#	Article	IF	Citations
1	Repeated endo-tracheal tube disconnection generates pulmonary edema in a model of volume overload: an experimental study. Critical Care, 2022, 26, 47.	2.5	4
2	Impact of Reverse Triggering Dyssynchrony during Lung-Protective Ventilation on Diaphragm Function: An Experimental Model. American Journal of Respiratory and Critical Care Medicine, 2022, 205, 663-673.	2.5	14
3	Role of Positive End-Expiratory Pressure and Regional Transpulmonary Pressure in Asymmetrical Lung Injury. American Journal of Respiratory and Critical Care Medicine, 2021, 203, 969-976.	2.5	11
4	Embryonic-Derived Mybâˆ' Macrophages Enhance Bacterial Clearance and Improve Survival in Rat Sepsis. International Journal of Molecular Sciences, 2021, 22, 3190.	1.8	6
5	Positive End-Expiratory Pressure, Pleural Pressure, and Regional Compliance during Pronation. An Experimental Study. American Journal of Respiratory and Critical Care Medicine, 2021, 203, 1266-1274.	2.5	46
6	Human Umbilical Cord Mesenchymal Stromal Cells Attenuate Systemic Sepsis in Part by Enhancing Peritoneal Macrophage Bacterial Killing <i>via</i> Heme Oxygenase-1 Induction in Rats. Anesthesiology, 2020, 132, 140-154.	1.3	16
7	Î±-Tocopherol Transfer Protein Enhances Î±-Tocopherol Protective Effects in Lung A549 Cells. American Journal of Respiratory Cell and Molecular Biology, 2020, 62, 810-813.	1.4	2
8	Regional Ventilation Displayed by Electrical Impedance Tomography as an Incentive to Decrease Positive End-Expiratory Pressure. American Journal of Respiratory and Critical Care Medicine, 2019, 200, 933-937.	2.5	41
9	Overexpression of IL-10 Enhances the Efficacy of Human Umbilical-Cord-Derived Mesenchymal Stromal Cells in E. coli Pneumosepsis. Journal of Clinical Medicine, 2019, 8, 847.	1.0	33
10	Imaging the Injured Lung. Anesthesiology, 2019, 131, 716-749.	1.3	29
11	Driving Pressure Is Associated with Outcome during Assisted Ventilation in Acute Respiratory Distress Syndrome. Anesthesiology, 2019, 131, 594-604.	1.3	71
12	Impact of spontaneous breathing during mechanical ventilation in acute respiratory distress syndrome. Current Opinion in Critical Care, 2019, 25, 192-198.	1.6	61
13	Reply to Santini et al.: High Positive End-Expiratory Pressure: Only a Dam against Edema Formation? Probably Not (Again). American Journal of Respiratory and Critical Care Medicine, 2019, 199, 544-544.	2.5	0
14	Diaphragmatic myotrauma: a mediator of prolonged ventilation and poor patient outcomes in acute respiratory failure. Lancet Respiratory Medicine,the, 2019, 7, 90-98.	5.2	139
15	Could nanotechnology make vitamin E therapeutically effective?. American Journal of Physiology - Lung Cellular and Molecular Physiology, 2019, 316, L1-L5.	1.3	5
16	Impact of Altered Airway Pressure on Intracranial Pressure, Perfusion, and Oxygenation: A Narrative Review. Critical Care Medicine, 2019, 47, 254-263.	0.4	21
17	Mechanical Ventilation Induces Desensitization of Lung Axl Tyrosine Kinase Receptors. Anesthesiology, 2018, 129, 143-153.	1.3	5
18	Unstable Inflation Causing Injury. Insight from Prone Position and Paired Computed Tomography Scans. American Journal of Respiratory and Critical Care Medicine, 2018, 198, 197-207.	2.5	32

#	Article	IF	Citations
19	High Positive End-Expiratory Pressure Renders Spontaneous Effort Noninjurious. American Journal of Respiratory and Critical Care Medicine, 2018, 197, 1285-1296.	2.5	156
