Victoria J Fraser

List of Publications by Citations

Source: https://exaly.com/author-pdf/598680/victoria-j-fraser-publications-by-citations.pdf
Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

303 papers	26,098 citations	81 h-index	155 g-index
313 ext. papers	29,025 ext. citations	4.2 avg, IF	6.59 L-index

#	Paper	IF	Citations
303	Inadequate antimicrobial treatment of infections: a risk factor for hospital mortality among critically ill patients. *Chest*, **1999**, 115, 462-74	5.3	1483
302	The influence of inadequate antimicrobial treatment of bloodstream infections on patient outcomes in the ICU setting. *Chest*, **2000**, 118, 146-55	5.3	1386
301	Delaying the empiric treatment of candida bloodstream infection until positive blood culture results are obtained: a potential risk factor for hospital mortality. *Antimicrobial Agents and Chemotherapy*, **2005**, 49, 3640-5	5.9	1001
300	Clinical importance of delays in the initiation of appropriate antibiotic treatment for ventilator-associated pneumonia. *Chest*, **2002**, 122, 262-8	5.3	762
299	A clone of methicillin-resistant Staphylococcus aureus among professional football players. *New England Journal of Medicine*, **2005**, 352, 468-75	59.2	626
298	PatientsPand physiciansPattitudes regarding the disclosure of medical errors. *JAMA - Journal of the American Medical Association*, **2003**, 289, 1001-7	27.4	597
297	Effectiveness of an educational program to reduce ventilator-associated pneumonia in a tertiary care center in Thailand: a 4-year study. *Clinical Infectious Diseases*, **2007**, 45, 704-11	11.6	571
296	Targeted versus universal decolonization to prevent ICU infection. *New England Journal of Medicine* , **2013**, 368, 2255-65	59.2	556
295	Risk factors for surgical site infection following orthopaedic spinal operations. *Journal of Bone and Joint Surgery - Series A*, **2008**, 90, 62-9	5.6	523
294	Experience with a clinical guideline for the treatment of ventilator-associated pneumonia. *Critical Care Medicine*, **2001**, 29, 1109-15	1.4	453
293	Outcome and attributable cost of ventilator-associated pneumonia among intensive care unit patients in a suburban medical center. *Critical Care Medicine*, **2003**, 31, 1312-7	1.4	440
292	Pseudomonas aeruginosa bloodstream infection: importance of appropriate initial antimicrobial treatment. *Antimicrobial Agents and Chemotherapy*, **2005**, 49, 1306-11	5.9	409
291	Strategies to prevent central line-associated bloodstream infections in acute care hospitals. *Infection Control and Hospital Epidemiology*, **2008**, 29 Suppl 1, S22-30	2	351
290	Characteristics and circumstances of falls in a hospital setting: a prospective analysis. *Journal of General Internal Medicine*, **2004**, 19, 732-9	4	337
289	Strategies to prevent surgical site infections in acute care hospitals. *Infection Control and Hospital Epidemiology*, **2008**, 29 Suppl 1, S51-61	2	323
288	A randomized controlled trial of an antibiotic discontinuation policy for clinically suspected ventilator-associated pneumonia. *Chest*, **2004**, 125, 1791-9	5.3	309
287	Antibiotic resistance in the intensive care unit. *Annals of Internal Medicine*, **2001**, 134, 298-314	8	288

