List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/10969330/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Bupropion response on sleep quality in patients with depression: Implications for increased cardiovascular disease risk. European Neuropsychopharmacology, 2014, 24, 207-214.	0.7	15
2	Response to citalopram is not associated with SLC6A4 genotype in African-Americans and Caucasians with major depression. Life Sciences, 2013, 92, 967-970.	4.3	15
3	Open-Label, Randomized, Parallel-Group Controlled Clinical Trial of Massage for Treatment of Depression in HIV-Infected Subjects. Journal of Alternative and Complementary Medicine, 2013, 19, 334-340.	2.1	14
4	Omega-3 Fatty Acid Augmentation of Citalopram Treatment for Patients With Major Depressive Disorder. Journal of Clinical Psychopharmacology, 2012, 32, 61-64.	1.4	139
5	Comparison of symptoms in African-American, Asian-American, Mexican-American and Non-Hispanic White patients with major depressive disorder. Asian Journal of Psychiatry, 2012, 5, 28-33.	2.0	15
6	Corticosterone and prolactin response to TFMPP in rats during repeated antidepressant administration. Journal of Pharmacy and Pharmacology, 2011, 43, 54-56.	2.4	5
7	Support and Undermining in Interpersonal Relationships Are Associated with Symptom Improvement in a Trial of Antidepressant Medication. Psychiatry (New York), 2011, 74, 240-254.	0.7	13
8	Religiosity and treatment response to antidepressant medication: a prospective multi-site clinical trial. Mental Health, Religion and Culture, 2011, 14, 805-818.	0.9	14
9	Ethnic differences in antidepressant response: a prospective multi-site clinical trial. Depression and Anxiety, 2010, 27, 56-62.	4.1	60
10	Longitudinal Course of Adolescent Depression: Neuroendocrine and Psychosocial Predictors. Journal of the American Academy of Child and Adolescent Psychiatry, 2010, 49, 141-151.	0.5	24
11	Longitudinal Course of Adolescent Depression: Neuroendocrine and Psychosocial Predictors. Journal of the American Academy of Child and Adolescent Psychiatry, 2010, 49, 141-151.	0.5	58
12	Contribution of Hypothalamic–Pituitary–Adrenal Activity and Environmental Stress to Vulnerability for Smoking in Adolescents. Neuropsychopharmacology, 2009, 34, 2721-2732.	5.4	36
13	Risk Markers for Depression in Adolescents: Sleep and HPA Measures. Neuropsychopharmacology, 2009, 34, 1936-1945.	5.4	79
14	Mechanisms Underlying the Comorbidity Between Depressive and Addictive Disorders in Adolescents: Interactions Between Stress and HPA Activity. American Journal of Psychiatry, 2009, 166, 361-369.	7.2	57
15	Ethnic differences in electroencephalographic sleep patterns in adolescents. Asian Journal of Psychiatry, 2009, 2, 17-24.	2.0	28
16	Biological Variations in Depression and Anxiety Between East and West. CNS Neuroscience and Therapeutics, 2009, 15, 283-294.	3.9	24
17	Effects of Early and Recent Adverse Experiences on Adrenal Response to Psychosocial Stress in Depressed Adolescents. Biological Psychiatry, 2008, 64, 521-526.	1.3	185
18	Electroencephalographic Sleep and Hypothalamic–Pituitary–Adrenal Changes from Episode to Recovery in Depressed Adolescents. Journal of Child and Adolescent Psychopharmacology, 2008, 18, 607-613.	1.3	45

#	Article	IF	CITATIONS
19	Comparison of the effects of desmethylimipramine on behavior in the forced swim test in peripubertal and adult rats. Behavioural Pharmacology, 2008, 19, 81-84.	1.7	8
20	Mecamylamine Attenuates Cue-Induced Reinstatement of Nicotine-Seeking Behavior in Rats. Neuropsychopharmacology, 2007, 32, 710-718.	5.4	66
