#	ARTICLE	IF	CITATIONS
1	Optimal Global Liner Service Procurement by Utilizing Liner Service Schedules. <i>Production and Operations Management</i> , 2021, 30, 703-714.	2.1	6
2	Liner Shipping Service Planning Under Sulfur Emission Regulations. <i>Transportation Science</i> , 2021, 55, 491-509.	2.6	36
3	Contracting in ocean transportation with empty container repositioning under asymmetric information. <i>Transportation Research, Part E: Logistics and Transportation Review</i> , 2021, 145, 102173.	3.7	12
4	Shipping to Heterogeneous Customers with Competing Carriers. <i>Manufacturing and Service Operations Management</i> , 2020, 22, 850-867.	2.3	17
5	Coordinating Pricing and Empty Container Repositioning in Two-Depot Shipping Systems. <i>Transportation Science</i> , 2020, 54, 1697-1713.	2.6	12
6	Quantity discount pricing for rail transport in a dry port system. <i>Transportation Research, Part E: Logistics and Transportation Review</i> , 2019, 122, 563-580.	3.7	31
7	A carrier's shipper contract under asymmetric information in the ocean transport industry. <i>Annals of Operations Research</i> , 2019, 273, 377-408.	2.6	12
8	Detention decisions for empty containers in the hinterland transportation system. <i>Transportation Research Part B: Methodological</i> , 2018, 110, 188-208.	2.8	34
9	An empirical model for estimating berth and sailing times of mega container ships. <i>Maritime Policy and Management</i> , 2018, 45, 1078-1093.	1.9	5
10	Ocean container transport in global supply chains: Overview and research opportunities. <i>Transportation Research Part B: Methodological</i> , 2017, 95, 442-474.	2.8	217
11	A novel floating price contract for the ocean freight industry. <i>IIE Transactions</i> , 2017, 49, 194-208.	1.6	7
12	Carrier Portfolio Management for Shipping Seasonal Products. <i>Operations Research</i> , 2017, 65, 1250-1266.	1.2	19
13	The regional port competition with different terminal competition intensity. <i>Flexible Services and Manufacturing Journal</i> , 2017, 29, 659-688.	1.9	11
14	Service type assignment and container routing with transit time constraints and empty container repositioning for liner shipping service networks. <i>Transportation Research Part B: Methodological</i> , 2016, 88, 46-71.	2.8	32
15	Appointment sequencing: Why the Smallest-Variance-First rule may not be optimal. <i>European Journal of Operational Research</i> , 2016, 255, 809-821.	3.5	20
16	Liner container assignment model with transit-time-sensitive container shipment demand and its applications. <i>Transportation Research Part B: Methodological</i> , 2016, 90, 135-155.	2.8	35
17	Bi-objective optimization for the container terminal integrated planning. <i>Transportation Research Part B: Methodological</i> , 2016, 93, 720-749.	2.8	59
18	Pricing and competition in a shipping market with waste shipments and empty container repositioning. <i>Transportation Research Part B: Methodological</i> , 2016, 85, 32-55.	2.8	47

#	ARTICLE	IF	CITATIONS
19	The value of specific cargo information for substitutable modes of inland transport. <i>Transportation Research, Part E: Logistics and Transportation Review</i> , 2016, 85, 23-39.	3.7	10
20	Fractional Price Matching Policies Arising from the Ocean Freight Service Industry. <i>Production and Operations Management</i> , 2015, 24, 1118-1134.	2.1	41
21	The loss-averse newsvendor problem with supply options. <i>Naval Research Logistics</i> , 2015, 62, 46-59.	1.4	27
22	Joint service capacity planning and dynamic container routing in shipping network with uncertain demands. <i>Transportation Research Part B: Methodological</i> , 2015, 78, 404-421.	2.8	47
