#	Article	IF	Citations
1	Differences in invasion between human smooth muscle cells from umbilical vein, saphenous vein and internal mammary artery: relation to the expression of the plasminogen activation system. Fibrinolysis and Proteolysis, 2000, 14, 358-365.	1.1	0
2	Immunohistochemical analysis of the plasminogen activation system and the matrix metalloproteinases in normal and atherosclerotic human vessels. Fibrinolysis and Proteolysis, 1999, 13, 252-258.	1.1	2
3	Progress in clinical fibrinolysis. Fibrinolysis and Proteolysis, 1997, 11, 67-84.	1.1	22
4	Urokinase and tissue-type plasminogen activator stimulate human vascular smooth muscle cell migration. Fibrinolysis, 1996, 10, 75-78.	0.5	6
5	Introduction of lysine and clot binding properties in the kringle one domain of tissue-type plasminogen activator.. Journal of Biological Chemistry, 1993, 268, 18496-18501.	3.4	7
6	Modulation of activities and RNA level of the components of the plasminogen activation system during fusion of human myogenic satellite cells in vitro. Developmental Biology, 1992, 151, 166-175.	2.0	41
7	Endotoxin induction of plasminogen activator and plasminogen activator inhibitor type 1 mRNA in rat tissues in vivo.. Journal of Biological Chemistry, 1990, 265, 15560-15563.	3.4	134
8	Plasminogen activators in (pre)malignant conditions of the colorectum. European Journal of Cancer & Clinical Oncology, 1989, 25, 565-569.	0.7	10
9	Plasminogen activator activity and composition in human colorectal carcinomas. Fibrinolysis, 1987, 1, 57-62.	0.5	15
10	Assignment of the human tissue-type plasminogen activator gene (PLAT) to chromosome 8. Human Genetics, 1986, 72, 153-6.	3.8	21
11	Quantitative analysis of the composition of mixtures of one-chain and two-chain tissue-type plasminogen activator with a spectrophotometric method. Thrombosis Research, 1985, 39, 281-288.	1.7	19
12	Differences in effects of fibrin(ogen) fragments on the activation of 1-glu-plasminogen and 442-VAL-plasminogen by tissue-type plasminogen activator. Thrombosis Research, 1983, 32, 87-92.	1.7	23
13	Inhibition of tissue-type plasminogen activator by conditioned medium from cultured human and porcine vascular endothelial cells. Biochemical and Biophysical Research Communications, 1983, 110, 392-398.	2.1	94
14	Activation of plasminogen by tissue activator is increased specifically in the presence of certain soluble fibrin(ogen) fragments. Thrombosis Research, 1982, 27, 377-385.	1.7	104
