LEIE SANDSIÃO

#	Article	IF	CITATIONS
1	Patients' Experiences of Self-Administered Electrotherapy for Spasticity in Stroke and Cerebral Palsy: A Qualitative Study. Journal of Rehabilitation Medicine, 2021, 54, jrm00263.	1.1	5
2	Evaluation of a self-administered transcutaneous electrical stimulation concept for the treatment of spasticity: a randomized placebo-controlled trial. European Journal of Physical and Rehabilitation Medicine, 2018, 54, 507-517.	2.2	15
3	Myofeedback training and intensive muscular strength training to decrease pain and improve work ability among female workers on long-term sick leave with neck pain: a randomized controlled trial. International Archives of Occupational and Environmental Health, 2011, 84, 335-346.	2.3	37
4	Prognostic factors for the effect of a myofeedback-based teletreatment service. Journal of Telemedicine and Telecare, 2010, 16, 336-343.	2.7	2
5	A scenario guideline for designing new teletreatments: a multidisciplinary approach. Journal of Telemedicine and Telecare, 2010, 16, 302-307.	2.7	38
6	Clinical evaluation of a myofeedback-based teletreatment service applied in the workplace: a randomized controlled trial. Journal of Telemedicine and Telecare, 2010, 16, 329-335.	2.7	26
7	Requirements Elicitation in a Telemedicine Pain-treatment Trial. , 2009, , .		2
8	Prognostic Factors for Intervention Effect on Neck/Shoulder Symptom Intensity and Disability among Female Computer Workers. Journal of Occupational Rehabilitation, 2009, 19, 300-311.	2.2	6
9	Prognostic factors for the effects of two interventions for work-related neck–shoulder complaints: Myofeedback training and ergonomic counselling. Applied Ergonomics, 2008, 39, 743-753.	3.1	10
10	Effects of Ambulant Myofeedback Training and Ergonomic Counselling in Female Computer Workers with Work-Related Neck-Shoulder Complaints: A Randomized Controlled Trial. Journal of Occupational Rehabilitation, 2007, 17, 137-152.	2.2	60
11	Changes in Cognitive-Behavioral Factors and Muscle Activation Patterns after Interventions for Work-Related Neck-Shoulder Complaints: Relations with Discomfort and Disability. Journal of Occupational Rehabilitation, 2007, 17, 593-609.	2.2	23
12	Are changes in pain induced by myofeedback training related to changes in muscle activation patterns in patients with work-related myalgia?. European Journal of Applied Physiology, 2006, 96, 209-215.	2.5	22
13	Psychophysiological stress reactions, trapezius muscle activity, and neck and shoulder pain among female cashiers before and after introduction of job rotation. Work and Stress, 2002, 16, 127-137.	4.5	56
14	Trapezius muscle activity, neck and shoulder pain, and subjective experiences during monotonous work in women. European Journal of Applied Physiology, 2000, 83, 235-238.	2.5	61
15	Trapezius Muscle Activity of Cash Register Work Compared to Department Work in the Supermarket. Proceedings of the Human Factors and Ergonomics Society, 2000, 44, 185-188.	0.3	7
16	Psychophysiological stress responses, muscle tension, and neck and shoulder pain among supermarket cashiers Journal of Occupational Health Psychology, 1999, 4, 245-255.	3.3	115
17	Subjective and objective evaluation of shoulder muscle fatigue. Ergonomics, 1994, 37, 1323-1333.	2.1	127
18	Variability of the EMG mean power frequency: A study on the trapezius muscle. Journal of Electromyography and Kinesiology, 1991, 1, 237-243.	1.7	24
