Version: 2024-02-01

227 papers	11,824 citations	30047 54 h-index	30058 103 g-index
230 all docs	230 docs citations	230 times ranked	7325 citing authors

#	Article	IF	Citations
1	Predicting Survival in Repaired Tetralogy of Fallot. JACC: Cardiovascular Imaging, 2022, 15, 257-268.	2.3	37
2	Use of Pulmonary Arterial Hypertension Therapies in Patients with a Fontan Circulation: Current Practice Across the United Kingdom. Journal of the American Heart Association, 2022, 11, e023035.	1.6	8
3	Exercise ventilatory reserve predicts survival in adult congenital heart disease associated pulmonary arterial hypertension with Eisenmenger physiology. International Journal of Cardiology Congenital Heart Disease, 2022, 7, 100331.	0.2	1
4	Eisenmenger Syndrome. Journal of the American College of Cardiology, 2022, 79, 1183-1198.	1.2	19
5	Pulmonary artery denervation for pulmonary arterial hypertension. Trends in Cardiovascular Medicine, 2021, 31, 252-260.	2.3	15
6	EmPHasis-10 health-related quality of life score predicts outcomes in patients with idiopathic and connective tissue disease-associated pulmonary arterial hypertension: results from a UK multicentre study. European Respiratory Journal, 2021, 57, 2000124.	3.1	29
7	Systolic dysfunction of the subpulmonary left ventricle is associated with the severity of heart failure in patients with a systemic right ventricle. International Journal of Cardiology, 2021, 324, 66-71.	0.8	18
8	Safety and efficacy of non-vitamin K antagonist oral anticoagulants for prevention of thromboembolism in adults with systemic right ventricle: Results from the NOTE international registry. International Journal of Cardiology, 2021, 322, 129-134.	0.8	1
9	Hospitalizations in adult patients with congenital heart disease: an emerging challenge. Heart Failure Reviews, 2021, 26, 347-353.	1.7	5
10	Something has got to give: funding innovation in an era of rigid budgeting, and why physicians should care. European Journal of Preventive Cardiology, 2021, 28, 44-46.	0.8	1
11	Palliative care in pulmonary hypertension associated with congenital heart disease: systematic review and expert opinion. ESC Heart Failure, 2021, 8, 1901-1914.	1.4	9
12	Prediction Models and Scores in Adult Congenital Heart Disease. Current Pharmaceutical Design, 2021, 27, 1232-1244.	0.9	11
13	Integrating patient-reported outcome measures in congenital heart disease care. European Heart Journal Quality of Care & Clinical Outcomes, 2021, 7, 325-326.	1.8	0
14	Perioperative management of patients with pulmonary hypertension undergoing non-cardiothoracic, non-obstetric surgery: a systematic review and expert consensus statement. British Journal of Anaesthesia, 2021, 126, 774-790.	1.5	45
15	A case series on the use of steroids and mycophenolate mofetil in idiopathic and heritable pulmonary veno-occlusive disease: is there a role for immunosuppression?. European Respiratory Journal, 2021, 57, 2004354.	3.1	9
16	Gender, an additional cardiovascular risk factor?. International Journal of Cardiology, 2021, 331, 270-272.	0.8	1
17	Emergency department management of patients with adult congenital heart disease: a consensus paper from the ESC Working Group on Adult Congenital Heart Disease, the European Society for Emergency Medicine (EUSEM), the European Association for Cardio-Thoracic Surgery (EACTS), and the Association for Acute Cardiovascular Care (ACVC). European Heart Journal, 2021, 42, 2527-2535.	1.0	10
18	Preventing disease progression in Eisenmenger syndrome. Expert Review of Cardiovascular Therapy, 2021, 19, 501-518.	0.6	0

#	Article	IF	Citations
19	Effect of medical treatment on heart failure incidence in patients with a systemic right ventricle. Heart, 2021, 107, 1384-1389.	1.2	11
20	Ultraâ€Fastâ€Track Extubation in Adult Congenital Heart Surgery. Journal of the American Heart Association, 2021, 10, e020201.	1.6	8
21	Reply to: â€œSystolic dysfunction of the subpulmonary left ventricle in the systemic right ventricle: late manifestation or subclinical predictor of heart failure?â€. International Journal of Cardiology, 2021, 332, 69.	0.8	1
