#	ARTICLE	IF	CITATIONS
1	Legacy of COVID-19 infection in children: long-COVID will have a lifelong health/economic impact. Archives of Disease in Childhood, 2022, 107, e2-e2.	1.0	19
2	Risk factors for post-COVID-19 condition in previously hospitalised children using the ISARIC Global follow-up protocol: a prospective cohort study. European Respiratory Journal, 2022, 59, 2101341.	3.1	216
3	Hypotheses to explain the associations between asthma and the consequences of COVID-19 infection. Clinical and Experimental Allergy, 2022, 52, 7-9.	1.4	14
4	Studying the post-COVID-19 condition: research challenges, strategies, and importance of Core Outcome Set development. BMC Medicine, 2022, 20, 50.	2.3	72
5	The Foetal Origins of Allergy and Potential Nutritional Interventions to Prevent Disease. Nutrients, 2022, 14, 1590.	1.7	9
6	Prevalence and risk factors of post-COVID-19 condition in adults and children at 6 and 12 months after hospital discharge: a prospective, cohort study in Moscow (StopCOVID). BMC Medicine, 2022, 20, .	2.3	48
7	StopCOVID cohort: An observational study of 3,480 patients admitted to the Sechenov University hospital network in Moscow city for suspected COVID-19 infection. Clinical Infectious Diseases, 2021, 73, 1-11.	2.9	58
8	Reply to Russo et al. Clinical Infectious Diseases, 2021, 72, e1159-e1160.	2.9	0
9	Strategies and Future Opportunities for the Prevention, Diagnosis, and Management of Cow Milk Allergy. Frontiers in Immunology, 2021, 12, 608372.	2.2	31
10	Translating results from research into clinical practice. Archives of Disease in Childhood, 2021, , archdischild-2021-321887.	1.0	0
11	Incidence and risk factors for persistent symptoms in adults previously hospitalized for COVID-19. Clinical and Experimental Allergy, 2021, 51, 1107-1120.	1.4	116
12	Harmonizing allergy care—integrated care pathways and multidisciplinary approaches. World Allergy Organization Journal, 2021, 14, 100584.	1.6	11
13	Allergy education and training for physicians. World Allergy Organization Journal, 2021, 14, 100589.	1.6	5
14	Asthma/Rhinitis (The United Airway) and Allergy: Chicken or Egg; Which Comes First?. Journal of Clinical Medicine, 2020, 9, 1483.	1.0	6
15	Excessive Media Consumption About COVID-19 is Associated With Increased State Anxiety: Outcomes of a Large Online Survey in Russia. Journal of Medical Internet Research, 2020, 22, e20955.	2.1	87
16	Understanding the health-care experiences of people with sickle cell disorder transitioning from paediatric to adult services: This Sickle Cell Life, a longitudinal qualitative study. Health Services and Delivery Research, 2020, 8, 1-94.	1.4	4
17	Editorial: Human Milk Composition and Health Outcomes in Children. Frontiers in Pediatrics, 2019, 7, 319.	0.9	8
18	Statistical Approaches in the Studies Assessing Associations between Human Milk Immune Composition and Allergic Diseases: A Scoping Review. Nutrients, 2019, 11, 2416.	1.7	3

#	ARTICLE	IF	CITATIONS
19	Time to onset of improvements in Quality of Life from Temperature-controlled Laminar Airflow (TLA) in severe allergic asthma. <i>Respiratory Medicine</i> , 2019, 147, 19-25.	1.3	4
20	Reviewing the evidence on breast milk composition and immunological outcomes. <i>Nutrition Reviews</i> , 2019, 77, 541-556.	2.6	63
21	Transforming growth factor beta in human milk and allergic outcomes in children: A systematic review. <i>Clinical and Experimental Allergy</i> , 2019, 49, 1201-1213.	1.4	26
22	Paediatric asthma care in the UK: fragmented and fatally fallible. <i>British Journal of General Practice</i> , 2019, 69, 405-406.	0.7	21
23	Not being heard: barriers to high quality unplanned hospital care during young people's transition to adult services – evidence from "this sickle cell life" research. <i>BMC Health Services Research</i> , 2019, 19, 876.	0.9	25