23	The impact of slow ocean steaming on delivery reliability and fuel consumption. <i>Transportation Research, Part E: Logistics and Transportation Review</i> , 2015, 76, 176-190.	3.7	88
24	Inbound container storage pricing schemes. <i>IIE Transactions</i> , 2015, 47, 800-818.	2.1	9
25	Disruption Recovery for a Vessel in Liner Shipping. <i>Transportation Science</i> , 2015, 49, 900-921.	2.6	58
26	Joint planning of berth and yard allocation in transshipment terminals using multi-cluster stacking strategy. <i>Transportation Research, Part E: Logistics and Transportation Review</i> , 2015, 83, 34-50.	3.7	39
27	A tailored branch-and-price approach for a joint tramp ship routing and bunkering problem. <i>Transportation Research Part B: Methodological</i> , 2015, 72, 1-19.	2.8	57
28	Optimal Algorithm for the General Quay Crane Double-Cycling Problem. <i>Transportation Science</i> , 2015, 49, 957-967.	2.6	38
29	A mathematical formulation and efficient heuristics for the dynamic container relocation problem. <i>Naval Research Logistics</i> , 2014, 61, 101-118.	1.4	45
30	An empirical investigation of the seaport's economic impact: Evidence from major ports in China. <i>Transportation Research, Part E: Logistics and Transportation Review</i> , 2014, 69, 41-53.	3.7	78
31	The Critical Role of Ocean Container Transport in Global Supply Chain Performance. <i>Production and Operations Management</i> , 2013, 22, 253-268.	2.1	153
32	Supply chain contracting with competing suppliers under asymmetric information. <i>IIE Transactions</i> , 2013, 45, 25-52.	2.1	53
33	Compensation plan for competing salespersons under asymmetric information. <i>European Journal of Operational Research</i> , 2013, 227, 570-580.	3.5	14
34	Scheduling Arrivals to a Stochastic Service Delivery System Using Copositive Cones. <i>Operations Research</i> , 2013, 61, 711-726.	1.2	118
35	Procurement risk management using capacitated option contracts with fixed ordering costs. <i>IIE Transactions</i> , 2013, 45, 845-864.	2.1	37
36	Inbound container storage price competition between the container terminal and a remote container yard. <i>Flexible Services and Manufacturing Journal</i> , 2012, 24, 320-348.	1.9	33

#	ARTICLE	IF	CITATIONS
37	Modified critical fractile approach for a class of partial postponement problems. International Journal of Production Economics, 2012, 136, 185-193.	5.1	8
38	Combined Pricing and Portfolio Option Procurement. Production and Operations Management, 2012, 21, 361-377.	2.1	52
39	TECHNICAL NOTE"Optimal Control of an Assembly System with Multiple Stages and Multiple Demand Classes. Operations Research, 2011, 59, 522-529.	1.2	48
40	Parallel machine scheduling with multiple unloading servers. Journal of Scheduling, 2010, 13, 213-226.	1.3	33
41	Optimal decisions for assemble-to-order systems with uncertain assembly capacity. International Journal of Production Economics, 2010, 123, 155-165.	5.1	32
42	Procurement management using option contracts: random spot price and the portfolio effect. IIE Transactions, 2010, 42, 793-811.	2.1	142
43	Note"Optimal Component Acquisition for a Single-Product, Single-Demand Assemble-to-Order Problem with Expediting. Manufacturing and Service Operations Management, 2009, 11, 229-236.	2.3	17
44	Optimal transportation policies for production/inventory systems with an unreliable and a reliable carrier. Journal of Global Optimization, 2009, 44, 251-271.	1.1	2
45	Inventory control problem with freight cost and stochastic demand. Operations Research Letters, 2009, 37, 443-446.	0.5	11
46	Minimizing the makespan in a two-machine cross-docking flow shop problem. European Journal of Operational Research, 2009, 193, 59-72.	3.5	125