22	Better Outcomes in Pulmonary Arterial Hypertension After Repair of Congenital Heart Disease, Compared With Idiopathic Pulmonary Arterial Hypertension. CJC Open, 2021, 3, 872-879.	0.7	4
23	Enhanced Assessment of Perioperative Mortality Risk in Adults With Congenital Heart Disease. Journal of the American College of Cardiology, 2021, 78, 234-242.	1.2	20
24	Systemic microangiopathy in Eisenmenger syndrome â€“ The missing link?. International Journal of Cardiology, 2021, 337, 62-63.	0.8	2
25	Safety of physical sports and exercise in ACHD. International Journal of Cardiology Congenital Heart Disease, 2021, 4, 100151.	0.2	1
26	Fluid challenge and balloon occlusion testing in patients with atrial septal defects. Heart, 2021, , heartjnl-2021-319676.	1.2	2
27	Management of acute cardiovascular complications in pregnancy. European Heart Journal, 2021, 42, 4224-4240.	1.0	12
28	The clinical presentation and outcome of aortic coarctation associated with left ventricular inflow and outflow tract lesion in adult patients: Shone syndrome and beyond. International Journal of Cardiology, 2021, 343, 45-49.	0.8	0
29	Cardiopulmonary exercise testing in congenital heart disease: towards serial testing as part of long-term follow-up. European Journal of Preventive Cardiology, 2021, , .	0.8	0
30	Pulmonary arterial hypertension in adults with congenital heart disease: markers of disease severity, management of advanced heart failure and transplantation. Expert Review of Cardiovascular Therapy, 2021, 19, 837-855.	0.6	2
31	Early switch to oral anticoagulation in patients with acute intermediate-risk pulmonary embolism (PEITHO-2): a multinational, multicentre, single-arm, phase 4 trial. Lancet Haematology,the, 2021, 8, e627-e636.	2.2	11
32	Impact of cyanosis on ventilatory responses during stair climb exercise in Eisenmenger syndrome and idiopathic pulmonary arterial hypertension. International Journal of Cardiology, 2021, 341, 84-87.	0.8	1
33	AHA/ACC vs ESC Guidelines forÂManagement of Adults WithÂCongenital Heart Disease. Journal of the American College of Cardiology, 2021, 78, 1904-1918.	1.2	21
34	Abstract 13261: Utility of a Novel Ensemble Based Deep Learning Network for the Automatic Detection of Pulmonary Hypertension and Right Ventricular Dilatation: A Study Based on Data From 783 Individuals From Two Tertiary Centres. Circulation, 2021, 144, .	1.6	0
35	Abstract 13277: Deep Learning Networks Trained on Routine Echocardiography Images Provide Expert Level Prognostication in Patients With Pulmonary Hypertension: A Study on 408 Patients From an Expert Centre. Circulation, 2021, 144, .	1.6	0
36	Catheter ablation for patients with end-stage complex congenital heart disease or cardiomyopathy considered for transplantation: Trials and tribulations. International Journal of Cardiology, 2020, 301, 127-134.	0.8	6

#	Article	IF	Citations
37	Tricuspid regurgitation severity after atrial septal defect closure or pulmonic valve replacement. Heart, 2020, 106, 455-461.	1.2	11
38	A single-centre, placebo-controlled, double-blind randomised cross-over study of nebulised iloprost in patients with Eisenmenger syndrome: A pilot study. International Journal of Cardiology, 2020, 299, 131-135.	0.8	12
39	Modifiable risk factors in congenital heart disease: Education, transition, digital health and choice architecture. European Journal of Preventive Cardiology, 2020, 27, 1074-1076.	0.8	3
40	Sex differences in hypertrophic cardiomyopathy: Time to tailor risk stratification and therapy?. European Journal of Preventive Cardiology, 2020, 27, 1816-1818.	0.8	1
41	Three-Dimensional Late Gadolinium Enhancement Cardiovascular Magnetic Resonance Predicts Inducibility of Ventricular Tachycardia in Adults With Repaired Tetralogy of Fallot. Circulation: Arrhythmia and Electrophysiology, 2020, 13, e008321.	2.1	25
42	Implications of Elevated PulmonaryÂArtery Pressure for Transcatheter MitralÂRepair. Journal of the American College of Cardiology, 2020, 76, 2607-2610.	1.2	5
43	Non-Vitamin K Oral Anticoagulants in Adults with Congenital Heart Disease: A Systematic Review. Journal of Clinical Medicine, 2020, 9, 1794.	1.0	19
