#	ARTICLE	IF	CITATIONS
1	A matheuristic approach for optimizing mineral value chains under uncertainty. Optimization and Engineering, 2022, 23, 1139-1164.	1.3	9
2	High-Order Data-Driven Spatial Simulation of Categorical Variables. Mathematical Geosciences, 2022, 54, 23-45.	1.4	9
3	Stochastic stope design optimisation under grade uncertainty and dynamic development costs. International Journal of Mining, Reclamation and Environment, 2022, 36, 81-103.	1.2	7
4	Updating geostatistically simulated models of mineral deposits in real-time with incoming new information using actor-critic reinforcement learning. Computers and Geosciences, 2022, 158, 104962.	2.0	2
5	An adaptive large neighborhood search heuristic to optimize mineral value chains under metal and material type uncertainty. International Journal of Mining, Reclamation and Environment, 2022, 36, 1-25.	1.2	1
6	Acknowledgement for Reviewers for 2021. Mathematical Geosciences, 2022, 54, 647.	1.4	0
7	Simultaneous stochastic optimization of mining complexes - mineral value chains: an overview of concepts, examples and comparisons. International Journal of Mining, Reclamation and Environment, 2022, 36, 443-460.	1.2	11
8	An Application of Simultaneous Stochastic Optimization at a Large Open-Pit Gold Mining Complex under Supply Uncertainty. Minerals (Basel, Switzerland), 2021, 11, 172.	0.8	6
9	Training Image Free High-Order Stochastic Simulation Based on Aggregated Kernel Statistics. Mathematical Geosciences, 2021, 53, 1469-1489.	1.4	7
10	Learning high-order spatial statistics at multiple scales: A kernel-based stochastic simulation algorithm and its implementation. Computers and Geosciences, 2021, 149, 104702.	2.0	5
11	Integrating Production Planning with Truck-Dispatching Decisions through Reinforcement Learning While Managing Uncertainty. Minerals (Basel, Switzerland), 2021, 11, 587.	0.8	20
12	Production scheduling in industrial mining complexes with incoming new information using tree search and deep reinforcement learning. Applied Soft Computing Journal, 2021, 110, 107644.	4.1	19
13	Simultaneous production scheduling and transportation optimization from mines to port under uncertain material supply. Resources Policy, 2021, 73, 102150.	4.2	5
14	Applied Machine Learning for Geometallurgical Throughput Prediction – A Case Study Using Production Data at the Tropicana Gold Mining Complex. Minerals (Basel, Switzerland), 2021, 11, 1257.	0.8	12
15	Hyper-heuristic approaches for strategic mine planning under uncertainty. Computers and Operations Research, 2020, 115, 104590.	2.4	38
16	Simultaneous stochastic optimisation of an open-pit gold mining complex with waste management. International Journal of Mining, Reclamation and Environment, 2020, 34, 415-429.	1.2	17
17	Long-term mine production scheduling with multiple processing destinations under mineral supply uncertainty, based on multi-neighbourhood Tabu search. International Journal of Mining, Reclamation and Environment, 2020, 34, 459-475.	1.2	16
18	Incorporating geological and equipment performance uncertainty while optimising short-term mine production schedules. International Journal of Mining, Reclamation and Environment, 2020, 34, 362-383.	1.2	22

#	ARTICLE	IF	CITATIONS
19	Production scheduling under uncertainty of an open-pit mine using Lagrangian relaxation and branch-and-cut algorithm. <i>International Journal of Mining, Reclamation and Environment</i> , 2020, 34, 343-361.	1.2	24
20	An application of simultaneous stochastic optimisation of an open-pit mining complex with tailings management. <i>International Journal of Mining, Reclamation and Environment</i> , 2020, 34, 592-607.	1.2	7
21	A dynamic stochastic programming approach for open-pit mine planning with geological and commodity price uncertainty. <i>Resources Policy</i> , 2020, 65, 101570.	4.2	14
22	High-Order Sequential Simulation via Statistical Learning in Reproducing Kernel Hilbert Space. <i>Mathematical Geosciences</i> , 2020, 52, 693-723.	1.4	11
23	Joint stochastic short-term production scheduling and fleet management optimization for mining complexes. <i>Optimization and Engineering</i> , 2020, 21, 1717-1743.	1.3	28
24	Adaptive self-learning mechanisms for updating short-term production decisions in an industrial mining complex. <i>Journal of Intelligent Manufacturing</i> , 2020, 31, 1795-1811.	4.4	20