24	Intestinal microbiota in infants at high risk for allergy: Effects of prebiotics and role in eczema development. <i>Journal of Allergy and Clinical Immunology</i> , 2018, 141, 1334-1342.e5.	1.5	128
25	Patient-reported experience measure in sickle cell disease. <i>Archives of Disease in Childhood</i> , 2018, 103, 1104-1109.	1.0	14
26	Levels of Growth Factors and IgA in the Colostrum of Women from Burundi and Italy. <i>Nutrients</i> , 2018, 10, 1216.	1.7	16
27	Effects of Bovine Immunoglobulins on Immune Function, Allergy, and Infection. <i>Frontiers in Nutrition</i> , 2018, 5, 52.	1.6	109
28	Use of temperature-controlled laminar airflow in the management of atopic asthma: clinical evidence and experience. <i>Therapeutic Advances in Respiratory Disease</i> , 2017, 11, 181-188.	1.0	10
29	Immune Components in Human Milk Are Associated with Early Infant Immunological Health Outcomes: A Prospective Three-Country Analysis. <i>Nutrients</i> , 2017, 9, 532.	1.7	59
30	Human Milk and Allergic Diseases: An Unsolved Puzzle. <i>Nutrients</i> , 2017, 9, 894.	1.7	111
31	Colostrum and Mature Human Milk of Women from London, Moscow, and Verona: Determinants of Immune Composition. <i>Nutrients</i> , 2016, 8, 695.	1.7	54
32	New patient-reported experience measure for children with allergic disease: development, validation and results from integrated care. <i>Archives of Disease in Childhood</i> , 2016, 101, 935-943.	1.0	18
33	Exposures influencing total IgA level in colostrum. <i>Journal of Developmental Origins of Health and Disease</i> , 2016, 7, 61-67.	0.7	18
34	Prebiotic-supplemented partially hydrolysed cow's milk formula for the prevention of eczema in high-risk infants: a randomized controlled trial. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2016, 71, 701-710.	2.7	84
35	Economic analysis of temperature-controlled laminar airflow (TLA) for the treatment of patients with severe persistent allergic asthma. <i>BMJ Open Respiratory Research</i> , 2016, 3, e000117.	1.2	7
36	Ready-to-use therapeutic food with elevated n-3 polyunsaturated fatty acid content, with or without fish oil, to treat severe acute malnutrition: a randomized controlled trial. <i>BMC Medicine</i> , 2015, 13, 93.	2.3	41

#	ARTICLE	IF	CITATIONS
37	Factors affecting breast milk composition and potential consequences for development of the allergic phenotype. <i>Clinical and Experimental Allergy</i> , 2015, 45, 583-601.	1.4	54
38	Fetal and early-life origins of allergy. <i>Pediatric Allergy and Immunology</i> , 2014, 25, 7-8.	1.1	5
39	Mesalazine in the initial management of severely acutely malnourished children with environmental enteric dysfunction: a pilot randomized controlled trial. <i>BMC Medicine</i> , 2014, 12, 133.	2.3	59
40	Prenatal Vitamin D Supplementation and Child Respiratory Health: A Randomised Controlled Trial. <i>PLoS ONE</i> , 2013, 8, e66627.	1.1	148
41	Nocturnal temperature controlled laminar airflow for treating atopic asthma: a randomised controlled trial. <i>Thorax</i> , 2012, 67, 215-221.	2.7	66
42	Fetal origins of asthma. <i>Seminars in Fetal and Neonatal Medicine</i> , 2012, 17, 82-91.	1.1	55
43	Shared learning for chronic conditions: a methodology for developing the Royal College of Paediatrics and Child Health (RCPCH) care pathways for children with allergies. <i>Archives of Disease in Childhood</i> , 2011, 96, i1-i5.	1.0	13
44	In this issue. <i>Pediatric Allergy and Immunology</i> , 2010, 21, 3-4.	1.1	2
45	Perinatal nutrition and immunity to infection. <i>Pediatric Allergy and Immunology</i> , 2010, 21, 564-576.	1.1	39
46	Omalizumab for childhood asthma. <i>Expert Review of Respiratory Medicine</i> , 2010, 4, 5-7.	1.0	2
47	Obesity and allergic disease: closely related epidemics of the 21st century. <i>Pediatric Allergy and Immunology</i> , 2009, 20, 305-306.	1.1	5
