#	ARTICLE	IF	CITATIONS
1	Elasto-hydrodynamic analysis of journal bearing operating with nanolubricants. Proceedings of the Institution of Mechanical Engineers, Part J: Journal of Engineering Tribology, 2021, 235, 963-974.	1.8	6
2	Tribological analysis of blended vegetable oils containing CuO nanoparticles as an additive. Materials Today: Proceedings, 2021, 51, 1259-1259.	1.8	6
3	Tribological challenges and advancements in wind turbine bearings: A review. Engineering Failure Analysis, 2020, 118, 104885.	4.0	55
4	Experimental analysis on stability and rheological behaviour of TiO <sub>2</sub> /canola oil nanolubricants. Materials Today: Proceedings, 2020, 28, 1285-1289.	1.8	9
5	Improving the tribological performance of canola oil by adding CuO nanoadditives for steel/steel contact. Materials Today: Proceedings, 2020, 28, 1392-1396.	1.8	21
6	Investigation of the micropolar lubricant and thermal effects in the slot entry hybrid journal bearings. Proceedings of the Institution of Mechanical Engineers, Part C: Journal of Mechanical Engineering Science, 2018, 232, 2103-2116.	2.1	3
7	Performance comparison of hole-entry and slot entry hybrid journal bearings considering combined influence of thermal effects and micropolar lubricant. Industrial Lubrication and Tribology, 2018, 70, 1037-1050.	1.3	6
8	Thermohydrostatic analysis of hybrid journal bearing compensated by constant flow valve operating with micropolar lubricant. Proceedings of the Institution of Mechanical Engineers, Part J: Journal of Engineering Tribology, 2016, 230, 1041-1055.	1.8	5
9	Thermohydrostatic rheological analysis of constant flow valve compensated multiple hole-entry hybrid journal bearings. Industrial Lubrication and Tribology, 2014, 66, 244-259.	1.3	3
10	Static performance characteristics of hybrid journal bearings with plugged entry holes. Industrial Lubrication and Tribology, 2013, 65, 333-340.	1.3	6
11	Thermohydrostatic rheological study of orifice compensated asymmetric hole-entry hybrid journal bearings. Industrial Lubrication and Tribology, 2013, 65, 369-378.	1.3	6
12	Influence of micropolar lubricant on bearings performance: A review. Proceedings of the Institution of Mechanical Engineers, Part J: Journal of Engineering Tribology, 2012, 226, 775-784.	1.8	21
13	Theoretical modeling of orifice compensated symmetric hole-entry hybrid journal bearings. Journal of Engineering, Design and Technology, 2012, 10, 421-435.	1.7	1
14	Influence of non-Newtonian behavior of lubricant on performance of hole-entry hybrid journal bearings employing constant flow valve restrictors. Industrial Lubrication and Tribology, 2011, 63, 373-386.	1.3	3
15	Performance of Asymmetric Slot-Entry Hybrid Journal Bearing Operating with Non-Newtonian Lubricant. Journal of Engineering & Technology, 2011, 1, 16.	0.1	4
16	Performance of slot-entry hybrid journal bearings considering combined influences of thermal effects and non-Newtonian behavior of lubricant. Tribology International, 2010, 43, 1518-1531.	5.9	34
17	Thermohydrostatic analysis of capillary compensated symmetric hole-entry hybrid journal bearing operating with non-Newtonian lubricant. Industrial Lubrication and Tribology, 2009, 61, 11-21.	1.3	17
18	On the design and development of hybrid journal bearings: a review. TriboTest Journal: Tribology and Lubrication in Practice, 2006, 12, 1-19.	0.7	53