286	Attributable cost of catheter-associated bloodstream infections among intensive care patients in a nonteaching hospital. *Critical Care Medicine*, **2006**, 34, 2084-9	1.4	269
285	Scheduled change of antibiotic classes: a strategy to decrease the incidence of ventilator-associated pneumonia. *American Journal of Respiratory and Critical Care Medicine*, **1997**, 156, 1040-8	10.2	259
284	The occurrence of ventilator-associated pneumonia in a community hospital: risk factors and clinical outcomes. *Chest*, **2001**, 120, 555-61	5.3	257
283	The emotional impact of medical errors on practicing physicians in the United States and Canada. *Joint Commission Journal on Quality and Patient Safety*, **2007**, 33, 467-76	1.4	249
282	The effect of daily bathing with chlorhexidine on the acquisition of methicillin-resistant Staphylococcus aureus, vancomycin-resistant Enterococcus, and healthcare-associated bloodstream infections: results of a quasi-experimental multicenter trial. *Critical Care Medicine*, **2009**, 37, 1858-65	1.4	247
281	Strategies to prevent catheter-associated urinary tract infections in acute care hospitals. *Infection Control and Hospital Epidemiology*, **2008**, 29 Suppl 1, S41-50	2	244
280	Effect of an education program on decreasing catheter-related bloodstream infections in the surgical intensive care unit. *Critical Care Medicine*, **2002**, 30, 59-64	1.4	243
279	Effect of an education program aimed at reducing the occurrence of ventilator-associated pneumonia. *Critical Care Medicine*, **2002**, 30, 2407-12	1.4	237
278	Risk factors for surgical site infection in spinal surgery. *Journal of Neurosurgery*, **2003**, 98, 149-55	3.2	237
277	Strategies to prevent ventilator-associated pneumonia in acute care hospitals. *Infection Control and Hospital Epidemiology*, **2008**, 29 Suppl 1, S31-40	2	229
276	The impact of nosocomial infections on patient outcomes following cardiac surgery. *Chest*, **1997**, 112, 666-75	5.3	227
275	Early versus late enteral feeding of mechanically ventilated patients: results of a clinical trial. *Journal of Parenteral and Enteral Nutrition*, **2002**, 26, 174-81	4.2	224
274	Clostridium difficile--associated disease in a setting of endemicity: identification of novel risk factors. *Clinical Infectious Diseases*, **2007**, 45, 1543-9	11.6	214
273	The clinical and economic impact of deep chest surgical site infections following coronary artery bypass graft surgery. *Chest*, **2000**, 118, 397-402	5.3	206
272	Ventilator-associated pneumonia in pediatric intensive care unit patients: risk factors and outcomes. *Pediatrics*, **2002**, 109, 758-64	7.4	204
271	A compendium of strategies to prevent healthcare-associated infections in acute care hospitals. *Infection Control and Hospital Epidemiology*, **2008**, 29 Suppl 1, S12-21	2	197
270	The effect of an education program on the incidence of central venous catheter-associated bloodstream infection in a medical ICU. *Chest*, **2004**, 126, 1612-8	5.3	196
269	Risk factors for surgical site infection after low transverse cesarean section. *Infection Control and Hospital Epidemiology*, **2008**, 29, 477-84; discussion 485-6	2	189

268	An educational intervention to reduce ventilator-associated pneumonia in an integrated health system: a comparison of effects. *Chest*, **2004**, 125, 2224-31	5.3	177
267	Herpes zoster risk factors in a national cohort of veterans with rheumatoid arthritis. *Clinical Infectious Diseases*, **2009**, 48, 1364-71	11.6	171
266	Choosing your words carefully: how physicians would disclose harmful medical errors to patients. *Archives of Internal Medicine*, **2006**, 166, 1585-93		165
265	A case-control study of patient, medication, and care-related risk factors for inpatient falls. *Journal of General Internal Medicine*, **2005**, 20, 116-22	4	164
264	The risk factors for deep and superficial chest surgical-site infections after coronary artery bypass graft surgery are different. *Journal of Thoracic and Cardiovascular Surgery*, **2002**, 124, 136-45	1.5	163
263	Risk factors for surgical site infection after major breast operation. *Journal of the American College of Surgeons*, **2008**, 207, 326-35	4.4	162
262	US and Canadian physiciansPattitudes and experiences regarding disclosing errors to patients. *Archives of Internal Medicine*, **2006**, 166, 1605-11		158
261	Hospital-associated costs due to surgical site infection after breast surgery. *Archives of Surgery (Chicago, Ill: 1920)*, **2008**, 143, 53-60; discussion 61		155
260	Short- and long-term attributable costs of Clostridium difficile-associated disease in nonsurgical inpatients. *Clinical Infectious Diseases*, **2008**, 46, 497-504	11.6	154
259	ICD-9 codes and surveillance for Clostridium difficile-associated disease. *Emerging Infectious Diseases*, **2006**, 12, 1576-9	10.2	154
258	Strategies to prevent transmission of methicillin-resistant Staphylococcus aureus in acute care hospitals. *Infection Control and Hospital Epidemiology*, **2008**, 29 Suppl 1, S62-80	2	153
257	Strategies to prevent clostridium difficile infections in acute care hospitals. *Infection Control and Hospital Epidemiology*, **2008**, 29 Suppl 1, S81-92	2	153
256	Attributable cost of nosocomial primary bloodstream infection in pediatric intensive care unit patients. *Pediatrics*, **2005**, 115, 868-72	7.4	147
255	Reporting of medical errors: an intensive care unit experience. *Critical Care Medicine*, **2004**, 32, 727-33	1.4	143
254	Ventilator-associated pneumonia in extremely preterm neonates in a neonatal intensive care unit: characteristics, risk factors, and outcomes. *Pediatrics*, **2003**, 112, 1283-9	7.4	135
253	Attributable outcomes of endemic Clostridium difficile-associated disease in nonsurgical patients. *Emerging Infectious Diseases*, **2008**, 14, 1031-8	10.2	132
252	Rate, risk factors, and outcomes of nosocomial primary bloodstream infection in pediatric intensive care unit patients. *Pediatrics*, **2002**, 110, 481-5	7.4	132
251	Inadequate treatment of nosocomial infections is associated with certain empiric antibiotic choices. *Critical Care Medicine*, **2000**, 28, 3456-64	1.4	131

