

Louis Du Pasquier

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/11134318/louis-du-pasquier-publications-by-year.pdf>
Version: 2024-04-10

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

137 papers	6,360 citations	48 h-index	75 g-index
139 ext. papers	6,999 ext. citations	6.8 avg, IF	5.57 L-index

#	Paper	IF	Citations
137	Major Histocompatibility Complex (MHC) in Fish 2022 , 355-386		0
136	The repertoire of vertebrate STAT transcription factors: Origin and variations in fish. <i>Developmental and Comparative Immunology</i> , 2021 , 116, 103929	3.2	3
135	Lymphoid Tissue in Teleost Gills: Variations on a Theme. <i>Biology</i> , 2020 , 9,	4.9	16
134	Genome-Wide Association Analysis Identifies a Genetic Basis of Infectivity in a Model Bacterial Pathogen. <i>Molecular Biology and Evolution</i> , 2020 , 37, 3439-3452	8.3	7
133	The Triumph of Individualism: Evolution of Somatically Generated Adaptive Immune Systems 2019 , 71-117		1
132	Evolutionary Concepts in Immunology 2019 ,		4
131	The Other Side of the Arms Race 2019 , 119-130		
130	Molecular characterisation of immunological memory following homologous or heterologous challenges in the schistosomiasis vector snail, <i>Biomphalaria glabrata</i> . <i>Developmental and Comparative Immunology</i> , 2019 , 92, 238-252	3.2	12
129	Immunological memory: What's in a name?. <i>Immunological Reviews</i> , 2018 , 283, 7-20	11.3	49
128	Describing the diversity of Ag specific receptors in vertebrates: Contribution of repertoire deep sequencing. <i>Developmental and Comparative Immunology</i> , 2017 , 75, 28-37	3.2	14
127	in Pancrustacean Immunity: Current Status and a Look to the Future. <i>Frontiers in Immunology</i> , 2017 , 8, 662	8.4	21
126	The genetic basis of resistance and matching-allele interactions of a host-parasite system: The <i>Daphnia magna</i> - <i>Pasteuria ramosa</i> model. <i>PLoS Genetics</i> , 2017 , 13, e1006596	6	34
125	Infections by <i>Pasteuria</i> do not protect its natural host <i>Daphnia magna</i> from subsequent infections. <i>Developmental and Comparative Immunology</i> , 2016 , 57, 120-5	3.2	6
124	A Population Biology Perspective on the Stepwise Infection Process of the Bacterial Pathogen <i>Pasteuria ramosa</i> in <i>Daphnia</i> . <i>Advances in Parasitology</i> , 2016 , 91, 265-310	3.2	51
123	A family of variable immunoglobulin and lectin domain containing molecules in the snail <i>Biomphalaria glabrata</i> . <i>Developmental and Comparative Immunology</i> , 2015 , 48, 234-43	3.2	58
122	Somatic and Germline Diversification of a Putative Immunoreceptor within One Phylum: Dscam in Arthropods. <i>Results and Problems in Cell Differentiation</i> , 2015 , 57, 131-58	1.4	14
121	The Development of the Immune System in <i>Xenopus</i> 2014 , 264-292		1

