#	ARTICLE	IF	CITATIONS
1	Lifestyle Medicine. <i>Physical Medicine and Rehabilitation Clinics of North America</i> , 2020, 31, 515-526.	0.7	30
2	Passive force and viscoelastic properties of single fibers in human aging muscles. <i>European Journal of Applied Physiology</i> , 2019, 119, 2339-2348.	1.2	31
3	Preventing Type 2 Diabetes with Home Cooking: Current Evidence and Future Potential. <i>Current Diabetes Reports</i> , 2018, 18, 99.	1.7	15
4	Innovation in medical education: a culinary coaching tele-nutrition training program. <i>Medical Education Online</i> , 2018, 23, 1510704.	1.1	13
5	Improving patients' home cooking – A case series of participation in a remote culinary coaching program. <i>Applied Physiology, Nutrition and Metabolism</i> , 2017, 42, 893-896.	0.9	16
6	Practice patterns, counseling and promotion of physical activity by sports medicine physicians. <i>Journal of Science and Medicine in Sport</i> , 2017, 20, 123-127.	0.6	22
7	Time for Food – Including Nutrition on Physiatrists' Tables. <i>PM and R</i> , 2016, 8, 388-390.	0.9	1
8	Health-related Culinary Education: A Summary of Representative Emerging Programs for Health Professionals and Patients. <i>Global Advances in Health and Medicine</i> , 2016, 5, 61-68.	0.7	68
9	The effect of before school physical activity on child development: A study protocol to evaluate the Build Our Kids Success (BOKS) Program. <i>Contemporary Clinical Trials</i> , 2016, 49, 103-108.	0.8	6
10	What is a Clinically Meaningful Improvement in Leg-Extensor Power for Mobility-limited Older Adults?. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2016, 71, 632-636.	1.7	28
11	Legumes: Health Benefits and Culinary Approaches to Increase Intake. <i>Clinical Diabetes</i> , 2015, 33, 198-205.	1.2	118
12	Lifestyle Medicine Education. <i>American Journal of Lifestyle Medicine</i> , 2015, 9, 361-367.	0.8	47
13	Credentialed Chefs as Certified Wellness Coaches: Call for Action. <i>Eating Behaviors</i> , 2015, 19, 65-67.	1.1	6
14	Comparative Effects of Light or Heavy Resistance Power Training for Improving Lower Extremity Power and Physical Performance in Mobility-Limited Older Adults. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2015, 70, 374-380.	1.7	106
15	Incorporating "Exercise is Medicine" into the University of South Carolina School of Medicine Greenville and Greenville Health System. <i>British Journal of Sports Medicine</i> , 2014, 48, 165-167.	3.1	37
16	Bridging the gap - planning Lifestyle Medicine fellowship curricula: A cross sectional study. <i>BMC Medical Education</i> , 2014, 14, 1045.	1.0	14
17	Physical activity counseling in medical school education: a systematic review. <i>Medical Education Online</i> , 2014, 19, 24325.	1.1	89
18	Longitudinal decline of lower extremity muscle power in healthy and mobility-limited older adults: influence of muscle mass, strength, composition, neuromuscular activation and single fiber contractile properties. <i>European Journal of Applied Physiology</i> , 2014, 114, 29-39.	1.2	173

#	ARTICLE	IF	CITATIONS
19	Branched Chain Amino Acids Are Associated With Muscle Mass in Functionally Limited Older Adults. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2014, 69, 717-724.	1.7	74
20	Innovation in Diabetes Care: Improving Consumption of Healthy Food through a "Chef Coaching" Program: A Case Report. <i>Global Advances in Health and Medicine</i> , 2014, 3, 42-48.	0.7	15
21	Efficacy of Whey Protein Supplementation on Resistance Exercise-Induced Changes in Lean Mass, Muscle Strength, and Physical Function in Mobility-Limited Older Adults. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2013, 68, 682-690.	1.7	175
22	Serum Glycine Is Associated with Regional Body Fat and Insulin Resistance in Functionally-Limited Older Adults. <i>PLoS ONE</i> , 2013, 8, e84034.	1.1	54
23	Systemic Vascular Function Is Associated with Muscular Power in Older Adults. <i>Journal of Aging Research</i> , 2012, 2012, 1-10.	0.4	29
24	Increased ceramide content and NF κ B signaling may contribute to the attenuation of anabolic signaling after resistance exercise in aged males. <i>Journal of Applied Physiology</i> , 2012, 113, 1727-1736.	1.2	79
25	Muscle power failure in mobility-limited older adults: preserved single fiber function despite lower whole muscle size, quality and rate of neuromuscular activation. <i>European Journal of Applied Physiology</i> , 2012, 112, 2289-2301.	1.2	88
26	The specific contributions of force and velocity to muscle power in older adults. <i>Experimental Gerontology</i> , 2012, 47, 608-613.	1.2	72
27	Muscle Performance and Physical Function Are Associated With Voluntary Rate of Neuromuscular Activation in Older Adults. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2011, 66A, 115-121.	1.7	77
28	Interruption of Physical Activity Because of Illness in the Lifestyle Interventions and Independence for Elders Pilot Trial. <i>Journal of Aging and Physical Activity</i> , 2010, 18, 61-74.	0.5	15
29	Impaired Voluntary Neuromuscular Activation Limits Muscle Power in Mobility-Limited Older Adults. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2010, 65A, 495-502.	1.7	74
30	Lower extremity strength and power asymmetry assessment in healthy and mobility-limited populations: reliability and association with physical functioning. <i>Aging Clinical and Experimental Research</i> , 2010, 22, 324-329.	1.4	36
31	Lower extremity strength and power asymmetry assessment in healthy and mobility-limited populations: reliability and association with physical functioning. <i>Aging Clinical and Experimental Research</i> , 2010, 22, 324-9.	1.4	23
32	Lower extremity power training in elderly subjects with mobility limitations: a randomized controlled trial. <i>Aging Clinical and Experimental Research</i> , 2008, 20, 337-343.	1.4	120
33	Muscle fiber size and function in elderly humans: a longitudinal study. <i>Journal of Applied Physiology</i> , 2008, 105, 637-642.	1.2	238
34	Slow rate of neuromuscular activation contributes to impaired movement acceleration and peak power in mobility-limited older adults. <i>FASEB Journal</i> , 2008, 22, 1163-9.	0.2	0
35	Geriatric rehabilitation. 4. Physical medicine and rehabilitation interventions for common age-related disorders and geriatric syndromes—No commercial party having a direct financial interest in the results of the research supporting this article has or will confer a benefit upon the author(s) or upon any organization with which the author(s) is/are associated.—Key references. <i>Archives of Physical Medicine and Rehabilitation</i> , 2004, 85, 18-22.	0.5	11
