

Huazi Xu

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/10887795/huazi-xu-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

65
papers

#	Paper	IF	Citations
65	Versatile subtypes of pericytes and their roles in spinal cord injury repair, bone development and repair.. <i>Bone Research</i> , 2022 , 10, 30	13.3	3
64	MFG-E8 alleviates intervertebral disc degeneration by suppressing pyroptosis and extracellular matrix degradation in nucleus pulposus cells via Nrf2/TXNIP/NLRP3 axis.. <i>Cell Death Discovery</i> , 2022 , 8, 209	6.9	0
63	AAV2-mediated and hypoxia response element-directed expression of bFGF in neural stem cells showed therapeutic effects on spinal cord injury in rats. <i>Cell Death and Disease</i> , 2021 , 12, 274	9.8	12
62	Targeting TFE3 Protects Against Lysosomal Malfunction-Induced Pyroptosis in Random Skin Flaps via ROS Elimination. <i>Frontiers in Cell and Developmental Biology</i> , 2021 , 9, 643996	5.7	1
61	Trehalose Augments Neuron Survival and Improves Recovery from Spinal Cord Injury via mTOR-Independent Activation of Autophagy. <i>Oxidative Medicine and Cellular Longevity</i> , 2021 , 2021, 8898996	6.7	0
60	Exenatide improves random-pattern skin flap survival via TFE3 mediated autophagy augment. <i>Journal of Cellular Physiology</i> , 2021 , 236, 3641-3659	7	4
59	Endothelial cells produce angiocrine factors to regulate bone and cartilage via versatile mechanisms. <i>Theranostics</i> , 2020 , 10, 5957-5965	12.1	16
58	CO-Releasing Molecule (CORM)-3 Ameliorates Spinal Cord-Blood Barrier Disruption Following Injury to the Spinal Cord. <i>Frontiers in Pharmacology</i> , 2020 , 11, 761	5.6	3
57	Role of Pyroptosis in Traumatic Brain and Spinal Cord Injuries. <i>International Journal of Biological Sciences</i> , 2020 , 16, 2042-2050	11.2	12
56	The role of glial cell line-derived neurotrophic factor family member artemin in neurological disorders and cancers. <i>Cell Proliferation</i> , 2020 , 53, e12860	7.9	6
55	Metformin Promotes Axon Regeneration after Spinal Cord Injury through Inhibiting Oxidative Stress and Stabilizing Microtubule. <i>Oxidative Medicine and Cellular Longevity</i> , 2020 , 2020, 9741369	6.7	18
54	Molecular structure and the role of high-temperature requirement protein 1 in skeletal disorders and cancers. <i>Cell Proliferation</i> , 2020 , 53, e12746	7.9	7
53	Baicalein Attenuates Pyroptosis and Endoplasmic Reticulum Stress Following Spinal Cord Ischemia-Reperfusion Injury Autophagy Enhancement. <i>Frontiers in Pharmacology</i> , 2020 , 11, 1076	5.6	10
52	TFE3, a potential therapeutic target for Spinal Cord Injury via augmenting autophagy flux and alleviating ER stress. <i>Theranostics</i> , 2020 , 10, 9280-9302	12.1	25
51	The repair and autophagy mechanisms of hypoxia-regulated bFGF-modified primary embryonic neural stem cells in spinal cord injury. <i>Stem Cells Translational Medicine</i> , 2020 , 9, 603-619	6.9	17
50	Trehalose promotes the survival of random-pattern skin flaps by TFEB mediated autophagy enhancement. <i>Cell Death and Disease</i> , 2019 , 10, 483	9.8	19
49	Betulinic Acid Enhances the Viability of Random-Pattern Skin Flaps by Activating Autophagy. <i>Frontiers in Pharmacology</i> , 2019 , 10, 1017	5.6	15