120	The proto-MHC of placozoans, a region specialized in cellular stress and ubiquitination/proteasome pathways. <i>Journal of Immunology</i> , 2014 , 193, 2891-901	5.3	18
119	No more non-model species: the promise of next generation sequencing for comparative immunology. <i>Developmental and Comparative Immunology</i> , 2014 , 45, 56-66	3.2	46
118	The first myriapod genome sequence reveals conservative arthropod gene content and genome organisation in the centipede <i>Strigamia maritima</i> . <i>PLoS Biology</i> , 2014 , 12, e1002005	9.7	182
117	More than one way to produce protein diversity: duplication and limited alternative splicing of an adhesion molecule gene in basal arthropods. <i>Evolution; International Journal of Organic Evolution</i> , 2013 , 67, 2999-3011	3.8	23
116	Shark IgW C region diversification through RNA processing and isotype switching. <i>Journal of Immunology</i> , 2013 , 191, 3410-8	5.3	20
115	Origin of immunoglobulin isotype switching. <i>Current Biology</i> , 2012 , 22, 872-80	6.3	46
114	Characterisation of a large family of polymorphic collagen-like proteins in the endospore-forming bacterium <i>Pasteuria ramosa</i> . <i>Research in Microbiology</i> , 2011 , 162, 701-14	4	15
113	Origin and evolution of TRIM proteins: new insights from the complete TRIM repertoire of zebrafish and pufferfish. <i>PLoS ONE</i> , 2011 , 6, e22022	3.7	73
112	Population genetics of duplicated alternatively spliced exons of the Dscam gene in <i>Daphnia</i> and <i>Drosophila</i> . <i>PLoS ONE</i> , 2011 , 6, e27947	3.7	18
111	Cloning of the unculturable parasite <i>Pasteuria ramosa</i> and its <i>Daphnia</i> host reveals extreme genotype-genotype interactions. <i>Ecology Letters</i> , 2011 , 14, 125-31	10	99
110	A large repertoire of parasite epitopes matched by a large repertoire of host immune receptors in an invertebrate host/parasite model. <i>PLoS Neglected Tropical Diseases</i> , 2010 , 4, e813	4.8	93
109	Plasticity of animal genome architecture unmasked by rapid evolution of a pelagic tunicate. <i>Science</i> , 2010 , 330, 1381-5	33.3	212
108	B-cells need a proper house, whereas T-cells are happy in a cave: the dependence of lymphocytes on secondary lymphoid tissues during evolution. <i>Trends in Immunology</i> , 2010 , 31, 144-53	14.4	48
107	Complexity of expressed CHIR genes. <i>Developmental and Comparative Immunology</i> , 2010 , 34, 866-73	3.2	24
106	CD96 interaction with CD155 via its first Ig-like domain is modulated by alternative splicing or mutations in distal Ig-like domains. <i>Journal of Biological Chemistry</i> , 2009 , 284, 2235-44	5.4	51
105	Origin and evolution of the vertebrate leukocyte receptors: the lesson from tunicates. <i>Immunogenetics</i> , 2009 , 61, 463-81	3.2	26
104	Fish TTRIMs. <i>Journal of Biology</i> , 2009 , 8, 50		12
103	Identification of a polymorphic collagen-like protein in the crustacean bacteria <i>Pasteuria ramosa</i> . <i>Research in Microbiology</i> , 2009 , 160, 792-9	4	22

102	The B7 family of immunoregulatory receptors: a comparative and evolutionary perspective. <i>Molecular Immunology</i> , 2009 , 46, 457-72	4.3	81
101	The fate of duplicated immunity genes in the dodecaploid <i>Xenopus ruwenzoriensis</i> . <i>Frontiers in Bioscience - Landmark</i> , 2009 , 14, 177-91	2.8	14
100	ciCD94-1, an ascidian multipurpose C-type lectin-like receptor expressed in <i>Ciona intestinalis</i> hemocytes and larval neural structures. <i>Differentiation</i> , 2008 , 76, 267-82	3.5	21
99	Transgenesis procedures in <i>Xenopus</i> . <i>Biology of the Cell</i> , 2008 , 100, 503-21	3.5	44
98	New perspectives for large-scale repertoire analysis of immune receptors. <i>Molecular Immunology</i> , 2008 , 45, 2437-45	4.3	22
97	The Dscam homologue of the crustacean <i>Daphnia</i> is diversified by alternative splicing like in insects. <i>Molecular Biology and Evolution</i> , 2008 , 25, 1429-39	8.3	120
96	Immunoreceptor tyrosine-based inhibition motifs: a quest in the past and future. <i>Immunological Reviews</i> , 2008 , 224, 11-43	11.3	257
95	Channel catfish leukocyte immune-type receptors contain a putative MHC class I binding site. <i>Immunogenetics</i> , 2007 , 59, 77-91	3.2	37
94	The chicken leukocyte receptor complex encodes a primordial, activating, high-affinity IgY Fc receptor. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2007 , 104, 11718-23	11.5	81
93	Costimulatory receptors in jawed vertebrates: conserved CD28, odd CTLA4 and multiple BTLAs. <i>Developmental and Comparative Immunology</i> , 2007 , 31, 255-71	3.2	64
92	Specific Immune Response. <i>NeuroImmune Biology</i> , 2007 , 101-126		
91	A novel family of diversified immunoregulatory receptors in teleosts is homologous to both mammalian Fc receptors and molecules encoded within the leukocyte receptor complex. <i>Immunogenetics</i> , 2006 , 58, 758-73	3.2	51
90	Germline and somatic diversification of immune recognition elements in Metazoa. <i>Immunology Letters</i> , 2006 , 104, 2-17	4.1	33
89	The chicken leukocyte receptor complex: a highly diverse multigene family encoding at least six structurally distinct receptor types. <i>Journal of Immunology</i> , 2005 , 175, 385-93	5.3	82
88	Immunology. Insects diversify one molecule to serve two systems. <i>Science</i> , 2005 , 309, 1826-7	33.3	34
87	Immunoglobulin superfamily receptors in protochordates: before RAG time. <i>Immunological Reviews</i> , 2004 , 198, 233-48	11.3	86
86	An evolutionarily conserved target motif for immunoglobulin class-switch recombination. <i>Nature Immunology</i> , 2004 , 5, 1275-81	19.1	136
85	Speculations on the origin of the vertebrate immune system. <i>Immunology Letters</i> , 2004 , 92, 3-9	4.1	36

