#	ARTICLE	IF	CITATIONS
1	Sociability as a personality trait in animals: methods, causes and consequences. <i>Biological Reviews</i> , 2022, 97, 802-816.	4.7	53
2	Societal extinction of species. <i>Trends in Ecology and Evolution</i> , 2022, 37, 411-419.	4.2	26
3	Using high-resolution contact networks to evaluate SARS-CoV-2 transmission and control in large-scale multi-day events. <i>Nature Communications</i> , 2022, 13, 1956.	5.8	8
4	Social networks of the greater horseshoe bat during the hibernation season: a landscape-scale case study. <i>Animal Behaviour</i> , 2022, 188, 25-34.	0.8	1
5	Multiple spatial behaviours govern social network positions in a wild ungulate. <i>Ecology Letters</i> , 2021, 24, 676-686.	3.0	38
6	Social networks strongly predict the gut microbiota of wild mice. <i>ISME Journal</i> , 2021, 15, 2601-2613.	4.4	64
7	Exploring the causes and consequences of cooperative behaviour in wild animal populations using a social network approach. <i>Biological Reviews</i> , 2021, 96, 2355-2372.	4.7	10
8	Cognition and covariance in the producer–scrounger game. <i>Journal of Animal Ecology</i> , 2021, 90, 2497-2509.	1.3	10
9	The long reach of family ties. <i>Science</i> , 2021, 373, 274-275.	6.0	1
10	Recognising the key role of individual recognition in social networks. <i>Trends in Ecology and Evolution</i> , 2021, 36, 1024-1035.	4.2	14
11	Unifying spatial and social network analysis in disease ecology. <i>Journal of Animal Ecology</i> , 2021, 90, 45-61.	1.3	68
12	Animal behavior: Innovation in the city. <i>Current Biology</i> , 2021, 31, R1122-R1124.	1.8	1
13	Assessing information-sharing networks within small-scale fisheries and the implications for conservation interventions. <i>Royal Society Open Science</i> , 2021, 8, 211240.	1.1	3
14	Drivers of passive leadership in wild songbirds: species-level differences and spatio-temporally dependent intraspecific effects. <i>Behavioral Ecology and Sociobiology</i> , 2021, 75, .	0.6	1
15	Handgrip Strength Is Associated With Hippocampal Volume and White Matter Hyperintensities in Major Depression and Healthy Controls: A UK Biobank Study. <i>Psychosomatic Medicine</i> , 2020, 82, 39-46.	1.3	44
16	Considering Complexity: Animal Social Networks and Behavioural Contagions. <i>Trends in Ecology and Evolution</i> , 2020, 35, 100-104.	4.2	44
17	Using a real-world network to model localized COVID-19 control strategies. <i>Nature Medicine</i> , 2020, 26, 1616-1622.	15.2	191
18	Exploring the Impact of Internet Use on Memory and Attention Processes. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 9481.	1.2	16

#	ARTICLE	IF	CITATIONS
19	Multiple factors affect discrimination learning performance, but not between-individual variation, in wild mixed-species flocks of birds. <i>Royal Society Open Science</i> , 2020, 7, 192107.	1.1	16
20	iEcology: Harnessing Large Online Resources to Generate Ecological Insights. <i>Trends in Ecology and Evolution</i> , 2020, 35, 630-639.	4.2	129
21	Familiarity breeds success: pairs that meet earlier experience increased breeding performance in a wild bird population. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2020, 287, 20201554.	1.2	14
22	Partner's age, not social environment, predicts extrapair paternity in wild great tits (<i>Parus major</i>). <i>Behavioral Ecology</i> , 2019, 30, 1782-1793.	1.0	10
23	Response to Perrier and Charmantier: On the importance of time scales when studying adaptive evolution. <i>Evolution Letters</i> , 2019, 3, 248-253.	1.6	1
24	The "online brain" how the Internet may be changing our cognition. <i>World Psychiatry</i> , 2019, 18, 119-129.	4.8	248
25	Social isolation and physical activity mediate associations between free bus travel and wellbeing among older adults in England. <i>Journal of Transport and Health</i> , 2019, 13, 274-284.	1.1	15