48	Therapeutic potential of pravastatin for random skin flaps necrosis: involvement of promoting angiogenesis and inhibiting apoptosis and oxidative stress. <i>Drug Design, Development and Therapy</i> , 2019 , 13, 1461-1472	4.4	5
47	Microporous polysaccharide multilayer coated BCP composite scaffolds with immobilised calcitriol promote osteoporotic bone regeneration both in vitro and in vivo. <i>Theranostics</i> , 2019 , 9, 1125-1143	12.1	22
46	Chondromodulin-1 in health, osteoarthritis, cancer, and heart disease. <i>Cellular and Molecular Life Sciences</i> , 2019 , 76, 4493-4502	10.3	10
45	Astilbin prevents bone loss in ovariectomized mice through the inhibition of RANKL-induced osteoclastogenesis. <i>Journal of Cellular and Molecular Medicine</i> , 2019 , 23, 8355-8368	5.6	11
44	FGF21 augments autophagy in random-pattern skin flaps via AMPK signaling pathways and improves tissue survival. <i>Cell Death and Disease</i> , 2019 , 10, 872	9.8	22
43	TFEB protects nucleus pulposus cells against apoptosis and senescence via restoring autophagic flux. <i>Osteoarthritis and Cartilage</i> , 2019 , 27, 347-357	6.2	35
42	Metformin Promotes the Survival of Random-Pattern Skin Flaps by Inducing Autophagy via the AMPK-mTOR-TFEB signaling pathway. <i>International Journal of Biological Sciences</i> , 2019 , 15, 325-340	11.2	21
41	Carbon monoxide releasing molecule-3 alleviates neuron death after spinal cord injury via inflammasome regulation. <i>EBioMedicine</i> , 2019 , 40, 643-654	8.8	33
40	Engineering Bioactive Self-Healing Antibacterial Exosomes Hydrogel for Promoting Chronic Diabetic Wound Healing and Complete Skin Regeneration. <i>Theranostics</i> , 2019 , 9, 65-76	12.1	274
39	Madecassoside inhibits estrogen deficiency-induced osteoporosis by suppressing RANKL-induced osteoclastogenesis. <i>Journal of Cellular and Molecular Medicine</i> , 2019 , 23, 380-394	5.6	22
38	Loureirin B Promotes Axon Regeneration by Inhibiting Endoplasmic Reticulum Stress: Induced Mitochondrial Dysfunction and Regulating the Akt/GSK-3 β Pathway after Spinal Cord Injury. <i>Journal of Neurotrauma</i> , 2019 , 36, 1949-1964	5.4	11
37	FGF1 improves functional recovery through inducing PRDX1 to regulate autophagy and anti-ROS after spinal cord injury. <i>Journal of Cellular and Molecular Medicine</i> , 2018 , 22, 2727-2738	5.6	35
36	Highly efficient local delivery of endothelial progenitor cells significantly potentiates angiogenesis and full-thickness wound healing. <i>Acta Biomaterialia</i> , 2018 , 69, 156-169	10.8	59
35	Lithium chloride contributes to blood-spinal cord barrier integrity and functional recovery from spinal cord injury by stimulating autophagic flux. <i>Biochemical and Biophysical Research Communications</i> , 2018 , 495, 2525-2531	3.4	13
34	Monotropein promotes angiogenesis and inhibits oxidative stress-induced autophagy in endothelial progenitor cells to accelerate wound healing. <i>Journal of Cellular and Molecular Medicine</i> , 2018 , 22, 1583-1600	5.6	32
33	Lentivirus Mediating FGF13 Enhances Axon Regeneration after Spinal Cord Injury by Stabilizing Microtubule and Improving Mitochondrial Function. <i>Journal of Neurotrauma</i> , 2018 , 35, 548-559	5.4	23
32	Effects of the traditional Chinese medicine baicalein on the viability of random pattern skin flaps in rats. <i>Drug Design, Development and Therapy</i> , 2018 , 12, 2267-2276	4.4	15
31	Novel multi-drug delivery hydrogel using scar-homing liposomes improves spinal cord injury repair. <i>Theranostics</i> , 2018 , 8, 4429-4446	12.1	47

