#	ARTICLE	IF	CITATIONS
1	European patch test results with audit allergens as candidates for inclusion in the European Baseline Series, 2019/20: Joint results of the <scp>ESSCA</sup>A</sup></scp> and the <scp>EBS</sup>B</sup></scp> working groups of the <scp>ESCD</scp>, and the <scp>GEIDAC</sup>C</sup></scp>. Contact Dermatitis, 2022, 86, 379-389.	0.8	18
2	Limonene and linalool hydroperoxides review: Pros and cons for routine patch testing. Contact Dermatitis, 2022, 87, 1-12.	0.8	12
3	Updated Criteria to Include Contact Allergens in the European Baseline Series With Suggested Additions. Current Treatment Options in Allergy, 2022, 9, 52-66.	0.9	2
4	Tâ€œcellâ€œmediated hypersensitivity to lumacaftor and ivacaftor in cystic fibrosis. Pediatric Allergy and Immunology, 2022, 33, .	1.1	1
5	Patch test results with the European baseline series, 2019/20â€œJoint European results of the <scp>ESSCA</scp> and the <scp>EBS</scp> working groups of the <scp>ESCD</scp>, and the <scp>GEIDAC</scp>. Contact Dermatitis, 2022, 87, 343-355.	0.8	22
6	Patch test results with the European baseline series and additions thereof in the ESSCA network, 2015â€œ2018. Contact Dermatitis, 2021, 84, 109-120.	0.8	44
7	Prevalence of allergic contact dermatitis to decyl and lauryl glucoside in the UK and Ireland. British Journal of Dermatology, 2021, 184, 571-573.	1.4	4
8	Developing a cosmetic series: Results from the <scp>ESSCA</scp> network, 2009â€œ2018. Contact Dermatitis, 2021, 84, 82-94.	0.8	10
9	Formaldehyde 2% is not a useful means of detecting allergy to formaldehyde releasersâ€œ results of the <scp>ESSCA</scp> network, 2015â€œ2018. Contact Dermatitis, 2021, 84, 95-102.	0.8	15
10	The European baseline series: Criteria for allergen inclusion with reference to formaldehyde releasers. Contact Dermatitis, 2021, 85, 125-128.	0.8	8
11	Nail dystrophy mimicking psoriatic disease caused by contact allergy to nail varnish allergens including copolymers. Contact Dermatitis, 2021, 85, 600-602.	0.8	3
12	Trends in preservative allergy: Benzisothiazolinone emerges from the pack. Contact Dermatitis, 2021, 85, 637-642.	0.8	15
13	Ideal proportion of the population to be patch tested: How many should we be doing?. Contact Dermatitis, 2021, 85, 693-697.	0.8	1
14	The European Baseline Series. , 2021, , 679-695.		0
15	Adverse Skin Reactions to Cosmetics and Skin Care Products. , 2021, , 913-932.		2
16	Comments on Various Baseline Series for Patch Testing. , 2021, , 663-677.		1
17	A survey of members of the European Surveillance System on Contact Allergy and the EU project â€œStanDermâ€œ to identify allergens tested in cosmetic series across Europe. Contact Dermatitis, 2020, 82, 195-200.	0.8	5
18	Allergic contact dermatitis to nonmethacrylate nail allergens in the <scp>UK</scp>. British Journal of Dermatology, 2020, 183, 754-756.	1.4	7

#	ARTICLE	IF	CITATIONS
19	The European Baseline Series. , 2020, , 1-17.		0
20	Adverse Skin Reactions to Cosmetics and Skin Care Products. , 2020, , 1-21.		1
21	Comments on Various Baseline Series for Patch Testing. , 2020, , 1-15.		0
22	Cosmetics and Skin Care Products. , 2020, , 1-21.		0
23	Comments on Various Baseline Series. , 2020, , 1-15.		0
24	A review of nonâ€glove personal protective equipmentâ€related occupational dermatoses reported to EPIDERM between 1993 and 2013. Contact Dermatitis, 2019, 80, 217-221.	0.8	38
