#	ARTICLE	IF	CITATIONS
1	It is time to define an organizational model for the prevention and management of infections along the surgical pathway: a worldwide cross-sectional survey. <i>World Journal of Emergency Surgery</i> , 2022, 17, 17.	2.1	11
2	Association of Complex Multimorbidity and Long-term Survival After Emergency General Surgery in Older Patients With Medicare. <i>JAMA Surgery</i> , 2022, 157, 499.	2.2	12
3	Go big and go home. <i>Journal of Trauma and Acute Care Surgery</i> , 2022, 93, 1-7.	1.1	0
4	Prehospital plasma is associated with survival principally in patients transferred from the scene of injury: A secondary analysis of the PAMPer trial. <i>Surgery</i> , 2022, 172, 1278-1284.	1.0	3
5	Burn Wound Colonization, Infection, and Sepsis. <i>Surgical Infections</i> , 2021, 22, 44-48.	0.7	50
6	Review of Sepsis in Burn Patients in 2020. <i>Surgical Infections</i> , 2021, 22, 37-43.	0.7	16
7	Prehospital Blood Product and Crystalloid Resuscitation in the Severely Injured Patient. <i>Annals of Surgery</i> , 2021, 273, 358-364.	2.1	119
8	Dose-dependent association between blood transfusion and nosocomial infections in trauma patients: A secondary analysis of patients from the PAMPer trial. <i>Journal of Trauma and Acute Care Surgery</i> , 2021, 91, 272-278.	1.1	8
9	Lactate as a mediator of prehospital plasma mortality reduction in hemorrhagic shock. <i>Journal of Trauma and Acute Care Surgery</i> , 2021, 91, 186-191.	1.1	10
10	Is more better? Do statewide increases in trauma centers reduce injury-related mortality?. <i>Journal of Trauma and Acute Care Surgery</i> , 2021, 91, 171-177.	1.1	10
11	Can educational videos reduce opioid consumption in trauma inpatients? A cluster-randomized pilot study. <i>Journal of Trauma and Acute Care Surgery</i> , 2021, 91, 212-218.	1.1	4
12	Opioids and Injury Deaths: A population-based analysis of the United States from 2006 to 2017. <i>Injury</i> , 2021, 52, 2194-2198.	0.7	4
13	Applying Implementation Science in Surgical Infection Quality Improvement. <i>Surgical Infections</i> , 2021, 22, 635-639.	0.7	1
14	Evaluating the Cost-effectiveness of Prehospital Plasma Transfusion in Unstable Trauma Patients. <i>JAMA Surgery</i> , 2021, 156, 1131.	2.2	5
15	“What Are My Injuries?” Health Literacy and Patient Comprehension of Trauma Care and Injuries. <i>Journal of Surgical Research</i> , 2021, 268, 105-111.	0.8	4
16	Risk Factors for Wound Infection in Outpatients With Lower Extremity Burns. <i>American Surgeon</i> , 2021, 87, 1118-1125.	0.4	2
17	Critical Care Documentation for the Dying Trauma Patient: Are We Recognizing Our Own Efforts?. <i>American Surgeon</i> , 2021, 87, 1488-1495.	0.4	1
18	Pre-Operative Antibiotic Agents for Facial Fractures: Is More than One Day Necessary?. <i>Surgical Infections</i> , 2021, 22, 516-522.	0.7	6

#	ARTICLE	IF	CITATIONS
19	Multi-omic analysis in injured humans: Patterns align with outcomes and treatment responses. <i>Cell Reports Medicine</i> , 2021, 2, 100478.	3.3	35
20	Goals of Care Discussions for the Imminently Dying Trauma Patient. <i>Journal of Surgical Research</i> , 2020, 246, 269-273.	0.8	19
21	Association of Prehospital Plasma Transfusion With Survival in Trauma Patients With Hemorrhagic Shock When Transport Times Are Longer Than 20 Minutes. <i>JAMA Surgery</i> , 2020, 155, e195085.	2.2	169
22	Prehospital plasma in injured patients is associated with survival principally in blunt injury: Results from two randomized prehospital plasma trials. <i>Journal of Trauma and Acute Care Surgery</i> , 2020, 88, 33-41.	1.1	40