44	Congenital Heart Disease and Pulmonary Hypertension. Cardiology Clinics, 2020, 38, 445-456.	0.9	11
45	Chronic thromboembolic disease following pulmonary embolism: time for a fresh look at old clot. European Respiratory Journal, 2020, 55, 1901934.	3.1	11
46	Severe Left Ventricular Outflow Tract Obstruction Immediately After Surgical Repair of Ebsteinâ€™s Anomaly. JACC: Case Reports, 2020, 2, 725-731.	0.3	1
47	Autopsy in adults with congenital heart disease (ACHD). Virchows Archiv Fur Pathologische Anatomie Und Physiologie Und Fur Klinische Medizin, 2020, 476, 797-820.	1.4	10
48	Heart and lung transplantation in pulmonary arterial hypertension related to congenital heart disease: an unusual indication. Journal of Congenital Cardiology, 2020, 4, .	0.5	1
49	Advanced therapies in Eisenmenger syndrome. Journal of Congenital Cardiology, 2020, 4, .	0.5	0
50	Pulmonary arterial hypertension associated with congenital heart disease after defect repair: the effect of pregnancy. Journal of Congenital Cardiology, 2020, 4, .	0.5	0
51	PAH-CHD: transition to adulthood. Journal of Congenital Cardiology, 2020, 4, .	0.5	1
52	The investigation and diagnosis of pulmonary hypertension in adults with congenital heart disease. Journal of Congenital Cardiology, 2020, 4, .	0.5	1
53	The effects of parenteral prostacyclin therapy as add-on treatment to oral compounds in Eisenmenger syndrome. European Respiratory Journal, 2019, 54, 1901401.	3.1	18
54	Chronic thromboembolic pulmonary hypertension following longâ€term peripherally inserted central venous catheter use. Pulmonary Circulation, 2019, 9, 1-3.	0.8	3

#	Article	IF	Citations
55	Early and Late Effects of Cardiac Resynchronization Therapy in Adult Congenital Heart Disease. Journal of the American Heart Association, 2019, 8, e012744.	1.6	17
56	Utility of machine learning algorithms in assessing patients with a systemic right ventricle. European Heart Journal Cardiovascular Imaging, 2019, 20, 925-931.	0.5	56
57	Surgical and percutaneous pulmonary valve replacement in England over the past two decades. Heart, 2019, 105, heartjnl-2018-314102.	1.2	6
58	Machine learning algorithms estimating prognosis and guiding therapy in adult congenital heart disease: data from a single tertiary centre including 10â€‰019 patients. European Heart Journal, 2019, 40, 1069-1077.	1.0	142
59	Pulmonary Artery Denervation. JACC: Cardiovascular Interventions, 2019, 12, 285-288.	1.1	6
60	Eisenmenger syndrome and other types of pulmonary arterial hypertension related to adult congenital heart disease. Expert Review of Cardiovascular Therapy, 2019, 17, 449-459.	0.6	13
61	Efficacy of catheter ablation for atrial fibrillation in patients with congenital heart disease. Europace, 2019, 21, 1334-1344.	0.7	25
62	Creatinine versus cystatin C to estimate glomerular filtration rate in adults with congenital heart disease: Results of the Boston Adult Congenital Heart Disease Biobank. American Heart Journal, 2019, 214, 142-155.	1.2	19
63	Evaluating a strategy of PAH therapy pre-treatment in patients with atrial septal defects and pulmonary arterial hypertension to permit safe repair (â€œtreat-and-repairâ€). International Journal of Cardiology, 2019, 291, 142-144.	0.8	10
64	Blood Viscosity and its Relevance to the Diagnosis and Management of Pulmonary Hypertension. Journal of the American College of Cardiology, 2019, 73, 2640-2642.	1.2	11
65	Does gender affect the prognosis and risk of complications in patients with congenital heart disease in the modern era?. International Journal of Cardiology, 2019, 290, 156-161.	0.8	18
66	Early histological changes of pulmonary arterial hypertension disclosed by invasive cardiopulmonary exercise testing. Pulmonary Circulation, 2019, 9, 1-4.	0.8	3
67	Peripartum outcomes in a large population of women with pulmonary arterial hypertension associated with congenital heart disease. European Journal of Preventive Cardiology, 2019, 26, 1067-1076.	0.8	31
68	Congenital heart disease, pulmonary arterial hypertension and the UKâ€™s Drivers and Vehicle Licensing Agency: controversial new guidance. Pulmonary Circulation, 2019, 9, 1-2.	0.8	0