20	Esophageal Manometry and Regional Transpulmonary Pressure in Lung Injury. American Journal of Respiratory and Critical Care Medicine, 2018, 197, 1018-1026.	2.5	161
21	Hypercapnic Acidosis Regulates Mer Tyrosine Kinase Receptor Shedding and Activity. American Journal of Respiratory Cell and Molecular Biology, 2018, 58, 132-134.	1.4	1
22	Unproven and Expensive before Proven and Cheap: Extracorporeal Membrane Oxygenation versus Prone Position in Acute Respiratory Distress Syndrome. American Journal of Respiratory and Critical Care Medicine, 2018, 197, 991-993.	2.5	42
23	Continuous Negative Abdominal Pressure Reduces Ventilator-induced Lung Injury in a Porcine Model. Anesthesiology, 2018, 129, 163-172.	1.3	20
24	Understanding spontaneous vs. ventilator breaths: impact and monitoring. Intensive Care Medicine, 2018, 44, 2235-2238.	3.9	25
25	Continuous Negative Abdominal Pressure Recruits Lungs at Lower Distending Pressures. American Journal of Respiratory and Critical Care Medicine, 2018, 197, 534-537.	2.5	11
26	Mechanical Ventilationâ€“induced Diaphragm Atrophy Strongly Impacts Clinical Outcomes. American Journal of Respiratory and Critical Care Medicine, 2018, 197, 204-213.	2.5	441
27	Declaration of conflicts of interest: a â€˜crookedâ€™ line towards scientific integrity. Intensive Care Medicine, 2018, 44, 1732-1734.	3.9	1
28	Reverse Triggering Causes an Injurious Inflation Pattern during Mechanical Ventilation. American Journal of Respiratory and Critical Care Medicine, 2018, 198, 1096-1099.	2.5	42
29	Negative trials in critical care: why most research is probably wrong. Lancet Respiratory Medicine,the, 2018, 6, 659-660.	5.2	61
30	Continuous negative abdominal pressure: mechanism of action and comparison with prone position. Journal of Applied Physiology, 2018, 125, 107-116.	1.2	13
31	Abrupt Deflation after Sustained Inflation Causes Lung Injury. American Journal of Respiratory and Critical Care Medicine, 2018, 198, 1165-1176.	2.5	39
32	F<scp>ifty</scp> Y<scp>ears of</scp> R<scp>esearch in</scp> ARDS.Insight into Acute Respiratory Distress Syndrome. From Models to Patients. American Journal of Respiratory and Critical Care Medicine, 2017, 196, 18-28.	2.5	55
33	Volume-controlled Ventilation Does Not Prevent Injurious Inflation during Spontaneous Effort. American Journal of Respiratory and Critical Care Medicine, 2017, 196, 590-601.	2.5	117
34	Î±-Tocopherol transfer protein mediates protective hypercapnia in murine ventilator-induced lung injury. Thorax, 2017, 72, 538-549.	2.7	13
35	Adverse Heartâ€“Lung Interactions in Ventilator-induced Lung Injury. American Journal of Respiratory and Critical Care Medicine, 2017, 196, 1411-1421.	2.5	55
36	Acute respiratory distress syndrome. BMJ: British Medical Journal, 2017, 359, j5055.	2.4	15

#	Article	IF	Citations
37	Tidal changes on CT and progression of ARDS. Thorax, 2017, 72, 981-989.	2.7	39
38	F<scp>ifty</scp> Y<scp>ears of</scp> R<scp>esearch in</scp> ARDS. Spontaneous Breathing during Mechanical Ventilation. Risks, Mechanisms, and Management. American Journal of Respiratory and Critical Care Medicine, 2017, 195, 985-992.	2.5	250
39	Visualizing the Propagation of Acute Lung Injury. Anesthesiology, 2016, 124, 121-131.	1.3	25
