Version: 2024-04-24

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
2259	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2258	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2257	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2256	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2255	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2254	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2253	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2252	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2251	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2250	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2249	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2248	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2247	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2246	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2245	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2244	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		
2243	Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272		

2242 Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272

2241 Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272

2240 Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272

2239 Spatial mapping of the internal and external electromagnetic fields of negative index metamaterials. **2006**, 14, 8694

2238 Spatial mapping of the internal and external electromagnetic fields of negative index metamaterials. **2006**, 14, 8694

2237 Spatial mapping of the internal and external electromagnetic fields of negative index metamaterials. **2006**, 14, 8694

2236 Spatial mapping of the internal and external electromagnetic fields of negative index metamaterials. **2006**, 14, 8694

2235 Spatial mapping of the internal and external electromagnetic fields of negative index metamaterials. **2006**, 14, 8694

2234 Spatial mapping of the internal and external electromagnetic fields of negative index metamaterials. **2006**, 14, 8694

2233 Spatial mapping of the internal and external electromagnetic fields of negative index metamaterials. **2006**, 14, 8694

2232 Spatial mapping of the internal and external electromagnetic fields of negative index metamaterials. **2006**, 14, 8694

2231 On perfect cloaking. **2006**, 14, 12457

2230 On perfect cloaking. **2006**, 14, 12457

2229 Plasmonic materials in transparency and cloaking problems: mechanism, robustness, and physical insights. **2007**, 15, 3318

2228 Plasmonic materials in transparency and cloaking problems: mechanism, robustness, and physical insights. **2007**, 15, 3318

2227 Plasmonic materials in transparency and cloaking problems: mechanism, robustness, and physical insights. **2007**, 15, 3318

2226 Plasmonic materials in transparency and cloaking problems: mechanism, robustness, and physical insights. **2007**, 15, 3318

2225 Plasmonic materials in transparency and cloaking problems: mechanism, robustness, and physical insights. **2007**, 15, 3318

2224 Plasmonic materials in transparency and cloaking problems: mechanism, robustness, and physical insights. **2007**, 15, 3318

2223 Plasmonic materials in transparency and cloaking problems: mechanism, robustness, and physical insights. **2007**, 15, 3318

2222 Plasmonic materials in transparency and cloaking problems: mechanism, robustness, and physical insights. **2007**, 15, 3318

2221 Plasmonic materials in transparency and cloaking problems: mechanism, robustness, and physical insights. **2007**, 15, 3318

