#	ARTICLE	IF	CITATIONS
1	Can physical activity eliminate the mortality risk associated with poor sleep? A 15-year follow-up of 341,248 MJ Cohort participants. Journal of Sport and Health Science, 2022, 11, 596-604.	6.5	27
2	Joint associations of adiposity and alcohol consumption with liver disease-related morbidity and mortality risk: findings from the UK Biobank. European Journal of Clinical Nutrition, 2022, 76, 74-83.	2.9	14
3	Sleep and physical activity in relation to all-cause, cardiovascular disease and cancer mortality risk. British Journal of Sports Medicine, 2022, 56, 718-724.	6.7	96
4	Six-week behaviour change intervention to reduce sedentary behaviour in people with chronic obstructive pulmonary disease: a randomised controlled trial. Thorax, 2022, 77, 231-238.	5.6	9
5	Preventing the "24-hour Babel": the need for a consensus on a consistent terminology scheme for physical activity, sedentary behaviour and sleep. British Journal of Sports Medicine, 2022, 56, 367-368.	6.7	9
6	Implementing the 27 PRISMA 2020 Statement items for systematic reviews in the sport and exercise medicine, musculoskeletal rehabilitation and sports science fields: the PERSiST (implementing Prisma) Tj ETQqO 0 0 rgBT /Overlock 10 T	6.7	140
7	Effect of severe versus moderate energy restriction on physical activity among postmenopausal female adults with obesity: a pre-specified secondary analysis of the TEMPO Diet randomized controlled Trial. American Journal of Clinical Nutrition, 2022, , .	4.7	2
8	Prospective Associations of Accelerometer-Assessed Physical Activity With Mortality and Incidence of Cardiovascular Disease Among Adults With Hypertension: The UK Biobank Study. Journal of the American Heart Association, 2022, 11, e023290.	3.7	12
9	Association of Changes in Physical Activity and Adiposity With Mortality and Incidence of Cardiovascular Disease: Longitudinal Findings From the UK Biobank. Mayo Clinic Proceedings, 2022, 97, 847-861.	3.0	3
10	Alcohol intake and mortality risk of COVID-19, pneumonia, and other infectious diseases: An analysis of 437191 UK biobank participants. Preventive Medicine Reports, 2022, 26, 101751.	1.8	4
11	Dose-response association between step count and cardiovascular disease risk markers in middle-aged adults. Scandinavian Journal of Medicine and Science in Sports, 2022, 32, 1161-1165.	2.9	4
12	The Surveillance of Physical Activity, Sedentary Behavior, and Sleep: Protocol for the Development and Feasibility Evaluation of a Novel Measurement System. JMIR Research Protocols, 2022, 11, e35697.	1.0	3
13	Revisiting the "physical activity paradox" in a Chinese context: Occupational physical activity and mortality in 142,302 urban working adults from the China Kadoorie Biobank study. The Lancet Regional Health - Western Pacific, 2022, 23, 100457.	2.9	9
14	Physical activity, diet quality and all-cause cardiovascular disease and cancer mortality: a prospective study of 346 627 UK Biobank participants. British Journal of Sports Medicine, 2022, 56, 1148-1156.	6.7	23
15	The bidirectional association between sleep and physical activity: A 6.9-Âyears longitudinal analysis of 38,601 UK Biobank participants. Preventive Medicine, 2021, 143, 106315.	3.4	21
16	Privileging the privileged: the public health focus on leisure time physical activity has contributed to widening socioeconomic inequalities in health. British Journal of Sports Medicine, 2021, 55, 525-526.	6.7	16
17	Workplace physical activity promotion: why so many failures and few successes? The need for new thinking. British Journal of Sports Medicine, 2021, 55, 650-651.	6.7	19
18	Childhood Obesity and Device-Measured Sedentary Behavior: An Instrumental Variable Analysis of 3,864 Mother-Offspring Pairs. Obesity, 2021, 29, 220-225.	3.0	4

#	ARTICLE	IF	CITATIONS
19	Untapping the Health Enhancing Potential of Vigorous Intermittent Lifestyle Physical Activity (VILPA): Rationale, Scoping Review, and a 4-Pillar Research Framework. <i>Sports Medicine</i> , 2021, 51, 1-10.	6.5	30
