#	ARTICLE	IF	CITATIONS
1	Bowel Ischemia in COVID-19 Infection: One-Year Surgical Experience. <i>American Surgeon</i> , 2021, 87, 1893-1900.	0.8	12
2	Gastrointestinal Complications in Critically Ill Patients With COVID-19. <i>Annals of Surgery</i> , 2020, 272, e61-e62.	4.2	156
3	Acute Kidney Injury in Critically-ill Patients With COVID-19. <i>Annals of Surgery</i> , 2020, Publish Ahead of Print, e280-e281.	4.2	14
4	The dose-dependent relationship between blood transfusions and infections after trauma: A population-based study. <i>Journal of Trauma and Acute Care Surgery</i> , 2020, 89, 51-57.	2.1	15
5	Smoking and risk of surgical bleeding: nationwide analysis of 5,452,411 surgical cases. <i>Transfusion</i> , 2020, 60, 1689-1699.	1.6	8
6	Initial Care of the Severely Injured Patient. <i>New England Journal of Medicine</i> , 2019, 380, 763-770.	27.0	67
7	Obesity as protective against, rather than a risk factor for, postoperative <i>Clostridium difficile</i> infection: A nationwide retrospective analysis of 1,426,807 surgical patients. <i>Journal of Trauma and Acute Care Surgery</i> , 2019, 86, 1001-1009.	2.1	17
8	Case 39-2019: A 57-Year-Old Woman with Hypotension and Trauma after a Motorcycle Accident. <i>New England Journal of Medicine</i> , 2019, 381, 2462-2469.	27.0	2
9	Early Enteral Nutrition Adequacy Mitigates the Neutrophilâ€“Lymphocyte Ratio Improving Clinical Outcomes in Critically Ill Surgical Patients. <i>Nutrition in Clinical Practice</i> , 2019, 34, 148-155.	2.4	8
10	Polytrauma patients in the Netherlands and the USA: A bi-institutional comparison of processes and outcomes of care. <i>Injury</i> , 2018, 49, 104-109.	1.7	14
11	Operating at night does not increase the risk of intraoperative adverse events. <i>American Journal of Surgery</i> , 2018, 216, 19-24.	1.8	12
12	The Role of Computed Tomography in the Diagnosis of Necrotizing Soft Tissue Infections. <i>World Journal of Surgery</i> , 2018, 42, 82-87.	1.6	33
13	Do Not Blame the Resident: the Impact of Surgeon and Surgical Trainee Experience on the Occurrence of Intraoperative Adverse Events (iAEs) in Abdominal Surgery. <i>Journal of Surgical Education</i> , 2018, 75, e156-e167.	2.5	23
14	Differences in Characteristics and Outcome of Patients with Penetrating Injuries in the USA and the Netherlands: A Multiâ€“institutional Comparison. <i>World Journal of Surgery</i> , 2018, 42, 3608-3615.	1.6	22
15	Are surgeons reluctant to accurately report intraoperative adverse events? A prospective study of 1,989 patients. <i>Surgery</i> , 2018, 164, 525-529.	1.9	14
16	Intraoperative Adverse Events in Abdominal Surgery. <i>Annals of Surgery</i> , 2017, 265, 1119-1125.	4.2	52
17	Hypophosphatemia in Enterally Fed Patients in the Surgical Intensive Care Unit. <i>Nutrition in Clinical Practice</i> , 2017, 32, 252-257.	2.4	37
18	Percutaneous damage control with self-expanding foam: pre-hospital rescue from abdominal exsanguination. <i>Trauma</i> , 2016, 18, 85-91.	0.5	3

#	ARTICLE	IF	CITATIONS
19	Adequate Nutrition May Get You Home. <i>Journal of Parenteral and Enteral Nutrition</i> , 2016, 40, 37-44.	2.6	113
20	Human dose confirmation for self-expanding intra-abdominal foam. <i>Journal of Trauma and Acute Care Surgery</i> , 2015, 79, 39-47.	2.1	14
21	Diagnosis and deployment of a self-expanding foam for abdominal exsanguination. <i>Journal of Trauma and Acute Care Surgery</i> , 2015, 78, 607-613.	2.1	12
22	Chronic safety assessment of hemostatic self-expanding foam. <i>Journal of Trauma and Acute Care Surgery</i> , 2015, 79, S78-S84.	2.1	8
