citing authors

#	ARTICLE	IF	CITATIONS
1	Persistent neuropsychological deficits and vigilance impairment in sleep apnea syndrome after treatment with continuous positive airways pressure (CPAP). <i>Neuropsychology, Development and Cognition Section A: Journal of Clinical and Experimental Neuropsychology</i> , 1993, 15, 330-341.	1.1	231
2	Nocturnal Hypoxemia as a Determinant of Vigilance Impairment in Sleep Apnea Syndrome. <i>Chest</i> , 1991, 100, 367-370.	0.8	159
3	Neuromotor functions in Inuit preschool children exposed to Pb, PCBs, and Hg. <i>Neurotoxicology and Teratology</i> , 2005, 27, 245-257.	2.4	116
4	Detection and recognition: Concurrent processes in perception. <i>Perception &amp; Psychophysics</i> , 1982, 31, 1-12.	2.3	102
5	Electrical Stimulation of the Human Brain in Epilepsy. <i>Epilepsia</i> , 1990, 31, 513-520.	5.1	85
6	Stimulation of human somatosensory cortex: tactile and body displacement perceptions in medial regions. <i>Experimental Brain Research</i> , 1993, 93, 173-6.	1.5	84
7	Episodic memory impairment in Huntington's disease: A meta-analysis. <i>Neuropsychologia</i> , 2006, 44, 1984-1994.	1.6	83
8	Human intracerebral potentials associated with target, novel, and omitted auditory stimuli. <i>Brain Topography</i> , 1989, 1, 237-245.	1.8	60
9	Contrasting Effects of Response Uncertainty on the Task-Evoked Pupillary Response and Reaction Time. <i>Psychophysiology</i> , 1987, 24, 258-262.	2.4	57
10	Effects of vagus nerve stimulation on pupillary function. <i>International Journal of Psychophysiology</i> , 2015, 98, 455-459.	1.0	57
11	Neural correlates of dual task interference in rapid visual streams: An fMRI study. <i>Brain and Cognition</i> , 2003, 53, 318-321.	1.8	51
12	Perceptual context and the selective attention effect on auditory event-related brain potentials. <i>Psychophysiology</i> , 1993, 30, 572-580.	2.4	34
13	Intracerebral amplitude distributions of the auditory evoked potential. <i>Electroencephalography and Clinical Neurophysiology - Evoked Potentials</i> , 1989, 74, 202-208.	2.0	33
14	Frontal cortex and the programming of repetitive tapping movements in man: lesion effects and functional neuroimaging. <i>Cognitive Brain Research</i> , 1999, 8, 17-25.	3.0	31
15	Effect of deep brain stimulation on amplitude and frequency characteristics of rest tremor in Parkinson's disease. <i>Thalamus &amp; Related Systems</i> , 2001, 1, 203.	0.5	31
16	Procedural Learning in Schizophrenia Can Reflect the Pharmacologic Properties of the Antipsychotic Treatments. <i>Cognitive and Behavioral Neurology</i> , 2004, 17, 32-40.	0.9	30
17	Frontal lesions impair the attentional control of movements during motor learning. <i>Neuropsychologia</i> , 1999, 37, 1427-1435.	1.6	28
18	Long-term Sustained Cognitive Benefits of Vagus Nerve Stimulation in Refractory Depression. <i>Journal of ECT</i> , 2018, 34, 283-290.	0.6	26

#	ARTICLE	IF	CITATIONS
19	Frontal lesions increase post-target interference in rapid stimulus streams. <i>Neuropsychologia</i> , 1996, 34, 509-514.	1.6	25
20	Early Huntington's disease affects movements in transformed sensorimotor mappings. <i>Brain and Cognition</i> , 2005, 57, 236-243.	1.8	13
21	A 6-Year Follow-up Study of Vagus Nerve Stimulation Effect on Quality of Life in Treatment-Resistant Depression. <i>Journal of ECT</i> , 2018, 34, e58-e60.	0.6	13
22	Standardization of Quantitative Tests for Preclinical Detection of Neuromotor Dysfunctions in Pediatric Neurotoxicology. <i>NeuroToxicology</i> , 2005, 26, 385-395.	3.0	11
23	Huntington's disease affects movement termination. <i>Behavioural Brain Research</i> , 2008, 187, 153-158.	2.2	10
24	ODD irritability is associated with obsessive-compulsive behavior and not ADHD in chronic tic disorders. <i>Psychiatry Research</i> , 2014, 220, 447-452.	3.3	10
25	Oppositional behavior and longitudinal predictions of early adulthood mental health problems in chronic tic disorders. <i>Psychiatry Research</i> , 2018, 266, 301-308.	3.3	9
26	Frontal brain lesions affect the use of advance information during response planning.. <i>Behavioral Neuroscience</i> , 2000, 114, 1034-1040.	1.2	7
27	Matching cannot account for context effects on the attention-related negative potential. <i>Behavioral and Brain Sciences</i> , 1991, 14, 761-762.	0.7	5
28	Frontal and striatal brain lesions increase susceptibility to masking in perceptual decisions. <i>Brain and Cognition</i> , 2002, 50, 90-94.	1.8	4
29	Clinical features associated with an early onset in chronic tic disorders. <i>Psychiatry Research</i> , 2015, 230, 745-748.	3.3	4
30	Response Inhibition in Tic Disorders. <i>Journal of Attention Disorders</i> , 2016, 20, 251-259.	2.6	4
31	Adaptation to a New Tuning Standard in a Musician with Tone-color Synesthesia and Absolute Pitch. <i>Auditory Perception &amp; Cognition</i> , 2020, 3, 113-123.	1.1	3
32	Emotions and Consciousness Alterations in Music-color Synesthesia. <i>Auditory Perception &amp; Cognition</i> , 2022, 5, 76-85.	1.1	2
33	Chapter 5.6 Episodic memory in the context of cognitive control dysfunction: the case of Huntington's disease. <i>Handbook of Behavioral Neuroscience</i> , 2008, 18, 575-583.	0.7	0
