#	Article	IF	CITATIONS
1	Learning to Delay in Ride-Sourcing Systems: A Multi-Agent Deep Reinforcement Learning Framework. IEEE Transactions on Knowledge and Data Engineering, 2022, 34, 2280-2292.	5.7	41
2	A Multi-Task Matrix Factorized Graph Neural Network for Co-Prediction of Zone-Based and OD-Based Ride-Hailing Demand. IEEE Transactions on Intelligent Transportation Systems, 2022, 23, 5704-5716.	8.0	22
3	Departure Time Choice Equilibrium and Tolling Strategies for a Bottleneck with Stochastic Capacity. Transportation Science, 2022, 56, 79-102.	4.4	6
4	Unlock the Sharing Economy: The Case of the Parking Sector for Recurrent Commuting Trips. Transportation Science, 2022, 56, 338-357.	4.4	9
5	Shared parking for ride-sourcing platforms to reduce cruising traffic. Transportation Research Part C: Emerging Technologies, 2022, 137, 103562.	7.6	16
6	Analysis of the Information Entropy on Traffic Flows. IEEE Transactions on Intelligent Transportation Systems, 2022, 23, 18012-18023.	8.0	9
7	Designing van-based mobile battery swapping and rebalancing services for dockless ebike-sharing systems based on the dueling double deep Q-network. Transportation Research Part C: Emerging Technologies, 2022, 138, 103620.	7.6	12
8	Coordinating ride-sourcing and public transport services with a reinforcement learning approach. Transportation Research Part C: Emerging Technologies, 2022, 138, 103611.	7.6	13
9	Calibration and validation of matching functions for ride-sourcing markets. Communications in Transportation Research, 2022, 2, 100058.	10.7	15
10	Competition and third-party platform-integration in ride-sourcing markets. Transportation Research Part B: Methodological, 2022, 159, 76-103.	5.9	36
11	Physics-augmented models to simulate commercial adaptive cruise control (ACC) systems. Transportation Research Part C: Emerging Technologies, 2022, 139, 103692.	7.6	16
12	Fitting Spatial-Temporal Data via a Physics Regularized Multi-Output Grid Gaussian Process: Case Studies of a Bike-Sharing System. IEEE Transactions on Intelligent Transportation Systems, 2022, 23, 21090-21101.	8.0	7
13	Two-sided pricing strategies for a parking sharing platform: Reselling or commissioning?. Transportation Research Part B: Methodological, 2022, 163, 40-63.	5.9	2
14	Analysis of ride-sourcing drivers' working Pattern(s) via spatiotemporal work slices: A case study in Hangzhou. Transport Policy, 2022, 125, 336-351.	6.6	1
15	Capturing the interaction between travel time reliability and route choice behavior based on the generalized Bayesian traffic model. Transportation Research Part B: Methodological, 2021, 143, 48-64.	5.9	20
16	Exploration of pedestrian side preference behavior with circleÂantipode experiments: analysis, simulation and implication. Transportmetrica B, 2021, 9, 266-282.	2.3	3
17	Predicting origin-destination ride-sourcing demand with a spatio-temporal encoder-decoder residual multi-graph convolutional network. Transportation Research Part C: Emerging Technologies, 2021, 122, 102858.	7.6	85
18	On string stability of a mixed and heterogeneous traffic flow: A unifying modelling framework. Transportation Research Part B: Methodological, 2021, 144, 133-154.	5.9	64

#	Article	IF	CITATIONS
19	Day-to-day dynamics with advanced traveler information. Transportation Research Part B: Methodological, 2021, 144, 23-44.	5.9	17
20	Integrating probabilistic tensor factorization with Bayesian supervised learning for dynamic ridesharing pattern analysis. Transportation Research Part C: Emerging Technologies, 2021, 124, 102916.	7.6	16
21	Data-driven analysis on matching probability, routing distance and detour distance in ride-pooling services. Transportation Research Part C: Emerging Technologies, 2021, 124, 102922.	7.6	38
22	Integrated line configuration and frequency determination with passenger path assignment in urban rail transit networks. Transportation Research Part B: Methodological, 2021, 145, 134-151.	5.9	52
23	From homogeneous to heterogeneous traffic flows: <mml:math xmlns:mml="http://www.w3.org/1998/Math/MathML" altimg="si5.svg"><mml:msub><mml:mi mathvariant="script">L<mml:mi mathvariant="bold">p</mml:mi </mml:mi </mml:msub>String stability under uncertain model</mml:math 	5.9	46