2220 Quasistatic cloaking of two-dimensional polarizable discrete systems by anomalous resonance. **2007**, 15, 6314

2219 Quasistatic cloaking of two-dimensional polarizable discrete systems by anomalous resonance. **2007**, 15, 6314

2218 Quasistatic cloaking of two-dimensional polarizable discrete systems by anomalous resonance. **2007**, 15, 6314

2217 Quasistatic cloaking of two-dimensional polarizable discrete systems by anomalous resonance. **2007**, 15, 6314

2216 Quasistatic cloaking of two-dimensional polarizable discrete systems by anomalous resonance. **2007**, 15, 6314

2215 Cloaking and transparency for collections of particles with metamaterial and plasmonic covers. **2007**, 15, 7578

2214 Cloaking and transparency for collections of particles with metamaterial and plasmonic covers. **2007**, 15, 7578

2213 Cloaking and transparency for collections of particles with metamaterial and plasmonic covers. **2007**, 15, 7578

2212 Cloaking and transparency for collections of particles with metamaterial and plasmonic covers. **2007**, 15, 7578

2211 Cloaking and transparency for collections of particles with metamaterial and plasmonic covers. **2007**, 15, 7578

2210 Cloaking and transparency for collections of particles with metamaterial and plasmonic covers. **2007**, 15, 7578

2209 Electromagnetic cloaking by layered structure of homogeneous isotropic materials. **2007**, 15, 11133

2208 Electromagnetic cloaking by layered structure of homogeneous isotropic materials. **2007**, 15, 11133

2207 Full-wave finite-difference time-domain simulation of electromagnetic cloaking structures. **2008**, 16, 6717

2206 Full-wave finite-difference time-domain simulation of electromagnetic cloaking structures. **2008**, 16, 6717

2205 Transformation media that turn a narrow slit into a large window. **2008**, 16, 11764

2204 Transformation media that turn a narrow slit into a large window. **2008**, 16, 11764

2203 Transformation media that turn a narrow slit into a large window. **2008**, 16, 11764

2202 Transformation media that turn a narrow slit into a large window. **2008**, 16, 11764

2201 Transformation media that turn a narrow slit into a large window. **2008**, 16, 11764

2200 Transformation media that turn a narrow slit into a large window. **2008**, 16, 11764

2199 Optical source transformations. **2008**, 16, 21215

2198 Optical source transformations. **2008**, 16, 21215

2197 Optical source transformations. **2008**, 16, 21215

2196 Cloak/anti-cloak interactions. **2009**, 17, 3101

2195 Cloak/anti-cloak interactions. **2009**, 17, 3101

2194 Cloak/anti-cloak interactions. **2009**, 17, 3101

2193 Terahertz near-field imaging of electric and magnetic resonances of a planar metamaterial. **2009**, 17, 3826

2192 Terahertz near-field imaging of electric and magnetic resonances of a planar metamaterial. **2009**, 17, 3826

2191 Terahertz near-field imaging of electric and magnetic resonances of a planar metamaterial. **2009**, 17, 3826

2190 Terahertz near-field imaging of electric and magnetic resonances of a planar metamaterial. **2009**, 17, 3826

2189 Broadband exterior cloaking. **2009**, 17, 14800

2188 Guiding light with conformal transformations. **2009**, 17, 14872

2187 Lattice modes mediate radiative coupling in metamaterial arrays. **2009**, 17, 22108

2186 Lattice modes mediate radiative coupling in metamaterial arrays. **2009**, 17, 22108

2185 Lattice modes mediate radiative coupling in metamaterial arrays. **2009**, 17, 22108

2184 Programming of inhomogeneous resonant guided wave networks. **2010**, 18, 25584

2183 Programming of inhomogeneous resonant guided wave networks. **2010**, 18, 25584

2182 Programming of inhomogeneous resonant guided wave networks. **2010**, 18, 25584

2181 Programming of inhomogeneous resonant guided wave networks. **2010**, 18, 25584

2180 Hiding in the corner. **2011**, 19, 20827

2179 Hiding in the corner. **2011**, 19, 20827

2178 Hiding in the corner. **2011**, 19, 20827

2177 Geometrical Mie theory for resonances in nanoparticles of any shape. **2011**, 19, 21432

2176 Dielectric based resonant guided wave networks. **2012**, 20, 10674

2175 Dielectric based resonant guided wave networks. **2012**, 20, 10674

2174 Dielectric based resonant guided wave networks. **2012**, 20, 10674

2173 Synthesis of spatially variant lattices. **2012**, 20, 15263

2172 An efficient plate heater with uniform surface temperature engineered with effective thermal materials. **2014**, 22, 17006

2171 An efficient plate heater with uniform surface temperature engineered with effective thermal materials. **2014**, 22, 17006

2170 Paraxial ray optics cloaking. **2014**, 22, 29465

2169 Paraxial ray optics cloaking. **2014**, 22, 29465

2168 Paraxial ray optics cloaking. **2014**, 22, 29465

2167 Rotationally reconfigurable metamaterials based on moir phenomenon. **2015**, 23, 17443

2166 Broadband high efficiency asymmetric transmission of achiral metamaterials. **2015**, 23, 19535

2165 Broadband high efficiency asymmetric transmission of achiral metamaterials. **2015**, 23, 19535

2164 Broadband high efficiency asymmetric transmission of achiral metamaterials. **2015**, 23, 19535

2163 Broadband high efficiency asymmetric transmission of achiral metamaterials. **2015**, 23, 19535

2162 Broadband high efficiency asymmetric transmission of achiral metamaterials. **2015**, 23, 19535

2161 SUSY-inspired one-dimensional transformation optics. **2014**, 1, 89

2160 Dispersion engineering via nonlocal transformation optics. **2016**, 3, 179

2159 Digital integral cloaking. **2016**, 3, 536

2158 Digital integral cloaking. **2016**, 3, 536

2157 Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272

2156 Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272

2155 Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272

2154 Wigner functions in optics: describing beams as ray bundles and pulses as particle ensembles. **2011**, 3, 272

2153 FDTD analysis of the optical black hole. **2010**, 27, 2020

2152 Spatial mapping of the internal and external electromagnetic fields of negative index metamaterials. **2006**, 14, 8694

2151 On perfect cloaking. **2006**, 14, 12457

2150 Plasmonic materials in transparency and cloaking problems: mechanism, robustness, and physical insights. **2007**, 15, 3318

2149 Plasmonic materials in transparency and cloaking problems: mechanism, robustness, and physical insights. **2007**, 15, 3318

2148 Plasmonic materials in transparency and cloaking problems: mechanism, robustness, and physical insights. **2007**, 15, 3318

2147 Plasmonic materials in transparency and cloaking problems: mechanism, robustness, and physical insights. **2007**, 15, 3318

