M Ian Phillips

List of Publications by Citations

Source: https://exaly.com/author-pdf/10980905/m-ian-phillips-publications-by-citations.pdf
Version: 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

128 papers	6,335 citations	44 h-index	77 g-index
131 ext. papers	6,685 ext. citations	7.1 avg, IF	5.39 L-index

#	Paper	IF	Citations
128	Improved graft mesenchymal stem cell survival in ischemic heart with a hypoxia-regulated heme oxygenase-1 vector. *Journal of the American College of Cardiology*, **2005**, 46, 1339-50	15.1	346
127	Paracrine action enhances the effects of autologous mesenchymal stem cell transplantation on vascular regeneration in rat model of myocardial infarction. *Annals of Thoracic Surgery*, **2005**, 80, 229-36; discussion 236-7	2.7	343
126	Hypoxic preconditioning enhances the benefit of cardiac progenitor cell therapy for treatment of myocardial infarction by inducing CXCR4 expression. *Circulation Research*, **2009**, 104, 1209-16	15.7	305
125	Autologous mesenchymal stem cell transplantation induce VEGF and neovascularization in ischemic myocardium. *Regulatory Peptides*, **2004**, 117, 3-10		305
124	Levels of angiotensin and molecular biology of the tissue renin angiotensin systems. *Regulatory Peptides*, **1993**, 43, 1-20		262
123	Antisense inhibition of AT1 receptor mRNA and angiotensinogen mRNA in the brain of spontaneously hypertensive rats reduces hypertension of neurogenic origin. *Regulatory Peptides*, **1993**, 49, 167-74		189
122	Lowering of hypertension by central saralasin in the absence of plasma renin. *Nature*, **1977**, 270, 445-7	50.4	168
121	Aerobic exercise training-induced left ventricular hypertrophy involves regulatory MicroRNAs, decreased angiotensin-converting enzyme-angiotensin ii, and synergistic regulation of angiotensin-converting enzyme 2-angiotensin (1-7). *Hypertension*, **2011**, 58, 182-9	8.5	161
120	Insulin inhibits pyramidal neurons in hippocampal slices. *Brain Research*, **1984**, 309, 187-91	3.7	147
119	Brain renin angiotensin in disease. *Journal of Molecular Medicine*, **2008**, 86, 715-22	5.5	145
118	The role of angiotensin, AT1 and AT2 receptors in the pressor, drinking and vasopressin responses to central angiotensin. *Brain Research*, **1992**, 586, 289-94	3.7	145
117	Angiotensin II-induced cardiac hypertrophy and hypertension are attenuated by epidermal growth factor receptor antisense. *Circulation*, **2002**, 106, 909-12	16.7	142
116	Immunohistochemical mapping of angiotensin AT1 receptors in the brain. *Regulatory Peptides*, **1993** , 44, 95-107		126
115	Specific angiotensin II receptive neurons in the cat subfornical organ. *Brain Research*, **1976**, 109, 531-40	3.7	121
114	Increased angiotensin II type 1 receptor expression in hypercholesterolemic atherosclerosis in rabbits. *Arteriosclerosis, Thrombosis, and Vascular Biology*, **1998**, 18, 1433-9	9.4	116
113	Adeno-associated virus vector-mediated transgene integration into neurons and other nondividing cell targets. *Journal of Virology*, **1998**, 72, 5919-26	6.6	115
112	Exercise training prevents the microvascular rarefaction in hypertension balancing angiogenic and apoptotic factors: role of microRNAs-16, -21, and -126. *Hypertension*, **2012**, 59, 513-20	8.5	113