48	Dietary prevention of allergic diseases in infants and small children. <i>Pediatric Allergy and Immunology</i> , 2008, 19, 1-4.	1.1	205
49	Early life nutrition and allergy. <i>Early Human Development</i> , 2007, 83, 777-783.	0.8	16
50	Preventing the evolution of the allergic march towards asthma: have we found the answer?. <i>Clinical and Experimental Allergy Reviews</i> , 2006, 6, 10-14.	0.3	0
51	Nutrition and allergic disease. <i>Clinical and Experimental Allergy Reviews</i> , 2006, 6, 117-188.	0.3	67
52	A controlled trial of a school-based intervention to improve asthma management. <i>European Respiratory Journal</i> , 2006, 27, 921-928.	3.1	28
53	Preventing the evolution of the allergic march towards asthma: have we found the answer?. <i>Clinical and Experimental Allergy Reviews</i> , 2006, 6, 10-14.	0.3	0
54	Allergy Practice Worldwide: A Report by the World Allergy Organization Specialty and Training Council. <i>International Archives of Allergy and Immunology</i> , 2006, 139, 166-174.	0.9	121

#	ARTICLE	IF	CITATIONS
55	Early Immunological Influences. , 2004, 84, 102-127.		17
56	Small Size at Birth and Greater Postnatal Weight Gain. American Journal of Respiratory and Critical Care Medicine, 2004, 170, 534-540.	2.5	101
57	The early life origins of asthma and related allergic disorders. Archives of Disease in Childhood, 2004, 89, 97-102.	1.0	105
58	Ovalbumin-specific immunoglobulin G and subclass responses through the first 5 years of life in relation to duration of egg sensitization and the development of asthma. Clinical and Experimental Allergy, 2004, 34, 1542-1549.	1.4	24
59	Serum ovalbumin-specific immunoglobulin G responses during pregnancy reflect maternal intake of dietary egg and relate to the development of allergy in early infancy. Clinical and Experimental Allergy, 2004, 34, 1855-1861.	1.4	62
60	Fetal exposure to intact immunoglobulin E occurs via the gastrointestinal tract. Clinical and Experimental Allergy, 2003, 33, 306-311.	1.4	54
61	Reduced soluble CD14 levels in amniotic fluid and breast milk are associated with the subsequent development of atopy, eczema, or both. Journal of Allergy and Clinical Immunology, 2002, 109, 858-866.	1.5	137
62	Immunoregulatory molecules during pregnancy and at birth. Journal of Reproductive Immunology, 2002, 56, 19-28.	0.8	55
63	Costimulatory molecules in the developing human gastrointestinal tract: A pathway for fetal allergen priming. Journal of Allergy and Clinical Immunology, 2001, 108, 235-241.	1.5	54
64	Future aspects of pharmacological treatment to inhibit the allergic march. Pediatric Allergy and Immunology, 2001, 12, 102-107.	1.1	5
65	Asthma, wheeze and cough in 7- to 9-year-old British schoolchildren. Ambulatory Child Health, 2001, 7, 313-321.	0.1	4
66	Early life origins of asthma Potential for prediction and prevention. Nihon Shoni Arerugi Gakkaishi the Japanese Journal of Pediatric Allergy and Clinical Immunology, 2001, 15, 160-168.	0.0	0
67	Unmet needs in the treatment of asthmatic children and adolescents: 1. Clinical and Experimental Allergy, 2000, 30, 70-72.	1.4	6
68	Pre-natal sensitization in humans. Pediatric Allergy and Immunology, 2000, 11, 6-8.	1.1	28
69	Progression from allergic sensitization to asthma. Pediatric Allergy and Immunology, 2000, 11, 12-14.	1.1	25
70	Detection of house-dust-mite allergen in amniotic fluid and umbilical-cord blood. Lancet, The, 2000, 356, 1900-1902.	6.3	154
71	Fetal and neonatal IL-13 production during pregnancy and at birth and subsequent development of atopic symptoms. Journal of Allergy and Clinical Immunology, 2000, 105, 951-959.	1.5	137
72	Prospects for prediction and prevention of childhood asthma.. Nihon Shoni Arerugi Gakkaishi the Japanese Journal of Pediatric Allergy and Clinical Immunology, 2000, 14, 300-301.	0.0	0
