

Charles L Bormann

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/10802743/charles-l-bormann-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
27	ART: Laboratory Aspects 2022 , 393-408		
26	The effect of semen collection location and time to processing on sperm parameters and early IVF/ICSI outcomes. <i>Journal of Assisted Reproduction and Genetics</i> , 2021 , 38, 1449-1457	3.4	2
25	Deep learning early warning system for embryo culture conditions and embryologist performance in the ART laboratory. <i>Journal of Assisted Reproduction and Genetics</i> , 2021 , 38, 1641-1646	3.4	6
24	Response to ovulation induction treatments in women with polycystic ovary syndrome as a function of serum anti-Müllerian hormone levels. <i>Journal of Assisted Reproduction and Genetics</i> , 2021 , 38, 1827-1833	3.4	0
23	Adaptive adversarial neural networks for the analysis of lossy and domain-shifted datasets of medical images. <i>Nature Biomedical Engineering</i> , 2021 , 5, 571-585	19	0
22	A patient-specific model combining anti-Müllerian hormone and body mass index as a predictor of polycystic ovary syndrome and other oligo-anovulation disorders. <i>Fertility and Sterility</i> , 2021 , 115, 229-237	4.8	6
21	Evaluation of deep convolutional neural networks in classifying human embryo images based on their morphological quality. <i>Heliyon</i> , 2021 , 7, e06298	3.6	9
20	Pretreatment anti-Müllerian hormone levels and outcomes of ovarian stimulation with gonadotropins/intrauterine insemination cycles. <i>Fertility and Sterility</i> , 2021 , 116, 422-430	4.8	1
19	Consistency and objectivity of automated embryo assessments using deep neural networks. <i>Fertility and Sterility</i> , 2020 , 113, 781-787.e1	4.8	20
18	Performance of a deep learning based neural network in the selection of human blastocysts for implantation. <i>ELife</i> , 2020 , 9,	8.9	29
17	Predicting blastocyst formation of day 3 embryos using a convolutional neural network (CNN): a machine learning approach. <i>Fertility and Sterility</i> , 2019 , 112, e272-e273	4.8	2
16	Artificial intelligence and machine learning for human reproduction and embryology presented at ASRM and ESHRE 2018. <i>Journal of Assisted Reproduction and Genetics</i> , 2019 , 36, 591-600	3.4	47
15	Automated smartphone-based system for measuring sperm viability, DNA fragmentation, and hyaluronic binding assay score. <i>PLoS ONE</i> , 2019 , 14, e0212562	3.7	13
14	Human sperm morphology analysis using smartphone microscopy and deep learning. <i>Fertility and Sterility</i> , 2019 , 112, e41	4.8	6
13	A deep learning framework outperforms embryologists in selecting day 5 euploid blastocysts with the highest implantation potential. <i>Fertility and Sterility</i> , 2019 , 112, e77-e78	4.8	4
12	Deep convolutional neural networks (CNN) for assessment and selection of normally fertilized human embryos. <i>Fertility and Sterility</i> , 2019 , 112, e272	4.8	4
11	Improved monitoring of human embryo culture conditions using a deep learning-derived key performance indicator (KPI). <i>Fertility and Sterility</i> , 2019 , 112, e70-e71	4.8	4

10	Automated quality assessment of individual embryologists performing ICSI using deep learning-enabled fertilization and embryo grading technology. <i>Fertility and Sterility</i> , 2019 , 112, e71	4.8	7
9	Deep learning-enabled prediction of fertilization based on oocyte morphological quality. <i>Fertility and Sterility</i> , 2019 , 112, e275	4.8	3
8	Development and evaluation of inexpensive automated deep learning-based imaging systems for embryology. <i>Lab on A Chip</i> , 2019 , 19, 4139-4145	7.2	15
7	Müllerian-Inhibiting Substance/Anti-Müllerian Hormone as a Predictor of Preterm Birth in Polycystic Ovary Syndrome. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2018 , 103, 4187-4196	5.6	13
6	An automated smartphone-based diagnostic assay for point-of-care semen analysis. <i>Science Translational Medicine</i> , 2017 , 9,	17.5	99
5	A pilot randomized controlled trial of Day 3 single embryo transfer with adjunctive time-lapse selection versus Day 5 single embryo transfer with or without adjunctive time-lapse selection. <i>Human Reproduction</i> , 2017 , 32, 1598-1603	5.7	28
4	Cryopreserved embryo transfer is an independent risk factor for placenta accreta. <i>Fertility and Sterility</i> , 2015 , 103, 1176-84.e2	4.8	104
3	Is the presence of an uncleaved embryo on day 3 a useful predictor of outcomes following day 5 transfer?. <i>Journal of Assisted Reproduction and Genetics</i> , 2015 , 32, 1379-84	3.4	6
2	Induction of chemokines and prostaglandin synthesis pathways in luteinized human granulosa cells: potential role of luteotropin withdrawal and prostaglandin F ₂ in regression of the human corpus luteum. <i>Reproductive Biology</i> , 2015 , 15, 247-56	2.3	6
1	Prenatal testosterone and dihydrotestosterone exposure disrupts ovine testicular development. <i>Reproduction</i> , 2011 , 142, 167-73	3.8	19
