#	ARTICLE	IF	CITATIONS
1	A Longitudinal Study of Emotion Regulation, Emotion Labilityâ€­Negativity, and Internalizing Symptomatology in Maltreated and Nonmaltreated Children. <i>Child Development</i> , 2013, 84, 512-527.	3.0	234
2	Linking Executive Function and Peer Problems from Early Childhood Through Middle Adolescence. <i>Journal of Abnormal Child Psychology</i> , 2016, 44, 31-42.	3.5	143
3	What's mom got to do with it? Contributions of maternal executive function and caregiving to the development of executive function across early childhood. <i>Developmental Science</i> , 2014, 17, 224-238.	2.4	130
4	The development of adolescent selfâ€­regulation: Reviewing the role of parent, peer, friend, and romantic relationships. <i>Journal of Adolescence</i> , 2014, 37, 433-440.	2.4	119
5	Religious people discount the future less. <i>Evolution and Human Behavior</i> , 2012, 33, 224-231.	2.2	86
6	Longitudinal Associations Among Religiousness, Delay Discounting, and Substance Use Initiation in Early Adolescence. <i>Journal of Research on Adolescence</i> , 2015, 25, 36-43.	3.7	57
7	Behavioral and neural inhibitory control moderates the effects of reward sensitivity on adolescent substance use. <i>Neuropsychologia</i> , 2016, 91, 318-326.	1.6	56
8	Attention and executive functioning in infancy: Links to childhood executive function and reading achievement. <i>Developmental Science</i> , 2019, 22, e12824.	2.4	56
9	Processes Linking Parentsâ€™ and Adolescentsâ€™ Religiousness and Adolescent Substance Use: Monitoring and Self-Control. <i>Journal of Youth and Adolescence</i> , 2014, 43, 745-756.	3.5	48
10	A longitudinal intergenerational analysis of executive functions during early childhood. <i>British Journal of Developmental Psychology</i> , 2014, 32, 50-64.	1.7	43
11	Executive functioning and substance use in adolescence: Neurobiological and behavioral perspectives. <i>Neuropsychologia</i> , 2017, 100, 79-92.	1.6	43
12	Sensitivity shift theory: A developmental model of positive affect and motivational deficits in social anxiety disorder. <i>Clinical Psychology Review</i> , 2019, 72, 101756.	11.4	43
13	A Systematic Review of Associations Between Adverse Peer Experiences and Emotion Regulation in Adolescence. <i>Clinical Child and Family Psychology Review</i> , 2021, 24, 141-163.	4.5	39
14	Parent-Adolescent Relationship Quality as a Moderator for the Influences of Parentsâ€™ Religiousness on Adolescentsâ€™ Religiousness and Adjustment. <i>Journal of Youth and Adolescence</i> , 2012, 41, 1576-1587.	3.5	38
15	Parenting and Adolescent Self-Regulation Mediate Between Family Socioeconomic Status and Adolescent Adjustment. <i>Journal of Early Adolescence</i> , 2017, 37, 502-524.	1.9	36
16	Attention Bias Modification Treatment for Adolescents With Social Anxiety Disorder. <i>Behavior Therapy</i> , 2019, 50, 126-139.	2.4	36
17	Longitudinal pathways linking family risk, neural risk processing, delay discounting, and adolescent substance use. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2019, 60, 655-664.	5.2	33
18	Longitudinal study of self-regulation, positive parenting, and adjustment problems among physically abused children. <i>Child Abuse and Neglect</i> , 2012, 36, 95-107.	2.6	32

#	ARTICLE	IF	CITATIONS
19	Structural Home Environment Effects on Developmental Trajectories of Self-Control and Adolescent Risk Taking. <i>Journal of Youth and Adolescence</i> , 2019, 48, 43-55.	3.5	31
20	Delay Discounting Mediates Parent-Adolescent Relationship Quality and Risky Sexual Behavior for Low Self-Control Adolescents. <i>Journal of Youth and Adolescence</i> , 2015, 44, 1674-1687.	3.5	30
21	Developmental Changes in Emotion Regulation during Adolescence: Associations with Socioeconomic Risk and Family Emotional Context. <i>Journal of Youth and Adolescence</i> , 2020, 49, 1545-1557.	3.5	28
22	Why are Religiousness and Spirituality Associated with Externalizing Psychopathology? A Literature Review. <i>Clinical Child and Family Psychology Review</i> , 2016, 19, 1-20.	4.5	26
23	Commonality between executive functioning and effortful control related to adjustment. <i>Journal of Applied Developmental Psychology</i> , 2019, 60, 47-55.	1.7	26
24	Adolescents who are less religious than their parents are at risk for externalizing and internalizing symptoms: The mediating role of parent-adolescent relationship quality.. <i>Journal of Family Psychology</i> , 2012, 26, 636-641.	1.3	24