69	Critical Care Management of theÂAdult with Eisenmenger Syndrome and Pulmonary Arterial Hypertension Related to Congenital Heart Disease. Congenital Heart Disease in Adolescents and Adults, 2019, , 273-297.	0.2	0
70	EmPHasis-10 score for the assessment of quality of life in various types of pulmonary hypertension and its relation to outcome. European Journal of Preventive Cardiology, 2019, 26, 1338-1340.	0.8	25
71	The outcome of adults born with pulmonary atresia: High morbidity and mortality irrespective of repair. International Journal of Cardiology, 2019, 280, 61-66.	0.8	11
72	Strength training in congenital heart disease: A way to boost respiratory function?. European Journal of Preventive Cardiology, 2019, 26, 489-491.	0.8	5

#	Article	IF	Citations
73	Risk stratification in congenital heart disease - A call for protocolised assessment and multicentre collaboration. International Journal of Cardiology, 2019, 276, 114-115.	0.8	6
74	Heart or heart-lung transplantation for patients with congenital heart disease in England. Heart, 2019, 105, heartjnl-2018-313984.	1.2	17
75	Incidence, mortality and bleeding rates associated with pulmonary embolism in England between 1997 and 2015. International Journal of Cardiology, 2019, 277, 229-234.	0.8	25
76	Acute Effect of Inhaled Iloprost in Children with Pulmonary Arterial Hypertension Associated with Simple Congenital Heart Defects. Pediatric Cardiology, 2018, 39, 757-762.	0.6	6
77	A crown of thornsâ€"right ventricular outflow tract obstruction caused by calcific pericardial ring. European Heart Journal Cardiovascular Imaging, 2018, 19, 83-83.	0.5	0
78	Platelet count and mean platelet volume predict outcome in adults with Eisenmenger syndrome. Heart, 2018, 104, 45-50.	1.2	26
79	Infective endocarditis in adults with congenital heart disease remains a lethal disease. Heart, 2018, 104, 161-165.	1.2	59
80	New York Heart Association (NYHA) classification in adults with congenital heart disease: relation to objective measures of exercise and outcome. European Heart Journal Quality of Care & Clinical Outcomes, 2018, 4, 51-58.	1.8	122
81	Atrial septal defects and pulmonary arterial hypertension. Journal of Thoracic Disease, 2018, 10, S2953-S2965.	0.6	27
82	Transition to adult care in adolescents with congenital heart disease. Progress in Pediatric Cardiology, 2018, 51, 62-66.	0.2	5
83	Echocardiographic Screening for Pulmonary Hypertension in CongenitalÂHeart Disease. Journal of the American College of Cardiology, 2018, 72, 2778-2788.	1.2	38
84	Pulmonary hypertension: the state of the art. Italian Journal of Medicine, 2018, 12, 159-170.	0.2	0
85	Arrhythmias in adult patients with congenital heart disease and pulmonary arterial hypertension. Heart, 2018, 104, 1963-1969.	1.2	39
86	Use of intravenous iron in cyanotic patients with congenital heart disease and/or pulmonary hypertension. International Journal of Cardiology, 2018, 267, 79-83.	0.8	22
87	Right Heart Catheterization for the Diagnosis of Pulmonary Hypertension. Heart Failure Clinics, 2018, 14, 467-477.	1.0	49
88	Definition and Management of Segmental Pulmonary Hypertension. Journal of the American Heart Association, 2018, 7, .	1.6	41
89	Heart Failure, Exercise Intolerance, and Physical Training. , 2018, , 77-87.		0
90	A stepwise composite echocardiographic score predicts severe pulmonary hypertension in patients with interstitial lung disease. ERJ Open Research, 2018, 4, 00124-2017.	1.1	16

#	Article	IF	Citations
91	Right Atrial Function Predicts Clinical Outcome in Patients with Precapillary Pulmonary Hypertension. Journal of the American Society of Echocardiography, 2018, 31, 1137-1145.	1.2	12
92	Ramipril and left ventricular diastolic function in stable patients with pulmonary regurgitation after repair of tetralogy of Fallot. International Journal of Cardiology, 2018, 272, 64-69.	0.8	14
93	Future Research. Congenital Heart Disease in Adolescents and Adults, 2018, , 251-263.	0.2	0
94	Body mass index in adult congenital heart disease. Heart, 2017, 103, 1250-1257.	1.2	48