24	parameters. Transportation Research Part D. Methodological, 2021, 146, 106-154. Equilibrium analyses and operational designs of a coupled market with substitutive and complementary ride-sourcing services to public transits. Transportation Research, Part E: Logistics and Transportation Review, 2021, 148, 102236.	7.4	21
25	A double time-scale passenger assignment model for high-speed railway networks with continuum capacity approximation. Transportation Research, Part E: Logistics and Transportation Review, 2021, 150, 102305.	7.4	8
26	Joint predictions of multi-modal ride-hailing demands: A deep multi-task multi-graph learning-based approach. Transportation Research Part C: Emerging Technologies, 2021, 127, 103063.	7.6	51
27	An integrated approach of train scheduling and rolling stock circulation with skip-stopping pattern for urban rail transit lines. Transportation Research Part C: Emerging Technologies, 2021, 128, 103170.	7.6	25
28	About calibration of car-following dynamics of automated and human-driven vehicles: Methodology, guidelines and codes. Transportation Research Part C: Emerging Technologies, 2021, 128, 103165.	7.6	63
29	On-demand service delivery under asymmetric information: Priority pricing, market selection, and horizontal substitution. International Journal of Production Economics, 2021, 237, 108146.	8.9	6
30	Mitigating unfairness in urban rail transit operation: A mixed-integer linear programming approach. Transportation Research Part B: Methodological, 2021, 149, 418-442.	5.9	23
31	Modeling indoor-level non-pharmaceutical interventions during the COVID-19 pandemic: A pedestrian dynamics-based microscopic simulation approach. Transport Policy, 2021, 109, 12-23.	6.6	42
32	Competition between the transportation network company and the government with subsidies to public transit riders. Transportation Research, Part E: Logistics and Transportation Review, 2021, 152, 102426.	7.4	18
33	Learning ride-sourcing drivers' customer-searching behavior: A dynamic discrete choice approach. Transportation Research Part C: Emerging Technologies, 2021, 130, 103293.	7.6	18
34	Modeling and managing the joint equilibrium of destination and parking choices under hybrid supply of curbside and shared parking. Transportation Research Part C: Emerging Technologies, 2021, 130, 103301.	7.6	14
35	Microscopic energy consumption modelling of electric buses: model development, calibration, and validation. Transportation Research, Part D: Transport and Environment, 2021, 98, 102978.	6.8	15
36	Spatial pricing in ride-sourcing markets under a congestion charge. Transportation Research Part B: Methodological, 2021, 152, 18-45.	5.9	20

#	Article	IF	CITATIONS
37	Multi-party ride-matching problem in the ride-hailing market with bundled option services. Transportation Research Part C: Emerging Technologies, 2021, 131, 103287.	7.6	12
38	Pareto-efficient solutions and regulations of congested ride-sourcing markets with heterogeneous demand and supply. Transportation Research, Part E: Logistics and Transportation Review, 2021, 154, 102483.	7.4	21
39	Origin–Destination Demand Estimation Models. , 2021, , 515-518.		0
40	Customer behavioural modelling of order cancellation in coupled ride-sourcing and taxi markets. Transportation Research Part B: Methodological, 2020, 132, 358-378.	5.9	48
41	Modeling and managing congested transit service with heterogeneous users under monopoly. Transportation Research Part B: Methodological, 2020, 132, 249-266.	5.9	11
42	A Pareto-improving and revenue-neutral scheme to manage mass transit congestion with heterogeneous commuters. Transportation Research Part C: Emerging Technologies, 2020, 113, 245-259.	7.6	30
43	Analysis of multi-modal commute behavior with feeding and competing ridesplitting services. Transportation Research, Part A: Policy and Practice, 2020, 132, 713-727.	4.2	18
44	Optimal deployment of wireless charging lanes considering their adverse effect on road capacity. Transportation Research Part C: Emerging Technologies, 2020, 111, 171-184.	7.6	49
45	Optimizing matching time interval and matching radius in on-demand ride-sourcing markets. Transportation Research Part B: Methodological, 2020, 131, 84-105.	5.9	106
46	The merits of privileged parking. Transportation Research Part B: Methodological, 2020, 140, 193-209.	5.9	4
