#	ARTICLE	IF	CITATIONS
1	<b>Comprehensive cardiac rehabilitation for patients following infective endocarditis</b>: results of the randomized CopenHeartIE trial</b>. European Journal of Cardiovascular Nursing, 2022, 21, 261-270.	0.9	3
2	A Network Analysis of the Fear of COVID-19 Scale (FCV-19S): A Large-Scale Cross-Cultural Study in Iran, Bangladesh, and Norway. International Journal of Environmental Research and Public Health, 2022, 19, 6824.	2.6	14
3	Health Literacy and Risk Factors for Coronary Artery Disease (From the CONCARDPCI Study). American Journal of Cardiology, 2022, 179, 22-30.	1.6	3
4	Baseline frailty status and outcomes important for shared decision-making in older adults receiving transcatheter aortic valve implantation, a prospective observational study. Aging Clinical and Experimental Research, 2021, 33, 345-352.	2.9	6
5	OUP accepted manuscript. European Journal of Cardiovascular Nursing, 2021, , .	0.9	1
6	Octogenarian patientsâ€™ sleep and delirium experiences in hospital and four years after aortic valve replacement: a qualitative interview study. BMJ Open, 2021, 11, e039959.	1.9	4
7	Patientsâ€™ reflections on prehospital symptom recognition and timely treatment of myocardial infarction. European Journal of Cardiovascular Nursing, 2021, 20, 526-533.	0.9	3
8	Frailty Status and Patient-Reported Outcomes in Octogenarians Following Transcatheter or Surgical Aortic Valve Replacement. Heart Lung and Circulation, 2021, 30, 1221-1231.	0.4	7
9	Cardiovascular nurses' adherence to practice standards in in-hospital telemetry monitoring. Nursing in Critical Care, 2020, 25, 37-44.	2.3	5
10	Accelerated importance of eHealth literacy in the COVID-19 outbreak and beyond. European Journal of Cardiovascular Nursing, 2020, 19, 458-461.	0.9	99
11	Rethinking rehabilitation after percutaneous coronary intervention: a protocol of a multicentre cohort study on continuity of care, health literacy, adherence and costs at all care levels (the Tj ETQq1 1 0.784314rgBT /Ovablock 10		
12	How can we improve specialist health services for children with multi-referrals? Parent reported experience. BMC Health Services Research, 2020, 20, 786.	2.2	5
13	Association between frailty and self-reported health following heart valve surgery. IJC Heart and Vasculature, 2020, 31, 100671.	1.1	5
14	Cardiac rehabilitation in older adults: is it just lifestyle?. Heart, 2020, 106, 1035-1037.	2.9	10
15	Continuity of care and its associations with self-reported health, clinical characteristics and follow-up services after percutaneous coronary intervention. BMC Health Services Research, 2020, 20, 71.	2.2	7
16	Psychometric Properties of the Norwegian Version of the Electronic Health Literacy Scale (eHEALS) Among Patients After Percutaneous Coronary Intervention: Cross-Sectional Validation Study. Journal of Medical Internet Research, 2020, 22, e17312.	4.3	20
17	Modes of e-Health delivery in secondary prevention programmes for patients with coronary artery disease: a systematic review. BMC Health Services Research, 2019, 19, 364.	2.2	49
18	Adaptation and psychometric properties of the Norwegian version of the heart continuity of care questionnaire (HCCQ). BMC Medical Research Methodology, 2019, 19, 62.	3.1	2

#	ARTICLE	IF	CITATIONS
19	Sleepless nights and sleepy days: a qualitative study exploring the experiences of patients with chronic heart failure and newly verified sleep-disordered breathing. <i>Scandinavian Journal of Caring Sciences</i> , 2019, 33, 750-759.	2.1	5
20	Changes in quality of life 5 years after sleeve gastrectomy: a prospective cohort study. <i>BMJ Open</i> , 2019, 9, e031170.	1.9	19
21	"I hope you get normal again": an explorative study on how delirious octogenarian patients experience their interactions with healthcare professionals and relatives after aortic valve therapy. <i>European Journal of Cardiovascular Nursing</i> , 2019, 18, 224-233.	0.9	3
22	Eating self-efficacy as predictor of long-term weight loss and obesity-specific quality of life after sleeve gastrectomy: A prospective cohort study. <i>Surgery for Obesity and Related Diseases</i> , 2019, 15, 161-167.	1.2	20
23	A novel geriatric assessment frailty score predicts 2-year mortality after transcatheter aortic valve implantation. <i>European Heart Journal Quality of Care &amp; Clinical Outcomes</i> , 2019, 5, 153-160.	4.0	39
24	Editor's Choice- Practical challenges regarding in-hospital telemetry monitoring require the development of European practice standards. <i>European Heart Journal: Acute Cardiovascular Care</i> , 2018, 7, 774-776.	1.0	2
25	"Eight Days of Nightmares"   "Octogenarian Patients' Experiences of Postoperative Delirium after Transcatheter or Surgical Aortic Valve Replacement. <i>Heart Lung and Circulation</i> , 2018, 27, 260-266.	0.4	17
26	Patient perceptions of experience with cardiac rehabilitation after isolated heart valve surgery. <i>European Journal of Cardiovascular Nursing</i> , 2018, 17, 45-53.	0.9	8
27	Avoidance of urinary catheterization to minimize in-hospital complications after transcatheter aortic valve implantation: An observational study. <i>European Journal of Cardiovascular Nursing</i> , 2018, 17, 66-74.	0.9	9
28	European cardiovascular nurses' and allied professionals' knowledge and practical skills regarding cardiopulmonary resuscitation. <i>European Journal of Cardiovascular Nursing</i> , 2018, 17, 336-344.	0.9	17
