#	ARTICLE	IF	CITATIONS
1	The Percentage of Consonants Correct (PCC) Metric. <i>Journal of Speech, Language, and Hearing Research</i> , 1997, 40, 708-722.	1.6	496
2	Prevalence of Speech Delay in 6-Year-Old Children and Comorbidity With Language Impairment. <i>Journal of Speech, Language, and Hearing Research</i> , 1999, 42, 1461-1481.	1.6	470
3	Phonological Disorders III. <i>The Journal of Speech and Hearing Disorders</i> , 1982, 47, 256-270.	1.3	462
4	Speech and Prosody Characteristics of Adolescents and Adults With High-Functioning Autism and Asperger Syndrome. <i>Journal of Speech, Language, and Hearing Research</i> , 2001, 44, 1097-1115.	1.6	436
5	Four New Speech and Prosody-Voice Measures for Genetics Research and Other Studies in Developmental Phonological Disorders. <i>Journal of Speech, Language, and Hearing Research</i> , 1993, 36, 105-140.	1.6	277
6	Developmental Phonological Disorders I. <i>Journal of Speech, Language, and Hearing Research</i> , 1994, 37, 1100-1126.	1.6	224
7	A Procedure for Phonetic Transcription by Consensus. <i>Journal of Speech, Language, and Hearing Research</i> , 1984, 27, 456-465.	1.6	205
8	Developmental Apraxia of Speech. <i>Journal of Speech, Language, and Hearing Research</i> , 1997, 40, 273-285.	1.6	205
9	Reliability studies in broad and narrow phonetic transcription. <i>Clinical Linguistics and Phonetics</i> , 1991, 5, 225-279.	0.9	202
10	Risk Factors for Speech Delay of Unknown Origin in 3-Year-Old Children. <i>Child Development</i> , 2003, 74, 346-357.	3.0	189
11	Pre-literacy skills of subgroups of children with speech sound disorders. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2004, 45, 821-835.	5.2	181
12	Phonological Disorders I. <i>The Journal of Speech and Hearing Disorders</i> , 1982, 47, 226-241.	1.3	180
13	The Speech Disorders Classification System (SDCS). <i>Journal of Speech, Language, and Hearing Research</i> , 1997, 40, 723-740.	1.6	174
14	Extensions to the Speech Disorders Classification System (SDCS). <i>Clinical Linguistics and Phonetics</i> , 2010, 24, 795-824.	0.9	163
15	Brief Report: Relations between Prosodic Performance and Communication and Socialization Ratings in High Functioning Speakers with Autism Spectrum Disorders. <i>Journal of Autism and Developmental Disorders</i> , 2005, 35, 861-869.	2.7	152
16	What Influences Literacy Outcome in Children With Speech Sound Disorder?. <i>Journal of Speech, Language, and Hearing Research</i> , 2009, 52, 1175-1188.	1.6	146
17	Characteristics of Children with Phonologic Disorders of Unknown Origin. <i>The Journal of Speech and Hearing Disorders</i> , 1986, 51, 140-161.	1.3	141
18	Prevalence and Phenotype of Childhood Apraxia of Speech in Youth With Galactosemia. <i>Journal of Speech, Language, and Hearing Research</i> , 2011, 54, 487-519.	1.6	139

#	ARTICLE	IF	CITATIONS
19	The Hypothesis of Apraxia of Speech in Children with Autism Spectrum Disorder. <i>Journal of Autism and Developmental Disorders</i> , 2011, 41, 405-426.	2.7	132
20	Speech, Prosody, and Voice Characteristics of a Mother and Daughter With a 7;13 Translocation Affecting <i>FOXP2</i> . <i>Journal of Speech, Language, and Hearing Research</i> , 2006, 49, 500-525.	1.6	129
21	Pleiotropic Effects of a Chromosome 3 Locus on Speech-Sound Disorder and Reading. <i>American Journal of Human Genetics</i> , 2004, 74, 283-297.	6.2	124
22	Articulation Testing Versus Conversational Speech Sampling. <i>Journal of Speech, Language, and Hearing Research</i> , 1992, 35, 259-273.	1.6	120
23	A Nonword Repetition Task for Speakers With Misarticulations: The Syllable Repetition Task (SRT). <i>Journal of Speech, Language, and Hearing Research</i> , 2009, 52, 1189-1212.	1.6	119
24	Encoding, memory, and transcoding deficits in Childhood Apraxia of Speech. <i>Clinical Linguistics and Phonetics</i> , 2012, 26, 445-482.	0.9	114
25	Developmental Apraxia of Speech. <i>Journal of Speech, Language, and Hearing Research</i> , 1997, 40, 286-312.	1.6	108