47	A two-level probabilistic approach for validation of stochastic traffic simulations: impact of drivers' heterogeneity models. Transportation Research Part C: Emerging Technologies, 2020, 121, 102843.	7.6	27
48	Development of a one-day driving cycle for electric ride-hailing vehicles. Transportation Research, Part D: Transport and Environment, 2020, 89, 102597.	6.8	4
49	Pricing and equilibrium in on-demand ride-pooling markets. Transportation Research Part B: Methodological, 2020, 139, 411-431.	5.9	139
50	On integrating carsharing and parking sharing services. Transportation Research Part B: Methodological, 2020, 142, 19-44.	5.9	34
51	On ride-pooling and traffic congestion. Transportation Research Part B: Methodological, 2020, 142, 213-231.	5.9	58
52	Modeling and optimizing a fare incentive strategy to manage queuing and crowding in mass transit systems. Transportation Research Part B: Methodological, 2020, 138, 247-267.	5.9	42
53	Dynamic optimization strategies for on-demand ride services platform: Surge pricing, commission rate, and incentives. Transportation Research Part B: Methodological, 2020, 138, 23-45.	5.9	69
54	Modeling household housing and car ownership decisions: a group decision-based time allocation approach. Transportmetrica A: Transport Science, 2020, 16, 409-438.	2.0	1

#	Article	IF	CITATIONS
55	Pricing strategies for shared parking management with double auction approach: Differential price vs. uniform price. Transportation Research, Part E: Logistics and Transportation Review, 2020, 136, 101899.	7.4	45
56	Fifty years of the bottleneck model: A bibliometric review and future research directions. Transportation Research Part B: Methodological, 2020, 139, 311-342.	5.9	91
57	Parking sharing problem with spatially distributed parking supplies. Transportation Research Part C: Emerging Technologies, 2020, 117, 102676.	7.6	38
58	Integrated reward scheme and surge pricing in a ridesourcing market. Transportation Research Part B: Methodological, 2020, 134, 126-142.	5.9	70
59	Mitigate the range anxiety: Siting battery charging stations for electric vehicle drivers. Transportation Research Part C: Emerging Technologies, 2020, 114, 164-188.	7.6	94
60	Traffic Priority Mechanisms. Transportation Science, 2020, 54, 1211-1224.	4.4	0
61	Parking reservation disturbances. Transportation Research Part B: Methodological, 2020, 135, 83-97.	5.9	36
62	A theory of auto ownership rationing. Transportation Research Part B: Methodological, 2019, 127, 125-146.	5.9	10
63	Day-to-day evolution of departure time choice in stochastic capacity bottleneck models with bounded rationality and various information perceptions. Transportation Research, Part E: Logistics and Transportation Review, 2019, 131, 168-192.	7.4	30
64	Modeling and managing congested transit service with heterogeneous users under monopoly. Transportation Research Procedia, 2019, 38, 544-564.	1.5	1
65	A Pareto-improving and revenue-neutral scheme to manage mass transit congestion with heterogeneous commuters. Transportation Research Procedia, 2019, 38, 586-605.	1.5	5
66	Customer behavioural modelling of order cancellation in coupled ride-sourcing and taxi markets. Transportation Research Procedia, 2019, 38, 853-873.	1.5	43
67	Ridesourcing systems: A framework and review. Transportation Research Part B: Methodological, 2019, 129, 122-155.	5.9	322
68	Last train scheduling for maximizing passenger destination reachability in urban rail transit networks. Transportation Research Part B: Methodological, 2019, 129, 79-95.	5.9	33
69	A generalized Bayesian traffic model. Transportation Research Part C: Emerging Technologies, 2019, 108, 182-206.	7.6	19
70	Resilience of Transportation Systems: Concepts and Comprehensive Review. IEEE Transactions on Intelligent Transportation Systems, 2019, 20, 4262-4276.	8.0	185
71	Optimizing Matching Time Interval and Matching Radius In On-Demand Matching of a Ride-Sourcing Market. SSRN Electronic Journal, 2019, , .	0.4	1
72	Day-to-Day Flow Dynamics for Stochastic User Equilibrium and a General Lyapunov Function. Transportation Science, 2019, , .	4.4	2

#	Article	IF	CITATIONS
73	Modelling drivers' working and recharging schedules in a ride-sourcing market with electric vehicles and gasoline vehicles. Transportation Research, Part E: Logistics and Transportation Review, 2019, 125, 160-180.	7.4	60
