#	ARTICLE	IF	CITATIONS
1	Chvátal-Erdős conditions for paths and cycles in graphs and digraphs. A survey. Discrete Mathematics, 1990, 84, 241-254.	0.7	33
2	Some remarks on Davenport constant. Discrete Mathematics, 2001, 237, 119-128.	0.7	21
3	On a Combinatorial Theorem of Erdős, Ginzburg and Ziv. Combinatorics Probability and Computing, 1998, 7, 403-412.	1.3	20
4	Representation of finite abelian group elements by subsequence sums. Journal De Theorie Des Nombres De Bordeaux, 2009, 21, 559-587.	0.1	15
5	On the Erdős-Ginzburg-Ziv theorem. Discrete Mathematics, 1996, 152, 321-324.	0.7	14
6	A weighted generalization of two theorems of Gao. Ramanujan Journal, 2012, 28, 323-340.	0.7	14
7	On the Olson and the Strong Davenport constants. Journal De Theorie Des Nombres De Bordeaux, 2011, 23, 715-750.	0.1	13
8	Biclosure and bistability in a balanced bipartite graph. Journal of Graph Theory, 1995, 20, 513-529.	0.9	12
9	Some exact values of the Harborth constant and its plus-minus weighted analogue. Archiv Der Mathematik, 2013, 101, 501-512.	0.5	8
10	Remarks on the plus-minus weighted Davenport constant. International Journal of Number Theory, 2014, 10, 1219-1239.	0.5	8
11	Existence conditions for barycentric sequences. Discrete Mathematics, 2004, 281, 163-172.	0.7	7
12	Multi-wise and constrained fully weighted Davenport constants and interactions with coding theory. Journal of Combinatorial Theory - Series A, 2015, 135, 237-267.	0.8	7
13	Barycentric sequences and barycentric Ramsey numbers stars. Discrete Mathematics, 2004, 277, 45-56.	0.7	4
14	Representation of group elements as subsequence sums. Discrete Mathematics, 2008, 308, 3315-3321.	0.7	3
15	Inverse results for weighted Harborth constants. International Journal of Number Theory, 2016, 12, 1845-1861.	0.5	3
16	Hamiltonian Properties of Bipartite Graphs and Digraphs with Bipartite Independence 2. SIAM Journal on Discrete Mathematics, 1993, 6, 189-196.	0.8	2
17	Monoids of sequences over finite abelian groups defined via zero-sums with respect to a given set of weights and applications to factorizations of norms of algebraic integers. Communications in Algebra, 2022, 50, 4195-4217.	0.6	2
18	A Chvátal-Erdős condition for (t, t) -factors in digraphs using given arcs. Discrete Mathematics, 1988, 71, 143-148.	0.7	1

#	ARTICLE	IF	CITATIONS
19	Hamiltonian properties and the bipartite independence number. <i>Discrete Mathematics</i> , 1996, 161, 207-215.	0.7	1
20	Some remarks on barycentric-sum problems over cyclic groups. <i>European Journal of Combinatorics</i> , 2013, 34, 1415-1428.	0.8	0