40	Spontaneous Effort During Mechanical Ventilation: Maximal Injury With Less Positive End-Expiratory Pressure*. Critical Care Medicine, 2016, 44, e678-e688.	0.4	142
41	Mild loss of lung aeration augments stretch in healthy lung regions. Journal of Applied Physiology, 2016, 120, 444-454.	1.2	13
42	What do we treat when we treat ARDS?. Intensive Care Medicine, 2016, 42, 284-286.	3.9	1
43	Standardized Intensive Care. Protocol Misalignment and Impact Misattribution. American Journal of Respiratory and Critical Care Medicine, 2016, 193, 17-22.	2.5	27
44	Hypocapnia and Hypercapnia. , 2016, , 1527-1546.e8.		6
45	Journal-related Activities and Other Special Activities at the 2015 American Society of Anesthesiologists Annual Meeting. Anesthesiology, 2015, 123, 750-758.	1.3	2
46	In Reply. Anesthesiology, 2015, 122, 473-474.	1.3	0
47	Anesthetics and Lung Injury. Anesthesiology, 2015, 123, 251-252.	1.3	0
48	Mechanical Ventilation Induces Neutrophil Extracellular Trap Formation. Anesthesiology, 2015, 122, 864-875.	1.3	72
49	Hypercapnia. Current Opinion in Critical Care, 2015, 21, 7-12.	1.6	17
50	Oxygen Delivery and Consumption Are Independent: Evidence from Venoarterial Extracorporeal Membrane Oxygenation in Resuscitated Children. American Journal of Respiratory and Critical Care Medicine, 2015, 192, 765-767.	2.5	0
51	Ventilator-Associated Lung Injury. , 2015, , 917-945.		0
52	Evolution of Diaphragm Thickness during Mechanical Ventilation. Impact of Inspiratory Effort. American Journal of Respiratory and Critical Care Medicine, 2015, 192, 1080-1088.	2.5	391
53	Measuring diaphragm thickness with ultrasound in mechanically ventilated patients: feasibility, reproducibility and validity. Intensive Care Medicine, 2015, 41, 642-649.	3.9	286
54	Permissive Hypercapnia. , 2015, , 727-742.		1

#	Article	IF	Citations
55	Physiologic Responsiveness Should Guide Entry into Randomized Controlled Trials. American Journal of Respiratory and Critical Care Medicine, 2015, 192, 1416-1419.	2.5	45
56	Mechanical Ventilation, Permissive Hypercapnia. , 2015, , 928-933.		0
57	Lung arginase expression and activity is increased in cystic fibrosis mouse models. Journal of Applied Physiology, 2014, 117, 284-288.	1.2	11
58	Vasopressin improves survival compared with epinephrine in a neonatal piglet model of asphyxial cardiac arrest. Pediatric Research, 2014, 75, 738-748.	1.1	27
59	Compartmentalization of Lung Injuryâ€"Atelectasis Versus Overstretch*. Critical Care Medicine, 2014, 42, 223-224.	0.4	3
60	Hypercapnia attenuates ventilatorâ€induced lung injury via a disintegrin and metalloproteaseâ€17. Journal of Physiology, 2014, 592, 4507-4521.	1.3	24
61	Withholding and withdrawing treatment in Canada: implications of the Supreme Court of Canadaâ€™s decision in the <i>Rasouli</i> case. Cmaj, 2014, 186, E622-E626.	0.9	12
62	Oxygenation Response to Positive End-Expiratory Pressure Predicts Mortality in Acute Respiratory Distress Syndrome. A Secondary Analysis of the LOVS and ExPress Trials. American Journal of Respiratory and Critical Care Medicine, 2014, 190, 70-76.	2.5	160
63	Lung-protective Ventilation in the Operating Room. Anesthesiology, 2014, 121, 184-188.	1.3	47
64	Effects of ventilation strategy on distribution of lung inflammatory cell activity. Critical Care, 2013, 17, R175.	2.5	33
65	CrossTalk proposal: There is added benefit to providing permissive hypercapnia in the treatment of ARDS. Journal of Physiology, 2013, 591, 2763-2765.	1.3	22