25	Multi-fractal conditional simulation of fault populations in coal seams using analogues: Method and application. <i>International Journal of Mining, Reclamation and Environment</i> , 2019, 33, 340-352.	1.2	5
26	Simultaneous stochastic optimization of an open pit gold mining complex with supply and market uncertainty. <i>Mining Technology: Transactions of the Institute of Mining and Metallurgy</i> , 2019, 128, 216-229.	0.6	17
27	Effects of High-Order Simulations on the Simultaneous Stochastic Optimization of Mining Complexes. <i>Minerals (Basel, Switzerland)</i> , 2019, 9, 210.	0.8	5
28	Responding to new information in a mining complex: fast mechanisms using machine learning. <i>Mining Technology: Transactions of the Institute of Mining and Metallurgy</i> , 2019, 128, 129-142.	0.6	16
29	High-Order Block Support Spatial Simulation Method and Its Application at a Gold Deposit. <i>Mathematical Geosciences</i> , 2019, 51, 793-810.	1.4	11
30	Application of simultaneous stochastic optimization with geometallurgical decisions at a copper-gold mining complex. <i>Mining Technology: Transactions of the Institute of Mining and Metallurgy</i> , 2019, 128, 88-105.	0.6	21
31	Dynamically optimizing the strategic plan of mining complexes under supply uncertainty. <i>Resources Policy</i> , 2019, 60, 83-93.	4.2	29
32	Optimizing a mineral value chain with market uncertainty using benders decomposition. <i>European Journal of Operational Research</i> , 2019, 274, 227-239.	3.5	4
33	Stochastic orebody modelling and stochastic long-term production scheduling at the Mag iron ore deposit, Quebec, Canada. <i>International Journal of Mining, Reclamation and Environment</i> , 2019, 33, 462-479.	1.2	15
34	Stochastic optimisation of long-term block cave scheduling with hang-up and grade uncertainty. <i>International Journal of Mining, Reclamation and Environment</i> , 2019, 33, 371-388.	1.2	15
35	A stochastic optimization method with in-pit waste and tailings disposal for open pit life-of-mine production planning. <i>Resources Policy</i> , 2018, 57, 112-121.	4.2	35
36	Schedule-based pushback design within the stochastic optimisation framework. <i>International Journal of Mining, Reclamation and Environment</i> , 2018, 32, 327-340.	1.2	5

#	ARTICLE	IF	CITATIONS
37	Risk-resilient mine production schedules with favourable product quality for rare earth element projects. <i>Mining Technology: Transactions of the Institute of Mining and Metallurgy</i> , 2018, 127, 41-55.	0.6	3
38	Adaptive policies for short-term material flow optimization in a mining complex. <i>Mining Technology: Transactions of the Institute of Mining and Metallurgy</i> , 2018, 127, 56-63.	0.6	12
39	Optimizing Infill Drilling Decisions Using Multi-Armed Bandits: Application in a Long-Term, Multi-Element Stockpile. <i>Mathematical Geosciences</i> , 2018, 50, 35-52.	1.4	12
40	Stochastic optimization for a mineral value chain with nonlinear recovery and forward contracts. <i>Journal of the Operational Research Society</i> , 2018, 69, 864-875.	2.1	6
41	High-Order Spatial Simulation Using Legendre-Like Orthogonal Splines. <i>Mathematical Geosciences</i> , 2018, 50, 753-780.	1.4	22
42	A New Computational Model of High-Order Stochastic Simulation Based on Spatial Legendre Moments. <i>Mathematical Geosciences</i> , 2018, 50, 929-960.	1.4	12
43	Modelling geological variability in the LabMag iron ore deposit and effects on the long-term production schedule. <i>Mining Technology: Transactions of the Institute of Materials, Minerals and Mining Section A</i> , 2017, 126, 44-58.	0.8	2
44	Simultaneous Stochastic Optimization of Mining Complexes and Mineral Value Chains. <i>Mathematical Geosciences</i> , 2017, 49, 341-360.	1.4	66
45	A High-Order, Data-Driven Framework for Joint Simulation of Categorical Variables. <i>Quantitative Geology and Geostatistics</i> , 2017, , 287-301.	0.1	8
46	A New High-Order, Nonstationary, and Transformation Invariant Spatial Simulation Approach. <i>Quantitative Geology and Geostatistics</i> , 2017, , 93-106.	0.1	0
47	A stochastic optimization formulation for the transition from open pit to underground mining. <i>Optimization and Engineering</i> , 2017, 18, 793-813.	1.3	19