20	Cross-sectional associations of device-measured sedentary behaviour and physical activity with cardio-metabolic health in the 1970 British Cohort Study. <i>Diabetic Medicine</i> , 2021, 38, e14392.	2.3	11
21	Development and feasibility of a mobile phone application designed to support physically inactive employees to increase walking. <i>BMC Medical Informatics and Decision Making</i> , 2021, 21, 23.	3.0	11
22	Screen media use by Portuguese children in 2009 and 2016: a repeated cross-sectional study. <i>Annals of Human Biology</i> , 2021, 48, 1-7.	1.0	7
23	Validity of a Non-Proprietary Algorithm for Identifying Lying Down Using Raw Data from Thigh-Worn Triaxial Accelerometers. <i>Sensors</i> , 2021, 21, 904.	3.8	17
24	Is Cohort Representativeness PassÃ©? Poststratified Associations of Lifestyle Risk Factors with Mortality in the UK Biobank. <i>Epidemiology</i> , 2021, 32, 179-188.	2.7	74
25	The athlete's sleep paradox prompts us to reconsider the dose-response relationship of physical activity and sleep. <i>British Journal of Sports Medicine</i> , 2021, 55, 887-888.	6.7	7
26	Comparison of a Thigh-Worn Accelerometer Algorithm With Diary Estimates of Time in Bed and Time Asleep: The 1970 British Cohort Study. <i>Journal for the Measurement of Physical Behaviour</i> , 2021, 4, 60-67.	0.8	4
27	Sliding down the risk factor rankings: reasons for and consequences of the dramatic downgrading of physical activity in the Global Burden of Disease 2019. <i>British Journal of Sports Medicine</i> , 2021, 55, 1222-1223.	6.7	7
28	Device-measured physical activity and sedentary behaviour in relation to mental wellbeing: An analysis of the 1970 British cohort study. <i>Preventive Medicine</i> , 2021, 145, 106434.	3.4	7
29	Developmental trajectories of sleep during childhood and adolescence are related to health in young adulthood. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2021, 110, 2435-2444.	1.5	16
30	Dietary risk versus physical inactivity: a forced comparison with policy implications?. <i>Lancet, The</i> , 2021, 397, 1709-1710.	13.7	0
31	Self-reported physical activity before a COVID-19 "lockdown": is it just a matter of opinion?. <i>BMJ Open Sport and Exercise Medicine</i> , 2021, 7, e001088.	2.9	19
32	Association of sedentary patterns with body fat distribution among US children and adolescents: a population-based study. <i>International Journal of Obesity</i> , 2021, 45, 2048-2057.	3.4	12
33	Effect of physical activity and exercise on telomere length: Systematic review with meta-analysis. <i>Journal of the American Geriatrics Society</i> , 2021, 69, 3285-3300.	2.6	22
34	Striking the Right Balance: Evidence to Inform Combined Physical Activity and Sedentary Behavior Recommendations. <i>Journal of Physical Activity and Health</i> , 2021, 18, 631-637.	2.0	24
35	Association of alcohol consumption with morbidity and mortality in patients with cardiovascular disease: original data and meta-analysis of 48,423 men and women. <i>BMC Medicine</i> , 2021, 19, 167.	5.5	33
36	Lifestyle risk factors and infectious disease mortality, including COVID-19, among middle aged and older adults: Evidence from a community-based cohort study in the United Kingdom. <i>Brain, Behavior, and Immunity</i> , 2021, 96, 18-27.	4.1	23

#	ARTICLE	IF	CITATIONS
37	Wearables-based walking program in addition to usual physiotherapy care for the management of patients with low back pain at medium or high risk of chronicity: A pilot randomized controlled trial. PLoS ONE, 2021, 16, e0256459.	2.5	4
38	Estimating changes in physical behavior during lockdowns using accelerometry-based simulations in a large UK cohort. Scandinavian Journal of Medicine and Science in Sports, 2021, 31, 2221-2229.	2.9	3
39	Light-intensity physical activity and mental ill health: a systematic review of observational studies in the general population. International Journal of Behavioral Nutrition and Physical Activity, 2021, 18, 123.	4.6	16
40	Behavioural mediators of reduced energy intake in a physical activity, diet, and sleep behaviour weight loss intervention in adults. Appetite, 2021, 165, 105273.	3.7	5