74	Tradable Credit Scheme for Control of Evolutionary Traffic Flows to System Optimum: Model and its Convergence. Networks and Spatial Economics, 2019, 19, 833-868.	1.6	22
75	The economics of parking occupancy sensors. Economics of Transportation, 2019, 17, 14-23.	2.3	4
76	PCA-based missing information imputation for real-time crash likelihood prediction under imbalanced data. Transportmetrica A: Transport Science, 2019, 15, 872-895.	2.0	22
77	Hexagon-Based Convolutional Neural Network for Supply-Demand Forecasting of Ride-Sourcing Services. IEEE Transactions on Intelligent Transportation Systems, 2019, 20, 4160-4173.	8.0	100
78	Impacts of wireless charging lanes on travel time and energy consumption in a two-lane road system. Physica A: Statistical Mechanics and Its Applications, 2018, 500, 1-10.	2.6	22
79	Managing rail transit peak-hour congestion with a fare-reward scheme. Transportation Research Part B: Methodological, 2018, 110, 122-136.	5.9	69
80	Traffic dynamics in a bi-modal transportation network with information provision and adaptive transit services. Transportation Research Part C: Emerging Technologies, 2018, 91, 77-98.	7.6	33
81	An optimal charging station location model with the consideration of electric vehicle's driving range. Transportation Research Part C: Emerging Technologies, 2018, 86, 641-654.	7.6	203
82	Are We Really Solving the Dynamic Traffic Equilibrium Problem with a Departure Time Choice?. Transportation Science, 2018, 52, 603-620.	4.4	35
83	Exploration of day-to-day route choice models by a virtual experiment. Transportation Research Part C: Emerging Technologies, 2018, 94, 220-235.	7.6	33
84	Day-to-day departure time choice under bounded rationality in the bottleneck model. Transportation Research Part B: Methodological, 2018, 117, 832-849.	5.9	18
85	A systematic analysis of multimodal transport systems with road space distribution and responsive bus service. Transportation Research Part C: Emerging Technologies, 2018, 96, 208-230.	7.6	37
86	A universal distribution law of network detour ratios. Transportation Research Part C: Emerging Technologies, 2018, 96, 22-37.	7.6	64
87	Public transit service frequency and fares with heterogeneous users under monopoly and alternative regulatory policies. Transportation Research Part B: Methodological, 2018, 117, 190-208.	5.9	31
88	Driver-Rider Cost-Sharing Strategies and Equilibria in a Ridesharing Program. Transportation Science, 2018, 52, 868-881.	4.4	71
89	Itinerary choice and advance ticket booking for high-speed-railway network services. Transportation Research Part C: Emerging Technologies, 2018, 95, 82-104.	7.6	35
90	A reliability-based assignment method for railway networks with heterogeneous passengers. Transportation Research Part C: Emerging Technologies, 2018, 93, 501-524.	7.6	20

#	Article	IF	CITATIONS
91	Integrated Reward Scheme and Surge Pricing in a Ride-Sourcing Market. SSRN Electronic Journal, 2018, , .	0.4	4
92	An intelligent physarum solver for supply chain network design under profit maximization and oligopolistic competition. International Journal of Production Research, 2017, 55, 244-263.	7.5	39
93	Private financing and mobility management of road network with tradable credits. Transportation Research, Part A: Policy and Practice, 2017, 97, 158-176.	4.2	7
94	Rational Behavior Adjustment Process with Boundedly Rational User Equilibrium. Transportation Science, 2017, 51, 968-980.	4.4	35
95	A Route Choice Model with Context-Dependent Value of Time. Transportation Science, 2017, 51, 536-548.	4.4	28
96	An electric vehicle driving behavior model in the traffic system with a wireless charging lane. Physica A: Statistical Mechanics and Its Applications, 2017, 481, 119-126.	2.6	19
97	An adaptive amoeba algorithm for shortest path tree computation in dynamic graphs. Information Sciences, 2017, 405, 123-140.	6.9	13
98	A new look at the morning commute with household shared-ride: How does school location play a role?. Transportation Research, Part E: Logistics and Transportation Review, 2017, 103, 198-217.	7.4	21
