the early detection of cnidarian-algal symbiosis breakdown. *Marine Environmental Research*, **2002**, 54, 345-9	3.3	25

17	Host-symbiont specificity during onset of symbiosis between the dinoflagellates Symbiodinium spp. and planula larvae of the scleractinian coral Fungia scutaria. *Coral Reefs*, **2001**, 20, 301-308	4.2	125
16	Symbiosis-enhanced gene expression in cnidarian-algal associations: cloning and characterization of a cDNA, sym32, encoding a possible cell adhesion protein. *Comparative Biochemistry and Physiology Part A, Molecular & Integrative Physiology*, **2000**, 126, 33-44	2.6	49
15	Late Larval Development and Onset of Symbiosis in the Scleractinian Coral Fungia scutaria. *Biological Bulletin*, **1999**, 196, 70-9	1.5	113
14	Carbonic anhydrase expression and synthesis in the sea anemone Anthopleura elegantissima are enhanced by the presence of dinoflagellate symbionts. *Physiological and Biochemical Zoology*, **1999**, 72, 307-16	2	64
13	Techniques for Exploring Symbiosis-Specific Gene Expression in Cnidarian/Algal Associations **1998**, 435-448		2
12	A peroxidase related to the mammalian antimicrobial protein myeloperoxidase in the Euprymna-Vibrio mutualism. *Proceedings of the National Academy of Sciences of the United States of America*, **1996**, 93, 13683-8	11.5	69
11	Differential protein profiles reflect the different lifestyles of symbiotic and aposymbiotic Anthopleura elegantissima, a sea anemone from temperate waters. *Journal of Experimental Biology* , **1996**, 199, 883-892	3	50
10	Effects of morphology and water motion on carbon delivery and productivity in the reef coral, Pocillopora damicornis (Linnaeus): Diffusion barriers, inorganic carbon limitation, and biochemical plasticity. *Journal of Experimental Marine Biology and Ecology*, **1994**, 178, 153-179	2.1	195
9	Effect of dissolved inorganic carbon concentration on the photosynthesis of the symbiotic sea anemone Aiptasia pulchella Carlgren: Role of carbonic anhydrase. *Journal of Experimental Marine Biology and Ecology*, **1993**, 174, 209-225	2.1	62
8	Abundant mRNAs in the squid light organ encode proteins with a high similarity to mammalian peroxidases. *Gene*, **1993**, 132, 219-26	3.8	35
7	Enhanced Production of ALDH-Like Protein in the Bacterial Light Organ of the Sepiolid Squid Euprymna scolopes. *Biological Bulletin*, **1993**, 184, 309-321	1.5	33
6	Productivity of Zooxanthellae and Biogeochemical Cycles **1992**, 257-271		19
5	The Induction of Carbonic Anhydrase in the Symbiotic Sea Anemone Aiptasia pulchella. *Biological Bulletin*, **1991**, 180, 496-504	1.5	47
4	A CO2 supply mechanism in zooxanthellate cnidarians: role of carbonic anhydrase. *Marine Biology*, **1989**, 100, 195-202	2.5	120
3	BIOLOGY OF HYDRACTINIID HYDROIDS. 4. ULTRASTRUCTURE OF THE PLANULA OFHYDRACTINIA ECHINATA. *Biological Bulletin*, **1985**, 168, 403-418	1.5	43
2	Genetic variation in heat tolerance of the coral Platygyra daedalea offers the potential for adaptation to ocean warming		3
1	Six priorities to advance the science and practice of coral reef restoration worldwide. *Restoration Ecology*,e13498	3.1	5
