#	ARTICLE	IF	CITATIONS
1	Subjective and objective evaluation of shoulder muscle fatigue. <i>Ergonomics</i> , 1994, 37, 1323-1333.	2.1	127
2	Psychophysiological stress responses, muscle tension, and neck and shoulder pain among supermarket cashiers.. <i>Journal of Occupational Health Psychology</i> , 1999, 4, 245-255.	3.3	115
3	Trapezius muscle activity, neck and shoulder pain, and subjective experiences during monotonous work in women. <i>European Journal of Applied Physiology</i> , 2000, 83, 235-238.	2.5	61
4	Effects of Ambulant Myofeedback Training and Ergonomic Counselling in Female Computer Workers with Work-Related Neck-Shoulder Complaints: A Randomized Controlled Trial. <i>Journal of Occupational Rehabilitation</i> , 2007, 17, 137-152.	2.2	60
5	Psychophysiological stress reactions, trapezius muscle activity, and neck and shoulder pain among female cashiers before and after introduction of job rotation. <i>Work and Stress</i> , 2002, 16, 127-137.	4.5	56
6	A scenario guideline for designing new teletreatments: a multidisciplinary approach. <i>Journal of Telemedicine and Telecare</i> , 2010, 16, 302-307.	2.7	38
7	Myofeedback training and intensive muscular strength training to decrease pain and improve work ability among female workers on long-term sick leave with neck pain: a randomized controlled trial. <i>International Archives of Occupational and Environmental Health</i> , 2011, 84, 335-346.	2.3	37
8	Clinical evaluation of a myofeedback-based teletreatment service applied in the workplace: a randomized controlled trial. <i>Journal of Telemedicine and Telecare</i> , 2010, 16, 329-335.	2.7	26
9	Variability of the EMG mean power frequency: A study on the trapezius muscle. <i>Journal of Electromyography and Kinesiology</i> , 1991, 1, 237-243.	1.7	24
10	Changes in Cognitive-Behavioral Factors and Muscle Activation Patterns after Interventions for Work-Related Neck-Shoulder Complaints: Relations with Discomfort and Disability. <i>Journal of Occupational Rehabilitation</i> , 2007, 17, 593-609.	2.2	23
11	Are changes in pain induced by myofeedback training related to changes in muscle activation patterns in patients with work-related myalgia?. <i>European Journal of Applied Physiology</i> , 2006, 96, 209-215.	2.5	22
12	Evaluation of a self-administered transcutaneous electrical stimulation concept for the treatment of spasticity: a randomized placebo-controlled trial. <i>European Journal of Physical and Rehabilitation Medicine</i> , 2018, 54, 507-517.	2.2	15
13	Prognostic factors for the effects of two interventions for work-related neck"shoulder complaints: Myofeedback training and ergonomic counselling. <i>Applied Ergonomics</i> , 2008, 39, 743-753.	3.1	10
14	Trapezius Muscle Activity of Cash Register Work Compared to Department Work in the Supermarket. <i>Proceedings of the Human Factors and Ergonomics Society</i> , 2000, 44, 185-188.	0.3	7
15	Prognostic Factors for Intervention Effect on Neck/Shoulder Symptom Intensity and Disability among Female Computer Workers. <i>Journal of Occupational Rehabilitation</i> , 2009, 19, 300-311.	2.2	6
16	Patients" Experiences of Self-Administered Electrotherapy for Spasticity in Stroke and Cerebral Palsy: A Qualitative Study. <i>Journal of Rehabilitation Medicine</i> , 2021, 54, jrm00263.	1.1	5
17	Requirements Elicitation in a Telemedicine Pain-treatment Trial. , 2009, , .		2
18	Prognostic factors for the effect of a myofeedback-based teletreatment service. <i>Journal of Telemedicine and Telecare</i> , 2010, 16, 336-343.	2.7	2