66	Spontaneous Effort Causes Occult Pendelluft during Mechanical Ventilation. American Journal of Respiratory and Critical Care Medicine, 2013, 188, 1420-1427.	2.5	391
67	Mechanical ventilation-induced apoptosis in newborn rat lung is mediated via FasL/Fas pathway. American Journal of Physiology - Lung Cellular and Molecular Physiology, 2013, 305, L795-L804.	1.3	27
68	Imaging the Interaction of Atelectasis and Overdistension in Surfactant-Depleted Lungs*. Critical Care Medicine, 2013, 41, 527-535.	0.4	42
69	Dissociation of Inflammatory Mediators and Function. Critical Care Medicine, 2013, 41, 151-158.	0.4	11
70	Positive End-expiratory Pressure Increments during Anesthesia in Normal Lung Result in Hysteresis and Greater Numbers of Smaller Aerated Airspaces. Anesthesiology, 2013, 119, 1402-1409.	1.3	14
71	Sustained therapeutic hypercapnia attenuates pulmonary arterial Rho-kinase activity and ameliorates chronic hypoxic pulmonary hypertension in juvenile rats. American Journal of Physiology - Heart and Circulatory Physiology, 2012, 302, H2599-H2611.	1.5	25
72	Ventilator-induced lung injury. Current Opinion in Critical Care, 2012, 18, 16-22.	1.6	20

#	Article	IF	Citations
73	Glucose in the ICU â€" Evidence, Guidelines, and Outcomes. New England Journal of Medicine, 2012, 367, 1259-1260.	13.9	18
74	Continuous negative abdominal distension augments recruitment of atelectatic lung*. Critical Care Medicine, 2012, 40, 1864-1872.	0.4	17
75	An Official Multi-Society Statement: The Role of Clinical Research Results in the Practice of Critical Care Medicine. American Journal of Respiratory and Critical Care Medicine, 2012, 185, 1117-1124.	2.5	57
76	Atelectasis. , 2012, , 564-569.		0
77	Relative effects of negative versus positive pressure ventilation depend on applied conditions. Intensive Care Medicine, 2012, 38, 879-885.	3.9	24
78	Permissive hypercapnia â€" role in protective lung ventilatory strategies. , 2012, , 111-120.		1
79	Normalizing physiological variables in acute illness: five reasons for caution. , 2012, , 183-189.		0
80	Cyclooxygenase Inhibition in Ventilator-Induced Lung Injury. Anesthesia and Analgesia, 2011, 112, 143-149.	1.1	11
81	Hypercapnia in acute illness: Sometimes good, sometimes not*. Critical Care Medicine, 2011, 39, 1581-1582.	0.4	5
82	Hypocapnia and the injured brain: Evidence for harm. Critical Care Medicine, 2011, 39, 229-230.	0.4	9
83	A Metabolic Window into Acute Respiratory Distress Syndrome. American Journal of Respiratory and Critical Care Medicine, 2011, 183, 1120-1122.	2.5	6
84	Lung-derived soluble mediators are pathogenic in ventilator-induced lung injury. American Journal of Physiology - Lung Cellular and Molecular Physiology, 2011, 300, L648-L658.	1.3	46
85	Prolonged Mechanical Ventilation Induces Cell Cycle Arrest in Newborn Rat Lung. PLoS ONE, 2011, 6, e16910.	1.1	24
86	Protocolized Intensive Care Unit Management of Analgesia, Sedation, and Delirium Improves Analgesia and Subsyndromal Delirium Rates. Anesthesia and Analgesia, 2010, 111, 451-463.	1.1	259
87	Hypocapnia and the injured brain: More harm than benefit. Critical Care Medicine, 2010, 38, 1348-1359.	0.4	233
88	Hypercapnic acidosis in ventilator-induced lung injury. Intensive Care Medicine, 2010, 36, 869-878.	3.9	46