25	Longitudinal associations among family environment, neural cognitive control, and social competence among adolescents. <i>Developmental Cognitive Neuroscience</i> , 2017, 26, 69-76.	4.0	23
26	Neural Interaction Between Risk Sensitivity and Cognitive Control Predicting Health Risk Behaviors Among Late Adolescents. <i>Journal of Research on Adolescence</i> , 2017, 27, 674-682.	3.7	21
27	Dynamic associations between religiousness and self-regulation across adolescence into young adulthood.. <i>Developmental Psychology</i> , 2020, 56, 180-197.	1.6	21
28	Validation of the NIMH-ChEFS adolescent face stimulus set in an adolescent, parent, and health professional sample. <i>International Journal of Methods in Psychiatric Research</i> , 2015, 24, 275-286.	2.1	20
29	Attention regulates anger and fear to predict changes in adolescent risk-taking behaviors. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2015, 56, 756-765.	5.2	20
30	Risky decision making in a laboratory driving task is associated with health risk behaviors during late adolescence but not adulthood. <i>International Journal of Behavioral Development</i> , 2016, 40, 58-63.	2.4	20
31	Infant Attention and Age 3 Executive Function. <i>Yale Journal of Biology and Medicine</i> , 2019, 92, 3-11.	0.2	19
32	Does adolescents' religiousness moderate links between harsh parenting and adolescent substance use?. <i>Journal of Family Psychology</i> , 2014, 28, 739-748.	1.3	18
33	Household chaos as a context for intergenerational transmission of executive functioning. <i>Journal of Adolescence</i> , 2017, 58, 40-48.	2.4	18
34	Poverty and Puberty: A Neurocognitive Study of Inhibitory Control in the Transition to Adolescence. <i>Psychological Science</i> , 2019, 30, 1573-1583.	3.3	18
35	Perceived Competence and Depressive Symptoms Among Adolescents: The Moderating Role of Attributional Style. <i>Child Psychiatry and Human Development</i> , 2012, 43, 612-630.	1.9	17
36	Neural Correlates of Risk Processing Among Adolescents: Influences of Parental Monitoring and Household Chaos. <i>Child Development</i> , 2018, 89, 784-796.	3.0	17

#	ARTICLE	IF	CITATIONS
37	Adolescents' Religiousness and Substance Use Are Linked via Afterlife Beliefs and Future Orientation. <i>Journal of Early Adolescence</i> , 2017, 37, 1054-1077.	1.9	16
38	A longitudinal perspective on the association between cognition and temperamental shyness. <i>International Journal of Behavioral Development</i> , 2014, 38, 266-276.	2.4	15
39	Intergenerational similarity in callous-unemotional traits: Contributions of hostile parenting and household chaos during adolescence. <i>Psychiatry Research</i> , 2016, 246, 815-820.	3.3	15
40	The Interaction Between Punishment Sensitivity and Effortful Control for Emerging Adults' Substance Use Behaviors. <i>Substance Use and Misuse</i> , 2018, 53, 1299-1310.	1.4	15
41	Religiosity and interpersonal problems explain individual differences in self esteem among young adults with child maltreatment experiences. <i>Child Abuse and Neglect</i> , 2018, 80, 277-284.	2.6	15
42	How Is Religiousness Associated With Adolescent Risk-Taking? The Roles of Emotion Regulation and Executive Function. <i>Journal of Research on Adolescence</i> , 2019, 29, 334-344.	3.7	15
43	Transactional relations between developmental trajectories of executive functioning and internalizing and externalizing symptomatology in adolescence. <i>Development and Psychopathology</i> , 2020, , 1-12.	2.3	14
44	What drives apostates and converters? The social and familial antecedents of religious change among adolescents.. <i>Psychology of Religion and Spirituality</i> , 2014, 6, 284-291.	1.3	13
45	Brains of a feather flocking together? Peer and individual neurobehavioral risks for substance use across adolescence. <i>Development and Psychopathology</i> , 2019, 31, 1661-1674.	2.3	12
46	Maltreatment and brain development: The effects of abuse and neglect on longitudinal trajectories of neural activation during risk processing and cognitive control. <i>Developmental Cognitive Neuroscience</i> , 2021, 48, 100939.	4.0	12
47	Longitudinal Associations among Impulsivity, Friend Substance Use, and Adolescent Substance Use. <i>Journal of Addiction Research & Therapy</i> , 2015, 06, .	0.2	10
48	Profiles of adolescent religiousness using latent profile analysis: Implications for psychopathology. <i>British Journal of Developmental Psychology</i> , 2017, 35, 91-105.	1.7	10