111	Swimming training in rats increases cardiac MicroRNA-126 expression and angiogenesis. *Medicine and Science in Sports and Exercise*, **2012**, 44, 1453-62	1.2	102
110	Angiotensin II as a pro-inflammatory mediator. *Current Opinion in Investigational Drugs*, **2002**, 3, 569-77		93
109	Aerobic exercise training promotes physiological cardiac remodeling involving a set of microRNAs. *American Journal of Physiology - Heart and Circulatory Physiology*, **2015**, 309, H543-52	5.2	91
108	Vigilant vector: heart-specific promoter in an adeno-associated virus vector for cardioprotection. *Hypertension*, **2002**, 39, 651-5	8.5	87
107	The effect of ouabain on water diffusion in the rat hippocampal slice measured by high resolution NMR imaging. *Magnetic Resonance in Medicine*, **1999**, 41, 137-42	4.4	85
106	Prolonged reduction of high blood pressure with an in vivo, nonpathogenic, adeno-associated viral vector delivery of AT1-R mRNA antisense. *Hypertension*, **1997**, 29, 374-80	8.5	83
105	Antisense inhibition and adeno-associated viral vector delivery for reducing hypertension. *Hypertension*, **1997**, 29, 177-87	8.5	80
104	The central and peripheral effects of Captopril (SQ 14225) on the arterial pressure of the spontaneously hypertensive rat. *Brain Research*, **1980**, 186, 499-503	3.7	80
103	Hypokalemia induces renal injury and alterations in vasoactive mediators that favor salt sensitivity. *American Journal of Physiology - Renal Physiology*, **2001**, 281, F620-9	4.3	79
102	Brain angiotensin in the developing spontaneously hypertensive rat. *Journal of Hypertension*, **1988**, 6, 607-12	1.9	71
101	Protection from ischemic heart injury by a vigilant heme oxygenase-1 plasmid system. *Hypertension*, **2004**, 43, 746-51	8.5	70
100	Antisense inhibition of hypertension: a new strategy for renin-angiotensin candidate genes. *Kidney International*, **1994**, 46, 1554-6	9.9	63
99	Antisense inhibition of hypertension in the spontaneously hypertensive rat. *Hypertension*, **1995**, 25, 314-9	8.5	61
98	Reduction of cold-induced hypertension by antisense oligodeoxynucleotides to angiotensinogen mRNA and AT1-receptor mRNA in brain and blood. *Hypertension*, **1998**, 31, 1317-23	8.5	58
97	Angiotensin II responsive cells in the organum vasculosum lamina terminalis (OVLT) recorded in hypothalamic brain slices. *Brain Research*, **1980**, 197, 256-9	3.7	58
96	Mobilizing of haematopoietic stem cells to ischemic myocardium by plasmid mediated stromal-cell-derived factor-1alpha (SDF-1alpha) treatment. *Regulatory Peptides*, **2005**, 125, 1-8		57
95	Antisense to epidermal growth factor receptor prevents the development of left ventricular hypertrophy. *Hypertension*, **2003**, 41, 824-9	8.5	57
94	Attenuation of hypertension and heart hypertrophy by adeno-associated virus delivering angiotensinogen antisense. *Hypertension*, **2001**, 37, 376-80	8.5	55

93	Genetic modification of stem cells for transplantation. *Advanced Drug Delivery Reviews*, **2008**, 60, 160-72	18.5	54
92	Antisense inhibition of brain renin-angiotensin system decreased blood pressure in chronic 2-kidney, 1 clip hypertensive rats. *Hypertension*, **2001**, 37, 371-5	8.5	54
91	A novel two-step procedure to expand cardiac Sca-1+ cells clonally. *Biochemical and Biophysical Research Communications*, **2007**, 359, 877-83	3.4	52
90	A vigilant, hypoxia-regulated heme oxygenase-1 gene vector in the heart limits cardiac injury after ischemia-reperfusion in vivo. *Journal of Cardiovascular Pharmacology and Therapeutics*, **2005**, 10, 251-63	2.6	50
89	Rat brain cells in primary culture: characterization of angiotensin II binding sites. *Brain Research*, **1981**, 207, 343-55	3.7	50
88	Antisense inhibition of beta(1)-adrenergic receptor mRNA in a single dose produces a profound and prolonged reduction in high blood pressure in spontaneously hypertensive rats. *Circulation*, **2000**, 101, 682-8	16.7	48
87	Expression of angiotensin type 1 and 2 receptors in brain after transient middle cerebral artery occlusion in rats. *Regulatory Peptides*, **2003**, 110, 241-7		47
86	Hypoxia inducible double plasmid system for myocardial ischemia gene therapy. *Hypertension*, **2002** , 39, 695-8	8.5	44
85	Is gene therapy for hypertension possible?. *Hypertension*, **1999**, 33, 8-13	8.5	44
84	Involvement of angiotensin receptor subtypes in osmotically induced release of vasopressin. *Brain Research*, **1994**, 637, 126-32	3.7	43
83	Inhibitory effects of luteinizing hormone releasing hormone (LH-RH) on neurons in the organum vasculosum lamina terminalis (OVLT). *Brain Research*, **1979**, 169, 204-8	3.7	42
82	A pressor response to intraventricular injections of carbachol. *Brain Research*, **1976**, 105, 157-62	3.7	42
81	Immunocytochemical and biochemical characterization of angiotensin I and II in cultured neuronal and glial cells from rat brain. *Neuroendocrinology*, **1988**, 47, 125-32	5.6	41
80	Immunoreactivity for an angiotensin II-like peptide in the human brain. *Brain Research*, **1981**, 205, 212-8	3.7	41
79	Inhibition of hypertension by peripheral administration of antisense oligodeoxynucleotides. *Hypertension*, **1996**, 28, 147-51	8.5	40
78	Myocardial angiotensin II receptor expression and ischemia-reperfusion injury. *Vascular Medicine*, **1998**, 3, 121-30	3.3	39
77	Identification of insulin receptor-containing cells in primary cultures of rat brain. *Cellular and Molecular Neurobiology*, **1982**, 2, 47-52	4.6	39
76	Gene therapy for hypertension: the preclinical data. *Hypertension*, **2001**, 38, 543-8	8.5	38

