#	Article	IF	CITATIONS
1	CKD Prevalence Varies across the European General Population. Journal of the American Society of Nephrology: JASN, 2016, 27, 2135-2147.	6.1	406
2	Microalbuminuria and all-cause mortality in 2,089 apparently healthy individuals: a 4.4-year follow-up study. The Nord-TrÃ,ndelag Health Study (HUNT), Norway. American Journal of Kidney Diseases, 2003, 42, 466-473.	1.9	234
3	Change in albuminuria and subsequent risk of end-stage kidney disease: an individual participant-level consortium meta-analysis of observational studies. Lancet Diabetes and Endocrinology,the, 2019, 7, 115-127.	11.4	199
4	Methodology used in studies reporting chronic kidney disease prevalence: a systematic literature review. Nephrology Dialysis Transplantation, 2015, 30, iv6-iv16.	0.7	69
5	Microalbuminuria and All-Cause Mortality in Treated Hypertensive Individuals. Circulation, 2003, 108, 2783-2789.	1.6	64
6	Sex-specific and pleiotropic effects underlying kidney function identified from GWAS meta-analysis. Nature Communications, 2019, 10, 1847.	12.8	55
7	Long-term trends in the prevalence of chronicÂkidney disease and the influence ofÂcardiovascularÂrisk factors in Norway. Kidney International, 2016, 90, 665-673.	5.2	40
8	A 15-Year Follow-Up Study of Sense of Humor and Causes of Mortality. Psychosomatic Medicine, 2016, 78, 345-353.	2.0	25
9	Moderately increased albuminuria, chronic kidney disease and incident dementia: the HUNT study. BMC Nephrology, 2019, 20, 261.	1.8	23
10	The causal effects of serum lipids and apolipoproteins on kidney function: multivariable and bidirectional Mendelian-randomization analyses. International Journal of Epidemiology, 2021, 50, 1569-1579.	1.9	18
11	The accuracy of predicting cardiovascular death based on one compared to several albuminuria values. Kidney International, 2014, 85, 1421-1428.	5.2	12
12	The HUNT study: Association of comorbidity clusters with longâ€ŧerm survival and incidence of exacerbation in a populationâ€based Norwegian COPD cohort. Respirology, 2022, , .	2.3	8
13	Long-term changes in albuminuria. Journal of Hypertension, 2016, 34, 2081-2089.	0.5	4
14	The G Protein Â3 Subunit C825T Polymorphism Is Associated With Microalbuminuria in Hypertensive Women and Cardiovascular Disease in Hypertensive Men. American Journal of Hypertension, 2010, 23, 1114-1120.	2.0	3
15	Association between depression symptoms and moderately increased levels of the inflammation marker albuminuria is explained by age and comorbidity. Scientific Reports, 2022, 12, .	3.3	1