95	Past and current cause-specific mortality in Eisenmenger syndrome. European Heart Journal, 2017, 38, 2060-2067.	1.0	68
96	Declining incidence and prevalence of Eisenmenger syndrome in the developed world: a triumph of modern medicine. Heart, 2017, 103, 1313-1314.	1.2	14
97	Cardiac remodelling amongst adults with various aetiologies of pulmonary arterial hypertension including Eisenmenger syndromeâ€"implications on survival and the role of right ventricular transverse strain. European Heart Journal Cardiovascular Imaging, 2017, 18, 1262-1270.	0.5	31
98	Predictors of Death in Contemporary Adult Patients With Eisenmenger Syndrome. Circulation, 2017, 135, 1432-1440.	1.6	118
99	Echocardiography in the Diagnosis and Follow-Up of Patients with Pulmonary Arterial Hypertension Associated with Congenital Heart Disease. Congenital Heart Disease in Adolescents and Adults, 2017, , 163-178.	0.2	3
100	Pulmonary Arterial Hypertension Complicating Congenital Heart Disease: Advances in Therapy. Seminars in Respiratory and Critical Care Medicine, 2017, 38, 636-650.	0.8	7
101	Conservative Management and Recommendations for Pulmonary Arterial Hypertension Related to Congenital Heart Disease. Congenital Heart Disease in Adolescents and Adults, 2017, , 229-251.	0.2	0
102	The CRASH report: emergency management dilemmas facing acute physicians in patients with pulmonary arterial hypertension. Thorax, 2017, 72, 1035-1045.	2.7	30
103	Response by Kempny et al to Letter Regarding Article, â€œPredictors of Death in Contemporary Adult Patients With Eisenmenger Syndrome: A Multicenter Studyâ€• Circulation, 2017, 136, 1078-1079.	1.6	0
104	Palliative Care and End-of-Life Considerations in Patients with PAHâ€"CHD. Congenital Heart Disease in Adolescents and Adults, 2017, , 341-361.	0.2	0
105	Infective endocarditis in patients with congenital heart disease: When, where and how. International Journal of Cardiology, 2017, 249, 171-172.	0.8	11
106	The spectrum of pulmonary arterial hypertension in adults with congenital heart disease: management from a physician and nurse specialist perspective. Journal of Congenital Cardiology, 2017, 1, .	0.5	0
107	Outcome of cardiac surgery in patients with congenital heart disease in England between 1997 and 2015. PLoS ONE, 2017, 12, e0178963.	1.1	49
108	Congenital Heart Defects and Pulmonary Hypertension: The Heathâ€"Edwards Paradigm. Congenital Heart Disease in Adolescents and Adults, 2017, , 3-22.	0.2	1

#	Article	IF	Citations
109	Physical Examination and Electrocardiography in Patients with Pulmonary Arterial Hypertension Due to Congenital Heart Disease: Initial Clinical Assessment. Congenital Heart Disease in Adolescents and Adults, 2017, , 121-148.	0.2	0
110	Multimodality imaging in congenital heart disease-related pulmonary arterial hypertension. Heart, 2016, 102, 910-918.	1.2	30
111	Patients with Down syndrome and congenital heart disease: survival is improving, but challenges remain: TableÂ1. Heart, 2016, 102, 1515-1517.	1.2	12
112	Determinants of outpatient clinic attendance amongst adults with congenital heart disease and outcome. International Journal of Cardiology, 2016, 203, 245-250.	0.8	75
113	Dyssynchrony and electromechanical delay are associated with focal fibrosis in the systemic right ventricle â€" Insights from echocardiography. International Journal of Cardiology, 2016, 220, 382-388.	0.8	20
114	Chronic Heart Failure in Congenital Heart Disease. Circulation, 2016, 133, 770-801.	1.6	271
115	Transplantation and Mechanical Circulatory Support in Congenital Heart Disease. Circulation, 2016, 133, 802-820.	1.6	118
116	Clinical course and potential complications of small ventricular septal defects in adulthood: Late development of left ventricular dysfunction justifies lifelong care. International Journal of Cardiology, 2016, 208, 102-106.	0.8	47
117	Depression requiring anti-depressant drug therapy in adult congenital heart disease: prevalence, risk factors, and prognostic value. European Heart Journal, 2016, 37, 771-782.	1.0	37