48	A heuristic approach for the stochastic optimization of mine production schedules. <i>Journal of Heuristics</i> , 2017, 23, 397-415.	1.1	40
49	Joint High-Order Simulation of Spatially Correlated Variables Using High-Order Spatial Statistics. <i>Mathematical Geosciences</i> , 2017, 49, 39-66.	1.4	25
50	A dynamic-material-value-based decomposition method for optimizing a mineral value chain with uncertainty. <i>European Journal of Operational Research</i> , 2017, 258, 617-625.	3.5	2
51	Optimizing Infill Drilling Decisions Using Multi-armed Bandits: Application in a Long-Term, Multi-element Stockpile. <i>Quantitative Geology and Geostatistics</i> , 2017, , 197-212.	0.1	0
52	Anisotropic Interpolation of Sparse Images. , 2016, , .		1
53	Generalizing Generative Models: Application to Image Super-Resolution. , 2016, , .		0
54	Testing geological heterogeneity representations for enhanced oil recovery techniques. <i>Journal of Petroleum Science and Engineering</i> , 2016, 146, 222-240.	2.1	22

#	ARTICLE	IF	CITATIONS
55	Simulation of weathered profiles coupled with multivariate block-support simulation of the Puma nickel laterite deposit, Brazil. <i>Engineering Geology</i> , 2016, 215, 108-121.	2.9	2
56	A multivariate destination policy for geometallurgical variables in mineral value chains using coalition-formation clustering. <i>Resources Policy</i> , 2016, 50, 322-332.	4.2	10
57	Stochastic short-term mine production schedule accounting for fleet allocation, operational considerations and blending restrictions. <i>European Journal of Operational Research</i> , 2016, 255, 911-921.	3.5	55
58	Fast wavelet-based stochastic simulation using training images. <i>Computational Geosciences</i> , 2016, 20, 399-420.	1.2	6
59	Global optimization of open pit mining complexes with uncertainty. <i>Applied Soft Computing Journal</i> , 2016, 40, 292-304.	4.1	123
60	Progressive hedging applied as a metaheuristic to schedule production in open-pit mines accounting for reserve uncertainty. <i>European Journal of Operational Research</i> , 2016, 253, 843-855.	3.5	35
61	Network-flow based algorithms for scheduling production in multi-processor open-pit mines accounting for metal uncertainty. <i>European Journal of Operational Research</i> , 2016, 250, 273-290.	3.5	39
62	Optimal mining rates revisited: Managing mining equipment and geological risk at a given mine setup. <i>Journal of Mining Science</i> , 2015, 51, 785-798.	0.1	1
63	Sparse image reconstruction by two phase RBM learning: Application to mine planning. , 2015, , .		1
64	Optimizing mining complexes with multiple processing and transportation alternatives: An uncertainty-based approach. <i>European Journal of Operational Research</i> , 2015, 247, 166-178.	3.5	81
65	A hybrid method based on linear programming and variable neighborhood descent for scheduling production in open-pit mines. <i>Journal of Global Optimization</i> , 2015, 63, 555-582.	1.1	42
66	A variable neighbourhood descent algorithm for the open-pit mine production scheduling problem with metal uncertainty. <i>Journal of the Operational Research Society</i> , 2014, 65, 1305-1314.	2.1	43
67	A new approach to constrained open pit pushback design using dynamic cut-off grades. <i>Journal of Mining Science</i> , 2014, 50, 733-744.	0.1	11
68	Optimized open pit mine design, pushbacks and the gap problem—a review. <i>Journal of Mining Science</i> , 2014, 50, 508-526.	0.1	52
69	Stochastic production phase design for an open pit mining complex with multiple processing streams. <i>Engineering Optimization</i> , 2014, 46, 1139-1152.	1.5	16
70	Stochastic optimization of mine production scheduling with uncertain ore/metal/waste supply. <i>International Journal of Mining Science and Technology</i> , 2014, 24, 755-762.	4.6	50
71	Grade control based on economic ore/waste classification functions and stochastic simulations: examples, comparisons and applications. <i>Mining Technology: Transactions of the Institute of Materials, Minerals and Mining Section A</i> , 2014, 123, 90-106.	0.8	13
72	Joint effect of commodity price and geological uncertainty over the life of mine and ultimate pit limit. <i>Mining Technology: Transactions of the Institute of Materials, Minerals and Mining Section A</i> , 2014, 123, 207-219.	0.8	9