26	A set of regulatory genes co-expressed in embryonic human brain is implicated in disrupted speech development. <i>Molecular Psychiatry</i> , 2019, 24, 1065-1078.	7.9	106
27	Developmental Apraxia of Speech. <i>Journal of Speech, Language, and Hearing Research</i> , 1997, 40, 313-337.	1.6	103
28	Linkage of speech sound disorder to reading disability loci. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2005, 46, 1057-1066.	5.2	100
29	Phonological Disorders II. <i>The Journal of Speech and Hearing Disorders</i> , 1982, 47, 242-256.	1.3	89
30	A diagnostic marker for childhood apraxia of speech: the lexical stress ratio. <i>Clinical Linguistics and Phonetics</i> , 2003, 17, 549-574.	0.9	89
31	Developmental Phonological Disorders III. <i>Journal of Speech, Language, and Hearing Research</i> , 1994, 37, 1151-1177.	1.6	87
32	Toward Diagnostic and Phenotype Markers for Genetically Transmitted Speech Delay. <i>Journal of Speech, Language, and Hearing Research</i> , 2005, 48, 834-852.	1.6	84
33	Associations between Phonology and Syntax in Speech-Delayed Children. <i>Journal of Speech, Language, and Hearing Research</i> , 1982, 25, 536-547.	1.6	82
34	Developmental Phonological Disorders II. <i>Journal of Speech, Language, and Hearing Research</i> , 1994, 37, 1127-1150.	1.6	81
35	A Follow-up Study of Children with Phonologic Disorders of Unknown Origin. <i>The Journal of Speech and Hearing Disorders</i> , 1988, 53, 144-155.	1.3	79
36	Otitis Media, Fluctuant Hearing Loss, and Speech-Language Outcomes. <i>Journal of Speech, Language, and Hearing Research</i> , 2000, 43, 100-120.	1.6	78

#	ARTICLE	IF	CITATIONS
37	The Genetic Bases of Speech Sound Disorders: Evidence From Spoken and Written Language. <i>Journal of Speech, Language, and Hearing Research</i> , 2006, 49, 1294-1312.	1.6	71
38	Speech and Prosody Characteristics of Adults with Mental Retardation. <i>Journal of Speech, Language, and Hearing Research</i> , 1990, 33, 627-653.	1.6	68
39	Children with Comorbid Speech Sound Disorder and Specific Language Impairment are at Increased Risk for Attention-Deficit/Hyperactivity Disorder. <i>Journal of Abnormal Child Psychology</i> , 2008, 36, 151-163.	3.5	68
40	Whole-exome sequencing supports genetic heterogeneity in childhood apraxia of speech. <i>Journal of Neurodevelopmental Disorders</i> , 2013, 5, 29.	3.1	65
41	Phenotype of <i>FOXP2</i> haploinsufficiency in a mother and son. <i>American Journal of Medical Genetics, Part A</i> , 2012, 158A, 174-181.	1.2	61
42	A diagnostic marker for childhood apraxia of speech: the coefficient of variation ratio. <i>Clinical Linguistics and Phonetics</i> , 2003, 17, 575-595.	0.9	59
43	Dimensions of early speech sound disorders: A factor analytic study. <i>Journal of Communication Disorders</i> , 2006, 39, 139-157.	1.5	57
44	Novel candidate genes and regions for childhood apraxia of speech identified by array comparative genomic hybridization. <i>Genetics in Medicine</i> , 2012, 14, 928-936.	2.4	56
45	A Diagnostic Marker to Discriminate Childhood Apraxia of Speech From Speech Delay: I. Development and Description of the Pause Marker. <i>Journal of Speech, Language, and Hearing Research</i> , 2017, 60, S1096-S1117.	1.6	55
46	Estimates of the prevalence of motor speech disorders in children with idiopathic speech delay. <i>Clinical Linguistics and Phonetics</i> , 2019, 33, 679-706.	0.9	52
47	Risk for Speech Disorder Associated With Early Recurrent Otitis Media With Effusion. <i>Journal of Speech, Language, and Hearing Research</i> , 2000, 43, 79-99.	1.6	51
48	Speech Sound Disorder Influenced by a Locus in 15q14 Region. <i>Behavior Genetics</i> , 2006, 36, 858-868.	2.1	48
49	Childhood Apraxia of Speech (CAS) in two patients with 16p11.2 microdeletion syndrome. <i>European Journal of Human Genetics</i> , 2013, 21, 455-459.	2.8	48
50	Family pedigrees of children with suspected childhood apraxia of speech. <i>Journal of Communication Disorders</i> , 2004, 37, 157-175.	1.5	46
