#	ARTICLE	IF	CITATIONS
1	The channel-source hypothesis: Empirical evidence for channel sourcing of dissolved organic carbon to explain hysteresis in a headwater mountain stream. <i>Hydrological Processes</i> , 2022, 36, .	1.1	9
2	The Influence of Local and Nonlocal Factors on Soil Water Content in a Steep Forested Catchment. <i>Water Resources Research</i> , 2021, 57, e2020WR028343.	1.7	9
3	Discussion: "Meadow Restoration Increases Baseflow and Groundwater Storage in the Sierra Nevada Mountains of California" by Luke J.H. Hunt, Julie Fair, and Maxwell Odland. <i>Journal of the American Water Resources Association</i> , 2020, 56, 182-185.	1.0	6
4	Climate Change Causes River Network Contraction and Disconnection in the H.J. Andrews Experimental Forest, Oregon, USA. <i>Frontiers in Water</i> , 2020, 2, .	1.0	32
5	Multiscale Feature-feature Interactions Control Patterns of Hyporheic Exchange in a Simulated Headwater Mountain Stream. <i>Water Resources Research</i> , 2019, 55, 10976-10992.	1.7	15
6	Simulation of dynamic expansion, contraction, and connectivity in a mountain stream network. <i>Advances in Water Resources</i> , 2018, 114, 64-82.	1.7	84
7	Time-variable Transit Time Distributions in the Hyporheic Zone of a Headwater Mountain Stream. <i>Water Resources Research</i> , 2018, 54, 2017-2036.	1.7	23
8	Dynamic hyporheic and riparian flow path geometry through base flow recession in two headwater mountain stream corridors. <i>Water Resources Research</i> , 2017, 53, 3988-4003.	1.7	31
9	Hydrologic controls on hyporheic exchange in a headwater mountain stream. <i>Water Resources Research</i> , 2017, 53, 6260-6278.	1.7	34
10	Comprehensive multiyear carbon budget of a temperate headwater stream. <i>Journal of Geophysical Research G: Biogeosciences</i> , 2016, 121, 1306-1315.	1.3	40
11	Hydrogeomorphic controls on hyporheic and riparian transport in two headwater mountain streams during base flow recession. <i>Water Resources Research</i> , 2016, 52, 1479-1497.	1.7	36
12	Carbon dynamics in the hyporheic zone of a headwater mountain stream in the Cascade Mountains, Oregon. <i>Water Resources Research</i> , 2016, 52, 7556-7576.	1.7	26
13	Variations in surface water-ground water interactions along a headwater mountain stream: Comparisons between transient storage and water balance analyses. <i>Water Resources Research</i> , 2013, 49, 3359-3374.	1.7	71
14	Coupled transport and reaction kinetics control the nitrate source-sink function of hyporheic zones. <i>Water Resources Research</i> , 2012, 48, .	1.7	158
15	Dynamics of nitrate production and removal as a function of residence time in the hyporheic zone. <i>Journal of Geophysical Research</i> , 2011, 116, .	3.3	370
16	Labile dissolved organic carbon supply limits hyporheic denitrification. <i>Journal of Geophysical Research</i> , 2011, 116, .	3.3	128
17	The role of the hyporheic zone across stream networks. <i>Hydrological Processes</i> , 2011, 25, 3525-3532.	1.1	117
18	An analysis of alternative conceptual models relating hyporheic exchange flow to diel fluctuations in discharge during baseflow recession. <i>Hydrological Processes</i> , 2010, 24, 686-694.	1.1	61

#	ARTICLE	IF	CITATIONS
19	Hillslope hydrologic connectivity controls riparian groundwater turnover: Implications of catchment structure for riparian buffering and stream water sources. <i>Water Resources Research</i> , 2010, 46, .	1.7	165
20	Changes in hyporheic exchange flow following experimental wood removal in a small, low-gradient stream. <i>Water Resources Research</i> , 2009, 45, .	1.7	45
21	Hydrologic connectivity between landscapes and streams: Transferring reach- and plot-scale understanding to the catchment scale. <i>Water Resources Research</i> , 2009, 45, .	1.7	430
22	Flow velocity and the hydrologic behavior of streams during baseflow. <i>Geophysical Research Letters</i> , 2007, 34, .	1.5	57
23	Effect of morphology and discharge on hyporheic exchange flows in two small streams in the Cascade Mountains of Oregon, USA. <i>Hydrological Processes</i> , 2006, 20, 267-287.	1.1	171
24	A modelling study of hyporheic exchange pattern and the sequence, size, and spacing of stream bedforms in mountain stream networks, Oregon, USA. <i>Hydrological Processes</i> , 2006, 20, 2443-2457.	1.1	145
25	Patterns in stream longitudinal profiles and implications for hyporheic exchange flow at the H.J. Andrews Experimental Forest, Oregon, USA. <i>Hydrological Processes</i> , 2005, 19, 2931-2949.	1.1	97
26	Geomorphic controls on hyporheic exchange flow in mountain streams. <i>Water Resources Research</i> , 2003, 39, SBH 3-1-SBH 3-14.	1.7	338
27	Power-law residence time distribution in the hyporheic zone of a 2nd-order mountain stream. <i>Geophysical Research Letters</i> , 2002, 29, 18-1.	1.5	248