21	The role of antagonism of NMDA receptor-mediated neurotransmission and inhibition of the dopamine reuptake in the neuroendocrine effects of phencyclidine. Life Sciences, 2006, 78, 2006-2011.	4.3	11
22	Genetic polymorphism of cytochrome P450 2C19 in Mexican Americans: A cross-ethnic comparative study. Clinical Pharmacology and Therapeutics, 2006, 80, 33-40.	4.7	97
23	Reinstatement of nicotine-seeking behavior by drug-associated stimuli after extinction in rats. Psychopharmacology, 2006, 184, 417-425.	3.1	59
24	Developmental exposure to corticosterone: behavioral changes and differential effects on leukemia inhibitory factor (LIF) and corticotropin-releasing hormone (CRH) gene expression in the mouse. Psychopharmacology, 2006, 185, 76-83.	3.1	15
25	Allostatic Load in Women With and Without PTSD Symptoms. Psychiatry (New York), 2006, 69, 191-203.	0.7	73
26	Effect of bupropion on nocturnal urinary free cortisol and its association with antidepressant response. Journal of Psychiatric Research, 2005, 39, 183-190.	3.1	12
27	Reduced Immobility in the Forced Swim Test in Mice with a Targeted Deletion of the Leukemia Inhibitory Factor (LIF) Gene. Neuropsychopharmacology, 2004, 29, 770-776.	5.4	34
28	Total Sleep Deprivation Decreases Immobility In The Forced-Swim Test. Neuropsychopharmacology, 2004, 29, 1105-1111.	5.4	43
29	Comparison of the Effects of Dextromethorphan, Dextrorphan, and Levorphanol on the Hypothalamo-Pituitary-Adrenal Axis. Journal of Pharmacology and Experimental Therapeutics, 2004, 309, 515-522.	2.5	24
30	REM sleep and cortisol responses to scopolamine during depression and remission in women. International Journal of Neuropsychopharmacology, 2004, 7, 265-274.	2.1	14
31	Effect of treatment with bupropion on EEG sleep: relationship to antidepressant response. International Journal of Neuropsychopharmacology, 2004, 7, 275-281.	2.1	37
32	Self-administration of 5-iodo-A-85380, a β2-selective nicotinic receptor ligand, by operantly trained rats. NeuroReport, 2003, 14, 1503-1505.	1.2	28
33	Urinary cortisol and catecholamines in mothers of child cancer survivors with and without PTSD. Psychoneuroendocrinology, 2002, 27, 805-819.	2.7	114
34	Effect of bupropion-SR on REM sleep: relationship to antidepressant response. Psychopharmacology, 2002, 165, 29-36.	3.1	33
35	Pharmacokinetics of reboxetine in healthy volunteers with different ethnic descents. Psychopharmacology, 2001, 155, 148-153.	3.1	17
36	CYP2D6 polymorphism in a Mexican American population. Clinical Pharmacology and Therapeutics, 2001. 70. 497-504.	4.7	21

#	Article	IF	CITATIONS
37	Comparison of noncontingent versus contingent cocaine administration on plasma corticosterone levels in rats. European Journal of Pharmacology, 2000, 387, 59-62.	3.5	64
38	Effect of ecstasy [3,4-methylenedioxymethamphetamine (MDMA)] on cerebral blood flow: a co-registered SPECT and MRI study. Psychiatry Research - Neuroimaging, 2000, 98, 15-28.	1.8	81
39	Brain N-acetyl aspartate concentrations measured by 1H MRS are reduced in adult male rats subjected to perinatal stress: preliminary observations and hypothetical implications for neurodevelopmental disorders. Journal of Psychiatric Research, 1999, 33, 41-51.	3.1	33
40	Relationship between ethnicity and sleep patterns in normal controls: implications for psychopathology and treatment. Journal of Psychiatric Research, 1999, 33, 419-426.	3.1	61
41	Age-Related Effects of Scopolamine on REM Sleep Regulation in Normal Control Subjects Relationship to Sleep Abnormalities in Depression. Neuropsychopharmacology, 1999, 21, 723-730.	5.4	9
42	REM sleep in depression is influenced by ethnicity. Psychiatry Research, 1999, 88, 95-105.	3.3	32