23	Efficacy of a prehospital self-expanding polyurethane foam for noncompressible hemorrhage under extreme operational conditions. <i>Journal of Trauma and Acute Care Surgery</i> , 2015, 78, 324-329.	2.1	27
24	Sprayable Foams Based on an Amphiphilic Biopolymer for Control of Hemorrhage Without Compression. <i>ACS Biomaterials Science and Engineering</i> , 2015, 1, 440-447.	5.2	48
25	Intraoperative Adverse Events: Risk Adjustment for Procedure Complexity and Presence of Adhesions Is Crucial. <i>Journal of the American College of Surgeons</i> , 2015, 221, 345-353.	0.5	18
26	The financial impact of intraoperative adverse events in abdominal surgery. <i>Surgery</i> , 2015, 158, 1382-1388.	1.9	29
27	Hydrophobically-modified chitosan foam: description and hemostatic efficacy. <i>Journal of Surgical Research</i> , 2015, 193, 316-323.	1.6	44
28	Delayed Laparotomy After Selective Nonoperative Management of Penetrating Abdominal Injuries. <i>World Journal of Surgery</i> , 2015, 39, 380-386.	1.6	16
29	Self-expanding foam for prehospital treatment of intra-abdominal hemorrhage. <i>Journal of Trauma and Acute Care Surgery</i> , 2014, 77, S127-S133.	2.1	29
30	Opening Pandora's box: understanding the nature, patterns, and 30-day outcomes of intraoperative adverse events. <i>American Journal of Surgery</i> , 2014, 208, 626-631.	1.8	25
31	Development of a lethal, closed-abdomen, arterial hemorrhage model in noncoagulopathic swine. <i>Journal of Surgical Research</i> , 2014, 187, 536-541.	1.6	12
32	Derivation and Validation of a Novel Severity Classification for Intraoperative Adverse Events. <i>Journal of the American College of Surgeons</i> , 2014, 218, 1120-1128.	0.5	81
33	Development of a lethal, closed-abdomen grade V hepato-portal injury model in non-coagulopathic swine. <i>Journal of Surgical Research</i> , 2013, 182, 101-107.	1.6	34
34	Self-expanding polyurethane polymer improves survival in a model of noncompressible massive abdominal hemorrhage. <i>Journal of Trauma and Acute Care Surgery</i> , 2013, 74, 1462-1467.	2.1	54
35	Aggressive early crystalloid resuscitation adversely affects outcomes in adult blunt trauma patients: An analysis of the Glue Grant database. <i>Journal of Trauma and Acute Care Surgery</i> , 2013, 74, 1215-1222.	2.1	53
36	Insertion of central venous catheters induces a hypercoagulable state. <i>Journal of Trauma and Acute Care Surgery</i> , 2012, 73, 385-390.	2.1	18

#	ARTICLE	IF	CITATIONS
37	Emergent Cricothyroidotomy in the Morbidly Obese: A Safe, No-Visualization Technique. <i>Journal of Trauma</i> , 2011, 71, 1873-1874.	2.3	6
38	Successful Selective Nonoperative Management of Abdominal Gunshot Wounds Despite Low Penetrating Trauma Volumes. <i>Archives of Surgery</i> , 2011, 146, 528.	2.2	32
39	Difficulties in managing the surgical patient who is morbidly obese. <i>Critical Care Medicine</i> , 2010, 38, S478-S482.	0.9	28
40	Diagnosis of Necrotizing Soft Tissue Infections by Computed Tomography. <i>Archives of Surgery</i> , 2010, 145, 452.	2.2	110
41	Effects of arginine vasopressin during resuscitation from hemorrhagic hypotension after traumatic brain injury*. <i>Critical Care Medicine</i> , 2006, 34, 433-438.	0.9	74
42	Ubiquitin immunoreactivity in cerebrospinal fluid after traumatic brain injury: Clinical and experimental findings. <i>Critical Care Medicine</i> , 2005, 33, 1589-1594.	0.9	43
43	Systemic Coagulation Changes Caused by Pulmonary Artery Catheters: Laboratory Findings and Clinical Correlation. <i>Journal of Trauma</i> , 2005, 59, 853-859.	2.3	18
44	Changes in intracranial pressure, coagulation, and neurologic outcome after resuscitation from experimental traumatic brain injury with hetastarch. <i>Surgery</i> , 2004, 136, 355-363.	1.9	78