84	Innate immunity in early chordates and the appearance of adaptive immunity. <i>Comptes Rendus - Biologies</i> , 2004 , 327, 591-591	1.4	
83	Innate immunity in early chordates and the appearance of adaptive immunity. <i>Comptes Rendus - Biologies</i> , 2004 , 327, 591-601	1.4	34
82	On the origins of the adaptive immune system: novel insights from invertebrates and cold-blooded vertebrates. <i>Trends in Immunology</i> , 2004 , 25, 105-11	14.4	98
81	Evolution of innate and adaptive immunity: can we draw a line?. <i>Trends in Immunology</i> , 2004 , 25, 640-4	14.4	202
80	Endothelial adhesion molecule ESAM binds directly to the multidomain adaptor MAGI-1 and recruits it to cell contacts. <i>Experimental Cell Research</i> , 2004 , 300, 121-33	4.2	72
79	Genomic analysis of immunity in a Urochordate and the emergence of the vertebrate immune system: "waiting for Godot". <i>Immunogenetics</i> , 2003 , 55, 570-81	3.2	237
78	Two highly divergent ancient allelic lineages of the transporter associated with antigen processing (TAP) gene in <i>Xenopus</i> : further evidence for co-evolution among MHC class I region genes. <i>European Journal of Immunology</i> , 2003 , 33, 3017-27	6.1	40
77	Workshop report: evolutionary immunobiology--new approaches, new paradigms. <i>Developmental and Comparative Immunology</i> , 2003 , 27, 263-71	3.2	6
76	A human TAPBP (TAPASIN)-related gene, TAPBP-R. <i>European Journal of Immunology</i> , 2002 , 32, 1059-68	6.1	44
75	The fate of duplicated major histocompatibility complex class Ia genes in a dodecaploid amphibian, <i>Xenopus ruwenzoriensis</i> . <i>European Journal of Immunology</i> , 2002 , 32, 2698-709	6.1	18
74	Heterogeneity of endothelial junctions is reflected by differential expression and specific subcellular localization of the three JAM family members. <i>Blood</i> , 2001 , 98, 3699-707	2.2	223
73	The immune system of invertebrates and vertebrates. <i>Comparative Biochemistry and Physiology - B Biochemistry and Molecular Biology</i> , 2001 , 129, 1-15	2.3	97
72	B-cell development in the amphibian <i>Xenopus</i> . <i>Immunological Reviews</i> , 2000 , 175, 201-13	11.3	87
71	Trans-species polymorphism of the major histocompatibility complex-encoded proteasome subunit LMP7 in an amphibian genus, <i>Xenopus</i> . <i>Immunogenetics</i> , 2000 , 51, 186-92	3.2	23
70	Charley Steinberg 1932-1999. <i>Immunogenetics</i> , 2000 , 51, 395-7	3.2	1
69	Relationships among the genes encoding MHC molecules and the specific antigen receptors 2000 , 53-65		2
68	B-cell development in the amphibian <i>Xenopus</i> 2000 , 175, 201		1
67	Duplication and MHC linkage of the CTX family of genes in <i>Xenopus</i> and in mammals. <i>European Journal of Immunology</i> , 1999 , 29, 1729-39	6.1	18