75	Saralasin increases activity of hippocampal neurons inhibited by angiotensin II. *Brain Research*, **1984**, 323, 345-8	3.7	37
74	What the Orphan Drug Act has done lately for children with rare diseases: a 10-year analysis. *Pediatrics*, **2012**, 129, 516-21	7.4	36
73	Angiotensin II receptor subtypes play opposite roles in regulating phosphatidylinositol hydrolysis in rat skin slices. *Biochemical and Biophysical Research Communications*, **1992**, 186, 285-92	3.4	36
72	LOX-1 and angiotensin receptors, and their interplay. *Cardiovascular Drugs and Therapy*, **2011**, 25, 401-17	3.9	34
71	Rat brain cells in primary culture: visualization and measurement of catecholamines. *Brain Research*, **1983**, 264, 267-75	3.7	34
70	Angiotensin II AT(1A) receptor antisense lowers blood pressure in acute 2-kidney, 1-clip hypertension. *Hypertension*, **2001**, 38, 674-8	8.5	33
69	Vigilant vectors: adeno-associated virus with a biosensor to switch on amplified therapeutic genes in specific tissues in life-threatening diseases. *Methods*, **2002**, 28, 259-66	4.6	32
68	Studies on the presence of angiotensin II in rat brain. *Journal of Neurochemistry*, **1982**, 38, 816-20	6	32
67	Sustained inhibition of angiotensin I-converting enzyme (ACE) expression and long-term antihypertensive action by virally mediated delivery of ACE antisense cDNA. *Circulation Research*, **1999**, 85, 614-22	15.7	31
66	A biphasic excitatory response of hippocampal neurons to gonadotropin-releasing hormone. *Neuroendocrinology*, **1986**, 44, 137-41	5.6	31
65	MR microscopy of perfused brain slices. *Magnetic Resonance in Medicine*, **1997**, 38, 1012-5	4.4	30
64	New beta-blocker: prolonged reduction in high blood pressure with beta(1) antisense oligodeoxynucleotides. *Hypertension*, **2000**, 35, 219-24	8.5	26
63	Antisense inhibition of AT1 receptor in vascular smooth muscle cells using adeno-associated virus-based vector. *Hypertension*, **1999**, 33, 354-9	8.5	26
62	Angiotensin II stimulates changes in the norepinephrine content of primary cultures of rat brain. *Neuroscience Letters*, **1983**, 36, 305-9	3.3	26
61	Efficient and persistent transduction of exocrine and endocrine pancreas by adeno-associated virus type 8. *Journal of Biomedical Science*, **2007**, 14, 585-94	13.3	25
60	Independent receptors for pressor and drinking responses to central injections of angiotensin II and carbachol. *Brain Research*, **1977**, 124, 305-15	3.7	25
59	The effect of chronic bilateral nephrectomy on plasma and brain angiotensin. *Journal of Hypertension*, **1992**, 10, 29-36	1.9	24
58	Biosynthesis of angiotensinogen and angiotensins by brain cells in primary culture. *Journal of Neurochemistry*, **1988**, 51, 398-405	6	21