51	Continuous Speech Sampling for Phonologic Analyses of Speech-Delayed Children. <i>The Journal of Speech and Hearing Disorders</i> , 1985, 50, 323-334.	1.3	44
52	Intelligibility Assessment in Developmental Phonological Disorders. <i>Journal of Speech, Language, and Hearing Research</i> , 1992, 35, 1095-1104.	1.6	44
53	Language Features in a Mother and Daughter of a Chromosome 7;13 Translocation Involving <i>FOXP2</i> . <i>Journal of Speech, Language, and Hearing Research</i> , 2009, 52, 1157-1174.	1.6	43
54	Estimates of the prevalence of speech and motor speech disorders in persons with complex neurodevelopmental disorders. <i>Clinical Linguistics and Phonetics</i> , 2019, 33, 707-736.	0.9	43

#	ARTICLE	IF	CITATIONS
55	A diagnostic marker for speech delay associated with otitis media with effusion: backing of obstruents. <i>Clinical Linguistics and Phonetics</i> , 2003, 17, 529-547.	0.9	40
56	Metrical Analysis of the Speech of Children With Suspected Developmental Apraxia of Speech. <i>Journal of Speech, Language, and Hearing Research</i> , 1999, 42, 1444-1460.	1.6	39
57	Diagnostic markers for child speech sound disorders: introductory comments. <i>Clinical Linguistics and Phonetics</i> , 2003, 17, 501-505.	0.9	38
58	Acoustic phenotypes for speech-genetics studies: toward an acoustic marker for residual /s/ distortions. <i>Clinical Linguistics and Phonetics</i> , 2002, 16, 403-424.	0.9	36
59	Tabletop Versus Microcomputer-Assisted Speech Management. <i>The Journal of Speech and Hearing Disorders</i> , 1990, 55, 635-655.	1.3	35
60	Perceptual and acoustic reliability estimates for the Speech Disorders Classification System (SDCS). <i>Clinical Linguistics and Phonetics</i> , 2010, 24, 825-846.	0.9	35
61	Which children benefit from letter names in learning letter sounds?. <i>Cognition</i> , 2008, 106, 1322-1338.	2.2	34
62	Phonological Correlates of Middle-Ear Involvement in Speech-Delayed Children. <i>Journal of Speech, Language, and Hearing Research</i> , 1983, 26, 293-297.	1.6	32
63	Speech and motor speech disorders and intelligibility in adolescents with Down syndrome. <i>Clinical Linguistics and Phonetics</i> , 2019, 33, 790-814.	0.9	32
64	Gene × Environment interactions in speech sound disorder predict language and preliteracy outcomes. <i>Development and Psychopathology</i> , 2007, 19, 1047-1072.	2.3	31
65	Contextual and Linguistic Correlates of Intelligibility in Children With Developmental Phonological Disorders. <i>Journal of Speech, Language, and Hearing Research</i> , 1992, 35, 1316-1332.	1.6	29
66	Speech Normalization in Developmental Phonological Disorders. <i>Language, Speech, and Hearing Services in Schools</i> , 1993, 24, 10-18.	1.6	29
67	Tabletop versus Microcomputer-Assisted Speech Management. <i>The Journal of Speech and Hearing Disorders</i> , 1989, 54, 233-248.	1.3	28
68	Data-Driven Subclassification of Speech Sound Disorders in Preschool Children. <i>Journal of Speech, Language, and Hearing Research</i> , 2014, 57, 2033-2050.	1.6	28
69	Functional MRI evidence for fine motor praxis dysfunction in children with persistent speech disorders. <i>Brain Research</i> , 2015, 1597, 47-56.	2.2	27
70	Estimates of the Prevalence of Speech and Motor Speech Disorders in Youth With 22q11.2 Deletion Syndrome. <i>American Journal of Speech-Language Pathology</i> , 2019, 28, 53-82.	1.8	26
71	A Subtype of Speech Delay Associated With Developmental Psychosocial Involvement. <i>Journal of Speech, Language, and Hearing Research</i> , 2005, 48, 635-650.	1.6	24
72	A Diagnostic Marker to Discriminate Childhood Apraxia of Speech From Speech Delay: II. Validity Studies of the Pause Marker. <i>Journal of Speech, Language, and Hearing Research</i> , 2017, 60, S1118-S1134.	1.6	24

#	ARTICLE	IF	CITATIONS
73	A Diagnostic Marker to Discriminate Childhood Apraxia of Speech From Speech Delay: III. Theoretical Coherence of the Pause Marker with Speech Processing Deficits in Childhood Apraxia of Speech. <i>Journal of Speech, Language, and Hearing Research</i> , 2017, 60, S1135-S1152.	1.6	24
