

# Laura Chaddock

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/10656165/laura-chaddock-publications-by-year.pdf>

**Version:** 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

24  
papers

6,886  
citations

23

#	Paper	IF	Citations
24	The influence of aerobic fitness on cerebral white matter integrity and cognitive function in older adults: results of a one-year exercise intervention. <i>Human Brain Mapping</i> , <b>2013</b> , 34, 2972-85	5.9	345
23	Neurobiological markers of exercise-related brain plasticity in older adults. <i>Brain, Behavior, and Immunity</i> , <b>2013</b> , 28, 90-9	16.6	266
22	Physical Activity and Fitness Effects on Cognition and Brain Health in Children and Older Adults. <i>Kinesiology Review</i> , <b>2012</b> , 1, 37-45	2	13
21	The association between aerobic fitness and executive function is mediated by prefrontal cortex volume. <i>Brain, Behavior, and Immunity</i> , <b>2012</b> , 26, 811-9	16.6	205
20	A functional MRI investigation of the association between childhood aerobic fitness and neurocognitive control. <i>Biological Psychology</i> , <b>2012</b> , 89, 260-8	3.2	125
19	Beyond vascularization: aerobic fitness is associated with N-acetylaspartate and working memory. <i>Brain and Behavior</i> , <b>2012</b> , 2, 32-41	3.4	78
18	Childhood aerobic fitness predicts cognitive performance one year later. <i>Journal of Sports Sciences</i> , <b>2012</b> , 30, 421-30	3.6	110
17	Caudate Nucleus Volume Mediates the Link between Cardiorespiratory Fitness and Cognitive Flexibility in Older Adults. <i>Journal of Aging Research</i> , <b>2012</b> , 2012, 939285	2.3	63
16	Role of childhood aerobic fitness in successful street crossing. <i>Medicine and Science in Sports and Exercise</i> , <b>2012</b> , 44, 749-53	1.2	30
15	Cardiorespiratory fitness and attentional control in the aging brain. <i>Frontiers in Human Neuroscience</i> , <b>2011</b> , 4, 229	3.3	104
14	Aerobic fitness and executive control of relational memory in preadolescent children. <i>Medicine and Science in Sports and Exercise</i> , <b>2011</b> , 43, 344-9	1.2	121
13	Aerobic fitness and response variability in preadolescent children performing a cognitive control task. <i>Neuropsychology</i> , <b>2011</b> , 25, 333-41	3.8	53
12	Exercise training increases size of hippocampus and improves memory. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2011</b> , 108, 3017-22	11.5	2627
11	Cardiorespiratory fitness and the flexible modulation of cognitive control in preadolescent children. <i>Journal of Cognitive Neuroscience</i> , <b>2011</b> , 23, 1332-45	3.1	218
10	A review of the relation of aerobic fitness and physical activity to brain structure and function in children. <i>Journal of the International Neuropsychological Society</i> , <b>2011</b> , 17, 975-85	3.1	188
9	Do athletes excel at everyday tasks?. <i>Medicine and Science in Sports and Exercise</i> , <b>2011</b> , 43, 1920-6	1.2	37
8	Brain-derived neurotrophic factor is associated with age-related decline in hippocampal volume. <i>Journal of Neuroscience</i> , <b>2010</b> , 30, 5368-75	6.6	352

7	Basal ganglia volume is associated with aerobic fitness in preadolescent children. <i>Developmental Neuroscience</i> , <b>2010</b> , 32, 249-56	2.2	214
6	Plasticity of brain networks in a randomized intervention trial of exercise training in older adults. <i>Frontiers in Aging Neuroscience</i> , <b>2010</b> , 2,	5.3	343
5	A cross-sectional study of hormone treatment and hippocampal volume in postmenopausal women: evidence for a limited window of opportunity. <i>Neuropsychology</i> , <b>2010</b> , 24, 68-76	3.8	30
4	Functional connectivity: a source of variance in the association between cardiorespiratory fitness and cognition?. <i>Neuropsychologia</i> , <b>2010</b> , 48, 1394-406	3.2	178
3	A neuroimaging investigation of the association between aerobic fitness, hippocampal volume, and memory performance in preadolescent children. <i>Brain Research</i> , <b>2010</b> , 1358, 172-83	3.7	410
2	Aerobic fitness is associated with hippocampal volume in elderly humans. <i>Hippocampus</i> , <b>2009</b> , 19, 1030-9.5	3.5	693
1	Dedifferentiation in the visual cortex: an fMRI investigation of individual differences in older adults. <i>Brain Research</i> , <b>2008</b> , 1244, 121-31	3.7	83