41	Alcohol drinking in one's thirties and forties is associated with body mass index in men, but not in women: A longitudinal analysis of the 1970 British Cohort Study. Preventive Medicine, 2021, 153, 106811.	3.4	2
42	Associations of changes in physical activity and discretionary screen time with incident obesity and adiposity changes: longitudinal findings from the UK Biobank. International Journal of Obesity, 2021, , .	3.4	3
43	Run, lift, or both? Associations between concurrent aerobic and muscle strengthening exercise with adverse cardiometabolic biomarkers among Korean adults. European Journal of Preventive Cardiology, 2020, 27, 738-748.	1.8	19
44	Emerging collaborative research platforms for the next generation of physical activity, sleep and exercise medicine guidelines: the Prospective Physical Activity, Sitting, and Sleep consortium (ProPASS). British Journal of Sports Medicine, 2020, 54, 435-437.	6.7	51
45	Effects of Interrupting Prolonged Sitting with Physical Activity Breaks on Blood Glucose, Insulin and Triacylglycerol Measures: A Systematic Review and Meta-analysis. Sports Medicine, 2020, 50, 295-330.	6.5	148
46	Physically active lessons in schools and their impact on physical activity, educational, health and cognition outcomes: a systematic review and meta-analysis. British Journal of Sports Medicine, 2020, 54, 826-838.	6.7	129
47	Daily steps and diet, but not sleep, are related to mortality in older Australians. Journal of Science and Medicine in Sport, 2020, 23, 276-282.	1.3	22
48	Is running associated with a lower risk of all-cause, cardiovascular and cancer mortality, and is the more the better? A systematic review and meta-analysis. British Journal of Sports Medicine, 2020, 54, 898-905.	6.7	121
49	Muscle Strengthening, Aerobic Exercise, and Obesity: A Pooled Analysis of 1.7 Million US Adults. Obesity, 2020, 28, 371-378.	3.0	33
50	Does a physically active lifestyle attenuate the association between alcohol consumption and mortality risk? Findings from the UK biobank. Preventive Medicine, 2020, 130, 105901.	3.4	10
51	Infographic. Is running associated with a lower risk of all-cause, cardiovascular and cancer mortality, and is more better? A systematic review and meta-analysis. British Journal of Sports Medicine, 2020, 54, 817-818.	6.7	6
52	Does Dog Ownership Really Prolong Survival?. Circulation: Cardiovascular Quality and Outcomes, 2020, 13, e006907.	2.2	5
53	The bold sedentary behavior recommendations in the new Canadian guidelines: are they evidence-based? Response to "Sedentary Behavior Research Network members support new Canadian 24-Hour Movement Guideline recommendations". Journal of Sport and Health Science, 2020, 9, 482-484.	6.5	8
54	How can global physical activity surveillance adapt to evolving physical activity guidelines? Needs, challenges and future directions. British Journal of Sports Medicine, 2020, 54, 1468-1473.	6.7	68

#	ARTICLE	IF	CITATIONS
55	World Health Organization 2020 guidelines on physical activity and sedentary behaviour. British Journal of Sports Medicine, 2020, 54, 1451-1462.	6.7	4,050
56	New global guidelines on sedentary behaviour and health for adults: broadening the behavioural targets. International Journal of Behavioral Nutrition and Physical Activity, 2020, 17, 151.	4.6	121
57	Putting physical activity in the “must-do” list of the global agenda. British Journal of Sports Medicine, 2020, 54, 1445-1446.	6.7	15
58	Advancing the global physical activity agenda: recommendations for future research by the 2020 WHO physical activity and sedentary behavior guidelines development group. International Journal of Behavioral Nutrition and Physical Activity, 2020, 17, 143.	4.6	166
59	Associations of sitting and physical activity with grip strength and balance in mid-life: 1970 British Cohort Study. Scandinavian Journal of Medicine and Science in Sports, 2020, 30, 2371-2381.	2.9	11
60	Is There a Link between Different Types of Alcoholic Drinks and Obesity? An Analysis of 280,183 UK Biobank Participants. International Journal of Environmental Research and Public Health, 2020, 17, 5178.	2.6	15
