#	Article	IF	Citations
1	Vitamin D Status Is Associated With Arterial Stiffness and Vascular Dysfunction in Healthy Humans. Journal of the American College of Cardiology, 2011, 58, 186-192.	2.8	289
2	Vitamin D and Cardiovascular Disease. Journal of the American College of Cardiology, 2017, 70, 89-100.	2.8	166
3	Mental Stress–Induced-Myocardial Ischemia in Young Patients With Recent Myocardial Infarction. Circulation, 2018, 137, 794-805.	1.6	160
4	Racial Differences in Arterial Stiffness and Microcirculatory Function Between Black and White Americans. Journal of the American Heart Association, 2013, 2, e002154.	3.7	114
5	Oxidative stress is associated with impaired arterial elasticity. Atherosclerosis, 2011, 218, 90-95.	0.8	111
6	Vitamin D and cardiovascular disease: is the evidence solid?. European Heart Journal, 2013, 34, 3691-3698.	2.2	111
7	Sex Differences in Mental Stressâ€Induced Myocardial Ischemia in Patients With Coronary Heart Disease. Journal of the American Heart Association, 2016, 5, .	3.7	91
8	The Mental Stress Ischemia Prognosis Study: Objectives, Study Design, and Prevalence of Inducible Ischemia. Psychosomatic Medicine, 2017, 79, 311-317.	2.0	71
9	Hemodynamic, catecholamine, vasomotor and vascular responses: Determinants of myocardial ischemia during mental stress. International Journal of Cardiology, 2017, 243, 47-53.	1.7	64
10	Telomere Shortening, Regenerative Capacity, and Cardiovascular Outcomes. Circulation Research, 2017, 120, 1130-1138.	4. 5	59
11	Age and Human Regenerative Capacity Impact of Cardiovascular Risk Factors. Circulation Research, 2016, 119, 801-809.	4.5	46
12	Brain Correlates of Mental Stress-Induced Myocardial Ischemia. Psychosomatic Medicine, 2018, 80, 515-525.	2.0	46
13	Sex Differences in Hemodynamic and Microvascular Mechanisms of Myocardial Ischemia Induced by Mental Stress. Arteriosclerosis, Thrombosis, and Vascular Biology, 2018, 38, 473-480.	2.4	44
14	Low testosterone in men predicts impaired arterial elasticity and microvascular function. International Journal of Cardiology, 2015, 194, 94-99.	1.7	42
15	Inflammatory response to mental stress and mental stress induced myocardial ischemia. Brain, Behavior, and Immunity, 2018, 68, 90-97.	4.1	41
16	Impact of American-Style Football Participation on Vascular Function. American Journal of Cardiology, 2015, 115, 262-267.	1.6	36
17	Circadian Variation in Vascular Function and Regenerative Capacity in Healthy Humans. Journal of the American Heart Association, 2014, 3, e000845.	3.7	33
18	Relation of Changes in Body Fat Distribution to Oxidative Stress. American Journal of Cardiology, 2017, 120, 2289-2293.	1.6	33

#	Article	IF	Citations
19	Coronary and Peripheral Vasomotor Responses to Mental Stress. Journal of the American Heart Association, 2018, 7 , .	3.7	33
20	Comparisons of the Framingham and Pooled Cohort Equation Risk Scores for Detecting Subclinical Vascular Disease in Blacks Versus Whites. American Journal of Cardiology, 2018, 121, 564-569.	1.6	32
21	Chest Pain and Mental Stress–Induced Myocardial Ischemia: Sex Differences. American Journal of Medicine, 2018, 131, 540-547.e1.	1.5	29
22	Association Between High-Sensitivity Cardiac Troponin Levels and Myocardial Ischemia During Mental Stress and Conventional Stress. JACC: Cardiovascular Imaging, 2018, 11, 603-611.	5.3	27
23	Cell Therapy in Peripheral Arterial Disease. Angiology, 2008, 59, 705-716.	1.8	26
24	Brain correlates of stressâ€induced peripheral vasoconstriction in patients with cardiovascular disease. Psychophysiology, 2019, 56, e13291.	2.4	24
25	Changes in truncal obesity and fat distribution predict arterial health. Journal of Clinical Lipidology, 2017, 11, 1354-1360.e3.	1.5	20
26	An investigation of racial/ethnic and sex differences in the association between experiences of everyday discrimination and leukocyte telomere length among patients with coronary artery disease. Psychoneuroendocrinology, 2019, 106, 122-128.	2.7	19
27	Sex-Specific Association Between Coronary Artery Disease Severity and Myocardial Ischemia Induced by Mental Stress. Psychosomatic Medicine, 2019, 81, 57-66.	2.0	18
28	Effects of a Healthâ€Partner Intervention on Cardiovascular Risk. Journal of the American Heart Association, 2016, 5, .	3.7	16
29	Use of High-Sensitivity Cardiac Troponin for the Exclusion of Inducible Myocardial Ischemia. Annals of Internal Medicine, 2018, 169, 751.	3.9	16
30	The association between acute mental stress and abnormal left atrial electrophysiology. Journal of Cardiovascular Electrophysiology, 2017, 28, 1151-1157.	1.7	14
31	The Relation of Psychosocial Distress With Myocardial Perfusion and Stress-Induced Myocardial Ischemia. Psychosomatic Medicine, 2019, 81, 363-371.	2.0	14
32	Association Between Change in Circulating Progenitor Cells During Exercise Stress and Risk of Adverse Cardiovascular Events in Patients With Coronary Artery Disease. JAMA Cardiology, 2020, 5, 147.	6.1	14
33	Circulating Proangiogenic Cell Activity Is Associated with Cardiovascular Disease Risk. Journal of Biomolecular Screening, 2012, 17, 1163-1170.	2.6	10
34	Functional health and well-being, arterial stiffness and vascular dysfunction in healthy adults. International Journal of Cardiology, 2014, 174, 729-730.	1.7	7
35	Myocardial Ischemia and Mobilization of Circulating Progenitor Cells. Journal of the American Heart Association, 2018, 7, e007504.	3.7	7
36	The Demise of Vitamin D for Cardiovascular Prevention. JAMA Cardiology, 2019, 4, 776.	6.1	6