250	Prevalence of Clostridium difficile environmental contamination and strain variability in multiple health care facilities. *American Journal of Infection Control*, **2007**, 35, 315-8	3.8	121
249	Mupirocin resistance in patients colonized with methicillin-resistant Staphylococcus aureus in a surgical intensive care unit. *Clinical Infectious Diseases*, **2007**, 45, 541-7	11.6	121
248	Patterns and predictors of inpatient falls and fall-related injuries in a large academic hospital. *Infection Control and Hospital Epidemiology*, **2005**, 26, 822-7	2	121
247	The preventability of ventilator-associated events. The CDC Prevention Epicenters Wake Up and Breathe Collaborative. *American Journal of Respiratory and Critical Care Medicine*, **2015**, 191, 292-301	10.2	117
246	Hospital mortality for patients with bacteremia due to Staphylococcus aureus or Pseudomonas aeruginosa. *Chest*, **2004**, 125, 607-16	5.3	115
245	The attitudes and experiences of trainees regarding disclosing medical errors to patients. *Academic Medicine*, **2008**, 83, 250-6	3.9	114
244	Reporting and disclosing medical errors: pediatriciansPattitudes and behaviors. *JAMA Pediatrics*, **2007**, 161, 179-85		112
243	Household versus individual approaches to eradication of community-associated Staphylococcus aureus in children: a randomized trial. *Clinical Infectious Diseases*, **2012**, 54, 743-51	11.6	110
242	Prevalence of the use of central venous access devices within and outside of the intensive care unit: results of a survey among hospitals in the prevention epicenter program of the Centers for Disease Control and Prevention. *Infection Control and Hospital Epidemiology*, **2003**, 24, 942-5	2	108
241	A multicenter intervention to prevent catheter-associated bloodstream infections. *Infection Control and Hospital Epidemiology*, **2006**, 27, 662-9	2	106
240	An educational intervention to prevent catheter-associated bloodstream infections in a nonteaching, community medical center. *Critical Care Medicine*, **2003**, 31, 1959-63	1.4	106
239	Multivariate analysis of risk factors for deep and superficial sternal infection after coronary artery bypass grafting at a tertiary care medical center. *Seminars in Thoracic and Cardiovascular Surgery*, **2004**, 16, 53-61	1.7	106
238	Circumstances of patient falls and injuries in 9 hospitals in a midwestern healthcare system. *Infection Control and Hospital Epidemiology*, **2007**, 28, 544-50	2	104
237	The impact of comorbidity on mortality following in-hospital diagnosis of tuberculosis. *Chest*, **1998**, 114, 1244-52	5.3	103
236	Evaluation of Clostridium difficile-associated disease pressure as a risk factor for C difficile-associated disease. *Archives of Internal Medicine*, **2007**, 167, 1092-7		102
235	Is influenza an influenza-like illness? Clinical presentation of influenza in hospitalized patients. *Infection Control and Hospital Epidemiology*, **2006**, 27, 266-70	2	102
234	Enhanced identification of postoperative infections among inpatients. *Emerging Infectious Diseases*, **2004**, 10, 1924-30	10.2	100
233	The impact of prebiopsy antibiotics on pathogen recovery in hematogenous vertebral osteomyelitis. *Clinical Infectious Diseases*, **2011**, 52, 867-72	11.6	96