66	Axolotl MHC architecture and polymorphism. <i>European Journal of Immunology</i> , 1999 , 29, 2897-907	6.1	45
65	Development of the early B cell population in <i>Xenopus</i> . <i>European Journal of Immunology</i> , 1998 , 28, 2947-59	6.1	32
64	CTX, a <i>Xenopus</i> thymocyte receptor, defines a molecular family conserved throughout vertebrates. <i>European Journal of Immunology</i> , 1998 , 28, 4094-104	6.1	102
63	CTX, a <i>Xenopus</i> thymocyte receptor, defines a molecular family conserved throughout vertebrates 1998 , 28, 4094		8
62	Antibody cross-linking of the thymocyte-specific cell surface molecule CTX causes abnormal mitosis and multinucleation of tumor cells. <i>Experimental Cell Research</i> , 1997 , 235, 227-37	4.2	9
61	Cross-linking CTX, a novel thymocyte-specific molecule, inhibits the growth of lymphoid tumor cells in <i>Xenopus</i> . <i>Molecular Immunology</i> , 1997 , 34, 133-43	4.3	15
60	Sequence and expression of an <i>Eisenia-fetida</i> -derived cDNA clone that encodes the 40-kDa fetidin antibacterial protein. <i>FEBS Journal</i> , 1997 , 246, 756-62		51
59	The T cell receptor beta genes of <i>Xenopus</i> . <i>European Journal of Immunology</i> , 1997 , 27, 763-71	6.1	49
58	Microsites for immunoglobulin switch recombination breakpoints from <i>Xenopus</i> to mammals. <i>European Journal of Immunology</i> , 1997 , 27, 2610-9	6.1	82
57	Conservation of a master hematopoietic switch gene during vertebrate evolution: isolation and characterization of Ikaros from teleost and amphibian species. <i>European Journal of Immunology</i> , 1997 , 27, 3049-58	6.1	49
56	Effects of thymectomy and tolerance induction on tumor immunity in adult <i>Xenopus laevis</i> . <i>International Journal of Cancer</i> , 1997 , 70, 330-4	7.5	15
55	Conservation of an alpha 2 domain within the teleostean world, MHC class I from the rainbow trout <i>Oncorhynchus mykiss</i> . <i>Developmental and Comparative Immunology</i> , 1996 , 20, 417-25	3.2	66
54	RING3 is linked to the <i>Xenopus</i> major histocompatibility complex. <i>Immunogenetics</i> , 1996 , 44, 397-399	3.2	6
53	RING3 is linked to the <i>Xenopus</i> major histocompatibility complex. <i>Immunogenetics</i> , 1996 , 44, 397-399	3.2	13
52	Membrane exon sequences of the three <i>Xenopus</i> Ig classes explain the evolutionary origin of mammalian isotypes. <i>European Journal of Immunology</i> , 1996 , 26, 409-14	6.1	48
51	CTX, a novel molecule specifically expressed on the surface of cortical thymocytes in <i>Xenopus</i> . <i>European Journal of Immunology</i> , 1996 , 26, 780-91	6.1	58
50	Is <i>Xenopus</i> IgX an analog of IgA?. <i>European Journal of Immunology</i> , 1996 , 26, 2823-30	6.1	105
49	<i>Xenopus</i> lymphoid tumor cell lines 1996 , 2367-2377		1

- 48 A ploidy marker to track lymphocytes after cells transfer between genetically identical or inbred *Xenopus* **1996**, 2379-2394
- 47 Exon-intron organization of *Xenopus* MHC class II beta chain genes. *Immunogenetics*, **1995**, 42, 376-85 3.2 21
- 46 Somatic mutations during an immune response in *Xenopus* tadpoles. *Autoimmunity*, **1995**, 4, 227-34 17
- 45 A *Xenopus* lymphoid tumor cell line with complete Ig genes rearrangements and T-cell characteristics. *Molecular Immunology*, **1995**, 32, 583-93 4.3 15
- 44 Ontogeny of the alloimmune response against a transplanted tumor in *Xenopus laevis*. *Differentiation*, **1995**, 59, 135-44 3.5 41
- 43 The third component of *Xenopus* complement: cDNA cloning, structural and functional analysis, and evidence for an alternate C3 transcript. *European Journal of Immunology*, **1995**, 25, 572-8 6.1 29
- 42 Lymphoid tumors of *Xenopus laevis* with different capacities for growth in larvae and adults. *Autoimmunity*, **1994**, 3, 297-307 51
- 41 Diversity of expressed V and J regions of immunoglobulin light chains in *Xenopus laevis*. *European Journal of Immunology*, **1993**, 23, 1980-6 6.1 9
- 40 Phylogeny of B-cell development. *Current Opinion in Immunology*, **1993**, 5, 185-93 7.8 62
- 39 In vitro growth of thymic tumor cell lines from *Xenopus*. *Autoimmunity*, **1992**, 2, 295-307 36
- 38 Changes in the amphibian antibody repertoire are correlated with metamorphosis and not with age or size. *Autoimmunity*, **1992**, 2, 1-6 17
- 37 Sequences of C mu and the VH1 family in LG7, a clonable strain of *Xenopus*, homozygous for the immunoglobulin loci. *Autoimmunity*, **1992**, 3, 13-24 10
- 36 Origin and evolution of the vertebrate immune system. *Apmis*, **1992**, 100, 383-92 3.4 24
- 35 Differential expression of creatine kinase isozymes during development of *Xenopus laevis*: an unusual heterodimeric isozyme appears at metamorphosis. *Differentiation*, **1991**, 46, 23-34 3.5 7
- 34 Reagents Specific for MHC Class I Antigens of *Xenopus*. *American Zoologist*, **1991**, 31, 580-591 24
- 33 Light chain heterogeneity in the amphibian *Xenopus*. *Molecular Immunology*, **1991**, 28, 985-94 4.3 32
- 32 The major histocompatibility complex of frogs. *Immunological Reviews*, **1990**, 113, 47-63 11.3 50
- 31 Expression of MHC class II antigens during *Xenopus* development. *Autoimmunity*, **1990**, 1, 85-95 85

