citing authors

#	ARTICLE	IF	CITATIONS
1	Multi attribute method implementation using a High Resolution Mass Spectrometry platform: From sample preparation to batch analysis. PLoS ONE, 2022, 17, e0262711.	2.5	13
2	Insect Cells for High-Yield Production of SARS-CoV-2 Spike Protein: Building a Virosome-Based COVID-19 Vaccine Candidate. Pharmaceutics, 2022, 14, 854.	4.5	8
3	Glycation modulates glutamatergic signaling and exacerbates Parkinson's disease-like phenotypes. Npj Parkinson's Disease, 2022, 8, 51.	5.3	15
4	Production of high-quality SARS-CoV-2 antigens: Impact of bioprocess and storage on glycosylation, biophysical attributes, and ELISA serologic tests performance. Biotechnology and Bioengineering, 2021, 118, 2202-2219.	3.3	27
5	Exploring the analytical power of the QTOF MS platform to assess monoclonal antibodies quality attributes. PLoS ONE, 2019, 14, e0219156.	2.5	9
6	Bioprocess integration for human mesenchymal stem cells: From up to downstream processing scale-up to cell proteome characterization. Journal of Biotechnology, 2017, 248, 87-98.	3.8	61
7	Bin1 and CD2AP polarise the endocytic generation of beta-amyloid. EMBO Reports, 2017, 18, 102-122.	4.5	133
8	The role of fibrinogen glycation in ATTR: evidence for chaperone activity loss in disease. Biochemical Journal, 2016, 473, 2225-2237.	3.7	4
9	Proteome response at the edge of protein aggregation. Open Biology, 2015, 5, 140221.	3.6	9
10	Transthyretin Amyloidosis: Chaperone Concentration Changes and Increased Proteolysis in the Pathway to Disease. PLoS ONE, 2015, 10, e0125392.	2.5	25
11	Insights into the molecular mechanism of protein native-like aggregation upon glycation. Biochimica Et Biophysica Acta - Proteins and Proteomics, 2013, 1834, 1010-1022.	2.3	48
12	The glyoxalase pathway: the first hundred years and beyond. Biochemical Journal, 2013, 453, 1-15.	3.7	210
13	The glyoxalase pathway in protozoan parasites. International Journal of Medical Microbiology, 2012, 302, 225-229.	3.6	54
14	The Proteome Response to Amyloid Protein Expression In Vivo. PLoS ONE, 2012, 7, e50123.	2.5	12
15	Tandem Mass Spectrometry of Peptides. , 2012, , .		3
16	Î±-Synuclein aggregation in the saliva of familial transthyretin amyloidosis: a potential biomarker. Amyloid: the International Journal of Experimental and Clinical Investigation: the Official Journal of the International Society of Amyloidosis, 2012, 19, 74-80.	3.0	10
17	The relative amounts of plasma transthyretin forms in familial transthyretin amyloidosis: A quantitative analysis by Fourier transform ion-cyclotron resonance mass spectrometry. Amyloid: the International Journal of Experimental and Clinical Investigation: the Official Journal of the International Society of Amyloidosis. 2011, 18, 191-199.	3.0	15
18	Beyond Genetic Factors in Familial Amyloidotic Polyneuropathy: Protein Glycation and the Loss of Fibrinogen's Chaperone Activity. PLoS ONE, 2011, 6, e24850.	2.5	28

#	ARTICLE	IF	CITATIONS
19	Enlightening the molecular basis of trypanothione specificity in trypanosomatids: Mutagenesis of <i>Leishmania infantum</i> glyoxalase II. <i>Experimental Parasitology</i> , 2011, 129, 402-408.	1.2	7
20	Insulin glycation by methylglyoxal results in native-like aggregation and inhibition of fibril formation. <i>BMC Biochemistry</i> , 2011, 12, 41.	4.4	87
21	A noninvasive method based on saliva to characterize transthyretin in familial amyloidotic polyneuropathy patients using FT-ICR high-resolution MS. <i>Proteomics - Clinical Applications</i> , 2010, 4, 674-678.	1.6	6
22	Protein Adducts As Prospective Biomarkers of Nevirapine Toxicity. <i>Chemical Research in Toxicology</i> , 2010, 23, 1714-1725.	3.3	42
23	Identification and quantitative analysis of human transthyretin variants in human serum by Fourier transform ion-cyclotron resonance mass spectrometry. <i>Amyloid: the International Journal of Experimental and Clinical Investigation: the Official Journal of the International Society of Amyloidosis</i> , 2009, 16, 201-207.	3.0	9
24	Protein glycation and methylglyoxal metabolism in yeast: finding peptide needles in protein haystacks. <i>FEMS Yeast Research</i> , 2008, 8, 174-181.	2.3	22
25	Extracellular methylglyoxal toxicity in <i>Saccharomyces cerevisiae</i> : role of glucose and phosphate ions. <i>Journal of Applied Microbiology</i> , 2008, 104, 1092-1102.	3.1	10
26	Protein glycation <i>in vivo</i> : functional and structural effects on yeast enolase. <i>Biochemical Journal</i> , 2008, 416, 317-326.	3.7	47
27	Yeast protein glycation <i>in vivo</i> by methylglyoxal. <i>FEBS Journal</i> , 2006, 273, 5273-5287.	4.7	67
28	Argpyrimidine, a methylglyoxal-derived advanced glycation end-product in familial amyloidotic polyneuropathy. <i>Biochemical Journal</i> , 2005, 385, 339-345.	3.7	89
29	Protein glycation in <i>Saccharomyces cerevisiae</i> . Argpyrimidine formation and methylglyoxal catabolism. <i>FEBS Journal</i> , 2005, 272, 4521-4531.	4.7	47