29	Indwelling urinary catheters, aortic valve treatment and delirium: a prospective cohort study. <i>BMJ Open</i> , 2018, 8, e021708.	1.9	5
30	Why some people do well and others don't. The role of sense of coherence in disease adaptation. <i>European Journal of Cardiovascular Nursing</i> , 2018, 17, 672-674.	0.9	5
31	Challenges adhering to a medication regimen following first-time percutaneous coronary intervention: A patient perspective. <i>International Journal of Nursing Studies</i> , 2018, 88, 16-24.	5.6	32
32	Changes in self-reported health and quality of life in octogenarian patients one month after transcatheter aortic valve implantation. <i>European Journal of Cardiovascular Nursing</i> , 2017, 16, 79-87.	0.9	15
33	Patient-centred care of patients with ventricular arrhythmias and risk of sudden cardiac death: What do the 2015 European Society of Cardiology guidelines add?. <i>European Journal of Cardiovascular Nursing</i> , 2017, 16, 558-564.	0.9	2
34	Continuity of care after percutaneous coronary intervention: The patient's perspective across secondary and primary care settings. <i>European Journal of Cardiovascular Nursing</i> , 2017, 16, 444-452.	0.9	33
35	Patient-reported outcomes and associations with pleural effusion in outpatients with heart failure: an observational cohort study. <i>BMJ Open</i> , 2017, 7, e013734.	1.9	10
36	Self-reported health status, treatment decision and survival in asymptomatic and symptomatic patients with aortic stenosis in a Western Norway population undergoing conservative treatment: a cross-sectional study with 18 months follow-up. <i>BMJ Open</i> , 2017, 7, e016489.	1.9	6

#	ARTICLE	IF	CITATIONS
37	Females report higher postoperative pain scores than males after ankle surgery. <i>Scandinavian Journal of Pain</i> , 2016, 12, 85-93.	1.3	23
38	Readmissions and mortality in delirious versus non-delirious octogenarian patients after aortic valve therapy: a prospective cohort study. <i>BMJ Open</i> , 2016, 6, e012683.	1.9	20
39	Patients' goals, resources, and barriers to future change: A qualitative study of patient reflections at hospital discharge after myocardial infarction. <i>European Journal of Cardiovascular Nursing</i> , 2016, 15, 495-503.	0.9	23
40	Patient-reported outcomes on the agenda in cardiovascular clinical practice. <i>European Journal of Cardiovascular Nursing</i> , 2016, 15, 108-111.	0.9	18
41	Sleep in octogenarians during the postoperative phase after transcatheter or surgical aortic valve replacement. <i>European Journal of Cardiovascular Nursing</i> , 2016, 15, 168-177.	0.9	11
42	Adding point of care ultrasound to assess volume status in heart failure patients in a nurse-led outpatient clinic. A randomised study. <i>Heart</i> , 2016, 102, 29-34.	2.9	57
43	Attempts to improve and confidence in improving health behaviour in 40-49 year olds with and without coronary heart disease: The Hordaland Health Study. <i>European Journal of Cardiovascular Nursing</i> , 2016, 15, e60-e69.	0.9	3
44	Comparison of Frequency, Risk Factors, and Time Course of Postoperative Delirium in Octogenarians After Transcatheter Aortic Valve Implantation Versus Surgical Aortic Valve Replacement. <i>American Journal of Cardiology</i> , 2015, 115, 802-809.	1.6	68
45	Feasibility and reliability of pocket-size ultrasound examinations of the pleural cavities and vena cava inferior performed by nurses in an outpatient heart failure clinic. <i>European Journal of Cardiovascular Nursing</i> , 2015, 14, 286-293.	0.9	44
46	Temporal trend analysis of nurses' knowledge about implantable cardioverter defibrillators. <i>Nursing in Critical Care</i> , 2015, 20, 146-154.	2.3	4
47	Factors associated with poor self-reported health status after aortic valve replacement with or without concomitant bypass surgery. <i>European Journal of Cardio-thoracic Surgery</i> , 2015, 48, 283-292.	1.4	19
48	Perceptions of healthcare professionals' support, shock anxiety and device acceptance among implantable cardioverter defibrillator recipients. <i>Journal of Advanced Nursing</i> , 2014, 70, 2061-2071.	3.3	10
49	Improvement of in-hospital telemetry monitoring in coronary care units: An intervention study for achieving optimal electrode placement and attachment, hygiene and delivery of critical information to patients. <i>European Journal of Cardiovascular Nursing</i> , 2014, 13, 515-523.	0.9	11
50	Sense of coherence—a determinant of quality of life over time in older female acute myocardial infarction survivors. <i>Journal of Clinical Nursing</i> , 2010, 19, 820-831.	3.0	40
51	Patient-reported outcomes as predictors of 10-year survival in women after acute myocardial infarction. <i>Health and Quality of Life Outcomes</i> , 2010, 8, 140.	2.4	50
52	The Other Side of the Coin: Perceived Positive Effects of Illness in Women Following Acute Myocardial Infarction. <i>European Journal of Cardiovascular Nursing</i> , 2008, 7, 80-87.	0.9	20
53	1368: Sense of coherence — A predictor of physical functioning and satisfaction with health in women after myocardial infarction?. <i>European Journal of Cardiovascular Nursing</i> , 2007, 6, 39-39.	0.9	0
54	Quality of life in female myocardial infarction survivors: a comparative study with a randomly selected general female population cohort. <i>Health and Quality of Life Outcomes</i> , 2007, 5, 58.	2.4	23