57	Alpha 2-adrenergic receptors in neuronal and glial cultures: characterization and comparison. *Journal of Neurochemistry*, **1989**, 53, 287-96	6	19
56	Orphan products: an emerging trend in drug approvals. *Nature Reviews Drug Discovery*, **2010**, 9, 84	64.1	18
55	Therapies for inborn errors of metabolism: what has the orphan drug act delivered?. *Pediatrics*, **2010**, 126, 101-6	7.4	16
54	The Discovery of Renin 100 Years Ago. *Physiology*, **1999**, 14, 271-274	9.8	16
53	Metabolism of angiotensin peptides by neuronal and glial cultures from rat brain. *Journal of Neurochemistry*, **1989**, 52, 863-8	6	16
52	Dopamine synthesis and release in LLC-PK1 cells. *European Journal of Pharmacology*, **1990**, 189, 423-6		16
51	Effect of cortisol on unit activity in freely moving rats. *Brain Research*, **1971**, 25, 651-5	3.7	16
50	Gene, stem cell, and future therapies for orphan diseases. *Clinical Pharmacology and Therapeutics*, **2012**, 92, 182-92	6.1	15
49	Intracisternal administration of Angiotensin II AT1 receptor antisense oligodeoxynucleotides protects against cerebral ischemia in spontaneously hypertensive rats. *Regulatory Peptides*, **2003**, 111, 117-22		15
48	NMR microscopy: Beginnings and new directions. *Magnetic Resonance Materials in Physics, Biology, and Medicine*, **1999**, 9, 112-116	2.8	15
47	Gene therapy for hypertension: sense and antisense strategies. *Expert Opinion on Biological Therapy* , **2001**, 1, 655-62	5.4	14
46	The predominant role of brain angiotensinogen and angiotensin in environmentally induced hypertension. *Regulatory Peptides*, **2002**, 110, 25-32		14
45	Alterations of lymphocyte populations during development in the spontaneously hypertensive rat. *Journal of Hypertension*, **1992**, 10, 629???634	1.9	13
44	Evidence for direct neuronal stimulation by intraventricular angiotensin II. *Brain Research*, **1977**, 126, 376-81	3.7	12
43	Genetically reprogrammed, liver-derived insulin-producing cells are glucose-responsive, but susceptible to autoimmune destruction in settings of murine model of type 1 diabetes. *American Journal of Translational Research (discontinued)*, **2013**, 5, 184-99	3	12
42	SENSITIVE SITES IN THE BRAIN FOR THE BLOOD PRESSURE AND DRINKING RESPONSES TO ANGIOTENSIN II **1977**, 325-356		12
41	Measurement of Brain Peptides: Angiotensin and Atrial Natriuretic Peptide in Tissue and Cell Culture. *Methods in Neurosciences*, **1991**, 6, 177-206		11
40	Converting Enzyme Inhibitors and Brain Angiotensin. *Journal of Cardiovascular Pharmacology*, **1986**, 8, S75-90	3.1	11