23	Characterization of unexpected survivors following a prehospital plasma randomized trial. <i>Journal of Trauma and Acute Care Surgery</i> , 2020, 89, 908-914.	1.1	9
24	Association of Prehospital Plasma With Survival in Patients With Traumatic Brain Injury. <i>JAMA Network Open</i> , 2020, 3, e2016869.	2.8	50
25	Evaluation and management of blunt cerebrovascular injury: A practice management guideline from the Eastern Association for the Surgery of Trauma. <i>Journal of Trauma and Acute Care Surgery</i> , 2020, 88, 875-887.	1.1	77
26	Massive transfusion and the response to prehospital plasma: It is all in how you define it. <i>Journal of Trauma and Acute Care Surgery</i> , 2020, 89, 43-50.	1.1	8
27	Effects of Ohio's opioid prescribing limit for the geriatric minimally injured trauma patient. <i>American Journal of Surgery</i> , 2020, 219, 400-403.	0.9	6
28	Catheter-Associated Urinary Tract Infections among Trauma Patients: Poor Quality of Care or Marker of Effective Rescue?. <i>Surgical Infections</i> , 2020, 21, 752-759.	0.7	3
29	Grade of injury, not initial management, is associated with unplanned interventions in liver injury. <i>Injury</i> , 2020, 51, 1301-1305.	0.7	5
30	Surgical Infection Society Guidance for Operative and Peri-Operative Care of Adult Patients Infected by the Severe Acute Respiratory Syndrome Coronavirus-2 (SARS-CoV-2). <i>Surgical Infections</i> , 2020, 21, 301-308.	0.7	53
31	Factors Influencing Nonadherence to Recommended Postdischarge Follow-Up After Trauma. <i>Journal of Surgical Research</i> , 2020, 256, 143-148.	0.8	17
32	Downstream hospital system effects of a comprehensive trauma recovery services program. <i>Journal of Trauma and Acute Care Surgery</i> , 2020, 89, 1177-1182.	1.1	19
33	Prehospital plasma is associated with distinct biomarker expression following injury. <i>JCI Insight</i> , 2020, 5, .	2.3	52
34	Opioid prescribing in minimally injured trauma patients: Effect of a state prescribing limit. <i>Surgery</i> , 2019, 166, 593-600.	1.0	14
35	Current Evaluation of Antibiotic Usage in Complicated Intra-Abdominal Infection after the STOP IT Trial: Did We STOP IT?. <i>Surgical Infections</i> , 2019, 20, 184-191.	0.7	7
36	Implementation of a prehospital air medical thawed plasma program: Is it even feasible?. <i>Journal of Trauma and Acute Care Surgery</i> , 2019, 87, 1077-1081.	1.1	12

#	ARTICLE	IF	CITATIONS
37	Regionalization of Spine Trauma Care in an Urban Trauma System in the United States: Decreased Time to Surgery and Hospital Length of Stay. <i>Neurosurgery</i> , 2019, 85, 773-778.	0.6	8
38	Utility of Sequential Organ Failure Assessment score in predicting bacteremia in critically ill burn patients. <i>American Journal of Surgery</i> , 2018, 215, 478-481.	0.9	8
39	<i>Level I Trauma Centers: More Is Not Necessarily Better</i>. <i>American Surgeon</i> , 2018, 84, 557-564.	0.4	4
40	<i>Statewide Analysis Shows Collaborative Regional Trauma Network Reduces Regional Mortality</i>. <i>American Surgeon</i> , 2018, 84, 309-317.	0.4	2
41	Facing the facts on prophylactic antibiotics for facial fractures: 1 day or less. <i>Journal of Trauma and Acute Care Surgery</i> , 2018, 85, 444-450.	1.1	26
42	Bedside dysphagia screens in patients with traumatic cervical injuries: An ideal tool for an under-recognized problem. <i>Journal of Trauma and Acute Care Surgery</i> , 2018, 85, 697-703.	1.1	9
43	Efficiency of care and cost for common emergency general surgery conditions: Comparison by surgeon training and practice. <i>Surgery</i> , 2018, 164, 651-656.	1.0	5
44	<i>Trauma Surgeons Save Livesâ€”Scribes Save Trauma Surgeons!</i>. <i>American Surgeon</i> , 2018, 84, 144-148.	0.4	10
