#	ARTICLE	IF	CITATIONS
1	Deer slow down litter decomposition by reducing litter quality in a temperate forest. <i>Ecology</i> , 2021, 102, e03235.	3.2	7
2	Deer exclusion unveils abiotic filtering in forest understorey plant assemblages. <i>Annals of Botany</i> , 2021, 128, 371-381.	2.9	6
3	Belowground effects of deer in a temperate forest are time-dependent. <i>Forest Ecology and Management</i> , 2021, 493, 119228.	3.2	5
4	More than weeds: Spontaneous vegetation in streets as a neglected element of urban biodiversity. <i>Landscape and Urban Planning</i> , 2019, 185, 163-172.	7.5	53
5	Improving nature experience in cities: What are people's preferences for vegetated streets?. <i>Journal of Environmental Management</i> , 2019, 230, 335-344.	7.8	28
6	Positive plant and bird diversity response to experimental deer population reduction after decades of uncontrolled browsing. <i>Diversity and Distributions</i> , 2016, 22, 274-287.	4.1	21
7	Long-term consequences of invasive deer on songbird communities: Going from bad to worse?. <i>Biological Invasions</i> , 2015, 17, 777-790.	2.4	18
8	Short-term effects of hunting on naïve black-tailed deer (<i>Odocoileus hemionus sitkensis</i>): behavioural response and consequences on vegetation growth. <i>Canadian Journal of Zoology</i> , 2014, 92, 915-925.	1.0	14
9	Understanding the paradox of deer persisting at high abundance in heavily browsed habitats. <i>Wildlife Biology</i> , 2014, 20, 122-135.	1.4	23
10	A better world for bryophytes? A rare and overlooked case of positive community-wide effects of browsing by overabundant deer. <i>Ecoscience</i> , 2013, 20, 352-360.	1.4	22
11	Declining woodland birds in North America: should we blame Bambi?. <i>Diversity and Distributions</i> , 2013, 19, 481-483.	4.1	48
12	Importance for forest plant communities of refuges protecting from deer browsing. <i>Forest Ecology and Management</i> , 2013, 289, 470-477.	3.2	29
