#	ARTICLE	IF	CITATIONS
1	Ambulance dispatching and relocation problem considering overcrowding of emergency departments. IJSE Transactions on Healthcare Systems Engineering, 2022, 12, 263-274.	1.7	1
2	Restructuring hierarchical capacitated facility location problem with extended coverage radius under uncertainty. Operational Research, 2021, 21, 91-138.	2.0	5
3	Suppliers's coalition strategy for green-Resilient supply chain network design. Journal of Industrial and Production Engineering, 2021, 38, 197-212.	3.1	30
4	Semi-permutation-based genetic algorithm for order acceptance and scheduling in two-stage assembly problem. Neural Computing and Applications, 2020, 32, 2989-3003.	5.6	8
5	Designing a resilient-green closed loop supply chain network for perishable products by considering disruption in both supply chain and power networks. Computers and Chemical Engineering, 2020, 134, 106680.	3.8	61
6	Simultaneous supplier selection and network configuration for green closed-loop supply chain under uncertainty. International Journal of Industrial and Systems Engineering, 2020, 35, 235.	0.2	2
7	Demand management to cope with routes disruptions in location-inventory-routing problem for perishable products. Research in Transportation Business and Management, 2020, 37, 100552.	2.9	26
8	An integrated two-layer network model for designing a resilient green-closed loop supply chain of perishable products under disruption. Journal of Cleaner Production, 2019, 230, 198-218.	9.3	68
9	Heuristic method for robust optimization model for green closed-loop supply chain network design of perishable goods. Journal of Cleaner Production, 2019, 226, 282-305.	9.3	90
10	Joint Dynamic Pricing and Inventory Control for Perishable Products Taking into Account Partial Backlogging and Inflation. International Journal of Applied and Computational Mathematics, 2019, 5, 1.	1.6	22
11	Pricing policies for a dual-channel green supply chain under demand disruptions. Computers and Industrial Engineering, 2019, 127, 493-510.	6.3	122
12	Integrated decision making for parts ordering and scheduling of jobs on two-stage assembly problem in three level supply chain. Journal of Manufacturing Systems, 2018, 46, 137-151.	13.9	15
13	A branch and bound algorithm for solving large-scale single-machine scheduling problems with non-identical release dates. European Journal of Industrial Engineering, 2018, 12, 24.	0.8	3