45	Prehospital Plasma during Air Medical Transport in Trauma Patients at Risk for Hemorrhagic Shock. <i>New England Journal of Medicine</i> , 2018, 379, 315-326.	13.9	573
46	Minimally Invasive Management of Abdominal Trauma. <i>Digestive Disease Interventions</i> , 2018, 02, 150-158.	0.3	0
47	Consequences of Implementing a â€œBetterâ€•Blood Culture System. <i>Surgical Infections</i> , 2018, 19, 582-586.	0.7	1
48	Level I Trauma Centers: More Is Not Necessarily Better. <i>American Surgeon</i> , 2018, 84, 557-564.	0.4	2
49	Trauma system regionalization improves mortality in patients requiring trauma laparotomy. <i>Journal of Trauma and Acute Care Surgery</i> , 2017, 82, 58-64.	1.1	26
50	Natural history of splenic vascular abnormalities after blunt injury: A Western Trauma Association multicenter trial. <i>Journal of Trauma and Acute Care Surgery</i> , 2017, 83, 999-1005.	1.1	36
51	Leaving the Skin Incision Open May Not Be as Beneficial as We Have Been Taught. <i>Surgical Infections</i> , 2017, 18, 431-439.	0.7	7
52	Does Isolation of <i>Enterococcus</i> Affect Outcomes in Intra-Abdominal Infections?. <i>Surgical Infections</i> , 2017, 18, 879-885.	0.7	14
53	Novel Method Suggests Global Superiority of Short-Duration Antibiotics for Intra-abdominal Infections. <i>Clinical Infectious Diseases</i> , 2017, 65, 1577-1579.	2.9	21
54	Prehospital Assessment of Trauma. <i>Surgical Clinics of North America</i> , 2017, 97, 961-983.	0.5	16

#	ARTICLE	IF	CITATIONS
55	Selective nonoperative management of abdominal gunshot wounds with isolated solid organ injury. American Journal of Surgery, 2017, 213, 583-585.	0.9	7
56	Despite Trauma Center Closures, Trauma System Regionalization Reduces Mortality and Time to Definitive Care in Severely Injured Patients. American Surgeon, 2017, 83, 591-597.	0.4	13
57	Current Pneumonia Surveillance Methodology: Similar Underestimation in Trauma and Surgical Patients in the Intensive Care Unit. Surgical Infections, 2017, 18, 558-562.	0.7	6
58	Despite Trauma Center Closures, Trauma System Regionalization Reduces Mortality and Time to Definitive Care in Severely Injured Patients. American Surgeon, 2017, 83, 591-597.	0.4	6
59	Patients with Risk Factors for Complications Do Not Require Longer Antimicrobial Therapy for Complicated Intra-Abdominal Infection. American Surgeon, 2016, 82, 860-866.	0.4	11
60	An Analysis of Past Surgical Infection Society Award Recipients. Surgical Infections, 2016, 17, 313-317.	0.7	0
61	Benefit of TeamSTEPPS Rounding Improvement Project on Infection-Related Monitoring. Surgical Infections, 2016, 17, 530-534.	0.7	2
62	The painful truth. Journal of Trauma and Acute Care Surgery, 2016, 80, 742-747.	1.1	21
63	Performance of a regional trauma network. Journal of Trauma and Acute Care Surgery, 2016, 81, 190-195.	1.1	13
64	Patients with Complicated Intra-Abdominal Infection Presenting with Sepsis Do Not Require Longer Duration of Antimicrobial Therapy. Journal of the American College of Surgeons, 2016, 222, 440-446.	0.2	50
65	Traumatic vascular injuries: who are repairing them and what are the outcomes?. American Journal of Surgery, 2016, 211, 619-625.	0.9	15
66	Functional and long-term outcomes in severe traumatic brain injury following regionalization of a trauma system. Journal of Trauma and Acute Care Surgery, 2015, 79, 372-377.	1.1	19
67	Trial of Short-Course Antimicrobial Therapy for Intraabdominal Infection. New England Journal of Medicine, 2015, 372, 1996-2005.	13.9	535
68	The splenic injury outcomes trial. Journal of Trauma and Acute Care Surgery, 2015, 79, 335-342.	1.1	89