47	Pricing and competition in a transportation market with empty equipment repositioning. Transportation Research Part B: Methodological, 2009, 43, 677-691.	2.8	65
48	Logistics scheduling with batching and transportation. European Journal of Operational Research, 2008, 189, 871-876.	3.5	71
49	A stochastic model for joint inventory and outbound shipment decisions. IIE Transactions, 2008, 40, 324-340.	2.1	54
50	Single machine scheduling under potential disruption. Operations Research Letters, 2007, 35, 541-548.	0.5	26
51	Outbound shipment mode considerations for integrated inventory and delivery lot-sizing decisions. Operations Research Letters, 2007, 35, 813-822.	0.5	26
52	Parallel-machine scheduling under potential disruption. Optimization Letters, 2007, 2, 27-37.	0.9	27
53	Dynamic lot-sizing problem with demand time windows and container-based transportation cost. Optimization Letters, 2007, 2, 39-51.	0.9	23
54	A comparison of outbound dispatch policies for integrated inventory and transportation decisions. European Journal of Operational Research, 2006, 171, 1094-1112.	3.5	75

#	ARTICLE	IF	CITATIONS
55	Two Machine Scheduling under Disruptions with Transportation Considerations. Journal of Scheduling, 2006, 9, 35-48.	1.3	31
56	Inventory and Production Decisions for an Assemble-to-Order System with Uncertain Demand and Limited Assembly Capacity. Operations Research, 2006, 54, 1137-1150.	1.2	39
57	Optimization of processing and delivery decisions involving third-party machines. Nonlinear Analysis: Theory, Methods & Applications, 2005, 63, e2269-e2278.	0.6	12
58	Machine scheduling with deliveries to multiple customer locations. European Journal of Operational Research, 2005, 164, 39-51.	3.5	121
59	Production and transport logistics scheduling with two transport mode choices. Naval Research Logistics, 2005, 52, 796-809.	1.4	59
60	Two-machine shop scheduling with an uncapacitated interstage transporter. IIE Transactions, 2005, 37, 725-736.	2.1	46
61	A dynamic lot-sizing model with multi-mode replenishments: polynomial algorithms for special cases with dual and multiple modes. IIE Transactions, 2005, 37, 453-467.	2.1	40
62	A Two-Echelon Inventory Optimization Model with Demand Time Window Considerations. Journal of Global Optimization, 2004, 30, 347-366.	1.1	25
63	Machine scheduling with job delivery coordination. European Journal of Operational Research, 2004, 158, 470-487.	3.5	215
64	Analysis of algorithms for two-stage flowshops with multi-processor task flexibility. Naval Research Logistics, 2004, 51, 44-59.	1.4	8
65	Warehouse space capacity and delivery time window considerations in dynamic lot-sizing for a simple supply chain. International Journal of Production Economics, 2004, 92, 169-180.	5.1	63
66	Inventory replenishment model: lot sizing versus just-in-time delivery. Operations Research Letters, 2004, 32, 581-590.	0.5	28
67	Logistics scheduling: Analysis of two-stage problems. Journal of Systems Science and Systems Engineering, 2003, 12, 385-407.	0.8	7
68	The Buyer-Vendor Coordination Problem: Modeling Inbound and Outbound Cargo Capacity and Costs. IIE Transactions, 2003, 35, 987-1002.	2.1	53
69	A Dynamic Model for Inventory Lot Sizing and Outbound Shipment Scheduling at a Third-Party Warehouse. Operations Research, 2003, 51, 735-747.	1.2	101
70	Optimal outbound dispatch policies: Modeling inventory and cargo capacity. Naval Research Logistics, 2002, 49, 531-556.	1.4	58
71	Workforce planning in synchronous production systems. European Journal of Operational Research, 2002, 136, 551-572.	3.5	27
72	Parallel machine scheduling with a common due window. European Journal of Operational Research, 2002, 136, 512-527.	3.5	61