232	Do clinical features allow for accurate prediction of fungal pathogenesis in bloodstream infections? Potential implications of the increasing prevalence of non-albicans candidemia. *Critical Care Medicine*, **2007**, 35, 1077-83	1.4	96
231	Rapid development of resistance to clarithromycin following monotherapy for disseminated Mycobacterium chelonae infection in a heart transplant patient. *Clinical Infectious Diseases*, **1995**, 20, 443-4	11.6	96
230	Brief report: Hospitalized patientsPattitudes about and participation in error prevention. *Journal of General Internal Medicine*, **2006**, 21, 367-70	4	94
229	Cycling empirical antimicrobial agents to prevent emergence of antimicrobial-resistant Gram-negative bacteria among intensive care unit patients. *Critical Care Medicine*, **2004**, 32, 2450-6	1.4	94
228	Improving methicillin-resistant Staphylococcus aureus surveillance and reporting in intensive care units. *Journal of Infectious Diseases*, **2007**, 195, 330-8	7	93
227	Effectiveness of education and an antibiotic-control program in a tertiary care hospital in Thailand. *Clinical Infectious Diseases*, **2006**, 42, 768-75	11.6	91
226	Risk factors for surgical site infection in spinal surgery. *Journal of Neurosurgery: Spine*, **2003**, 98, 149-155	2.8	87
225	Assessment of Healthcare Worker Protocol Deviations and Self-Contamination During Personal Protective Equipment Donning and Doffing. *Infection Control and Hospital Epidemiology*, **2017**, 38, 1077-1083	2	86
224	A multifaceted intervention to reduce pandrug-resistant Acinetobacter baumannii colonization and infection in 3 intensive care units in a Thai tertiary care center: a 3-year study. *Clinical Infectious Diseases*, **2008**, 47, 760-7	11.6	85
223	Staphylococcus aureus nasal colonization and subsequent infection in intensive care unit patients: does methicillin resistance matter?. *Infection Control and Hospital Epidemiology*, **2010**, 31, 584-91	2	83
222	Effectiveness of multifaceted hospitalwide quality improvement programs featuring an intervention to remove unnecessary urinary catheters at a tertiary care center in Thailand. *Infection Control and Hospital Epidemiology*, **2007**, 28, 791-8	2	81
221	Multicenter study of Clostridium difficile infection rates from 2000 to 2006. *Infection Control and Hospital Epidemiology*, **2010**, 31, 1030-7	2	79
220	1236The Preventability of Ventilator-Associated Events: The CDC Prevention EpicentersPWake Up and Breathe Collaborative. *Open Forum Infectious Diseases*, **2014**, 1, S46-S46	1	78
219	133Compliance with follow-up cultures in Staphylococcus aureus bacteremia: Opportunity for quality improvement. *Open Forum Infectious Diseases*, **2014**, 1, S15-S15	1	78
218	2123. High Utilization of Post-Discharge Antibiotics After Mastectomy in a Nationwide Cohort of Commercially Insured Women. *Open Forum Infectious Diseases*, **2018**, 5, S624-S624	1	78
217	2128. Predictors of Post-Discharge Prophylactic Antibiotics Following Spinal Fusion. *Open Forum Infectious Diseases*, **2018**, 5, S626-S626	1	78
216	2129. Utilization of Post-Discharge Antibiotics in Spinal Fusion in a Nationwide Cohort of Commercially Insured Individuals. *Open Forum Infectious Diseases*, **2018**, 5, S626-S627	1	78
215	Nonrandom selection and the attributable cost of surgical-site infections. *Infection Control and Hospital Epidemiology*, **2002**, 23, 177-82	2	75

