SHIIIAN CANC

#	Article	IF	CITATIONS
1	Nonlinear dynamics analysis of cluster-shaped conservative flows generated from a generalized thermostatted system. Chinese Physics B, 2022, 31, 010501.	1.4	1
2	Global structures of clew-shaped conservative chaotic flows in a class of 3D one-thermostat systems. Chaos, Solitons and Fractals, 2022, 154, 111687.	5.1	2
3	Bifurcation and chaos in a smooth 3D dynamical system extended from Nosé-Hoover oscillator. Chaos, Solitons and Fractals, 2022, 158, 112016.	5.1	6
4	Pseudo-random number generator based on a generalized conservative Sprott-A system. Nonlinear Dynamics, 2021, 104, 827-844.	5.2	33
5	An Effective Approach for Constructing a Class of 4D Multicluster Conservative Chaotic Systems without External Excitation. International Journal of Bifurcation and Chaos in Applied Sciences and Engineering, 2021, 31, .	1.7	5
6	Chaotic and subharmonic oscillations in a DC–DC boost converter with PWM voltage–current hybrid controller and parallel MR load. Nonlinear Dynamics, 2020, 99, 1321-1339.	5.2	5
7	Conservative chaos and invariant tori in the modified Sprott A system. Nonlinear Dynamics, 2020, 99, 1699-1708.	5.2	32
8	A generic method for constructing <i>n</i> -fold covers of 3D conservative chaotic systems. Chaos, 2020, 30, 033103.	2.5	20
9	A new conservative system with isolated invariant tori and six-cluster chaotic flows. European Physical Journal: Special Topics, 2020, 229, 1335-1342.	2.6	9
10	Generating multicluster conservative chaotic flows from a generalized Sprott-A system. Chaos, Solitons and Fractals, 2020, 133, 109651.	5.1	24
11	Mechanical analysis and ultimate boundary estimation of the chaotic permanent magnet synchronous motor. Journal of the Franklin Institute, 2019, 356, 5378-5394.	3.4	11
12	Hidden and self-excited coexisting attractors in a Lorenz-like system with two equilibrium points. Nonlinear Dynamics, 2019, 95, 381-390.	5.2	62
13	Dynamical analysis and circuit implementation of a DC/DC single-stage boost converter with memristance load. Nonlinear Dynamics, 2018, 93, 1741-1755.	5.2	16
14	Single Crystal-Lattice-Shaped Chaotic and Quasi-Periodic Flows with Time-Reversible Symmetry. International Journal of Bifurcation and Chaos in Applied Sciences and Engineering, 2018, 28, 1830044.	1.7	10
15	Hyperchaos in a Conservative System with Nonhyperbolic Fixed Points. Complexity, 2018, 2018, 1-8.	1.6	22
16	Conservative Chaos in a Class of Nonconservative Systems: Theoretical Analysis and Numerical Demonstrations. International Journal of Bifurcation and Chaos in Applied Sciences and Engineering, 2018, 28, 1850087.	1.7	25
17	On a 3-D generalized Hamiltonian model with conservative and dissipative chaotic flows. Chaos, Solitons and Fractals, 2017, 99, 45-51.	5.1	22
18	Distinguishing Lorenz and Chen Systems Based Upon Hamiltonian Energy Theory. International Journal of Bifurcation and Chaos in Applied Sciences and Engineering, 2017, 27, 1750024.	1.7	20

Shijian Cang

#	Article	IF	CITATIONS
19	Four-dimensional autonomous dynamical systems with conservative flows: two-case study. Nonlinear Dynamics, 2017, 89, 2495-2508.	5.2	54
20	A New No-Equilibrium Chaotic System and Its Topological Horseshoe Chaos. Advances in Mathematical Physics, 2016, 2016, 1-6.	0.8	4
21	Simplified hyper-chaotic systems generating multi-wing non-equilibrium attractors. Optik, 2016, 127, 2424-2431.	2.9	37
22	Birth of one-to-four-wing chaotic attractors in a class of simplest three-dimensional continuous memristive systems. Nonlinear Dynamics, 2016, 83, 1987-2001.	5.2	28
23	A general method for exploring three-dimensional chaotic attractors with complicated topological structure based on the two-dimensional local vector field around equilibriums. Nonlinear Dynamics, 2016, 83, 1069-1078.	5.2	17
24	Chaotic behavior and circuit implementation of a fractional-order permanent magnet synchronous motor model. Journal of the Franklin Institute, 2015, 352, 2887-2898.	3.4	46
25	A Strange Double-Deck Butterfly Chaotic Attractor from a Permanent Magnet Synchronous Motor with Smooth Air Gap: Numerical Analysis and Experimental Observation. Abstract and Applied Analysis, 2014, 2014, 1-11.	0.7	3
26	Analytical and numerical investigation of a new Lorenz-like chaotic attractor with compound structures. Nonlinear Dynamics, 2014, 75, 745-760.	5.2	22
27	Projective synchronisation of fractional-order memristive systems with different structures based on active control method. International Journal of Sensor Networks, 2013, 14, 102.	0.4	3
28	Adaptive Sliding Mode Controller Design for Projective Synchronization of Different Chaotic Systems with Uncertain Terms and External Bounded Disturbances. Journal of Applied Mathematics, 2013, 2013, 1-10.	0.9	0
29	A hyperchaotic system without equilibrium. Nonlinear Dynamics, 2012, 69, 531-537.	5.2	136
30	A four-wing hyper-chaotic attractor and transient chaos generated from a new 4-D quadratic autonomous system. Nonlinear Dynamics, 2010, 59, 515-527.	5.2	90
