#	ARTICLE	IF	CITATIONS
1	Effective cues for accelerating young drivers's time to transfer control following a period of conditional automation. <i>Accident Analysis and Prevention</i> , 2018, 116, 14-20.	5.7	14
2	Attention capture, processing speed, and inattentive blindness. <i>Acta Psychologica</i> , 2018, 190, 72-77.	1.5	3
3	Effects of a Change in Environment on the Minimum Time to Situation Awareness in Transfer of Control Scenarios. <i>Transportation Research Record</i> , 2017, 2663, 126-133.	1.9	9
4	Effects of Alert Cue Specificity on Situation Awareness in Transfer of Control in Level 3 Automation. <i>Transportation Research Record</i> , 2017, 2663, 27-33.	1.9	17
5	Experienced drivers are quicker to achieve situation awareness than inexperienced drivers in situations of transfer of control within a Level 3 autonomous environment. <i>Proceedings of the Human Factors and Ergonomics Society</i> , 2016, 60, 270-273.	0.3	37
6	Do different attention capture paradigms measure different types of capture?. <i>Attention, Perception, and Psychophysics</i> , 2016, 78, 2014-2030.	1.3	15
7	Exploring the breadth of the top-down representations that control attentional disengagement. <i>Quarterly Journal of Experimental Psychology</i> , 2015, 68, 993-1006.	1.1	6
8	Functional fixedness: The functional significance of delayed disengagement based on attention set.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2015, 41, 17-21.	0.9	10
9	The impact of red light running camera flashes on younger and older drivers's attention and oculomotor control.. <i>Psychology and Aging</i> , 2015, 30, 755-767.	1.6	7
10	Driven to distraction? The effect of simulated red light running camera flashes on attention and oculomotor control. <i>Visual Cognition</i> , 2014, 22, 57-73.	1.6	5
11	Pupillary response predicts multiple object tracking load, error rate, and conscientiousness, but not inattentive blindness. <i>Acta Psychologica</i> , 2013, 144, 6-11.	1.5	20
12	Characterizing the time course and nature of attentional disengagement effects. <i>Vision Research</i> , 2012, 56, 38-48.	1.4	13