61	Joint associations of device-measured physical activity and sleep duration with cardiometabolic health in the 1970 British Cohort Study. Journal of Science and Medicine in Sport, 2020, 23, 1191-1196.	1.3	9
62	Methods matter and the “too much, too soon” theory (part 2): what is the goal of your sports injury research? Are you describing, predicting or drawing a causal inference?. British Journal of Sports Medicine, 2020, 54, 1307-1309.	6.7	9
63	Do different sit-stand workstations influence lumbar kinematics, lumbar muscle activity and musculoskeletal pain in office workers? A secondary analysis of a randomized controlled trial. International Journal of Occupational Safety and Ergonomics, 2020, , 1-8.	1.9	4
64	How do travelers manage jetlag and travel fatigue? A survey of passengers on long-haul flights. Chronobiology International, 2020, 37, 1621-1628.	2.0	10
65	Efficacy of a Multi-component m-Health Weight-loss Intervention in Overweight and Obese Adults: A Randomised Controlled Trial. International Journal of Environmental Research and Public Health, 2020, 17, 6200.	2.6	39
66	Statement on Methods in Sport Injury Research From the First METHODS MATTER Meeting, Copenhagen, 2019. Journal of Orthopaedic and Sports Physical Therapy, 2020, 50, 226-233.	3.5	17
67	The descriptive epidemiology of standing activity during free-living in 5412 middle-aged adults: the 1970 British Cohort Study. Journal of Epidemiology and Community Health, 2020, 74, jech-2020-213783.	3.7	6
68	Long overdue remarriage for better physical activity advice for all: bringing together the public health and occupational health agendas. British Journal of Sports Medicine, 2020, 54, 1377-1378.	6.7	17
69	Are people in the bush really physically active? A systematic review and meta-analysis of physical activity and sedentary behaviour in rural Australians populations. Journal of Global Health, 2020, 10, 010410.	2.7	8
70	Does adequate physical activity attenuate the associations of alcohol and alcohol-related cancer mortality? A pooled study of 54%686 British adults. International Journal of Cancer, 2020, 147, 2754-2763.	5.1	5
71	Statement on methods in sport injury research from the 1st METHODS MATTER Meeting, Copenhagen, 2019. British Journal of Sports Medicine, 2020, 54, 941-941.	6.7	16
72	Feasibility of Measuring Sedentary Time Using Data From a Thigh-Worn Accelerometer. American Journal of Epidemiology, 2020, 189, 963-971.	3.4	36

#	ARTICLE	IF	CITATIONS
73	Patterns and Correlates of Sedentary Behaviour Accumulation and Physical Activity in People with Chronic Obstructive Pulmonary Disease: A Cross-Sectional Study. <i>COPD: Journal of Chronic Obstructive Pulmonary Disease</i> , 2020, 17, 156-164.	1.6	14
74	Estimated cardiorespiratory fitness in childhood and cardiometabolic health in adulthood: 1970 British Cohort Study. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2020, 30, 932-938.	2.9	17
75	Association between TV viewing and heart disease mortality: observational study using negative control outcome. <i>Journal of Epidemiology and Community Health</i> , 2020, 74, 391-394.	3.7	10
76	Effects of Human–Dog Interactions on Salivary Oxytocin Concentrations and Heart Rate Variability: A Four-Condition Cross-Over Trial. <i>Anthrozoos</i> , 2020, 33, 37-52.	1.4	18
77	Internal consistency and convergent and divergent validity of the Liverpool jetlag questionnaire. <i>Chronobiology International</i> , 2020, 37, 218-226.	2.0	9
78	Cardiorespiratory Fitness Is Associated With Early Death Among Healthy Young and Middle-Aged Baby Boomers and Generation Xers. <i>American Journal of Medicine</i> , 2020, 133, 961-968.e3.	1.5	14
79	Informed consent procedures in patients with an acute inability to provide informed consent: Policy and practice in the CENTER-TBI study. <i>Journal of Critical Care</i> , 2020, 59, 6-15.	2.2	8
80	Physical Activity and Health-Related Quality of Life in People With Back Pain: A Population-Based Pooled Study of 27,273 Adults. <i>Journal of Physical Activity and Health</i> , 2020, 17, 177-188.	2.0	5