25	Immediate hypersensitivity to <i>p</i>â€phenylenediamine. Contact Dermatitis, 2019, 80, 177-178.	0.8	9
26	The European baseline series and recommended additions: 2019. Contact Dermatitis, 2019, 80, 1-4.	0.8	142
27	Patch testing with alkyl glucosides: Concomitant reactions are common but not ubiquitous. Contact Dermatitis, 2019, 80, 286-290.	0.8	23
28	European Surveillance System on Contact Allergies (ESSCA): polysensitization, 2009â€2014. Contact Dermatitis, 2018, 78, 373-385.	0.8	17
29	Allergic contact dermatitis caused by nail acrylates in Europe. An EECDRG study. Contact Dermatitis, 2018, 78, 254-260.	0.8	74
30	(Meth)acrylate allergy: frequently missed?. British Journal of Dermatology, 2018, 178, 980-981.	1.4	15
31	UK trends of allergic occupational skin disease attributed to fragrances 1996â€2015. Contact Dermatitis, 2018, 78, 33-40.	0.8	23
32	A proposal to create an extension to the <sc>E</sc>uropean baseline series. Contact Dermatitis, 2018, 78, 101-108.	0.8	56
33	Extended documentation for hand dermatitis patients: Pilot study on irritant exposures. Contact Dermatitis, 2018, 79, 168-174.	0.8	15
34	Pilot study on a new concept of documenting the clinical relevance of patch test results in contact dermatitis patients. Contact Dermatitis, 2018, 79, 370-377.	0.8	8
35	Response to letter to the editor re. Hines J, Wilkinson <sc>SM</sc>, John <sc>SM</sc>, <i> et al</i>. The three moments of skin cream application: an evidenceâ€based proposal for use of skin creams in the prevention of irritant contact dermatitis in the workplace. Journal of the European Academy of Dermatology and Venereology, 2017, 31, e308.	1.3	0
36	Recommendation to test limonene hydroperoxides 0â€3% and linalool hydroperoxides 1â€0% in the British baseline patch test series. British Journal of Dermatology, 2017, 177, 1708-1715.	1.4	38

#	ARTICLE	IF	CITATIONS
37	Contact allergy to reactive dyes in footwear. <i>Contact Dermatitis</i> , 2017, 76, 370-371.	0.8	7
38	Contact allergy to thioctic acid present in Hypromellose [®] eye drops. <i>Contact Dermatitis</i> , 2017, 76, 361-362.	0.8	11
39	European Surveillance System on Contact Allergies (<sc>ESSCA</sc>): results with the European baseline series, 2013/14. <i>Journal of the European Academy of Dermatology and Venereology</i> , 2017, 31, 1516-1525.	1.3	106
40	Patch testing with rubber series in <sc>E</sc>urope: a critical review and recommendation. <i>Contact Dermatitis</i> , 2017, 76, 195-203.	0.8	21
41	The epidemic of methylisothiazolinone: a <sc>E</sc>uropean prospective study. <i>Contact Dermatitis</i> , 2017, 76, 272-279.	0.8	76
42	Allergic contact urticaria secondary to hair dye use. <i>Contact Dermatitis</i> , 2017, 77, 257-259.	0.8	5
43	Allergic contact dermatitis caused by copper in a malachite necklace. <i>Contact Dermatitis</i> , 2017, 77, 120-121.	0.8	7
44	Acrylate allergy: time to intervene. <i>Contact Dermatitis</i> , 2017, 77, 353-355.	0.8	10
45	Has the epidemic of allergic contact dermatitis due to methylisothiazolinone reached its peak?. <i>British Journal of Dermatology</i> , 2017, 177, 276-278.	1.4	11
46	The three moments of skin cream application: an evidence-based proposal for use of skin creams in the prevention of irritant contact dermatitis in the workplace. <i>Journal of the European Academy of Dermatology and Venereology</i> , 2017, 31, 53-64.	1.3	20
