477  
citing authors

#	ARTICLE	IF	CITATIONS
1	Spatial release from energetic and informational masking in a selective speech identification task. Journal of the Acoustical Society of America, 2008, 123, 4369-4379.	0.5	116
2	Accurate Sound Localization in Reverberant Environments Is Mediated by Robust Encoding of Spatial Cues in the Auditory Midbrain. Neuron, 2009, 62, 123-134.	3.8	78
3	The influence of spatial separation on divided listening. Journal of the Acoustical Society of America, 2006, 120, 1506-1516.	0.5	74
4	Disentangling the effects of spatial cues on selection and formation of auditory objects. Journal of the Acoustical Society of America, 2008, 124, 2224-2235.	0.5	58
5	Spatial release from energetic and informational masking in a divided speech identification task. Journal of the Acoustical Society of America, 2008, 123, 4380-4392.	0.5	45
6	Effect of source spectrum on sound localization in an everyday reverberant room. Journal of the Acoustical Society of America, 2011, 130, 324-333.	0.5	45
7	Limitations on Monaural and Binaural Temporal Processing in Bilateral Cochlear Implant Listeners. JARO - Journal of the Association for Research in Otolaryngology, 2015, 16, 641-652.	0.9	36
8	Interaural Level Differences Do Not Suffice for Restoring Spatial Release from Masking in Simulated Cochlear Implant Listening. PLoS ONE, 2012, 7, e45296.	1.1	26
9	Developmental Conductive Hearing Loss Reduces Modulation Masking Release. Trends in Hearing, 2016, 20, 233121651667625.	0.7	18
10	Across-frequency combination of interaural time difference in bilateral cochlear implant listeners. Frontiers in Systems Neuroscience, 2014, 8, 22.	1.2	17
11	Comodulation masking release in speech identification with real and simulated cochlear-implant hearing. Journal of the Acoustical Society of America, 2012, 131, 1315-1324.	0.5	16
12	Simulations of cochlear-implant speech perception in modulated and unmodulated noise. Journal of the Acoustical Society of America, 2010, 128, 870-880.	0.5	13
13	Speech Perception in Noise with a Harmonic Complex Excited Vocoder. JARO - Journal of the Association for Research in Otolaryngology, 2014, 15, 265-278.	0.9	12
14	FORUM: Remote testing for psychological and physiological acoustics. Journal of the Acoustical Society of America, 2022, 151, 3116-3128.	0.5	12
15	Spatial Release From Informational Masking: Evidence From Functional Near Infrared Spectroscopy. Trends in Hearing, 2018, 22, 233121651881746.	0.7	11
16	The intelligibility of pointillistic speech. Journal of the Acoustical Society of America, 2009, 126, EL196-EL201.	0.5	8
17	Hemodynamic Responses Link Individual Differences in Informational Masking to the Vicinity of Superior Temporal Gyrus. Frontiers in Neuroscience, 2021, 15, 675326.	1.4	7
18	Conductive hearing loss during development does not appreciably alter the sharpness of cochlear tuning. Scientific Reports, 2021, 11, 3955.	1.6	5

#	ARTICLE	IF	CITATIONS
19	Remote testing for psychological and physiological acoustics: Initial report of the P&P Task Force on Remote Testing. Proceedings of Meetings on Acoustics, 2020, , .	0.3	5
20	Population rate-coding predicts correctly that human sound localization depends on sound intensity. ELife, 2019, 8, .	2.8	5
21	Effect of source location and listener location on ILD cues in a reverberant room. Journal of the Acoustical Society of America, 2004, 115, 2598-2598.	0.5	4
22	Teaching Electronic Circuit Fundamentals via Remote Laboratory Curriculum. Biomedical Engineering Education, 2021, 1, 105-108.	0.6	3
23	An auditory-visual tradeoff in susceptibility to clutter. Scientific Reports, 2021, 11, 23540.	1.6	3
24	Quantifying Neuronal Information Flow in Response to Frequency and Intensity Changes in the Auditory Cortex. , 2018, 2018, 1367-1371.		2
25	Neural and Behavioral Sensitivities to Azimuth Degrade with Distance in Reverberant Environments. , 2007, , 505-516.		2
