#	ARTICLE	IF	CITATIONS
1	A correlated storage location assignment problem in a single-block-multi-aisles warehouse considering BOM information. <i>International Journal of Production Research</i> , 2010, 48, 1321-1338.	4.9	57
2	Minimizing mean weighted tardiness in unrelated parallel machine scheduling with reinforcement learning. <i>Computers and Operations Research</i> , 2012, 39, 1315-1324.	2.4	52
3	Dynamic parallel machine scheduling with mean weighted tardiness objective by Q-Learning. <i>International Journal of Advanced Manufacturing Technology</i> , 2007, 34, 968-980.	1.5	50
4	A hybrid Lagrangian-simulated annealing-based heuristic for the parallel-machine capacitated lot-sizing and scheduling problem with sequence-dependent setup times. <i>Computers and Operations Research</i> , 2015, 63, 72-82.	2.4	48
5	Reducing energy consumption in serial production lines with Bernoulli reliability machines. <i>International Journal of Production Research</i> , 2017, 55, 7356-7379.	4.9	41
6	Optimization of the number and positions of fixture locators in the peripheral milling of a low-rigidity workpiece. <i>International Journal of Advanced Manufacturing Technology</i> , 2007, 33, 668-676.	1.5	36
7	MIP-based fix-and-optimize algorithms for the parallel machine capacitated lot-sizing and scheduling problem. <i>International Journal of Production Research</i> , 2013, 51, 5011-5028.	4.9	33
8	A two-stage robust optimization approach for the berth allocation problem under uncertainty. <i>Flexible Services and Manufacturing Journal</i> , 2020, 32, 425-452.	1.9	32
9	Hierarchical Capacity Planning With Reconfigurable Kits in Global Semiconductor Assembly and Test Manufacturing. <i>IEEE Transactions on Automation Science and Engineering</i> , 2007, 4, 543-552.	3.4	30
10	The robustness of scheduling policies in multi-product manufacturing systems with sequence-dependent setup times and finite buffers. <i>Computers and Industrial Engineering</i> , 2012, 63, 1145-1153.	3.4	29
11	Improving energy efficiency in Bernoulli serial lines: an integrated model. <i>International Journal of Production Research</i> , 2016, 54, 3414-3428.	4.9	29
12	Scheduling policies in multi-product manufacturing systems with sequence-dependent setup times and finite buffers. <i>International Journal of Production Research</i> , 2012, 50, 7479-7492.	4.9	27
13	Two decision models for berth allocation problem under uncertainty considering service level. <i>Flexible Services and Manufacturing Journal</i> , 2017, 29, 312-344.	1.9	27
14	Semiconductor final test scheduling with Sarsa(\hat{I} ,k) algorithm. <i>European Journal of Operational Research</i> , 2011, 215, 446-458.	3.5	26
15	Value-driven uncertainty-aware data processing for an RFID-enabled mixed-model assembly line. <i>International Journal of Production Economics</i> , 2015, 165, 273-281.	5.1	20
16	Improved multi-agent system for the vehicle routing problem with time windows. <i>Tsinghua Science and Technology</i> , 2009, 14, 407-412.	4.1	17
17	A Decision Model for Berth Allocation Under Uncertainty Considering Service Level Using an Adaptive Differential Evolution Algorithm. <i>Asia-Pacific Journal of Operational Research</i> , 2016, 33, 1650049.	0.9	17
18	A study on calibration of coefficients in end milling forces model. <i>International Journal of Advanced Manufacturing Technology</i> , 2005, 25, 652-662.	1.5	16

#	ARTICLE	IF	CITATIONS
19	Analysis of multi-product manufacturing systems with arbitrary processing times. International Journal of Production Research, 2015, 53, 983-1001.	4.9	14
20	Behaviour perception-based disruption models for the parallel machine capacitated lot-sizing and scheduling problem. International Journal of Production Research, 2017, 55, 3058-3072.	4.9	14
21	Improved methods for process routing in enterprise production processes in terms of sustainable development II. Tsinghua Science and Technology, 2006, 11, 693-700.	4.1	13
22	A bi-objective model for robust yard allocation scheduling for outbound containers. Engineering Optimization, 2017, 49, 113-135.	1.5	13
23	Transient Analysis of Geometric Serial Lines With Perishable Intermediate Products. IEEE Robotics and Automation Letters, 2017, 2, 149-156.	3.3	12
24	An integrated model for multi-resource constrained scheduling problem considering multi-product and resource-sharing. International Journal of Production Research, 2018, 56, 6491-6511.	4.9	12
25	Chinese consumer responses to carbon labeling: evidence from experimental auctions. Journal of Environmental Planning and Management, 2018, 61, 2319-2337.	2.4	11
26	Value of information sharing in a multiple producersâ€ distributor supply chain. Annals of Operations Research, 2020, 285, 121-148.	2.6	11
27	An improved multi-objective genetic algorithm for heterogeneous coverage RFID network planning. International Journal of Production Research, 2016, 54, 2227-2240.	4.9	10
28	Procurement models under purchase price uncertainty for Chinese oil refineries. International Journal of Production Research, 2013, 51, 2952-2968.	4.9	9
29	Cycle time reduction in assembly and test manufacturing factories: A KPI driven methodology. , 2008, , .		8
30	A DECISION SUPPORT SYSTEM FOR THE ALLOCATION OF YARD CRANES AND BLOCKS IN CONTAINER TERMINALS. Asia-Pacific Journal of Operational Research, 2011, 28, 803-829.	0.9	8
31	Business process design: Process comparison and integration. Information Systems Frontiers, 2012, 14, 363-374.	4.1	8
32	A Sub-Optimal Control Policy in a Two-Product Door Manufacturing Line With Geometric Reliability Machines. IEEE Robotics and Automation Letters, 2017, 2, 157-164.	3.3	8
33	A column-generation-based algorithm for a resource-constrained project scheduling problem with a fractional shared resource. Engineering Optimization, 2020, 52, 798-816.	1.5	8
34	A modified hybrid method of spatial credibilistic clustering and particle swarm optimization. Soft Computing, 2011, 15, 855-865.	2.1	7
35	Multi-product manufacturing systems with sequence-dependent setups: Performance evaluation and system properties. , 2011, , .		6
36	A dynamic model for serial supply chain with periodic delivery policy. International Journal of Production Research, 2010, 48, 821-834.	4.9	5