#	ARTICLE	IF	CITATIONS
73	A Dynamic Lot-Sizing Model with Demand Time Windows. <i>Management Science</i> , 2001, 47, 1384-1395.	2.4	93
74	Single-machine scheduling with maintenance and repair rate-modifying activities. <i>European Journal of Operational Research</i> , 2001, 135, 493-513.	3.5	97
75	Machine scheduling with transportation considerations. <i>Journal of Scheduling</i> , 2001, 4, 3-24.	1.3	277
76	Title is missing!. <i>Annals of Operations Research</i> , 2001, 102, 287-307.	2.6	39
77	Scheduling jobs and maintenance activities on parallel machines. <i>Naval Research Logistics</i> , 2000, 47, 145-165.	1.4	187
78	A note on "parallel machine scheduling with non-simultaneous machine available time". <i>Discrete Applied Mathematics</i> , 2000, 100, 133-135.	0.5	28
79	Multiprocessor task scheduling to minimize the maximum tardiness and the total completion time. <i>IEEE Transactions on Automation Science and Engineering</i> , 2000, 16, 824-830.	2.4	10
80	Stock Replenishment and Shipment Scheduling for Vendor-Managed Inventory Systems. <i>Management Science</i> , 2000, 46, 217-232.	2.4	460
81	Scheduling jobs and maintenance activities on parallel machines. <i>Naval Research Logistics</i> , 2000, 47, 145.	1.4	1
82	Two-machine flowshop scheduling with availability constraints. <i>European Journal of Operational Research</i> , 1999, 114, 420-429.	3.5	126
83	Scheduling one and two-processor tasks on two parallel processors. <i>IIE Transactions</i> , 1999, 31, 445-455.	2.1	1
84	General multiprocessor task scheduling. <i>Naval Research Logistics</i> , 1999, 46, 57-74.	1.4	75
85	Scheduling maintenance and semiresumable jobs on a single machine. <i>Naval Research Logistics</i> , 1999, 46, 845-863.	1.4	153
86	Scheduling one and two-processor tasks on two parallel processors. <i>IIE Transactions</i> , 1999, 31, 445-455.	2.1	23
87	General multiprocessor task scheduling. <i>Naval Research Logistics</i> , 1999, 46, 57-74.	1.4	13
88	Performance Comparison of Some Classes of Flexible Flow Shops and Job Shops. <i>Flexible Services and Manufacturing Journal</i> , 1998, 10, 379-405.	0.4	22
89	Scheduling with multiple-job-on-one-processor pattern. <i>IIE Transactions</i> , 1998, 30, 433-445.	2.1	8
90	Minimizing total completion time in two-processor task systems with prespecified processor allocations. <i>Naval Research Logistics</i> , 1998, 45, 231-242.	1.4	23

#	ARTICLE	IF	CITATIONS
91	Scheduling with multiple-job-on-one-processor pattern. IIE Transactions, 1998, 30, 433-445.	2.1	97
92	Workforce Planning in Mixed Model Assembly Systems. Operations Research, 1997, 45, 553-567.	1.2	59
93	Minimizing the makespan in the two-machine flowshop scheduling problem with an availability constraint. Operations Research Letters, 1997, 20, 129-139.	0.5	166
94	Current trends in deterministic scheduling. Annals of Operations Research, 1997, 70, 1-41.	2.6	183
95	Scheduling with agreeable release times and due dates on a batch processing machine. European Journal of Operational Research, 1997, 96, 564-569.	3.5	93
96	On the fixed interval due-date scheduling problem. Discrete Applied Mathematics, 1996, 68, 101-117.	0.5	7
97	Machine scheduling with an availability constraint. Journal of Global Optimization, 1996, 9, 395-416.	1.1	357
98	Solving a Class Scheduling Problem with a Genetic Algorithm. ORSA Journal on Computing, 1995, 7, 443-452.	1.7	31
99	Minimizing the error bound for the dynamic lot size model. Operations Research Letters, 1995, 17, 57-68.	0.5	7
100	The single-machine scheduling problem to minimize total tardiness subject to minimum number of tardy jobs. IIE Transactions, 1995, 27, 250-256.	2.1	21
