#	ARTICLE	IF	CITATIONS
1	Comparison of starting ovarian stimulation on day 2 versus day 15 of the menstrual cycle in the same oocyte donor and pregnancy rates among the corresponding recipients of vitrified oocytes. <i>Fertility and Sterility</i> , 2014, 102, 1307-1311.	1.0	54
2	Elective single-embryo transfer in oocyte donation programmes: should it be the rule?. <i>Reproductive BioMedicine Online</i> , 2012, 25, 642-648.	2.4	31
3	Prospective, randomized, comparative study of leuprorelin + human menopausal gonadotropins versus ganirelix + recombinant follicle-stimulating hormone in oocyte donors and pregnancy rates among the corresponding recipients. <i>Gynecological Endocrinology</i> , 2008, 24, 188-193.	1.7	22
4	Analysis of factors associated with multiple pregnancy in an oocyte donation programme. <i>Reproductive BioMedicine Online</i> , 2010, 21, 694-699.	2.4	19
5	Investigations into implantation failure in oocyte-donation recipients. <i>Reproductive BioMedicine Online</i> , 2014, 28, 99-105.	2.4	18
6	Replacing GnRH agonists with GnRH antagonists in oocyte recipient cycle did not adversely affect the pregnancy rates. <i>European Journal of Obstetrics, Gynecology and Reproductive Biology</i> , 2011, 159, 355-358.	1.1	16
7	Is it justified to transfer two embryos in oocyte donation? A pilot randomized clinical trial. <i>Reproductive BioMedicine Online</i> , 2015, 31, 154-161.	2.4	15
8	Reproductive outcomes in recipients are not associated with oocyte donor body mass index up to 28 kg/m ² : a cohort study of 2722 cycles. <i>Reproductive BioMedicine Online</i> , 2017, 35, 739-746.	2.4	9
9	Heterotopic pregnancy in a cross border oocyte donation patient: the importance of cooperation between centers. <i>Fertility and Sterility</i> , 2011, 95, 2432.e13-2432.e15.	1.0	8
10	Does LH suppression by progesterone-primed ovarian stimulation compared with GnRH antagonist affect live birth rate among oocyte recipients?. <i>Reproductive BioMedicine Online</i> , 2020, 40, 661-667.	2.4	8
11	Is AMH useful to reduce low ovarian response to GnRH antagonist protocol in oocyte donors?. <i>Gynecological Endocrinology</i> , 2013, 29, 754-757.	1.7	7
12	Obstetric and perinatal complications in an oocyte donation programme. Is it time to limit the number of embryos to transfer?. <i>Gynecological Endocrinology</i> , 2016, 32, 267-271.	1.7	7
13	Triggering ovulation with 250 µg or 500 µg of r-hCG in oocyte donors treated with antagonist protocol has no effect on the number of mature oocytes retrieved: a randomized clinical trial. <i>Gynecological Endocrinology</i> , 2012, 28, 678-681.	1.7	5
14	Progesterone-primed ovarian stimulation in oocyte donation: a model for elective fertility preservation?. <i>Reproductive BioMedicine Online</i> , 2022, 44, 1015-1022.	2.4	4
15	Single or double embryo transfer? Decision-making process in patients participating in an oocyte donation program. <i>Gynecological Endocrinology</i> , 2020, 36, 365-369.	1.7	3
16	Recipient outcomes in an oocyte donation programme: should very young donors be excluded?. <i>Reproductive BioMedicine Online</i> , 2022, 44, 867-873.	2.4	1
17	Using donor oocytes. , 0, , 158-165.		0
