#	ARTICLE	IF	CITATIONS
1	A note on the elasticity of soft biological tissues. <i>Journal of Biomechanics</i> , 1972, 5, 309-311.	0.9	345
2	Solitary waves in prestressed elastic tubes. <i>Bulletin of Mathematical Biology</i> , 1996, 58, 939-955.	0.9	89
3	Wave propagation through a viscous fluid contained in a prestressed thin elastic tube. <i>International Journal of Engineering Science</i> , 1992, 30, 1607-1620.	2.7	88
4	Large deformation analysis of some basic problems in biophysics. <i>The Bulletin of Mathematical Biophysics</i> , 1976, 38, 701-712.	0.5	85
5	A stress-strain relation for a rat abdominal aorta. <i>Journal of Biomechanics</i> , 1988, 21, 369-374.	0.9	47
6	Head-on collision of solitary waves in fluid-filled elastic tubes. <i>Applied Mathematics Letters</i> , 2005, 18, 941-950.	1.5	47
7	Solitary waves in prestressed elastic tubes. <i>Bulletin of Mathematical Biology</i> , 1996, 58, 939-955.	0.9	39
8	A note on the exact travelling wave solution to the KdV-Burgers equation. <i>Wave Motion</i> , 2003, 38, 367-369.	1.0	37
9	Electromechanical properties and related models of bone tissues. <i>International Journal of Engineering Science</i> , 1979, 17, 813-851.	2.7	36
10	A travelling wave solution to the KdV-Burgers equation. <i>Applied Mathematics and Computation</i> , 2004, 154, 665-670.	1.4	36
11	The effect of a bump on wave propagation in a fluid-filled elastic tube. <i>International Journal of Engineering Science</i> , 2004, 42, 203-215.	2.7	35
12	On the nonlocal theory of quasi-static elastic dielectrics. <i>International Journal of Engineering Science</i> , 1972, 10, 285-292.	2.7	31
13	Variable coefficient modified KdV equation in fluid-filled elastic tubes with stenosis: Solitary waves. <i>Chaos, Solitons and Fractals</i> , 2009, 42, 358-364.	2.5	28
14	Modulation of electron-acoustic waves in a plasma with kappa distribution. <i>Physics of Plasmas</i> , 2016, 23, .	0.7	22
15	Interactions of nonlinear ion-acoustic waves in a collisionless plasma. <i>Journal of Computational and Applied Mathematics</i> , 2007, 206, 826-831.	1.1	21
16	A continuum theory of elastic solids with diatomic structure. <i>International Journal of Engineering Science</i> , 1973, 11, 1237-1246.	2.7	19
17	Modulational instability of acoustic waves in a dusty plasma with nonthermal electrons and trapped ions. <i>Chaos, Solitons and Fractals</i> , 2019, 121, 50-58.	2.5	19
18	Weakly nonlinear waves in a prestressed thin elastic tube containing a viscous fluid. <i>International Journal of Engineering Science</i> , 1999, 37, 1859-1876.	2.7	18

#	ARTICLE	IF	CITATIONS
19	A note on the solution of perturbed Korteweg-de Vries equation. Applied Mathematics and Computation, 2002, 132, 643-647.	1.4	18
20	Waves in fluid-filled elastic tubes with a stenosis: Variable coefficients KdV equations. Journal of Computational and Applied Mathematics, 2007, 202, 328-338.	1.1	18
21	Cylindrical and spherical solitary waves in an electron-acoustic plasma with vortex electron distribution. Physics of Plasmas, 2018, 25, .	0.7	17
22	An analytical solution to the dissipative nonlinear Schrödinger equation. Applied Mathematics and Computation, 2003, 145, 179-184.	1.4	16
23	A note on the cylindrical solitary waves in an electron-acoustic plasma with vortex electron distribution. Physics of Plasmas, 2015, 22, 092105.	0.7	16
24	Nonlinear waves in a thick-walled viscoelastic tube filled with an inviscid fluid. International Journal of Engineering Science, 1998, 36, 345-357.	2.7	14
25	Forced Korteweg-de Vries-Burgers equation in an elastic tube filled with a variable viscosity fluid. Chaos, Solitons and Fractals, 2008, 38, 1134-1145.	2.5	14
26	Analytical solution for nonplanar waves in a plasma with q-nonextensive nonthermal velocity distribution: Weighted residual method. Chaos, Solitons and Fractals, 2020, 130, 109448.	2.5	14
27	Solitary waves in initially stressed thin elastic tubes. International Journal of Non-Linear Mechanics, 1997, 32, 1165-1176.	1.4	13