99	Optimizing on-time arrival probability and percentile travel time for elementary path finding in time-dependent transportation networks: Linear mixed integer programming reformulations. Transportation Research Part B: Methodological, 2017, 96, 68-91.	5.9	78
100	Modeling and managing morning commute with both household and individual travels. Transportation Research Part B: Methodological, 2017, 103, 227-247.	5.9	26
101	A game-theoretic model of car ownership and household time allocation. Transportation Research Part B: Methodological, 2017, 104, 667-685.	5.9	15
102	Day-to-day departure time choice under bounded rationality in the bottleneck model. Transportation Research Procedia, 2017, 23, 551-570.	1.5	13
103	Exploration of day-to-day route choice models by a virtual experiment. Transportation Research Procedia, 2017, 23, 679-699.	1.5	13
104	Short-term forecasting of passenger demand under on-demand ride services: A spatio-temporal deep learning approach. Transportation Research Part C: Emerging Technologies, 2017, 85, 591-608.	7.6	485
105	A link-based mean-excess traffic equilibrium model under uncertainty. Transportation Research Part B: Methodological, 2017, 95, 53-75.	5.9	19
106	Ridesharing User Equilibrium and Its Implications for High-Occupancy Toll Lane Pricing. Transportation Research Record, 2017, 2667, 39-50.	1.9	33
107	Interactive travel choices and traffic forecast in a doubly dynamical system with user inertia and information provision. Transportation Research Part C: Emerging Technologies, 2017, 85, 711-731.	7.6	48
108	Pricing strategies for a taxi-hailing platform. Transportation Research, Part E: Logistics and Transportation Review, 2016, 93, 212-231.	7.4	207

#	Article	IF	CITATIONS
109	Endogenous growth and demographic transition in a model of cultural transmission. Journal of Evolutionary Economics, 2016, 26, 953-970.	1.7	1
110	A Physarum-inspired approach to supply chain network design. Science China Information Sciences, 2016, 59, 1.	4.3	25
111	Economic analysis of ride-sourcing markets. Transportation Research Part C: Emerging Technologies, 2016, 71, 249-266.	7.6	248
112	Private parking slot sharing. Transportation Research Part B: Methodological, 2016, 93, 596-617.	5.9	75
113	A simple reservation and allocation model of shared parking lots. Transportation Research Part C: Emerging Technologies, 2016, 71, 303-312.	7.6	138
114	Self-driving cars will change cities. Regional Science and Urban Economics, 2016, 61, 26-37.	2.6	144
115	Transit Operations with Deterministic Optimal Fare and Frequency Control. Transportation Research Procedia, 2016, 14, 313-322.	1.5	7
116	The time dimension of parking economics. Transportation Research Part B: Methodological, 2016, 91, 211-228.	5.9	21
117	Pareto-improving transportation network design and ownership regimes. Transportation Research Part B: Methodological, 2016, 91, 292-309.	5.9	13
118	Dynamics of modal choice of heterogeneous travelers with responsive transit services. Transportation Research Part C: Emerging Technologies, 2016, 68, 333-349.	7.6	27
119	The Downs–Thomson paradox with imperfect mode substitutes and alternative transit administration regimes. Transportation Research Part B: Methodological, 2016, 86, 104-127.	5.9	45
120	Speed or spacing? Cumulative variables, and convolution of model errors and time in traffic flow models validation and calibration. Transportation Research Part B: Methodological, 2016, 91, 21-33.	5.9	59
121	Day-to-Day Flow Dynamics and Congestion Control. Transportation Science, 2016, 50, 982-997.	4.4	47
122	Multi-objective re-synchronizing of bus timetable: Model, complexity and solution. Transportation Research Part C: Emerging Technologies, 2016, 67, 149-168.	7.6	77
123	Physics of day-to-day network flow dynamics. Transportation Research Part B: Methodological, 2016, 86, 86-103.	5.9	43
124	Managing morning commute with parking space constraints in the case of a bi-modal many-to-one network. Transportmetrica A: Transport Science, 2016, 12, 116-141.	2.0	19
125	Learning Marginal-Cost Pricing via Trial-and-Error Procedure with Day-to-Day Flow Dynamics. Transportation Research Procedia, 2015, 7, 362-380.	1.5	3
126	Decentralizing Pareto-efficient network flow/speed patterns with hybrid schemes of speed limit and road pricing. Transportation Research, Part E: Logistics and Transportation Review, 2015, 83, 51-64.	7.4	7