#	ARTICLE	IF	CITATIONS
37	Object recognition-based automated inspection system for hose assembly. Proceedings of the Institution of Mechanical Engineers, Part B: Journal of Engineering Manufacture, 2015, 229, 27-42.	1.5	5
38	An Improved L-Shaped Method for Solving Process Flexibility Design Problems. Mathematical Problems in Engineering, 2016, 2016, 1-15.	0.6	4
39	Fuzzy rule-based neural network for high-speed train manufacturing system scheduling problem. Neural Computing and Applications, 2023, 35, 2077-2088.	3.2	4
40	A Lagrangian relaxation-based algorithm for the allocation of yard cranes for yard activities with different priorities. Journal of Systems Science and Systems Engineering, 2013, 22, 227-252.	0.8	3
41	A factory-level dynamic operator allocation policy: the bubble allocation. International Journal of Production Research, 2016, 54, 4240-4255.	4.9	3
42	Semiconductor system with multiple closed-loops constrains. , 2007, , .		2
43	Adaptive interaction in a 3D product structure browsing system for maintenance training. Human Factors and Ergonomics in Manufacturing, 2008, 18, 14-29.	1.4	2
44	Achieving flexibility in business process modeling using an algebraic language. , 2009, , .		2
45	A MILP-based batch scheduling for two-stage hybrid flowshop with sequence-dependent setups in semiconductor assembly and test manufacturing. , 2010, , .		2
46	An overlapping decomposition method for performance analysis of the two-loop closed production system in semiconductor assembly factory. International Journal of Computer Integrated Manufacturing, 2011, 24, 811-820.	2.9	2
47	An Analytical Framework for Modeling, Analysis, and Improvement of Team Communication and Collaboration Process in Primary Care Clinics. IEEE Transactions on Automation Science and Engineering, 2019, 16, 1148-1162.	3.4	2
48	Faster or fewer iterations? A strategic perspective of a sequential product development project. IIEE Transactions, 2020, , 1-19.	1.6	2
49	The Assignment of Customers in Multi-depot Vehicle Routing Problem with Fleet Size Constraint for Each Depot. , 2007, , .		1
50	Automated Inspection of Flexible Assembly: System Design and Algorithm Research. , 2008, , .		1
51	Hybrid Method of Spatial Credibilistic Clustering and Particle Swarm Optimization: Discussion and Application. , 2009, , .		1
52	New evaluation scales of linguistic information based on normal distributions. , 2010, , .		1
53	A note to TOPSIS method in MADM problems under fuzzy environment. , 2010, , .		1
54	Reliability analysis of a novel structure in an automatic sorting system. , 2010, , .		1

#	ARTICLE	IF	CITATIONS
55	Simplification of decision making matrix in fuzzy multiple attribute decision making. , 2011, , .		1
56	The robustness of scheduling policies in multi-product manufacturing systems with sequence-dependent setup times and finite buffers. , 2012, , .		1
57	Modeling and Analysis of the Waiting Time of Rapid Response Process in Acute Care. IEEE Robotics and Automation Letters, 2018, 3, 336-343.	3.3	1
58	Production planning with joint resources usage in semiconductor test manufacturing. , 0, , .		0
59	A multi-stage modeling framework for web service composition. , 2007, , .		0
60	Study on plan of track lines in marshalling station. , 2007, , .		0
61	Analysis of two-loop closed production systems. , 2009, , .		0
62	The design of cooperative planning processes in railway bureaus based on roles, activities and time sequences. , 2010, , .		0
63	Attribute reduction in MADM problems based on triangular fuzzy numbers. , 2010, , .		0
64	Spatial-based decomposition approach for the crude scheduling problem of a refinery with multiple ports and long-distance pipelines. , 2010, , .		0
65	Performance evaluation of a multi-product system with setups and dynamic scheduling policies. , 2010, , .		0
66	Scheduling policies in multi-product manufacturing systems with sequence-dependent setup times. , 2011, , .		0
67	A new practical conformance testing method based on standard. , 2011, , .		0
68	An energy and productivity optimization model in Bernoulli serial lines. , 2016, , .		0
69	Visualised Decision Support in Industrial Project Monitoring and Control. , 2018, , .		0