28	Weakly non-linear waves in a tapered elastic tube filled with an inviscid fluid. International Journal of Non-Linear Mechanics, 2005, 40, 785-793.	1.4	13
29	Weakly nonlinear waves in water of variable depth: Variable-coefficient Korteweg-de Vries equation. Computers and Mathematics With Applications, 2010, 60, 1747-1755.	1.4	13
30	On large periodic motions of arteries. Journal of Biomechanics, 1983, 16, 643-648.	0.9	12
31	Amplitude modulation of nonlinear waves in a fluid-filled tapered elastic tube. Applied Mathematics and Computation, 2004, 154, 747-767.	1.4	12
32	On some nonlinear waves in fluid-filled viscoelastic tubes: weakly dispersive case. Communications in Nonlinear Science and Numerical Simulation, 2005, 10, 425-440.	1.7	12
33	Non-linear waves in a fluid-filled inhomogeneous elastic tube with variable radius. International Journal of Non-Linear Mechanics, 2008, 43, 241-245.	1.4	12
34	Re-visiting the head-on collision problem between two solitary waves in shallow water. International Journal of Non-Linear Mechanics, 2015, 69, 66-70.	1.4	12
35	Electro-mechanical remodelling of bones. International Journal of Engineering Science, 1983, 21, 1117-1126.	2.7	11
36	Non-linear wave modulation in a prestressed viscoelastic thin tube filled with an inviscid fluid. International Journal of Non-Linear Mechanics, 1999, 34, 571-588.	1.4	11

#	ARTICLE	IF	CITATIONS
37	Contribution of Higher Order Terms in Nonlinear Ion-Acoustic Waves: Strongly Dispersive Case. Journal of the Physical Society of Japan, 2002, 71, 1921-1930.	0.7	11
38	Weakly nonlinear waves in a fluid with variable viscosity contained in a prestressed thin elastic tube. Chaos, Solitons and Fractals, 2008, 36, 196-202.	2.5	11
39	Solitary waves in fluid-filled elastic tubes: weakly dispersive case. International Journal of Engineering Science, 2001, 39, 439-451.	2.7	10
40	Modulation of non-linear waves in a viscous fluid contained in an elastic tube. International Journal of Non-Linear Mechanics, 2001, 36, 649-661.	1.4	10
41	Weakly nonlinear waves in a viscous fluid contained in a viscoelastic tube with variable cross-section. European Journal of Mechanics, A/Solids, 2005, 24, 337-347.	2.1	10
42	Higher order approximations in reductive perturbation method: strongly dispersive waves. Communications in Nonlinear Science and Numerical Simulation, 2005, 10, 549-558.	1.7	10
43	A nonlocal continuum theory for diatomic elastic solids. International Journal of Engineering Science, 1977, 15, 623-644.	2.7	9
44	A viscoelastic model for arterial wall materials. International Journal of Engineering Science, 1994, 32, 1567-1578.	2.7	9
45	A quasi-linear constitutive relation for arterial wall materials. Journal of Biomechanics, 1996, 29, 1011-1014.	0.9	9
46	A complex travelling wave solution to the KdV-Burgers equation. Physics Letters, Section A: General, Atomic and Solid State Physics, 2005, 344, 418-422.	0.9	9
47	Head-on-collision of nonlinear waves in a fluid of variable viscosity contained in an elastic tube. Chaos, Solitons and Fractals, 2009, 41, 1578-1586.	2.5	9
48	A mixture model for wet bones theory. International Journal of Engineering Science, 1977, 15, 707-718.	2.7	8
49	Pulse velocities in initially stressed arteries. Journal of Biomechanics, 1988, 21, 55-58.	0.9	8
50	Nonlinear waves in a prestressed thick elastic tube filled with an inviscid fluid. International Journal of Engineering Science, 1996, 34, 1519-1529.	2.7	8
51	Solitary waves in a tapered prestressed fluid-filled elastic tube. Zeitschrift Fur Angewandte Mathematik Und Physik, 2004, 55, 282-294.	0.7	8
52	Wave propagation in a prestressed elastic tube filled with a viscous fluid. International Journal of Engineering Science, 1991, 29, 575-585.	2.7	7
53	The boundary layer approximation and nonlinear waves in elastic tubes. International Journal of Engineering Science, 2000, 38, 1441-1457.	2.7	7
54	Nonlinear waves in a prestressed elastic tube filled with a layered fluid. International Journal of Engineering Science, 2002, 40, 713-726.	2.7	7

#	ARTICLE	IF	CITATIONS
55	On head-on collision between two solitary waves in shallow water: the use of the extended PLK method. <i>Nonlinear Dynamics</i> , 2015, 82, 73-84.	2.7	7