81	Trends in Walking, Moderate, and Vigorous Physical Activity Participation Across the Socioeconomic Gradient in New South Wales, Australia From 2002 to 2015. <i>Journal of Physical Activity and Health</i> , 2020, 17, 1125-1133.	2.0	6
82	Thigh-worn accelerometry for measuring movement and posture across the 24-hour cycle: a scoping review and expert statement. <i>BMJ Open Sport and Exercise Medicine</i> , 2020, 6, e000874.	2.9	39
83	Does dog acquisition improve physical activity, sedentary behaviour and biological markers of cardiometabolic health? Results from a three-arm controlled study. <i>BMJ Open Sport and Exercise Medicine</i> , 2020, 6, e000703.	2.9	8
84	Is the time right for quantitative public health guidelines on sitting? A narrative review of sedentary behaviour research paradigms and findings. <i>British Journal of Sports Medicine</i> , 2019, 53, 377-382.	6.7	199
85	Do all daily metabolic equivalent task units (METs) bring the same health benefits?. <i>British Journal of Sports Medicine</i> , 2019, 53, 991-992.	6.7	10
86	Sitting behaviour and physical activity: two sides of the same cardiovascular health coin?. <i>British Journal of Sports Medicine</i> , 2019, 53, 852-853.	6.7	11
87	Associations of self-reported stair climbing with all-cause and cardiovascular mortality: The Harvard Alumni Health Study. <i>Preventive Medicine Reports</i> , 2019, 15, 100938.	1.8	15
88	The 2018 Physical Activity Guidelines for Americans: What's New? Implications for Clinicians and the Public. <i>Journal of Orthopaedic and Sports Physical Therapy</i> , 2019, 49, 487-490.	3.5	18
89	Companion dog acquisition and mental well-being: a community-based three-arm controlled study. <i>BMC Public Health</i> , 2019, 19, 1428.	2.9	56
90	Is Dog Ownership Associated with Mental Health? A Population Study of 68,362 Adults Living in England. <i>Anthrozoos</i> , 2019, 32, 729-739.	1.4	17

#	ARTICLE	IF	CITATIONS
91	Comparison of physical behavior estimates from three different thigh-worn accelerometers brands: a proof-of-concept for the Prospective Physical Activity, Sitting, and Sleep consortium (ProPASS). International Journal of Behavioral Nutrition and Physical Activity, 2019, 16, 65.	4.6	53
92	Case-mix, care pathways, and outcomes in patients with traumatic brain injury in CENTER-TBI: a European prospective, multicentre, longitudinal, cohort study. Lancet Neurology, The, 2019, 18, 923-934.	10.2	304
93	How the 2018 US Physical Activity Guidelines are a Call to Promote and Better Understand Acute Physical Activity for Cognitive Function Gains. Sports Medicine, 2019, 49, 1625-1627.	6.5	16
94	Associations between objectively assessed and questionnaire-based sedentary behaviour with body mass index and systolic blood pressure in Kuwaiti adolescents. BMC Research Notes, 2019, 12, 588.	1.4	5
95	The association between physical activity and low back pain: a systematic review and meta-analysis of observational studies. Scientific Reports, 2019, 9, 8244.	3.3	101
96	Exercise trials for blood pressure control: keeping it REAL. British Journal of Sports Medicine, 2019, 53, 1443-1444.	6.7	0
97	Injury Fear, Stigma, and Reporting in Professional Dancers. Safety and Health at Work, 2019, 10, 260-264.	0.6	25
98	Sitting Time, Physical Activity, and Risk of Mortality in Adults. Journal of the American College of Cardiology, 2019, 73, 2062-2072.	2.8	349
99	Lifestyle risk factors, obesity and infectious disease mortality in the general population: Linkage study of 97,844 adults from England and Scotland. Preventive Medicine, 2019, 123, 65-70.	3.4	53
100	Infographic. Self-rated walking pace and all-cause, cardiovascular disease and cancer mortality: individual participant pooled analysis of 50 225 walkers from 11 population British cohorts. British Journal of Sports Medicine, 2019, 53, 1381-1382.	6.7	6
101	Testing Differential Associations Between Smoking and Chronic Disease Across Socioeconomic Groups. Epidemiology, 2019, 30, 48-51.	2.7	6
102	Canine Endogenous Oxytocin Responses to Dog-Walking and Affiliative Human-Dog Interactions. Animals, 2019, 9, 51.	2.3	15