101	Error bound for the dynamic lot size model allowing speculative motive. IIE Transactions, 1995, 27, 683-688.	2.1	7
102	GLOBAL JOB SHOP SCHEDULING WITH A GENETIC ALGORITHM. Production and Operations Management, 1995, 4, 30-45.	2.1	34
103	A new dynamic programming algorithm for the single item capacitated dynamic lot size model. Journal of Global Optimization, 1994, 4, 285-300.	1.1	55
104	A dynamic programming algorithm for dynamic lot size models with piecewise linear costs. Journal of Global Optimization, 1994, 4, 397-413.	1.1	20
105	Minimizing makespan in hybrid flowshops. Operations Research Letters, 1994, 16, 149-158.	0.5	163
106	A REVIEW OF PRODUCTION PLANNING AND SCHEDULING MODELS IN THE SEMICONDUCTOR INDUSTRY PART II: SHOP-FLOOR CONTROL. IIE Transactions, 1994, 26, 44-55.	2.1	303
107	On scheduling to minimize earliness-tardiness and batch delivery costs with a common due date. European Journal of Operational Research, 1993, 70, 272-288.	3.5	89
108	Minimizing total completion time on a batch processing machine with job families. Operations Research Letters, 1993, 13, 61-65.	0.5	122

#	ARTICLE	IF	CITATIONS
109	Capacitated two-parallel machines scheduling to minimize sum of job completion times. Discrete Applied Mathematics, 1993, 41, 211-222.	0.5	84
110	Minimizing the Makespan in the 3-Machine Assembly-Type Flowshop Scheduling Problem. Management Science, 1993, 39, 616-625.	2.4	256
111	Implementation of a decision support system for scheduling semiconductor test operations. Journal of Electronics Manufacturing, 1993, 03, 121-131.	0.4	23
112	Complexity of Single Machine Hierarchical Scheduling: A Survey. , 1993, , 269-298.		48
113	Error Bound of a Heuristic for the Common Due Date Scheduling Problem. ORSA Journal on Computing, 1993, 5, 420-425.	1.7	11
114	GUIDELINES FOR REPORTING COMPUTATIONAL RESULTS IN IIE TRANSACTIONS. IIE Transactions, 1993, 25, 121-123.	2.1	37
115	COMMON DUE-DATE WINDOW SCHEDULING. Production and Operations Management, 1993, 2, 262-275.	2.1	50
116	A Classification of Static Scheduling Problems. , 1993, , 203-253.		14
117	Efficient Algorithms for Scheduling Semiconductor Burn-In Operations. Operations Research, 1992, 40, 764-775.	1.2	434
118	A REVIEW OF PRODUCTION PLANNING AND SCHEDULING MODELS IN THE SEMICONDUCTOR INDUSTRY PART I: SYSTEM CHARACTERISTICS, PERFORMANCE EVALUATION AND PRODUCTION PLANNING. IIE Transactions, 1992, 24, 47-60.	2.1	478
119	Single machine flow-time scheduling with scheduled maintenance. Acta Informatica, 1992, 29, 375-382.	0.5	178
120	A new dynamic programming algorithm for the parallel machines total weighted completion time problem. Operations Research Letters, 1992, 11, 73-75.	0.5	32
121	Scheduling semiconductor test operations: Minimizing maximum lateness and number of tardy jobs on a single machine. Naval Research Logistics, 1992, 39, 369-388.	1.4	68
122	Parallel machines scheduling with nonsimultaneous machine available time. Discrete Applied Mathematics, 1991, 30, 53-61.	0.5	159
123	Minimizing weighted number of tardy jobs and weighted earliness-tardiness penalties about a common due date. Computers and Operations Research, 1991, 18, 379-389.	2.4	60
124	The dynamic lot size model with quantity discount. Naval Research Logistics, 1990, 37, 707-713.	1.4	50
125	Economic Lot Scheduling for Two-Product Problem. IIE Transactions, 1989, 21, 162-169.	2.1	7
126	A Solution to the Multiple Set-Up Problem with Dynamic Demand. IIE Transactions, 1989, 21, 266-270.	2.1	71

#	ARTICLE	IF	CITATIONS
127	Multiprocessor scheduling: combining LPT and MULTIFIT. Discrete Applied Mathematics, 1988, 20, 233-242.	0.5	69
128	The Economic Order Quantity for Freight Discount Costs. IIE Transactions, 1986, 18, 318-320.	2.1	85
