#	ARTICLE	IF	CITATIONS
1	Load-to-grain angle dependence of the embedment behavior of dowel-type fasteners in laminated veneer lumber. <i>Construction and Building Materials</i> , 2016, 126, 1020-1033.	7.2	32
2	Engineering modeling of semi-rigid joints with dowel-type fasteners for nonlinear analysis of timber structures. <i>Engineering Structures</i> , 2018, 171, 123-139.	5.3	20
3	Integrative experimental characterization and engineering modeling of single-dowel connections in LVL. <i>Construction and Building Materials</i> , 2016, 107, 235-246.	7.2	15
4	Creep and cracking of concrete hinges: insight from centric and eccentric compression experiments. <i>Materials and Structures/Materiaux Et Constructions</i> , 2017, 50, 244.	3.1	15
5	Parameterization equations for the nonlinear connection slip applied to the anisotropic embedment behavior of wood. <i>Composites Part B: Engineering</i> , 2018, 142, 142-158.	12.0	15
6	Dowel deformations in multi-dowel LVL-connections under moment loading. <i>Wood Material Science and Engineering</i> , 2015, 10, 216-231.	2.3	12
7	Experimental characterization of the global and local behavior of multi-dowel LVL-connections under complex loading. <i>Materials and Structures/Materiaux Et Constructions</i> , 2016, 49, 2407-2424.	3.1	5
8	Constrained displacement boundary condition in embedment testing of dowel-type fasteners in LVL. <i>Strain</i> , 2017, 53, e12238.	2.4	5
9	A Numerical Study of the Stiffness and Strength of Cross-Laminated Timber Wall-to-Floor Connections under Compression Perpendicular to the Grain. <i>Buildings</i> , 2021, 11, 442.	3.1	5
10	Embedment properties of thermally modified spruce timber with dowel-type fasteners. <i>Construction and Building Materials</i> , 2021, 313, 125517.	7.2	4
11	An innovative timber-steel hybrid beam consisting of glulam mechanically reinforced by means of steel rod: Analytical and preliminary numerical investigations. <i>Journal of Building Engineering</i> , 2021, 43, 102549.	3.4	3