118	Unable to Access the Pulmonary Artery. , 2016, , 71-80.		0
119	Pulmonary hypertension related to congenital heart disease: A comprehensive review. Global Cardiology Science & Practice, 2015, 2015, 42.	0.3	0
120	Hypoalbuminaemia predicts outcome in adult patients with congenital heart disease. Heart, 2015, 101, 699-705.	1.2	32
121	Pulmonary tumour thrombotic microangiopathy: unclassifiable pulmonary hypertension?. European Respiratory Journal, 2015, 46, 1214-1217.	3.1	38
122	Survival Prospects and Circumstances of Death in Contemporary Adult Congenital Heart Disease Patients Under Follow-Up at a Large Tertiary Centre. Circulation, 2015, 132, 2118-2125.	1.6	471
123	Impaired Right, Left, or Biventricular Function and Resting Oxygen Saturation Are Associated With Mortality in Eisenmenger Syndrome. Circulation: Cardiovascular Imaging, 2015, 8, .	1.3	32
124	Physiological differences between various types of Eisenmenger syndrome and relation to outcome. International Journal of Cardiology, 2015, 179, 455-460.	0.8	55
125	Percutaneous transluminal pulmonary angioplasty for the treatment of chronic thromboembolic pulmonary hypertension: Challenges and future directions. International Journal of Cardiology, 2015, 187, 401-403.	0.8	10
126	Acceptance and psychological impact of implantable defibrillators amongst adults with congenital heart disease. International Journal of Cardiology, 2015, 181, 218-224.	0.8	33

#	Article	IF	Citations
127	Congenital heart disease beyond the age of 60: emergence of a new population with high resource utilization, high morbidity, and high mortality. European Heart Journal, 2014, 35, 725-732.	1.0	218
128	Choice and Competition Between Adult Congenital Heart Disease Centers. Circulation: Cardiovascular Quality and Outcomes, 2014, 7, 285-291.	0.9	13
129	Pulmonary hypertension related to congenital heart disease: a call for action. European Heart Journal, 2014, 35, 691-700.	1.0	150
130	C-reactive protein in adults with pulmonary arterial hypertension associated with congenital heart disease and its prognostic value. Heart, 2014, 100, 1335-1341.	1.2	30
131	Single-ventricle physiology in the UK: an ongoing challenge of growing numbers and of growing complexity of congenital heart disease. Heart, 2014, 100, 1315-1316.	1.2	6
132	Survival prospects of treatment naÃ¯ve patients with Eisenmenger: a systematic review of the literature and report of own experience. Heart, 2014, 100, 1366-1372.	1.2	77
133	Bosentan in Pulmonary Hypertension Associated with Fibrotic Idiopathic Interstitial Pneumonia. American Journal of Respiratory and Critical Care Medicine, 2014, 190, 208-217.	2.5	177
134	Myocardial fibrosis in Eisenmenger syndrome: a descriptive cohort study exploring associations of late gadolinium enhancement with clinical status and survival. Journal of Cardiovascular Magnetic Resonance, 2014, 16, 32.	1.6	38
135	Long-term natural history and postoperative outcome of double-chambered right ventricleâ€"Experience from two tertiary adult congenital heart centres and review of the literature. International Journal of Cardiology, 2014, 174, 662-668.	0.8	34
136	Eisenmenger Syndrome and Other Types of Pulmonary Arterial Hypertension Related to Congenital Heart Disease. , 2014, , 2481-2494.		4
137	Disease targeting therapies in patients with Eisenmenger syndrome: Response to treatment and long-term efficiency. International Journal of Cardiology, 2013, 167, 840-847.	0.8	68
138	Cardiothoracic ratio from postero-anterior chest radiographs: A simple, reproducible and independent marker of disease severity and outcome in adults with congenital heart disease. International Journal of Cardiology, 2013, 166, 453-457.	0.8	75
139	Peak oxygen uptake correlates with disease severity and predicts outcome in adult patients with Ebstein's anomaly of the tricuspid valve. International Journal of Cardiology, 2013, 163, 305-308.	0.8	27
140	Six-minute walk test distance and resting oxygen saturations but not functional class predict outcome in adult patients with Eisenmenger syndrome. International Journal of Cardiology, 2013, 168, 4784-4789.	0.8	53