43	Prenatal stress is associated with depression-related electroencephalographic sleep changes in adult male rats: A preliminary report. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 1999, 23, 929-939.	4.8	37
44	Proton Spectroscopy in Myotonic Dystrophy. Archives of Neurology, 1998, 55, 305.	4.5	67
45	Differential response of rapid eye movement sleep to cholinergic blockade by scopolamine in currently depressed, remitted, and normal control subjects. Biological Psychiatry, 1997, 41, 929-938.	1.3	31
46	Electroencephalographic sleep and urinary free cortisol in adolescent depression: A preliminary report of changes from episode to recovery. Biological Psychiatry, 1997, 41, 369-373.	1.3	20
47	Sleep electroencephalographic abnormalities in adolescent depressives: Effects of scopolamine. Biological Psychiatry, 1997, 42, 577-584.	1.3	34
48	The pharmacokinetics and pharmacodynamics of adinazolam: multi-ethnic comparisons. Psychopharmacology, 1997, 129, 265-270.	3.1	17
49	Reduced Effect of Antidepressant Treatment on Prolactin Response to a Serotonin Agonist in Prepubertal Rats. Journal of Child and Adolescent Psychopharmacology, 1995, 5, 115-120.	1.3	6
50	Psychobiologic effects of 3,4-methylenedioxymethamphetamine in humans: methodological considerations and preliminary observations. Behavioural Brain Research, 1995, 73, 103-107.	2.2	129
51	Prenatal stress prevents the desensitization of the corticosterone response to TFMPP by desmethylimipramine, but not by pheneezine, in adult male offspring. Life Sciences, 1995, 57, 2163-2170.	4.3	9
52	Dissociation between plasma bioactive and immunoactive ACTH concentrations in depressed patients. Biological Psychiatry, 1994, 35, 309-315.	1.3	3
53	Exposure to threshold doses of nicotine in utero: II. Neuroendocrine response to nicotine in adult male offspring. Developmental Brain Research, 1994, 83, 278-284.	1.7	10
54	Neuroendocrine responses produced by enantiomeric pairs of drugs that interact with phencyclidine and σ receptors. European Journal of Pharmacology, 1994, 263, 115-120.	3.5	5

#	Article	IF	CITATIONS
55	Exposure to threshold doses of nicotine : I. Neuroendocrine response to restraint stress in adult male offspring. Life Sciences, 1994, 55, 1567-1575.	4.3	15
56	Repeated scopolamine treatment does not enhance the acth response to physostigmine in rats. Depression, 1993, 1, 101-104.	0.6	0
57	Relationship between REM sleep latency and nocturnal cortisol concentrations in depressed patients. Journal of Sleep Research, 1992, 1, 54-57.	3.2	24
58	Dose-Dependent Effects of Scopolamine on Nocturnal Growth Hormone Secretion in Normal Adult Men: Relation to <i>δ</i> -Sleep Changes*. Journal of Clinical Endocrinology and Metabolism, 1991, 72, 90-95.	3.6	11
59	Peripubertal and Adult Male Rats Differ in Their Hypothalamic-Pituitary Response to Cholinergic Challenge. Journal of Child and Adolescent Psychopharmacology, 1990, 1, 141-145.	1.3	1
60	Dose-dependent effects of DDAVP on memory in healthy young adult males: A preliminary study. Peptides, 1990, 11, 473-476.	2.4	15
61	Neuroendocrine aspects of primary endogenous depression: IX. Receiver operating characteristic analysis of the dexamethasone suppression index vs. the dexamethasone suppression test in patients and controls. Psychiatry Research, 1990, 31, 49-56.	3.3	1
62	Neuroendocrine aspects of primary endogenous depression X: Serum growth hormone measures in patients and matched control subjects. Biological Psychiatry, 1990, 27, 1065-1082.	1.3	47
63	Relationship of nocturnal plasma bioactive and immunoactive ACTH concentrations to cortisol secretion in normal men. European Journal of Endocrinology, 1989, 121, 857-865.	3.7	14