69	Taking the Blood Bank to the Field: The Design and Rationale of the Prehospital Air Medical Plasma (PAMPer) Trial. Prehospital Emergency Care, 2015, 19, 343-350.	1.0	50
70	Adjacent Level Ligamentous Injury Associated with Traumatic Cervical Spine Fractures: Indications for Imaging and Implications for Treatment. World Neurosurgery, 2015, 84, 69-75.	0.7	15
71	Decreased mortality in traumatic brain injury following regionalization across hospital systems. Journal of Trauma and Acute Care Surgery, 2015, 78, 715-720.	1.1	31
72	Despite Trauma Center Closures, Trauma System Regionalization Reduces Time to Definitive Care and Mortality. Journal of the American College of Surgeons, 2015, 221, S161-S162.	0.2	2

#	ARTICLE	IF	CITATIONS
73	Where's the Difference? Presentation of Nosocomial Infection in Critically Ill Trauma versus General Surgery Patients. <i>Surgical Infections</i> , 2014, 15, 377-381.	0.7	4
74	Trauma recidivists: surprisingly better outcomes than initially injured trauma patients. <i>American Journal of Surgery</i> , 2014, 207, 427-431.	0.9	12
75	Trends in Maxillofacial Trauma: A Comparison of Two Cohorts of Patients at a Single Institution 20 Years Apart. <i>Journal of Oral and Maxillofacial Surgery</i> , 2014, 72, 750-754.	0.5	27
76	Upcoming Rules and Benchmarks Concerning the Monitoring of and the Payment for Surgical Infections. <i>Surgical Clinics of North America</i> , 2014, 94, 1219-1231.	0.5	10
77	Diagnosis of Infection after Splenectomy for Trauma Should Be Based on Lack of Platelets Rather Than White Blood Cell Count. <i>Surgical Infections</i> , 2014, 15, 221-226.	0.7	9
78	Bacterial Species-Specific Hospital Mortality Rate for Intra-Abdominal Infections. <i>Surgical Infections</i> , 2014, 15, 194-199.	0.7	14
79	Regional collaboration across hospital systems to develop and implement trauma protocols saves lives within 2 years. <i>Surgery</i> , 2013, 154, 875-884.	1.0	30
80	A novel prospective approach to evaluate trauma recidivism. <i>Journal of Trauma and Acute Care Surgery</i> , 2013, 75, 116-121.	1.1	65
81	Trauma center variation in splenic artery embolization and spleen salvage. <i>Journal of Trauma and Acute Care Surgery</i> , 2013, 75, 69-75.	1.1	88
82	Enhancing the Fever Workup Utilizing a Multi-Technique Modeling Approach to Diagnose Infections More Accurately. <i>Surgical Infections</i> , 2012, 13, 93-101.	0.7	6
83	Continued rationale of why hospital mortality is not an appropriate measure of trauma outcomes. <i>American Journal of Surgery</i> , 2012, 203, 366-369.	0.9	10
84	In-house direct supervision by an attending is associated with differences in the care of patients with a blunt splenic injury. <i>Surgery</i> , 2011, 150, 718-726.	1.0	25
85	The "fever workup" and respiratory culture practice in critically ill trauma patients. <i>Journal of Critical Care</i> , 2010, 25, 493-500.	1.0	13
86	Moving Beyond Traditional Measurement of Mortality after Injury: Evaluation of Risks for Late Death. <i>Journal of the American College of Surgeons</i> , 2010, 210, 788-794.	0.2	49
87	Trauma Team Activation can be Tailored by Prehospital Criteria. <i>American Surgeon</i> , 2010, 76, 1401-1407.	0.4	9
88	Critical Analysis of Empiric Antibiotic Utilization: Establishing Benchmarks. <i>Surgical Infections</i> , 2010, 11, 125-131.	0.7	13
89	Follow-up disparities after trauma: a real problem for outcomes research. <i>American Journal of Surgery</i> , 2010, 199, 348-353.	0.9	71
90	Trauma team activation can be tailored by prehospital criteria. <i>American Surgeon</i> , 2010, 76, 1401-7.	0.4	4