89	Do soluble mediators cause ventilator-induced lung injury and multi-organ failure?. Intensive Care Medicine, 2010, 36, 750-757.	3.9	26
90	Hypoxemia during surgery: learning from history, science, and current practice. Canadian Journal of Anaesthesia, 2010, 57, 877-881.	0.7	2

#	Article	IF	Citations
91	Early Growth Response-1 Worsens Ventilator-induced Lung Injury by Up-Regulating Prostanoid Synthesis. American Journal of Respiratory and Critical Care Medicine, 2010, 181, 947-956.	2.5	29
92	Bench-to-bedside review: Carbon dioxide. Critical Care, 2010, 14, 220.	2.5	131
93	Glycemic Control in the ICU. New England Journal of Medicine, 2010, 363, 2540-2546.	13.9	197
94	Therapeutic effects of hypercapnia on chronic lung injury and vascular remodeling in neonatal rats. American Journal of Physiology - Lung Cellular and Molecular Physiology, 2009, 297, L920-L930.	1.3	44
95	The GRADE System for Rating Clinical Guidelines. PLoS Medicine, 2009, 6, e1000094.	3.9	184
96	Use of dynamic CT in acute respiratory distress syndrome (ARDS) with comparison of positive and negative pressure ventilation. European Radiology, 2009, 19, 50-57.	2.3	18
97	Permissive hypercapnia â€" role in protective lung ventilatory strategies. , 2009, , 241-250.		1
98	Positive End-Expiratory Pressure Improves Survival in a Rodent Model of Cardiopulmonary Resuscitation Using High-Dose Epinephrine. Anesthesia and Analgesia, 2009, 109, 1202-1208.	1.1	20
99	Ventilator-Induced Lung Injury. , 2009, , 1-6.		0
100	Normalizing physiological variables in acute illness: five reasons for caution. , 2009, , 313-319.		0
101	Negative-Pressure Ventilation. American Journal of Respiratory and Critical Care Medicine, 2008, 177, 412-418.	2.5	67
102	Vascular Remodeling Protects against Ventilator-induced Lung Injury in the <i>In Vivo</i>Â Rat. Anesthesiology, 2008, 108, 1047-1054.	1.3	6
103	Early growth response factor-1 in acute lung injury. American Journal of Physiology - Lung Cellular and Molecular Physiology, 2007, 293, L1089-L1091.	1.3	36
104	Ventilator-induced Lung Injury Distribution: The Key to Understanding Injury Mechanisms. American Journal of Respiratory and Critical Care Medicine, 2007, 175, 96-96.	2.5	0
105	Have changes in ventilation practice improved outcome in children with acute lung injury?*. Pediatric Critical Care Medicine, 2007, PAP, 324-30.	0.2	74
106	Atelectasis in the perioperative patient. Current Opinion in Anaesthesiology, 2007, 20, 37-42.	0.9	94
107	Incidence, risk factors and consequences of ICU delirium. Intensive Care Medicine, 2007, 33, 66-73.	3.9	869
108	Reply to the comment by Drs. Girard et al.. Intensive Care Medicine, 2007, 33, 1481-1482.	3.9	1

#	Article	IF	Citations
109	The effect of global hypoxia on myocardial function after successful cardiopulmonary resuscitation in a laboratory model. Resuscitation, 2006, 68, 267-275.	1.3	29
110	Epinephrine Increases Mortality after Brief Asphyxial Cardiac Arrest in an In Vivo Rat Model. Anesthesia and Analgesia, 2006, 102, 542-548.	1.1	48
111	Atelectasis Causes Alveolar Injury in Nonatelectatic Lung Regions. American Journal of Respiratory and Critical Care Medicine, 2006, 174, 279-289.	2.5	202
112	Therapeutic hypercapnia prevents chronic hypoxia-induced pulmonary hypertension in the newborn rat. American Journal of Physiology - Lung Cellular and Molecular Physiology, 2006, 291, L912-L922.	1.3	80
113	Atelectasis. , 2006, , 616-621.		0