30	Coupling factors and exosomal packaging microRNAs involved in the regulation of bone remodelling. <i>Biological Reviews</i> , 2018 , 93, 469-480	13.5	37
29	Valproic acid enhances the viability of random pattern skin flaps: involvement of enhancing angiogenesis and inhibiting oxidative stress and apoptosis. <i>Drug Design, Development and Therapy</i> , 2018 , 12, 3951-3960	4.4	8
28	Salvianolic Acid B Promotes the Survival of Random-Pattern Skin Flaps in Rats by Inducing Autophagy. <i>Frontiers in Pharmacology</i> , 2018 , 9, 1178	5.6	20
27	Hydrogen Sulfide Ameliorates Blood-Spinal Cord Barrier Disruption and Improves Functional Recovery by Inhibiting Endoplasmic Reticulum Stress-Dependent Autophagy. <i>Frontiers in Pharmacology</i> , 2018 , 9, 858	5.6	21
26	TFEB, a potential therapeutic target for osteoarthritis via autophagy regulation. <i>Cell Death and Disease</i> , 2018 , 9, 858	9.8	44
25	A Thermosensitive Heparin-Poloxamer Hydrogel Bridges aFGF to Treat Spinal Cord Injury. <i>ACS Applied Materials & Interfaces</i> , 2017 , 9, 6725-6745	9.5	62
24	Metformin ameliorates BSCB disruption by inhibiting neutrophil infiltration and MMP-9 expression but not direct TJ proteins expression regulation. <i>Journal of Cellular and Molecular Medicine</i> , 2017 , 21, 3322-3336	5.6	27
23	Trehalose ameliorates oxidative stress-mediated mitochondrial dysfunction and ER stress via selective autophagy stimulation and autophagic flux restoration in osteoarthritis development. <i>Cell Death and Disease</i> , 2017 , 8, e3081	9.8	111
22	Dl-3-n-butylphthalide prevents the disruption of blood-spinal cord barrier via inhibiting endoplasmic reticulum stress following spinal cord injury. <i>International Journal of Biological Sciences</i> , 2017 , 13, 1520-1531	11.2	28
21	The Temporal Pattern, Flux, and Function of Autophagy in Spinal Cord Injury. <i>International Journal of Molecular Sciences</i> , 2017 , 18,	6.3	35
20	The cross-talk between autophagy and endoplasmic reticulum stress in blood-spinal cord barrier disruption after spinal cord injury. <i>Oncotarget</i> , 2017 , 8, 1688-1702	3.3	17
19	Inhibiting endoplasmic reticulum stress by lithium chloride contributes to the integrity of blood-spinal cord barrier and functional recovery after spinal cord injury. <i>American Journal of Translational Research (discontinued)</i> , 2017 , 9, 1012-1024	3	8
18	Dl-3-n-butylphthalide improves functional recovery in rats with spinal cord injury by inhibiting endoplasmic reticulum stress-induced apoptosis. <i>American Journal of Translational Research (discontinued)</i> , 2017 , 9, 1075-1087	3	18
17	Multifaceted effects of astragaloside IV on promotion of random pattern skin flap survival in rats. <i>American Journal of Translational Research (discontinued)</i> , 2017 , 9, 4161-4172	3	24
16	Metformin protects against apoptosis and senescence in nucleus pulposus cells and ameliorates disc degeneration in vivo. <i>Cell Death and Disease</i> , 2016 , 7, e2441	9.8	167
15	NPNT is Expressed by Osteoblasts and Mediates Angiogenesis via the Activation of Extracellular Signal-regulated Kinase. <i>Scientific Reports</i> , 2016 , 6, 36210	4.9	14
14	The effects of lactate and acid on articular chondrocytes function: Implications for polymeric cartilage scaffold design. <i>Acta Biomaterialia</i> , 2016 , 42, 329-340	10.8	26
13	Stabilization of HIF-1 by FG-4592 promotes functional recovery and neural protection in experimental spinal cord injury. <i>Brain Research</i> , 2016 , 1632, 19-26	3.7	34

12	Retinoic Acid Prevents Disruption of Blood-Spinal Cord Barrier by Inducing Autophagic Flux After Spinal Cord Injury. <i>Neurochemical Research</i> , 2016 , 41, 813-25	4.6	31
11	Phenylbutyrate prevents disruption of blood-spinal cord barrier by inhibiting endoplasmic reticulum stress after spinal cord injury. <i>American Journal of Translational Research (discontinued)</i> , 2016 , 8, 1864-75	3	10
10	Calmodulin interacts with Rab3D and modulates osteoclastic bone resorption. <i>Scientific Reports</i> , 2016 , 6, 37963	4.9	12
9	Epidermal growth factor attenuates blood-spinal cord barrier disruption via PI3K/Akt/Rac1 pathway after acute spinal cord injury. <i>Journal of Cellular and Molecular Medicine</i> , 2016 , 20, 1062-75	5.6	29
8	The Role of bFGF in the Excessive Activation of Astrocytes Is Related to the Inhibition of TLR4/NF κ B Signals. <i>International Journal of Molecular Sciences</i> , 2015 , 17,	6.3	25
7	Engineering scaffolds integrated with calcium sulfate and oyster shell for enhanced bone tissue regeneration. <i>ACS Applied Materials & Interfaces</i> , 2014 , 6, 12177-88	9.5	39
6	Nerve growth factor improves functional recovery by inhibiting endoplasmic reticulum stress-induced neuronal apoptosis in rats with spinal cord injury. <i>Journal of Translational Medicine</i> , 2014 , 12, 130	8.5	77
5	Differentiation of menstrual blood-derived stem cells toward nucleus pulposus-like cells in a coculture system with nucleus pulposus cells. <i>Spine</i> , 2014 , 39, 754-60	3.3	16
4	Lactate down-regulates matrix synthesis and promotes apoptosis and autophagy in rat nucleus pulposus cells. <i>Journal of Orthopaedic Research</i> , 2014 , 32, 253-61	3.8	22
3	Morphology Control and Self-Setting Modification of β -Calcium Sulfate Hemihydrate Bone Cement by Addition of Ethanol. <i>International Journal of Applied Ceramic Technology</i> , 2013 , 10, E219-E225	2	14
2	Apoptosis, senescence, and autophagy in rat nucleus pulposus cells: Implications for diabetic intervertebral disc degeneration. <i>Journal of Orthopaedic Research</i> , 2013 , 31, 692-702	3.8	121
1	Effect of pH and succinic acid on the morphology of β -calcium sulfate hemihydrate synthesized by a salt solution method. <i>Journal of Crystal Growth</i> , 2013 , 374, 31-36	1.6	44