47	Patch test results with rubber series in the <sc>E</sc>uropean <sc>S</sc>urveillance <sc>S</sc>ystem on <sc>C</sc>ontact <sc>A</sc>llergies (<sc>ESSCA</sc>), 2013/14. <i>Contact Dermatitis</i> , 2016, 75, 345-352.	0.8	39
48	Allergic contact dermatitis in children: trends in allergens, 10 years on. A retrospective study of 500 children tested between 2005 and 2014 in one <sc>UK</sc> centre. <i>Contact Dermatitis</i> , 2016, 74, 37-43.	0.8	44
49	Quality in epidemiological surveillance of contact allergy. <i>Contact Dermatitis</i> , 2016, 74, 175-180.	0.8	9
50	Contact allergy to ingredients of topical medications: results of the European Surveillance System on Contact Allergies (ESSCA), 2009-2012. <i>Pharmacoepidemiology and Drug Safety</i> , 2016, 25, 1305-1312.	0.9	35
51	Careers advice: do we leave it too late?. <i>British Journal of Dermatology</i> , 2016, 175, 244-244.	1.4	0
52	ESSCA results with nickel, cobalt and chromium, 2009-2012. <i>Contact Dermatitis</i> , 2016, 75, 117-121.	0.8	41
53	Contact allergy resulting from the use of acrylate nails is increasing in both users and those who are occupationally exposed. <i>Contact Dermatitis</i> , 2016, 74, 120-122.	0.8	51
54	European Society of Contact Dermatitis guideline for diagnostic patch testing - recommendations on best practice. <i>Contact Dermatitis</i> , 2015, 73, 195-221.	0.8	1,012

#	ARTICLE	IF	CITATIONS
55	Patch test results of the European baseline series among patients with occupational contact dermatitis across Europe – analyses of the European Surveillance System on Contact Allergy network, 2002–2010. Contact Dermatitis, 2015, 72, 154-163.	0.8	144
56	Characteristics of patients patch tested in the European Surveillance System on Contact Allergies (ESSCA) network, 2009–2012. Contact Dermatitis, 2015, 73, 82-90.	0.8	36
57	Chronic cheilitis caused by acrylates used as an adhesive for an orthodontic brace. Contact Dermatitis, 2015, 72, 115-116.	0.8	6
58	ESSCA results with the baseline series, 2009–2012: rubber allergens. Contact Dermatitis, 2015, 73, 305-312.	0.8	35
59	Methylchloroisothiazolinone and methylisothiazolinone contact allergy: an occupational perspective. Contact Dermatitis, 2015, 72, 381-386.	0.8	25
60	UK rates of occupational skin disease attributed to rubber accelerators, 1996–2012. Contact Dermatitis, 2015, 72, 305-311.	0.8	36
61	Pitfalls of patch testing with glucosides. Contact Dermatitis, 2014, 71, 108-109.	0.8	7
62	Photopatch testing: recommendations for a European photopatch test baseline series. Contact Dermatitis, 2013, 68, 239-243.	0.8	125
63	Contact allergy to sodium sulfite and its relationship to sodium metabisulfite. Contact Dermatitis, 2012, 66, 128-130.	0.8	36
64	Current patch test results with the European baseline series and extensions to it from the European Surveillance System on Contact Allergy™ network, 2007–2008. Contact Dermatitis, 2012, 67, 9-19.	0.8	114
65	Octyldodecyl xyloside: a novel contact allergen. Contact Dermatitis, 2011, 65, 302-304.	0.8	9
66	The European baseline series in 10 European Countries, 2005/2006 – Results of the European Surveillance System on Contact Allergies (ESSCA). Contact Dermatitis, 2009, 61, 31-38.	0.8	156