26	Predators attacking virtual prey reveal the costs and benefits of leadership. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2019, 116, 8925-8930.	3.3	54
27	Grip Strength Is Associated With Cognitive Performance in Schizophrenia and the General Population: A UK Biobank Study of 476559 Participants. <i>Schizophrenia Bulletin</i> , 2018, 44, 728-736.	2.3	62
28	Association Between Muscular Strength and Cognition in People With Major Depression or Bipolar Disorder and Healthy Controls. <i>JAMA Psychiatry</i> , 2018, 75, 740.	6.0	54
29	The Validity and Value of Self-reported Physical Activity and Accelerometry in People With Schizophrenia: A Population-Scale Study of the UK Biobank. <i>Schizophrenia Bulletin</i> , 2018, 44, 1293-1300.	2.3	77
30	Movement and conformity interact to establish local behavioural traditions in animal populations. <i>PLoS Computational Biology</i> , 2018, 14, e1006647.	1.5	12
31	Personality shapes pair bonding in a wild bird social system. <i>Nature Ecology and Evolution</i> , 2018, 2, 1696-1699.	3.4	39
32	How Do Birds Cope with Losing Members of Their Group?. <i>Frontiers for Young Minds</i> , 2018, 6, .	0.8	0
33	Spatial, temporal and individual-based differences in nest-site visits and subsequent reproductive success in wild great tits. <i>Journal of Avian Biology</i> , 2018, 49, e01740.	0.6	15
34	Male great tits assort by personality during the breeding season. <i>Animal Behaviour</i> , 2017, 128, 21-32.	0.8	27
35	Wild birds respond to flockmate loss by increasing their social network associations to others. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2017, 284, 20170299.	1.2	50
36	Recent natural selection causes adaptive evolution of an avian polygenic trait. <i>Science</i> , 2017, 358, 365-368.	6.0	161

#	ARTICLE	IF	CITATIONS
37	Indirectly connected: simple social differences can explain the causes and apparent consequences of complex social network positions. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2017, 284, 20171939.	1.2	30
38	Individual variation in winter supplementary food consumption and its consequences for reproduction in wild birds. <i>Journal of Avian Biology</i> , 2016, 47, 678-689.	0.6	32
39	Social carry-over effects underpin trans-seasonally linked structure in a wild bird population. <i>Ecology Letters</i> , 2016, 19, 1324-1332.	3.0	88
40	Nonlethal predator effects on the turn-over of wild bird flocks. <i>Scientific Reports</i> , 2016, 6, 33476.	1.6	23
41	Pathways of information transmission among wild songbirds follow experimentally imposed changes in social foraging structure. <i>Biology Letters</i> , 2016, 12, 20160144.	1.0	55
42	Mobile Phone Ownership and Endorsement of "Health" Among People With Psychosis: A Meta-analysis of Cross-sectional Studies. <i>Schizophrenia Bulletin</i> , 2016, 42, 448-455.	2.3	313
43	Experimental manipulation of avian social structure reveals segregation is carried over across contexts. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2015, 282, 20142350.	1.2	54
44	The role of social and ecological processes in structuring animal populations: a case study from automated tracking of wild birds. <i>Royal Society Open Science</i> , 2015, 2, 150057.	1.1	91
45	The influence of nonrandom extra-pair paternity on heritability estimates derived from wild pedigrees. <i>Evolution; International Journal of Organic Evolution</i> , 2015, 69, 1336-1344.	1.1	42
46	Inferring social structure from temporal data. <i>Behavioral Ecology and Sociobiology</i> , 2015, 69, 857-866.	0.6	86
47	Consistent individual differences in the social phenotypes of wild great tits, <i>Parus major</i> . <i>Animal Behaviour</i> , 2015, 108, 117-127.	0.8	137
48	Experimental Evidence that Social Relationships Determine Individual Foraging Behavior. <i>Current Biology</i> , 2015, 25, 3138-3143.	1.8	73