30	Evolution of the MHC: antigenicity and unusual tissue distribution of <i>Xenopus</i> (frog) class II molecules. <i>Molecular Immunology</i> , 1990 , 27, 451-62	4.3	48
29	Tonegawa's prize. <i>Nature</i> , 1988 , 331, 108	50.4	
28	MHC class I antigens as surface markers of adult erythrocytes during the metamorphosis of <i>Xenopus</i> . <i>Developmental Biology</i> , 1988 , 128, 198-206	3.1	48
27	Changes in the immune system during metamorphosis of <i>Xenopus</i> . <i>Trends in Immunology</i> , 1987 , 8, 58-64		104
26	Genetics of polyploid <i>Xenopus</i> . <i>Trends in Genetics</i> , 1986 , 2, 310-315	8.5	222
25	Ontogeny of the Immune System in Anuran Amphibians 1986 , 1079-1088		2
24	Immune responses of thymus/lymphocyte embryonic chimeras: studies on tolerance and major histocompatibility complex restriction in <i>Xenopus</i> . <i>European Journal of Immunology</i> , 1985 , 15, 540-7	6.1	83
23	Methods Used to Study the Immune System of <i>Xenopus</i> (Amphibia, Anura) 1985 , 425-465		9
22	Studies on the <i>Xenopus</i> major histocompatibility complex. <i>Developmental and Comparative Immunology</i> , 1985 , 9, 777-81	3.2	13
21	Phylogeny of MHC Class I and Class II Molecules Identified by Cross-Reactive Xenoantisera 1985 , 51-59		
20	Ontogeny of the immune system in <i>Xenopus</i> . <i>Differentiation</i> , 1984 , 28, 109-115	3.5	37
19	Ontogeny of the immune system in <i>Xenopus</i> . <i>Differentiation</i> , 1984 , 28, 116-122	3.5	36
18	Identification of class I major histocompatibility complex encoded molecules in the amphibian <i>Xenopus</i> . <i>Immunogenetics</i> , 1984 , 20, 433-42	3.2	65
17	Structural and functional analysis of spontaneous anti-nitrophenyl antibodies in three cyprinid fish species: carp (<i>Cyprinus carpio</i>), goldfish (<i>Carassius auratus</i>) and tench (<i>Tinca tinca</i>). <i>Developmental and Comparative Immunology</i> , 1984 , 8, 611-22	3.2	52
16	Studies on <i>Xenopus</i> immunoglobulins using monoclonal antibodies. <i>Molecular Immunology</i> , 1984 , 21, 257-70	4.3	78
15	Immunoglobulin expression in diploid and polyploid interspecies hybrid of <i>Xenopus</i> : evidence for allelic exclusion. <i>European Journal of Immunology</i> , 1983 , 13, 585-90	6.1	18
14	Restoration of antibody responsiveness in early thymectomized <i>Xenopus</i> by implantation of major histocompatibility complex-mismatched larval thymus. <i>European Journal of Immunology</i> , 1982 , 12, 546-51	6.1	14
13	The expression of antibody diversity in natural and laboratory-made polyploid individuals of the clawed toad <i>Xenopus</i> . <i>Immunogenetics</i> , 1982 , 15, 251-60	3.2	22

12	Antibody diversity in lower vertebrates--why is it so restricted?. <i>Nature</i> , 1982 , 296, 311-3	50.4	139
11	Ontogeny of Immunological Functions in Amphibians 1982 , 633-657		1
10	Le T?tard et l?Anticorps 1981 , 1, 62-68		1
9	Genetic control of T helper cell function in the clawed toad <i>Xenopus laevis</i> . <i>European Journal of Immunology</i> , 1981 , 11, 151-5	6.1	43
8	Antibody diversity in amphibians: evidence for the inheritance of idiotypic specificities in isogenic <i>Xenopus</i> . <i>European Journal of Immunology</i> , 1980 , 10, 731-6	6.1	30