214	Atypical avian influenza (H5N1). *Emerging Infectious Diseases*, **2004**, 10, 1321-4	10.2	74
213	Influenza vaccination among healthcare workers: ten-year experience of a large healthcare organization. *Infection Control and Hospital Epidemiology*, **2010**, 31, 233-40	2	73
212	Improved surveillance for surgical site infections after orthopedic implantation procedures: extending applications for automated data. *Clinical Infectious Diseases*, **2009**, 48, 1223-9	11.6	73
211	The epidemiology of hematogenous vertebral osteomyelitis: a cohort study in a tertiary care hospital. *BMC Infectious Diseases*, **2010**, 10, 158	4	73
210	Development and validation of a Clostridium difficile infection risk prediction model. *Infection Control and Hospital Epidemiology*, **2011**, 32, 360-6	2	72
209	The impact of bedside behavior on catheter-related bacteremia in the intensive care unit. *Archives of Surgery*, **2004**, 139, 131-6		71
208	Risk factors for spinal surgical-site infections in a community hospital: a case-control study. *Infection Control and Hospital Epidemiology*, **2003**, 24, 31-6	2	69
207	Risk factors for nosocomial primary bloodstream infection in pediatric intensive care unit patients: a 2-year prospective cohort study. *Infection Control and Hospital Epidemiology*, **2006**, 27, 553-60	2	68
206	Using focus groups to understand physiciansPand nursesPperspectives on error reporting in hospitals. *Joint Commission Journal on Quality and Safety*, **2004**, 30, 471-9		68
205	Attributable costs of surgical site infection and endometritis after low transverse cesarean delivery. *Infection Control and Hospital Epidemiology*, **2010**, 31, 276-82	2	67
204	Epidemiology of methicillin-resistant Staphylococcus aureus colonization in a surgical intensive care unit. *Infection Control and Hospital Epidemiology*, **2006**, 27, 1032-40	2	67
203	Outpatient Antibiotic Prescription Trends in the United States: A National Cohort Study. *Infection Control and Hospital Epidemiology*, **2018**, 39, 584-589	2	66
202	Clostridium difficile-associated disease in allogeneic hematopoietic stem-cell transplant recipients: risk associations, protective associations, and outcomes. *Clinical Transplantation*, **2010**, 24, 192-8	3.8	66
201	Catheter-associated bloodstream infections in general medical patients outside the intensive care unit: a surveillance study. *Infection Control and Hospital Epidemiology*, **2007**, 28, 905-9	2	64
200	Patient safety event reporting in critical care: a study of three intensive care units. *Critical Care Medicine*, **2007**, 35, 1068-76	1.4	60
199	Occurrence of co-colonization or co-infection with vancomycin-resistant enterococci and methicillin-resistant Staphylococcus aureus in a medical intensive care unit. *Infection Control and Hospital Epidemiology*, **2004**, 25, 99-104	2	60
198	Developing a risk stratification model for surgical site infection after abdominal hysterectomy. *Infection Control and Hospital Epidemiology*, **2009**, 30, 1077-83	2	59
197	Case-control study of clinical features of influenza in hospitalized patients. *Infection Control and Hospital Epidemiology*, **2008**, 29, 921-6	2	59

196	Intermittent episodes of detectable HIV viremia in patients receiving nonnucleoside reverse-transcriptase inhibitor-based or protease inhibitor-based highly active antiretroviral therapy regimens are equivalent in incidence and prognosis. *Clinical Infectious Diseases*, **2005**, 41, 1326-32	11.6	59
195	Multicenter study of surveillance for hospital-onset Clostridium difficile infection by the use of ICD-9-CM diagnosis codes. *Infection Control and Hospital Epidemiology*, **2010**, 31, 262-8	2	58
194	Initial inappropriate urinary catheters use in a tertiary-care center: incidence, risk factors, and outcomes. *American Journal of Infection Control*, **2007**, 35, 594-9	3.8	57
193	Medical error disclosure among pediatricians: choosing carefully what we might say to parents. *JAMA Pediatrics*, **2008**, 162, 922-7		55
192	Use of Medicare diagnosis and procedure codes to improve detection of surgical site infections following hip arthroplasty, knee arthroplasty, and vascular surgery. *Infection Control and Hospital Epidemiology*, **2012**, 33, 40-9	2	54
191	Lost opportunities: how physicians communicate about medical errors. *Health Affairs*, **2008**, 27, 246-55	7	54
190	Staphylococcus aureus colonization in children with community-associated Staphylococcus aureus skin infections and their household contacts. *JAMA Pediatrics*, **2012**, 166, 551-7		53
189	Risk factors for Stenotrophomonas maltophilia bacteremia in oncology patients: a case-control study. *Infection Control and Hospital Epidemiology*, **2003**, 24, 269-74	2	53
188	Compliance with universal precautions among emergency department personnel caring for trauma patients. *Annals of Emergency Medicine*, **1999**, 33, 160-5	2.1	53
187	Use of personal protective equipment and operating room behaviors in four surgical subspecialties: personal protective equipment and behaviors in surgery. *Infection Control and Hospital Epidemiology*, **1999**, 20, 110-4	2	52
186	Herpes simplex virus from respiratory tract secretions: epidemiology, clinical characteristics, and outcome in immunocompromised and nonimmunocompromised hosts. *American Journal of Medicine*, **1993**, 94, 29-33	2.4	52
185	Potentially pathogenic bacteria in shower water and air of a stem cell transplant unit. *Applied and Environmental Microbiology*, **2009**, 75, 5363-72	4.8	50
184	Seroprevalence of anti-H5 antibody among Thai health care workers after exposure to avian influenza (H5N1) in a tertiary care center. *Clinical Infectious Diseases*, **2005**, 40, e16-8	11.6	50
183	Postarthroscopy surgical site infections: review of the literature. *Clinical Infectious Diseases*, **2002**, 34, 65-71	11.6	49
182	Gram-negative bacteraemia in non-ICU patients: factors associated with inadequate antibiotic therapy and impact on outcomes. *Journal of Antimicrobial Chemotherapy*, **2008**, 61, 1376-83	5.1	48
181	Attributable costs of enterococcal bloodstream infections in a nonsurgical hospital cohort. *Infection Control and Hospital Epidemiology*, **2010**, 31, 28-35	2	47
180	Preventing catheter-associated bloodstream infections: a survey of policies for insertion and care of central venous catheters from hospitals in the prevention epicenter program. *Infection Control and Hospital Epidemiology*, **2006**, 27, 8-13	2	47
179	Ventilator-associated pneumonia in a multi-hospital system: differences in microbiology by location. *Infection Control and Hospital Epidemiology*, **2003**, 24, 853-8	2	47