56	Analysis of periodic and solitary waves in a magnetosonic quantum dusty plasma. <i>Indian Journal of Physics</i> , 2021, 95, 1255-1261.	0.9	7
57	Torsional waves in a stressed elastic tube filled with a viscous fluid. <i>International Journal of Engineering Science</i> , 1992, 30, 771-780.	2.7	6
58	Non-linear waves in a fluid-filled thick elastic tube. <i>International Journal of Non-Linear Mechanics</i> , 1998, 33, 363-375.	1.4	6
59	Propagation of weakly nonlinear waves in fluid-filled thick viscoelastic tubes. <i>Applied Mathematical Modelling</i> , 1999, 23, 779-798.	2.2	6
60	Modulation of non-linear axial and transverse waves in a fluid-filled thin elastic tube. <i>International Journal of Non-Linear Mechanics</i> , 2000, 35, 597-611.	1.4	6
61	A note on the travelling wave solution to the perturbed Burgers' equation. <i>Applied Mathematical Modelling</i> , 2002, 26, 37-40.	2.2	6
62	Propagation of weakly nonlinear waves in fluid-filled thin elastic tubes. <i>Applied Mathematics and Computation</i> , 2002, 133, 29-41.	1.4	6
63	Interaction of nonlinear waves governed by Boussinesq equation. <i>Chaos, Solitons and Fractals</i> , 2006, 30, 1185-1189.	2.5	6
64	Modulation of Electron-Acoustic Waves in a Plasma with Vortex Electron Distribution. <i>International Journal of Nonlinear Sciences and Numerical Simulation</i> , 2015, 16, 61-66.	0.4	6
65	Incremental elastic modulus for ventricles in diastole. <i>Journal of Biomechanics</i> , 1984, 17, 621-626.	0.9	5
66	Modulation of nonlinear waves in a thin elastic tube filled with a viscous fluid. <i>International Journal of Engineering Science</i> , 1999, 37, 1877-1891.	2.7	5
67	Interactions of nonlinear acoustic waves in a fluid-filled elastic tube. <i>International Journal of Engineering Science</i> , 2001, 39, 563-581.	2.7	5
68	Modulation of nonlinear waves in a viscous fluid contained in a tapered elastic tube. <i>International Journal of Engineering Science</i> , 2002, 40, 1897-1918.	2.7	5
69	Non-linear waves in a viscous fluid contained in an elastic tube with variable cross-section. <i>International Journal of Non-Linear Mechanics</i> , 2006, 41, 258-270.	1.4	5
70	Pulse waves in a prestressed elastic tube. <i>International Journal of Engineering Science</i> , 1990, 28, 1-9.	2.7	4
71	The effect of quadrupole on bone remodeling. <i>International Journal of Engineering Science</i> , 1996, 34, 257-268.	2.7	4
72	Small but finite amplitude waves in a prestressed viscoelastic thin tube filled with an inviscid fluid. <i>International Journal of Engineering Science</i> , 1997, 35, 353-363.	2.7	4

#	ARTICLE	IF	CITATIONS
73	Waves in initially stressed fluid-filled thick tubes. <i>Journal of Biomechanics</i> , 1997, 30, 273-276.	0.9	4
74	Non-linear wave modulation in a prestressed fluid field thin elastic tube. <i>International Journal of Non-Linear Mechanics</i> , 1999, 34, 123-138.	1.4	4
75	On the existence of some evolution equations in fluid-filled elastic tubes and their progressive wave solutions. <i>International Journal of Engineering Science</i> , 2004, 42, 1693-1706.	2.7	4
76	Solitary waves in a fluid-filled thin elastic tube with variable cross-section. <i>Communications in Nonlinear Science and Numerical Simulation</i> , 2007, 12, 735-744.	1.7	4
77	Weakly non-linear waves in a fluid-filled elastic tube with variable prestretch. <i>International Journal of Non-Linear Mechanics</i> , 2008, 43, 887-891.	1.4	4
78	Nonlinear Wave Modulation in a Fluid-Filled Elastic Tube with Stenosis. <i>Zeitschrift Fur Naturforschung - Section A Journal of Physical Sciences</i> , 2008, 63, 24-34.	0.7	4
79	Forced KdV equation in a fluid-filled elastic tube with variable initial stretches. <i>Chaos, Solitons and Fractals</i> , 2009, 42, 1388-1395.	2.5	4
80	Multiple time scale formalism and its application to long water waves. <i>Applied Mathematical Modelling</i> , 2010, 34, 1187-1193.	2.2	4