64	Characterization of the effects of the acute and repeated administration of MK-801 on the release of adrenocorticotropin, corticosterone and prolactin in the rat. European Journal of Pharmacology, 1989, 164, 257-263.	3.5	51
65	The predictive power of the salivary cortisol dexamethasone suppression test for three-year outcome in major depressive illness. Journal of Psychiatric Research, 1989, 23, 151-156.	3.1	3
66	Saliva and serum cortisol dynamics following intravenous dexamethasone in normal volunteers. Life Sciences, 1989, 45, 1781-1785.	4.3	20
67	Naloxone does not antagonize PCP-induced stimulation of the pituitary-adrenal axis in the rat. Life Sciences, 1989, 44, 143-147.	4.3	4
68	Neuroendocrine aspects of primary endogenous depression. V. Serum prolactin measures in patients and matched control subjects. Biological Psychiatry, 1989, 25, 4-21.	1.3	35
69	Differential effects of scopolamine on nocturnal cortisol secretion, sleep architecture, and REM latency in normal volunteers: Relation to sleep and cortisol abnormalities in depression. Biological Psychiatry, 1989, 25, 403-412.	1.3	31
70	Specificity of the salivary cortisol dexamethasone suppression test across psychiatric diagnoses. Biological Psychiatry, 1989, 25, 879-893.	1.3	24
71	Pituitary-adrenal and thyroid effects on melatonin content of the rat pineal gland. Psychoneuroendocrinology, 1989, 14, 165-175.	2.7	10
72	Pharmacotherapy of Asian Psychiatric Patients. Psychiatric Annals, 1989, 19, 659-663.	0.1	4

#	Article	IF	CITATIONS
73	Neuroendocrine aspects of primary endogenous depression VII. Logistic regression analysis of matched patient-control hormone data for discrimination between groups. Journal of Psychiatric Research, 1988, 22, 297-307.	3.1	6
74	Neuroendocrine aspects of primary endogenous depression: VI. Receiver operating characteristic analysis of the cortisol suppression index versus the dexamethasone suppression test in patients and matched controls. Psychiatry Research, 1988, 26, 69-78.	3.3	10
75	Serum dexamethasone concentrations in endogenous depressives before, during, and after treatment: Preliminary observations. Biological Psychiatry, 1988, 23, 705-710.	1.3	13
76	Haloperidol and Prolactin Concentrations in Asians and Caucasians. Journal of Clinical Psychopharmacology, 1988, 8, 195???200.	1.4	79
77	Neuroendocrine aspects of primary endogenous depression III. Cortisol secretion in relation to diagnosis and symptom patterns. Psychological Medicine, 1987, 17, 609-619.	4.5	45
78	Neuroendocrine Aspects of Primary Endogenous Depression. Archives of General Psychiatry, 1987, 44, 790.	12.3	65
79	MK-801 stimulates the release of adrenocorticotrophin but not does affect the release of prolactin in the rat. European Journal of Pharmacology, 1987, 141, 323-324.	3.5	6
80	Neuroendocrine aspects of primary endogenous depression—Ⅳ. Pituitary-thyroid axis activity in patients and matched control subjects. Psychoneuroendocrinology, 1987, 12, 333-347.	2.7	47
81	The effects of the systemic administration of N-methylmorphine chloride, a quaternary analogue of morphine that does not cross the blood-brain barrier, on the release of anterior pituitary hormones in the rat. Psychoneuroendocrinology, 1987, 12, 67-71.	2.7	9
82	The effects of the acute administration of phencyclidine hydrochloride (PCP) on the release of corticosterone, growth hormone and prolactin in the rat. Life Sciences, 1986, 38, 291-296.	4.3	15
83	Influence of prenatal ethanol exposure on hormonal responses to clonidine and naloxone in prepubescent male and female rats. Psychoneuroendocrinology, 1986, 11, 105-110.	2.7	15