74	Estimates of the prevalence of speech and motor speech disorders in adolescents with Down syndrome. <i>Clinical Linguistics and Phonetics</i> , 2019, 33, 772-789.	0.9	24
75	Associations among Pragmatic Functions, Linguistic Stress, and Natural Phonological Processes in Speech-Delayed Children. <i>Journal of Speech, Language, and Hearing Research</i> , 1982, 25, 547-553.	1.6	23
76	The Capability-Focus Treatment Framework for Child Speech Disorders. <i>American Journal of Speech-Language Pathology</i> , 1998, 7, 27-38.	1.8	23
77	A diagnostic marker for speech delay associated with otitis media with effusion: the intelligibilityâ€speech gap. <i>Clinical Linguistics and Phonetics</i> , 2003, 17, 507-528.	0.9	20
78	A Diagnostic Marker to Discriminate Childhood Apraxia of Speech From Speech Delay: IV. The Pause Marker Index. <i>Journal of Speech, Language, and Hearing Research</i> , 2017, 60, S1153-S1169.	1.6	19
79	Descriptive Statistics for Two Children's Social Desirability Scales, General and Test Anxiety, and Locus of Control in Elementary School Children. <i>Psychological Reports</i> , 1974, 34, 863-870.	1.7	18
80	Articulation Testing by Microcomputer. <i>The Journal of Speech and Hearing Disorders</i> , 1986, 51, 309-324.	1.3	18
81	Breakpoint localization using arrayâ€CGH in three siblings with an unbalanced 4q;16q translocation and childhood apraxia of speech (CAS). <i>American Journal of Medical Genetics, Part A</i> , 2008, 146A, 2227-2233.	1.2	18
82	Self-Monitoring and Generalization in Preschool Speech-Delayed Children. <i>Language, Speech, and Hearing Services in Schools</i> , 1990, 21, 157-170.	1.6	18
83	An Intervention Procedure for Children with Persistent /r/ Errors. <i>Language, Speech, and Hearing Services in Schools</i> , 1980, 11, 102-110.	1.6	17
84	A Retrospective Study of Spontaneous Generalization in Speech-Delayed Children. <i>Language, Speech, and Hearing Services in Schools</i> , 1987, 18, 144-157.	1.6	16
85	Distinct developmental profiles in typical speech acquisition. <i>Journal of Neurophysiology</i> , 2012, 107, 2885-2900.	1.8	15
86	Cognitive, Linguistic, and Motor Abilities in a Multigenerational Family with Childhood Apraxia of Speech. <i>Archives of Clinical Neuropsychology</i> , 2016, 31, 1006-1025.	0.5	15
87	Articulation Judgments: Some Perceptual Considerations. <i>Journal of Speech and Hearing Research</i> , 1972, 15, 876-882.	0.7	14
88	A neurodevelopmental framework for research in childhood apraxia of speech. , 2010, , 259-270.		14
89	Heritability Estimation for Speech-Sound Traits with Developmental Trajectories. <i>Behavior Genetics</i> , 2011, 41, 184-191.	2.1	12
90	Transitioning from analog to digital audio recording in childhood speech sound disorders. <i>Clinical Linguistics and Phonetics</i> , 2005, 19, 335-359.	0.9	9

#	ARTICLE	IF	CITATIONS
91	A frequent acoustic sign of speech motor delay (SMD). <i>Clinical Linguistics and Phonetics</i> , 2019, 33, 757-771.	0.9	8
92	Initial studies of the phenotype and persistence of speech motor delay (SMD). <i>Clinical Linguistics and Phonetics</i> , 2019, 33, 737-756.	0.9	7
93	Analysis of Language-Speech Samples with Salt and Pepper. <i>Journal of Speech, Language, and Hearing Research</i> , 1989, 32, 755-766.	1.6	6
94	Alternative Research Perspectives. <i>Journal of Speech, Language, and Hearing Research</i> , 1998, 41, 960-963.	1.6	5
95	The Effect of Examiner Social Behavior on Children's Articulation Test Performance. <i>Journal of Speech and Hearing Research</i> , 1971, 14, 659-672.	0.7	4
96	Toward Classification of Developmental Phonological Disorders. <i>Speech and Language: Advances in Basic Research and Practice</i> , 1982, 8, 1-18.	0.1	4
97	Response to Ingram Letter. <i>Journal of Speech, Language, and Hearing Research</i> , 1994, 37, 936-937.	1.6	1
