#	ARTICLE	IF	CITATIONS
1	Electroencephalographic analysis of brain activity after interventions with transcranial direct current stimulation over the motor cortex: a systematic review. <i>Adaptive Behavior</i> , 2022, 30, 63-79.	1.9	3
2	Brain activity and upper limb movement analysis in children with Down syndrome undergoing transcranial direct current stimulation combined with virtual reality training: study protocol for a randomized controlled trial. <i>Trials</i> , 2022, 23, 87.	1.6	3
3	tDCS and motor training in individuals with central nervous system disease: A systematic review. <i>Journal of Bodywork and Movement Therapies</i> , 2020, 24, 442-451.	1.2	6
4	Effect of Transcranial Direct Current Stimulation Combined With Xbox-Kinect Game Experience on Upper Limb Movement in Down Syndrome: A Case Report. <i>Frontiers in Bioengineering and Biotechnology</i> , 2020, 8, 514.	4.1	8
5	Gait and postural control patterns and rehabilitation in Down syndrome: a systematic review. <i>Journal of Physical Therapy Science</i> , 2020, 32, 303-314.	0.6	20
6	Effect of Anodic tDCS Over Motor Cortex Versus Cerebellum in Cerebral Palsy: A Study Protocol. <i>Pediatric Physical Therapy</i> , 2019, 31, 301-305.	0.6	2
7	Evaluation of upper limb movements in children with Down's syndrome: A systematic review. , 2018, 51, 45-51.		2
8	Effect of Transcranial Direct Current Stimulation of Motor Cortex in Cerebral Palsy: A Study Protocol. <i>Pediatric Physical Therapy</i> , 2018, 30, 67-71.	0.6	2
9	Effect of postural insoles on gait pattern in individuals with hemiparesis: A randomized controlled clinical trial. <i>Journal of Bodywork and Movement Therapies</i> , 2018, 22, 792-797.	1.2	6
10	Cerebellar transcranial direct current stimulation in children with ataxic cerebral palsy: A sham-controlled, crossover, pilot study. <i>Developmental Neurorehabilitation</i> , 2017, 20, 142-148.	1.1	40
11	Effect of bilateral transcranial direct current stimulation combined with gait training in a child with hemiparetic spastic cerebral palsy: Case report. <i>Gait and Posture</i> , 2017, 57, 361.	1.4	1
12	Protocol study for a randomised, controlled, double-blind, clinical trial involving virtual reality and anodal transcranial direct current stimulation for the improvement of upper limb motor function in children with Down syndrome. <i>BMJ Open</i> , 2017, 7, e016260.	1.9	10
13	Motor Cortex Plasticity in Children With Spastic Cerebral Palsy: A Systematic Review. <i>Journal of Motor Behavior</i> , 2017, 49, 355-364.	0.9	12
14	Effect of Transcranial Direct Current Stimulation Combined With Virtual Reality Training on Balance in Children With Cerebral Palsy: A Randomized, Controlled, Double-Blind, Clinical Trial. <i>Journal of Motor Behavior</i> , 2017, 49, 329-336.	0.9	39
15	Spared Primary Motor Cortex and The Presence of MEP in Cerebral Palsy Dictate the Responsiveness to tDCS during Gait Training. <i>Frontiers in Human Neuroscience</i> , 2016, 10, 361.	2.0	24
16	Effects of a single session of transcranial direct current stimulation on static balance in a patient with hemiparesis: a case study. <i>Journal of Physical Therapy Science</i> , 2015, 27, 955-958.	0.6	19
17	Effect of a single session of transcranial direct-current stimulation combined with virtual reality training on the balance of children with cerebral palsy: a randomized, controlled, double-blind trial. <i>Journal of Physical Therapy Science</i> , 2015, 27, 763-768.	0.6	46
18	Effects of anodal transcranial direct current stimulation combined with virtual reality for improving gait in children with spastic diparetic cerebral palsy: a pilot, randomized, controlled, double-blind, clinical trial. <i>Clinical Rehabilitation</i> , 2015, 29, 1212-1223.	2.2	81

#	ARTICLE	IF	CITATIONS
19	Effect of Transcranial Direct-Current Stimulation Combined with Treadmill Training on Balance and Functional Performance in Children with Cerebral Palsy: A Double-Blind Randomized Controlled Trial. PLoS ONE, 2014, 9, e105777.	2.5	84
20	Transcranial direct current stimulation during treadmill training in children with cerebral palsy: A randomized controlled double-blind clinical trial. Research in Developmental Disabilities, 2014, 35, 2840-2848.	2.2	84
21	Effects of gastrocnemius fascia lengthening on gait pattern in children with cerebral palsy using the Gait Profile Score. Research in Developmental Disabilities, 2014, 35, 1137-1143.	2.2	28
22	Transcranial Direct Current Stimulation Combined with Treadmill Gait Training in Delayed Neuro-psychomotor Development. Journal of Physical Therapy Science, 2014, 26, 945-950.	0.6	25
23	A comparison of treadmill training and overground walking in ambulant children with cerebral palsy: randomized controlled clinical trial. Clinical Rehabilitation, 2013, 27, 686-696.	2.2	62
24	Effect of transcranial direct current stimulation combined with gait and mobility training on functionality in children with cerebral palsy: study protocol for a double-blind randomized controlled clinical trial. BMC Pediatrics, 2013, 13, 168.	1.7	25
25	Effect of Ankle-foot Orthosis on Gait Velocity and Cadence of Stroke Patients: A Systematic Review. Journal of Physical Therapy Science, 2013, 25, 1503-1508.	0.6	65
26	Análise do equilíbrio em pacientes hemiparéticos após o treino com o programa Wii Fit. Fisioterapia Em Movimento, 2011, 24, 337-343.	0.1	32
