citing authors

#	ARTICLE	IF	CITATIONS
1	Controlled workplace charging of electric vehicles: The impact of rate schedules on transformer aging. <i>Applied Energy</i> , 2020, 276, 115352.	10.1	35
2	Disaggregating solar generation behind individual meters in real time. , 2018, , .		39
3	A common data architecture for energy data analytics. , 2017, , .		8
4	Optimized Risk-Aware Nomination Strategy in Demand Response Markets. , 2016, , .		2
5	Estimating Behind-the-meter Solar Generation with Existing Measurement Infrastructure. , 2016, , .		21
6	Characterization of demand response in the commercial, industrial, and residential sectors in the United States. <i>Wiley Interdisciplinary Reviews: Energy and Environment</i> , 2016, 5, 288-304.	4.1	20
7	Linking measurements and models in commercial buildings: A case study for model calibration and demand response strategy evaluation. <i>Energy and Buildings</i> , 2016, 124, 222-235.	6.7	47
8	How Baseline Model Implementation Choices Affect Demand Response Assessments. <i>Journal of Solar Energy Engineering, Transactions of the ASME</i> , 2015, 137, .	1.8	10
9	Estimating the benefits of electric vehicle smart charging at non-residential locations: A data-driven approach. <i>Applied Energy</i> , 2015, 155, 515-525.	10.1	103
10	A methodology for estimating the capacity value of demand response. , 2014, , .		13
11	Field demonstration of automated demand response for both winter and summer events in large buildings in the Pacific Northwest. <i>Energy Efficiency</i> , 2013, 6, 671-684.	2.8	14
12	Demand Response for Ancillary Services. <i>IEEE Transactions on Smart Grid</i> , 2013, 4, 1988-1995.	9.0	264
13	Understanding the Effect of Baseline Modeling Implementation Choices on Analysis of Demand Response Performance. , 2013, , .		2
14	Understanding the Effect of Baseline Modeling Implementation Choices on Analysis of Demand Response Performance. , 2012, , .		8
15	Examining uncertainty in demand response baseline models and variability in automated responses to dynamic pricing. , 2011, , .		57
16	Quantifying Changes in Building Electricity Use, With Application to Demand Response. <i>IEEE Transactions on Smart Grid</i> , 2011, 2, 507-518.	9.0	253
17	Variability in automated responses of commercial buildings and industrial facilities to dynamic electricity prices. <i>Energy and Buildings</i> , 2011, 43, 3322-3330.	6.7	63
18	Utilizing Automated Demand Response in commercial buildings as non-spinning reserve product for ancillary services markets. , 2011, , .		25

#	ARTICLE	IF	CITATIONS
19	Characterizing the Response of Commercial and Industrial Facilities to Dynamic Pricing Signals From the Utility. , 2010, , .		11
20	Study on Auto-DR and pre-cooling of commercial buildings with thermal mass in California. Energy and Buildings, 2010, 42, 967-975.	6.7	132
21	Statistical analysis of baseline load models for non-residential buildings. Energy and Buildings, 2009, 41, 374-381.	6.7	99