49	Positive and Negative Affect and Adolescent Adjustment: Moderation Effects of Prefrontal Functioning. <i>Journal of Research on Adolescence</i> , 2018, 28, 40-55.	3.7	10
50	Impaired Fear Recognition and Social Anxiety Symptoms in Adolescence. <i>Journal of Child and Family Studies</i> , 2016, 25, 3381-3386.	1.3	9
51	Longitudinal link between trait motivation and risk-taking behaviors via neural risk processing. <i>Developmental Cognitive Neuroscience</i> , 2019, 40, 100725.	4.0	9
52	Neural Cognitive Control Moderates the Relation between Negative Life Events and Depressive Symptoms in Adolescents. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2020, 49, 118-133.	3.4	9
53	Bidirectional links between adolescent brain function and substance use moderated by cognitive control. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2021, 62, 427-436.	5.2	9
54	Socioeconomic Risk for Adolescent Cognitive Control and Emerging Risk-Taking Behaviors. <i>Journal of Research on Adolescence</i> , 2021, 31, 71-84.	3.7	9

#	ARTICLE	IF	CITATIONS
55	Are Religiousness and Forgiveness Protective Factors for Adolescents Experiencing Peer Victimization?. <i>Journal of Aggression, Maltreatment and Trauma</i> , 2014, 23, 1090-1108.	1.4	7
56	Positive and negative associations between adolescents' religiousness and health behaviors via self-regulation. <i>Religion, Brain and Behavior</i> , 2016, 6, 188-206.	0.7	7
57	The moderating role of emotional reactivity in the link between parental hostility and eating disorder symptoms in early adolescence. <i>Eating Disorders</i> , 2017, 25, 420-435.	3.0	7
58	Neural cognitive control moderates the association between insular risk processing and risk-taking behaviors via perceived stress in adolescents. <i>Developmental Cognitive Neuroscience</i> , 2018, 30, 150-158.	4.0	7
59	Inhibitory Control Mediates the Association between Perceived Stress and Secure Relationship Quality. <i>Frontiers in Psychology</i> , 2018, 9, 217.	2.1	7
60	Processes linking socioeconomic disadvantage and neural correlates of cognitive control in adolescence. <i>Developmental Cognitive Neuroscience</i> , 2021, 48, 100935.	4.0	7
61	A 4-year longitudinal neuroimaging study of cognitive control using latent growth modeling: developmental changes and brain-behavior associations. <i>NeuroImage</i> , 2021, 237, 118134.	4.2	7
62	Homesickness in college students: the role of religion in combating depression. <i>Mental Health, Religion and Culture</i> , 2013, 16, 489-500.	0.9	6
63	Adult Sexual Experiences as a Mediator Between Child Abuse and Current Secretary Immunoglobulin A Levels. <i>Journal of Interpersonal Violence</i> , 2016, 31, 942-960.	2.0	6
64	Intergenerational transmission of delay discounting: The mediating role of household chaos. <i>Journal of Adolescence</i> , 2019, 72, 83-90.	2.4	6
65	Insular Risk Processing Predicts Alcohol Use Via Externalizing Pathway in Male Adolescents. <i>Journal of Studies on Alcohol and Drugs</i> , 2019, 80, 602-613.	1.0	6
66	Associations between peer attachment and neural correlates of risk processing across adolescence. <i>Developmental Cognitive Neuroscience</i> , 2020, 42, 100772.	4.0	6
67	Associations between developmental patterns of negative parenting and emotion regulation development across adolescence.. <i>Emotion</i> , 2022, 22, 270-282.	1.8	6
68	Religious Social Support Protects against Social Risks for Adolescent Substance Use. <i>Journal of Research on Adolescence</i> , 2020, 30, 361-371.	3.7	5
69	The temporal window of valuation is constricted among adolescent smokers. <i>Behavioural Processes</i> , 2016, 132, 29-33.	1.1	4
70	Brief report: Bifactor modeling of general vs. specific factors of religiousness differentially predicting substance use risk in adolescence. <i>Journal of Adolescence</i> , 2015, 43, 15-19.	2.4	2
71	Predictors of Sibling Victimization and Associations With Self-Perception and Relationship Attachment in Adolescence. <i>Journal of Early Adolescence</i> , 2020, 40, 305-327.	1.9	2
72	Adolescence and Early Adulthood. , 2014, , 87-112.		2

#	ARTICLE	IF	CITATIONS
73	Longitudinal Associations between Social Relationships and Alcohol Use from Adolescence into Young Adulthood: The Role of Religiousness. <i>Journal of Youth and Adolescence</i> , 0, , .	3.5	1
74	Neural cognitive control moderates the longitudinal link between hedonia and substance use across adolescence. <i>Developmental Cognitive Neuroscience</i> , 2022, 55, 101111.	4.0	0