103	Short and sporadic bouts in the 2018 US physical activity guidelines: is high-intensity incidental physical activity the new HIIT?. British Journal of Sports Medicine, 2019, 53, 1137-1139.	6.7	38
104	Any public health guidelines should always be developed from a consistent, clear evidence base. British Journal of Sports Medicine, 2019, 53, 1555-1556.	6.7	6
105	Ready. Set. Move! Sports Medicine Australia advocates movement as medicine for all!. British Journal of Sports Medicine, 2019, 53, 985-985.	6.7	0
106	The new <i>BMJ</i> <i>Open</i> Sport & Exercise Medicine</i> in the everchanging publishing landscape. BMJ Open Sport and Exercise Medicine, 2019, 5, e000603.	2.9	1
107	Associations of vigorous physical activity with all-cause, cardiovascular and cancer mortality among 64 913 adults. BMJ Open Sport and Exercise Medicine, 2019, 5, e000596.	2.9	31
108	Psychological distress and infectious disease mortality in the general population. Brain, Behavior, and Immunity, 2019, 76, 280-283.	4.1	28

#	ARTICLE	IF	CITATIONS
109	The effectiveness of incidental physical activity interventions compared to other interventions in the management of people with low back pain: A systematic review and meta-analysis of randomised controlled trials. <i>Physical Therapy in Sport</i> , 2019, 36, 34-42.	1.9	15
110	Examining associations between physical activity and cardiovascular mortality using negative control outcomes. <i>International Journal of Epidemiology</i> , 2019, 48, 1161-1166.	1.9	13
111	Association between physical activity and sub-types of cardiovascular disease death causes in a general population cohort. <i>European Journal of Epidemiology</i> , 2019, 34, 483-487.	5.7	30
112	Letâ€™s share, help deliver and sustain the WHO global action plan on physical activity. <i>British Journal of Sports Medicine</i> , 2019, 53, 794-796.	6.7	9
113	Physical activity and chronic back conditions: A population-based pooled study of 60,134 adults. <i>Journal of Sport and Health Science</i> , 2019, 8, 386-393.	6.5	31
114	The physiological function of oxytocin in humans and its acute response to human-dog interactions: A review of the literature. <i>Journal of Veterinary Behavior: Clinical Applications and Research</i> , 2019, 30, 25-32.	1.2	32
115	Associations of health-behavior patterns, mental health and self-rated health. <i>Preventive Medicine</i> , 2019, 118, 295-303.	3.4	66
116	Infographic: The “weekend warrior” physical activity pattern and mortality. <i>British Journal of Sports Medicine</i> , 2019, 53, 469-470.	6.7	0
117	How does light-intensity physical activity associate with adult cardiometabolic health and mortality? Systematic review with meta-analysis of experimental and observational studies. <i>British Journal of Sports Medicine</i> , 2019, 53, 370-376.	6.7	254
118	Geographical Patterning of Physical Activity Prevalence in Iran: Spatial Analysis of 4 Pooled National Health Surveys Among 119,560 Adults. <i>Journal of Physical Activity and Health</i> , 2019, 16, 1071-1077.	2.0	4
119	Accelerometer-based facilitated walking program in addition to usual care for the management of patients with low back pain at medium or high risk of chronicity: a randomised controlled trial protocol. <i>International Journal of Clinical Trials</i> , 2019, 6, 23.	0.2	1
120	Prevalence of overweight and obesity and associations with socioeconomic indicators: the study of health and activity among adolescents in Kuwait. <i>Minerva Pediatrica</i> , 2019, 71, 326-332.	2.7	11
121	Intensity-Weighted Physical Activity Volume and Risk of All-Cause and Cardiovascular Mortality: Does the Use of Absolute or Corrected Intensity Matter?. <i>Journal of Physical Activity and Health</i> , 2019, 16, 1054-1059.	2.0	2
122	Physical Activity and Sedentary Behaviors Levels of Kuwaiti Adolescents: The Study of Health and Activity Among Adolescents in Kuwait. <i>Journal of Physical Activity and Health</i> , 2018, 15, 255-262.	2.0	11
123	The Importance of Vigorous-Intensity Leisure-Time Physical Activity in Reducing Cardiovascular Disease Mortality Risk in the Obese. <i>Mayo Clinic Proceedings</i> , 2018, 93, 1096-1103.	3.0	15