39	Angiotensin Receptor Stimulation of Transforming Growth Factor-□n Rat Skin and Wound Healing **1994**, 377-396		11
38	The potential role of antisense oligodeoxynucleotide therapy for cardiovascular disease. *Drugs*, **2000**, 60, 239-48	12.1	9
37	Intravenous angiotensinogen antisense in AAV-based vector decreases hypertension. *American Journal of Physiology - Heart and Circulatory Physiology*, **1999**, 277, H2392-9	5.2	9
36	MRI measurement of cell volume fraction in the perfused rat hippocampal slice. *Magnetic Resonance in Medicine*, **1999**, 42, 603-7	4.4	9
35	Angiotensin-induced drinking in rats with hereditary hypothalamic diabetes insipidus. *Neuroscience Letters*, **1977**, 4, 327-30	3.3	9
34	Exercise training prevents obesity-associated disorders: Role of miRNA-208a and MED13. *Molecular and Cellular Endocrinology*, **2018**, 476, 148-154	4.4	8
33	Brain angiotensin and the female reproductive cycle. *Advances in Experimental Medicine and Biology* , **1995**, 377, 357-70	3.6	8
32	Genetic modification of stem cells for cardiac, diabetic, and hemophilia transplantation therapies. *Progress in Molecular Biology and Translational Science*, **2012**, 111, 285-304	4	7
31	Gene therapy for neurologic disease: benchtop discoveries to bedside applications. 1. The bench. *Journal of Child Neurology*, **1997**, 12, 1-12	2.5	6
30	Stem cell therapy for heart failure: the science and current progress. *Future Cardiology*, **2008**, 4, 285-98	1.3	6
29	Gene therapy for hypertension: the preclinical data. *Methods in Enzymology*, **2002**, 346, 3-13	1.7	6
28	A role for central angiotensin in regulation of blood pressure at the nucleus tractus solitarius. *Clinical and Experimental Hypertension*, **1984**, 6, 1933-7		6
27	Infrared fluorescent protein 1.4 genetic labeling tracks engrafted cardiac progenitor cells in mouse ischemic hearts. *PLoS ONE*, **2014**, 9, e107841	3.7	5
26	A Cre-loxP solution for defining the brain renin-angiotensin system. Focus on "Targeted viral delivery of Cre recombinase induces conditional gene deletion in cardiovascular circuits of the mouse brain". *Physiological Genomics*, **2004**, 18, 1-3	3.6	4
25	Insulin in the Brain: A Feedback Loop Involving Brain Insulin and Circumventricular Organs **1987**, 163-175		4
24	Gene therapy for hypertension: antisense inhibition of the renin-angiotensin system. *Methods in Molecular Medicine*, **2005**, 108, 363-79		3
23	Antisense oligonucleotides for in vivo studies of angiotensin receptors. *Advances in Experimental Medicine and Biology*, **1996**, 396, 79-92	3.6	3
22	The emergence of gene therapy for rare diseases. *Expert Opinion on Orphan Drugs*, **2014**, 2, 1197-1209	1.1	2

21	Tumor-free iPS stem cells for heart cells. *Cell Cycle*, **2014**, 13, 1519	4.7	2
20	Gene therapy for neurologic disease: benchtop discoveries to bedside applications. 2. The bedside. *Journal of Child Neurology*, **1997**, 12, 77-84	2.5	2
19	Peptides and Blood Vessels **1983**, 815-835		2
18	Angiotensin and Drinking: A Model for the Study of Peptide Action in the Brain **1984**, 423-462		2
17	Novel low shear 3D bioreactor for high purity mesenchymal stem cell production. *PLoS ONE*, **2021**, 16, e0252575	3.7	2
16	Is orphan drug pricing blowing a bubble? The unique situation of orphan drugs and why high prices will likely persist. *Expert Opinion on Orphan Drugs*, **2013**, 1, 675-679	1.1	1
15	Antisense Therapeutics **2004**,		1
14	Designing antisense to inhibit the renin-angiotensin system **2000**, 212, 145-153		1
13	Dopamine receptor agonists and antagonists both inhibit dopamine secretion in LLC-PK1 cells. *European Journal of Pharmacology*, **1993**, 240, 277-82	5.3	1
12	FUNCTION OF BRAIN ANGIOTENSIN IN HYPOVOLEMIA, REPRODUCTION, AND NEUROTRANSMISSION **1998**, 83-115		1
11	Central and Peripheral Actions of Angiotensin II **1986**, 385-441		1
10	Human Stem Cell Therapy **2012**, 187-207		
9	Gene Therapy Strategies: Constructing an AAV Trojan Horse **2010**, 283-306		
8	Antisense Therapeutics **2005**, 003-010		
7	Antisense inhibition of the Renin-Angiotensin system. *Methods in Molecular Medicine*, **2001**, 51, 83-104		
6	Designing antisense to inhibit the renin-angiotensin system **2000**, 145-153		
5	Angiotensin II as a Mediator of Inflammation in Atherosclerosis **2001**, 113-127		
4	An Appetite: Sodium Hunger . The Search for a Salty Taste. Jay Schulkin. Cambridge University Press, New York, 1992. xii, 192 pp., illus. $54.95.. *Science*, **1992**, 256, 1574-1575	33.3	

List of Publications

3	An Appetite: Sodium Hunger . The Search for a Salty Taste. Jay Schulkin. Cambridge University Press, New York, 1992. xii, 192 pp., illus. $54.95.. *Science*, **1992**, 256, 1574-1575	33.3
2	Tooth Loss and Hypertension in the Spontaneously Hypertensive Rat.. *Hypertension Research*, **1993**, 16, 203-208	4.7
1	Genetically Modified Stem Cells for Transplantation **2013**, 119-146