84	Prenatal ethanol and ontogeny of pituitary-adrenal responses to ethanol and morphine. Alcohol, 1986, 3, 255-259.	1.7	73
85	Pituitary-Adrenal Responses to Morphine and Footshock Stress Are Enhanced following Prenatal Alcohol Exposure. Alcoholism: Clinical and Experimental Research, 1986, 10, 397-402.	2.4	96
86	Ethnicity and psychopharmacology. Culture, Medicine and Psychiatry, 1986, 10, 151-165.	1.2	62
87	The effects of the acute administration of buprenorphine hydrochloride on the release of anterior pituitary hormones in the rat: Evidence for the involvement of multiple opiate receptors. Life Sciences, 1985, 37, 1861-1868.	4.3	15
88	Pre- and post-dexamethasone salivary cortisol concentrations in major depression. Psychoneuroendocrinology, 1985, 10, 461-467.	2.7	13
89	A modified dexamethasone suppression test for endogenous depression. Psychiatry Research, 1985, 15, 293-299.	3.3	18
90	Altered Stress Responsiveness in Adult Rats Exposed to Ethanol <i>in vitro</i> : Neuroendocrine Mechanisms. Novartis Foundation Symposium, 1984, 105, 47-72.	1.1	17

#	Article	IF	CITATIONS
91	Neonatal and Long-Term Neuroendocrine Effects of Fetal Alcohol Exposure1. Frontiers of Neurology and Neuroscience, 1983, 9, 140-152.	2.8	38
92	Saliva haloperidol concentrations in schizophrenic patients: relation to serum haloperidol and prolactin concentrations. , 1983, , 182-189.		0
93	[38] Radioimmunoassay of haloperidol. Methods in Enzymology, 1982, 84, 532-542.	1.0	8
94	Saliva cortisol levels following dexamethasone administration in endogenously depressed patients. Life Sciences, 1982, 30, 177-181.	4.3	64
95	Effects of maternal ethanol consumption in rats on basal and rhythmic pituitary - adrenal function in neonatal offspring. Psychoneuroendocrinology, 1982, 7, 49-58.	2.7	51
96	Radioimmunoassay of haloperidol in human serum: Correlation of serum haloperidol with serum prolactin. Life Sciences, 1981, 29, 1837-1845.	4.3	42
97	Neonatal Dexamethasone Administration. I. Temporary Delay of Development of the Circadian Serum Corticosterone Rhythm in Rats*. Endocrinology, 1981, 108, 1049-1054.	2.8	25
98	Contemporary Neuroendocrine Research Strategies and Methodologies in Psychiatry. , 1981, , 363-379.		0
99	Contemporary Neuroendocrine Research Strategies and Methodologies in Psychiatry. , 1981, , 363-379.		1
100	[23] The Talc-resin-trichloroacetic acid test for screening radioiodinated polypeptide hormones. Methods in Enzymology, 1980, 70, 322-334.	1.0	7
101	Circadian patterns of rat anterior pituitary and target gland hormones in serum: Determination of the appropriate sample size by statistical power analysis. Psychoneuroendocrinology, 1980, 5, 209-224.	2.7	36
102	The talc-resin-TCA test: Rapid screening of radioionated polypeptide hormones for radioimmunoassay. Life Sciences, 1978, 23, 2183-2192.	4.3	38
103	Secretion of Hormones Influencing Water and Electrolyte Balance (Antidiuretic Hormone,) Tj ETQq1 1 0.784314	rgBT /Ove 2.0	erlogs 10 Tf 50
104	Selective neuroendocrine effects of low-dose haloperidol in normal adult men. Psychopharmacology, 1976, 47, 135-140.	3.1	44
105	Prolactin-Related Testosterone Secretion in Normal Adult Men. Journal of Clinical Endocrinology and Metabolism, 1976, 42, 112-116.	3.6	123
106	Antidiuretic Hormone: Episodic Nocturnal Secretion in Adult Men. Endocrine Research Communications, 1975, 2, 459-469.	0.5	9
107	Nocturnal Increase of Plasma Testosterone in Men: Relation to Gonadotropins and Prolactin. Journal of Clinical Endocrinology and Metabolism, 1975, 40, 1027-1033.	3.6	99
108	The neuroendocrinology of human sleep. Life Sciences, 1974, 14, 1041-1052.	4.3	26