81	Contribution of higher order terms in electron-acoustic solitary waves with vortex electron distribution. <i>Zeitschrift Fur Angewandte Mathematik Und Physik</i> , 2014, 65, 1223-1231.	0.7	4
82	A nonlocal model for plug formation in plates. <i>International Journal of Engineering Science</i> , 1978, 16, 287-297.	2.7	3
83	Effects of twist on pulse waves in arteries. <i>Bulletin of Mathematical Biology</i> , 1985, 47, 495-502.	0.9	3
84	Diatomic elastic dielectrics with polarization inertia. <i>International Journal of Engineering Science</i> , 1989, 27, 1275-1284.	2.7	3
85	Solitary waves in a thick walled elastic tube. <i>Applied Mathematical Modelling</i> , 1998, 22, 583-599.	2.2	3
86	Contributions of higher order terms to nonlinear waves in fluid-filled elastic tubes: strongly dispersive case. <i>International Journal of Engineering Science</i> , 2003, 41, 1387-1403.	2.7	3
87	A note on the analytical solution to the modified perturbed Kortewegâ€™de Vries equation. <i>Applied Mathematics and Computation</i> , 2003, 134, 501-505.	1.4	3
88	Complex travelling wave solutions to the KdV and Burgers equations. <i>Applied Mathematics and Computation</i> , 2005, 162, 925-930.	1.4	3
89	Nonlinear waves in an elastic tube with variable prestretch filled with a fluid of variable viscosity. <i>International Journal of Engineering Science</i> , 2008, 46, 949-957.	2.7	3
90	An application of modified reductive perturbation method to long water waves. <i>International Journal of Engineering Science</i> , 2011, 49, 1397-1403.	2.7	3

#	ARTICLE	IF	CITATIONS
91	Non-symmetrical waves in a prestressed elastic tube filled with an inviscid fluid. International Journal of Engineering Science, 1994, 32, 605-616.	2.7	2
92	The effect of shear stress on solitary waves in arteries. Bulletin of Mathematical Biology, 1997, 59, 993-1012.	0.9	2
93	Nonlinear wave modulation in a fluid filled thick elastic tube. International Journal of Engineering Science, 1998, 36, 1061-1082.	2.7	2
94	Solitary waves in elastic tubes filled with a layered fluid. International Journal of Engineering Science, 2001, 39, 629-639.	2.7	2
95	The effect of a bump in an elastic tube on wave propagation in a viscous fluid of variable viscosity. Applied Mathematics and Computation, 2007, 187, 1574-1583.	1.4	2
96	Waves in an elastic tube filled with a heterogeneous fluid of variable viscosity. International Journal of Non-Linear Mechanics, 2009, 44, 590-595.	1.4	2
97	Impact of nonlocal thin elastic plates by a cylindrical projectile. International Journal of Engineering Science, 1978, 16, 905-916.	2.7	1
98	On a class of finite deformations of elastic soft tissues. Bulletin of Mathematical Biology, 1982, 44, 175-192.	0.9	1
99	A variational formulation of diatomic elastic dielectrics. International Journal of Engineering Science, 1988, 26, 865-871.	2.7	1
100	An evolution of pulse speed in arteries. Bulletin of Mathematical Biology, 1996, 58, 129-140.	0.9	1
101	An evolution of pulse speed in arteries. Bulletin of Mathematical Biology, 1996, 58, 129-140.	0.9	1
102	Harmonic waves in a prestressed thin elastic tube filled with a viscous fluid. Journal of Engineering Mathematics, 1997, 32, 305-320.	0.6	1
103	Dressed solitary waves in fluid-filled elastic tubes. International Journal of Non-Linear Mechanics, 1999, 34, 185-196.	1.4	1
104	Localized travelling waves in a prestressed thick elastic tube. International Journal of Non-Linear Mechanics, 2001, 36, 1085-1095.	1.4	1
105	Modulation of nonlinear waves in a fluid-filled elastic tube with stenosis. International Journal of Mathematics and Mathematical Sciences, 2004, 2004, 3205-3218.	0.3	1
106	Modulation of nonlinear waves near the marginal state of instability in fluid-filled elastic tubes. Applied Mathematics and Computation, 2004, 149, 83-101.	1.4	1
107	Interactions of Nonlinear Waves in Fluid-Filled Elastic Tubes. Zeitschrift Fur Naturforschung - Section A Journal of Physical Sciences, 2007, 62, 21-28.	0.7	1
108	The Modified Reductive Perturbation Method as Applied to the Boussinesq Equation. Zeitschrift Fur Naturforschung - Section A Journal of Physical Sciences, 2007, 62, 347-352.	0.7	1
