

Katie Laird

List of Publications by Citations

Source: <https://exaly.com/author-pdf/1046659/katie-laird-publications-by-citations.pdf>

Version: 2024-04-19

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
39	Vapour phase: a potential future use for essential oils as antimicrobials?. <i>Letters in Applied Microbiology</i> , 2012 , 54, 169-74	2.9	89
38	Shape-dependent antibacterial activity of silver nanoparticles on Escherichia coli and Enterococcus faecium bacterium. <i>Applied Surface Science</i> , 2017 , 424, 310-315	6.7	54
37	Reduction of surface contamination and biofilms of Enterococcus sp. and Staphylococcus aureus using a citrus-based vapour. <i>Journal of Hospital Infection</i> , 2012 , 80, 61-6	6.9	33
36	The use of Citri-VI □ An antimicrobial citrus essential oil vapour for the control of Penicillium chrysogenum, Aspergillus niger and Alternaria alternata in vitro and on food. <i>Food Research International</i> , 2012 , 47, 310-314	7	33
35	Synchronous application of antibiotics and essential oils: dual mechanisms of action as a potential solution to antibiotic resistance. <i>Critical Reviews in Microbiology</i> , 2018 , 44, 414-435	7.8	26
34	The effect of low-temperature laundering and detergents on the survival of Escherichia coli and Staphylococcus aureus on textiles used in healthcare uniforms. <i>Journal of Applied Microbiology</i> , 2017 , 123, 280-286	4.7	21
33	Characterisation and screening of antimicrobial essential oil components against clinically important antibiotic-resistant bacteria using thin layer chromatography-direct bioautography hyphenated with GC-MS, LC-MS and NMR. <i>Phytochemical Analysis</i> , 2019 , 30, 121-131	3.4	20
32	From ward to washer: The survival of Clostridium difficile spores on hospital bed sheets through a commercial UK NHS healthcare laundry process. <i>Infection Control and Hospital Epidemiology</i> , 2018 , 39, 1406-1411	2	18
31	The role of textiles as fomites in the healthcare environment: a review of the infection control risk. <i>PeerJ</i> , 2020 , 8, e9790	3.1	14
30	Washing uniforms at home: adherence to hospital policy. <i>Nursing Standard (Royal College of Nursing (Great Britain): 1987)</i> , 2015 , 29, 37-43	1.1	12
29	A Multifactorial Comparison of Ternary Combinations of Essential Oils in Topical Preparations to Current Antibiotic Prescription Therapies for the Control of Acne Vulgaris-Associated Bacteria. <i>Phytotherapy Research</i> , 2017 , 31, 410-417	6.7	11
28	Structure-activity modelling of essential oils, their components, and key molecular parameters and descriptors. <i>Molecular and Cellular Probes</i> , 2018 , 38, 25-30	3.3	10
27	From formulation to in vivo model: A comprehensive study of a synergistic relationship between vancomycin, carvacrol, and cuminaldehyde against Enterococcus faecium. <i>Phytotherapy Research</i> , 2020 , 34, 1638-1649	6.7	7
26	Chemical Synthesis of Copper Nanospheres and Nanocubes and Their Antibacterial Activity Against Escherichia coli and Enterococcus sp.. <i>Acta Metallurgica Sinica (English Letters)</i> , 2017 , 30, 29-35	2.5	7
25	Evaluating the link between the management of clinical waste in the National Health Service (NHS) and the risk of the spread of infections: A case study of three hospitals in England. <i>International Journal of Hygiene and Environmental Health</i> , 2010 , 213, 432-6	6.9	7
24	The Stability of Model Human Coronaviruses on Textiles in the Environment and during Health Care Laundering. <i>MSphere</i> , 2021 , 6,	5	7
23	Identification and quantification of the antimicrobial components of a citrus essential oil vapor. <i>Natural Product Communications</i> , 2012 , 7, 103-7	0.9	7

22	Interactive health-hygiene education for early years: the creation and evaluation of learning resources to improve understanding of handwashing practice. <i>International Journal of Early Years Education</i> , 2019 , 27, 374-390	0.7	5
21	Reduction of Legionella spp. in water and in soil by a citrus plant extract vapor. <i>Applied and Environmental Microbiology</i> , 2014 , 80, 6031-6	4.8	4
20	Growth advantage in stationary phase phenomenon in Gram-positive bacteria. <i>Journal of Hospital Infection</i> , 2011 , 78, 73-5	6.9	4
19	Improving young children's handwashing behaviour and understanding of germs: The impact of A Germ's Journey educational resources in schools and public spaces. <i>PLoS ONE</i> , 2020 , 15, e0242134	3.7	4
18	Development of a silver-based dual-function antimicrobial laundry additive and textile coating for the decontamination of healthcare laundry. <i>Journal of Applied Microbiology</i> , 2021 , 130, 1012-1022	4.7	4
17	Microencapsulation for improved mosquitoes repellent efficacy of cotton fabrics. <i>IOP Conference Series: Materials Science and Engineering</i> , 2020 , 827, 012056	0.4	3
16	The effect of climbing chalk powder on the infectivity of human coronavirus OC43. <i>Letters in Applied Microbiology</i> , 2021 , 72, 725-729	2.9	3
15	Microemulsification of essential oils for the development of antimicrobial and mosquito repellent functional coatings for textiles. <i>Journal of Applied Microbiology</i> , 2021 , 131, 2808-2820	4.7	3
14	The role of protective clothing in healthcare and its decontamination 2014 , 398-412		2
13	Children and handwashing: Developing a resource to promote health and well-being in low and middle income countries. <i>Health Education Journal</i> , 2020 , 79, 123-137	1.5	2
12	Morphological changes in Enterococcus faecium on exposure to Citrus essential oils in vapor phase as determined by TEM, SEM and AFM. <i>Journal of Essential Oil Research</i> , 2012 , 24, 181-185	2.3	1
11	Synergistic Combinations of Antibiotics with Cumin, Oregano and Rosewood Oils as a Strategy to Preserve the Antibiotic Repertoire. <i>Current Traditional Medicine</i> , 2019 , 5, 337-353	0.8	1
10	The role of protective clothing in healthcare and its decontamination 2020 , 209-226		1
9	Investigation of the stability and risks of fomite transmission of human coronavirus OC43 on leather. <i>FEMS Microbiology Letters</i> , 2021 , 368,	2.9	1
8	Identification and Quantification of the Antimicrobial Components of a Citrus Essential Oil Vapor. <i>Natural Product Communications</i> , 2012 , 7, 1934578X1200700	0.9	0
7	Evaluating approaches to designing effective Co-Created hand-hygiene interventions for children in India, Sierra Leone and the UK. <i>PLoS ONE</i> , 2020 , 15, e0239234	3.7	0
6	Antimicrobial textiles for medical environments 2016 , 249-262		0
5	Porous surfaces: stability and recovery of coronaviruses.. <i>Interface Focus</i> , 2022 , 12, 20210039	3.9	0

- 4 Evaluating approaches to designing effective Co-Created hand-hygiene interventions for children in India, Sierra Leone and the UK **2020**, 15, e0239234
- 3 Evaluating approaches to designing effective Co-Created hand-hygiene interventions for children in India, Sierra Leone and the UK **2020**, 15, e0239234
- 2 Evaluating approaches to designing effective Co-Created hand-hygiene interventions for children in India, Sierra Leone and the UK **2020**, 15, e0239234
- 1 Evaluating approaches to designing effective Co-Created hand-hygiene interventions for children in India, Sierra Leone and the UK **2020**, 15, e0239234