2146 Full-wave finite-difference time-domain simulation of electromagnetic cloaking structures. **2008**, 16, 6717

2145 Optical source transformations. **2008**, 16, 21215

2144 Optical source transformations. **2008**, 16, 21215

2143 Cloak/anti-cloak interactions. **2009**, 17, 3101

2142 Cloak/anti-cloak interactions. **2009**, 17, 3101

2141 Broadband exterior cloaking. **2009**, 17, 14800

2140 Visualizing invisibility: Metamaterials-based optical devices in natural environments. **2010**, 18, 3332

2139 Programming of inhomogeneous resonant guided wave networks. **2010**, 18, 25584

2138 Hiding in the corner. **2011**, 19, 20827

2137 Paraxial ray optics cloaking. **2014**, 22, 29465

2136 Broadband high efficiency asymmetric transmission of achiral metamaterials. **2015**, 23, 19535

766 Preface. xvii-xxii

765 Cloaking. 316-385

764 An Acoustic Metamaterial Bending Waveguide Design Using Transformation Acoustics. **2011**,

763 Analogue Gravity. **2011**, 14, 3 323

762 The effect of electrostatic shielding using invisibility cloak. **2011**, 1, 042126 1

761 Maxwell Fisheye and Eaton Lenses Emulated by Microdroplets. **2011**,

760 Plasmonic cloaking and scattering cancelation for electromagnetic and acoustic waves. **2011**, 48, 468-482 40

759 Circuit Components Based on New Materials: The Reality of Multitechnology System on Systems Hyperintegration. **2010**, 11, 106-111

758 From Curved Space to Optical Cloaking. **2011**, 389-389

757 Space-time cloak could hide events. **2010**,

756 Invisibility rug hides 'large' objects.

755 Anomalous rotation characteristics of circularly polarized beam in left-handed materials. **2011**, 60, 074208 2

754 Design and simulation of a spherical electromagnetic reshaper with a split -ring- resonator microstructure. **2011**, 60, 094103 1

753 Deduction and verification of electromagnetic parameter of arbitrary polyhedron cloaks. **2011**, 60, 027801 7

752 Light scattering resonances in small particles with electric and magnetic optical properties. **2011**, 117-136

751 Affine Transformational Optics. **2011**,

750 Constraints and Challenges in Tip-Based Nanofabrication. **2011**, 401-443

749 Transverse angular shift in optical Magnus effect. **2011**, 60, 074207

748	Can even monochromatic radiation ensure ideal invisibility?. **2011**, 181, 787	4
747	Design and Analysis of Cloaking Structure Using 2D Transmission Line. **2011**, 22, 875-880	
746	Theory of Negative-Refractive-Index Response of Double-Fishnet Structures. **2012**, 77-91	
745	Photon Generation in Electronic Transitions: Lasers and Nanoscopic Sources. **2012**, 67-110	
744	The Road Ahead for Metamaterials: Improved Material Building Blocks. **2012**,	
743	Layered elliptical-cylindrical acoustic cloaking design based on isotropic materials. **2012**, 61, 184301	10
742	Application of Metamaterials and Meta-Atoms to Terahertz Devices. **2012**, 40, 508	
741	Research on a cylindrical cloak with active acoustic metamaterial layers. **2012**, 61, 134303	8
740	Molding light propagation with phase discontinuities. **2012**,	0
739	Basics of Meta-materials. **2012**, 78, 767-772	3
738	Affine Nonmagnetic Transformation Design and its Application. **2012**,	
737	Design and study of elliptical cylinder external cloak based on line-transformation. **2012**, 61, 204101	4
736	Inverse Problems: Visibility and Invisibility. **2012**, 1-64	
735	Results and Discussion. **2012**, 63-205	
734	Is singularity-free cloaking possible? New cloaking ideas (a reply to comments on the paper "Invisible cloaking of material bodies using the wave flow method" [Phys. Usp. 53 455 (2010)]). **2012**, 182, 337-341	3
733	Plasmonic Metamaterials. **2012**, 33, 197-202	
732	Discontinuous Galerkin Methods for Metamaterials. **2013**, 127-150	
731	An Introduction to Mathematics of Transformational Plasmonics. **2012**, 235-277	

730 Twisting Electromagnetic Fields with Singular Transformation Optics. **2013**,

729 Multiscale models of electromagnetic and plasmonic metamaterials. **2013**, 19-71

728 Amorphous Metamaterials and Potential Nanophotonics Applications. **2013**, 39-66 2

727 Trapping Light by Mimicking Gravitational Lensing. **2013**,

726 Trapping Light by Mimicking Gravitational Lensing. **2013**,

725 Design and study of the two-dimensional ellptical scattering-shifting cloak. **2013**, 62, 024101 5

724 Transformation Optics. 59-70

723 Nanoring color filters based on Fabry-PEot cavities. **2013**, 62, 057804 5

722 Plasmonic Nanoparticle-Based Metamaterials: From Electric to Magnetic Response. **2013**, 327-365

721 Experimental investigation of bistable transmission with nonlinear meta-atoms in waveguide configuration. **2013**,

720 Approximate Electromagnetic Cloaking of a Dielectric Sphere Using Homogeneous Isotropic Multi-Layered Materials. **2013**, 05, 379-387

719 Micromechanics of Elastic Metamaterials. **2013**,

718 Designing Cloaks and Absorbing Blankets for Scattering Reduction Using Field and Impedance Transformation Techniques. **2014**, 517-538 1

717 Quasi-Conformal Approaches for Two and Three-Dimensional Transformation Optical Media. **2014**, 1-32 2

716 Creating Illusion Effects Using Transformation Optics. **2014**, 139-165

715 Transformation Electromagnetics for Antenna Applications. **2014**, 263-287 1

714 Transformation Electromagnetics and Non-standard Devices. **2014**, 459-491