178	Surgical site infections after arthroscopy: Outbreak investigation and case control study. *Arthroscopy - Journal of Arthroscopic and Related Surgery*, **2003**, 19, 172-81	5.4	47
177	Evaluation of Rooms with Negative Pressure Ventilation Used for Respiratory Isolation in Seven Midwestern Hospitals. *Infection Control and Hospital Epidemiology*, **1993**, 14, 623-628	2	47
176	The impact of ICD-9-CM code rank order on the estimated prevalence of Clostridium difficile infections. *Clinical Infectious Diseases*, **2011**, 53, 20-5	11.6	45
175	Effect of nosocomial infections due to antibiotic-resistant organisms on length of stay and mortality in the pediatric intensive care unit. *Infection Control and Hospital Epidemiology*, **2007**, 28, 299-306	2	44
174	Clinical utility of blood cultures drawn from central vein catheters and peripheral venipuncture in critically ill medical patients. *Chest*, **2003**, 123, 854-61	5.3	44
173	Safe medication prescribing: training and experience of medical students and housestaff at a large teaching hospital. *Academic Medicine*, **2005**, 80, 594-9	3.9	44
172	An evaluation of dental antibiotic prescribing practices in the United States. *Journal of the American Dental Association*, **2017**, 148, 878-886.e1	1.9	43
171	How trainees would disclose medical errors: educational implications for training programmes. *Medical Education*, **2011**, 45, 372-80	3.7	43
170	PatientsPconcerns about medical errors during hospitalization. *Joint Commission Journal on Quality and Patient Safety*, **2007**, 33, 5-14	1.4	43
169	Intervention to prevent falls on the medical service in a teaching hospital. *Infection Control and Hospital Epidemiology*, **2008**, 29, 539-45	2	42
168	Effectiveness of environmental and infection control programs to reduce transmission of Clostridium difficile. *Clinical Infectious Diseases*, **2004**, 39, 601-2	11.6	42
167	Varying rates of Clostridium difficile-associated diarrhea at prevention epicenter hospitals. *Infection Control and Hospital Epidemiology*, **2005**, 26, 676-9	2	41
166	The epidemiology of vancomycin-resistant Enterococcus colonization in a medical intensive care unit. *Infection Control and Hospital Epidemiology*, **2003**, 24, 257-63	2	41
165	Results of a comprehensive infection control program for reducing surgical-site infections in coronary artery bypass surgery. *Infection Control and Hospital Epidemiology*, **1999**, 20, 533-8	2	41
164	Contamination of environmental surfaces with Staphylococcus aureus in households with children infected with methicillin-resistant S aureus. *JAMA Pediatrics*, **2014**, 168, 1030-8	8.3	38
163	Effectiveness of a catheter-associated bloodstream infection bundle in a Thai tertiary care center: a 3-year study. *American Journal of Infection Control*, **2010**, 38, 449-55	3.8	38
162	Severity of Clostridium difficile-associated disease (CDAD) in allogeneic stem cell transplant recipients: evaluation of a CDAD severity grading system. *Infection Control and Hospital Epidemiology*, **2007**, 28, 208-11	2	38
161	Patient Concerns about Medical Errors in Emergency Departments. *Academic Emergency Medicine*, **2005**, 12, 57-64	3.4	38