#	ARTICLE	IF	CITATIONS
73	CDFSIM: Efficient Stochastic Simulation Through Decomposition of Cumulative Distribution Functions of Transformed Spatial Patterns. <i>Mathematical Geosciences</i> , 2014, 46, 95-123.	1.4	16
74	Optimizing mining rates under financial uncertainty in global mining complexes. <i>International Journal of Production Economics</i> , 2014, 158, 359-365.	5.1	13
75	Production scheduling with uncertain supply: a new solution to the open pit mining problem. <i>Optimization and Engineering</i> , 2013, 14, 361-380.	1.3	117
76	Stochastic mine production scheduling with multiple processes: Application at Escondida Norte, Chile. <i>Journal of Mining Science</i> , 2013, 49, 583-597.	0.1	31
77	Forecasting Recoverable Ore Reserves and Their Uncertainty at Morila Gold Deposit, Mali: An Efficient Simulation Approach and Future Grade Control Drilling. <i>Mathematical Geosciences</i> , 2013, 45, 1005-1020.	1.4	15
78	Modern Mining Geostatistics – A Special Issue Dedicated to Our Friend Professor Danie Krige. <i>Mathematical Geosciences</i> , 2013, 45, 897-899.	1.4	0
79	Implementing a parametric maximum flow algorithm for optimal open pit mine design under uncertain supply and demand. <i>Journal of the Operational Research Society</i> , 2013, 64, 185-197.	2.1	46
80	A heuristic approach to stochastic cutoff grade optimization for open pit mining complexes with multiple processing streams. <i>Resources Policy</i> , 2013, 38, 591-597.	4.2	36
81	Geologic heterogeneity recognition using discrete wavelet transformation for subsurface flow solute transport simulations. <i>Advances in Water Resources</i> , 2013, 54, 22-37.	1.7	4
82	Stochastic long-term production scheduling of iron ore deposits: Integrating joint multi-element geological uncertainty. <i>Journal of Mining Science</i> , 2013, 49, 68-81.	0.1	68
83	Joint stochastic optimisation of short and long term mine production planning: method and application in a large operating gold mine. <i>Mining Technology: Transactions of the Institute of Materials, Minerals and Mining Section A</i> , 2013, 122, 110-123.	0.8	27
84	Multi-scale stochastic simulation with a wavelet-based approach. <i>Computers and Geosciences</i> , 2012, 45, 177-189.	2.0	21
85	A diversified Tabu search approach for the open-pit mine production scheduling problem with metal uncertainty. <i>European Journal of Operational Research</i> , 2012, 222, 642-652.	3.5	122
86	Dimensional Reduction of Pattern-Based Simulation Using Wavelet Analysis. <i>Mathematical Geosciences</i> , 2012, 44, 343-374.	1.4	38
87	Multivariate Block-Support Simulation of the Yandi Iron Ore Deposit, Western Australia. <i>Mathematical Geosciences</i> , 2012, 44, 449-468.	1.4	47
88	Quantifying multi-element and volumetric uncertainty, Coleman McCreeedy deposit, Ontario, Canada. <i>Computers and Geosciences</i> , 2012, 42, 71-78.	2.0	22
89	Optimal production scale of open pit mining operations with uncertain metal supply and long-term stockpiles. <i>Resources Policy</i> , 2012, 37, 81-89.	4.2	22
90	Approximations of High-Order Spatial Statistics Through Decomposition. <i>Quantitative Geology and Geostatistics</i> , 2012, , 91-102.	0.1	2

#	ARTICLE	IF	CITATIONS
91	Geologic heterogeneity representation using high-order spatial cumulants for subsurface flow and transport simulations. <i>Water Resources Research</i> , 2011, 47, .	1.7	16
92	Implementation of conditional simulation by successive residuals. <i>Computers and Geosciences</i> , 2011, 37, 129-142.	2.0	16
93	HOSIM: A high-order stochastic simulation algorithm for generating three-dimensional complex geological patterns. <i>Computers and Geosciences</i> , 2011, 37, 1242-1253.	2.0	47
94	Stochastic optimization for strategic mine planning: A decade of developments. <i>Journal of Mining Science</i> , 2011, 47, 138-150.	0.1	111
95	Incorporating geological and market uncertainties and operational flexibility into open pit mine design. <i>Journal of Mining Science</i> , 2011, 47, 191-201.	0.1	34
96	A risk quantification framework for strategic mine planning: Method and application. <i>Journal of Mining Science</i> , 2011, 47, 235-246.	0.1	20
97	Discretizing two-dimensional complex fractured fields for incompressible two-phase flow. <i>International Journal for Numerical Methods in Fluids</i> , 2011, 65, 764-780.	0.9	17
98	An efficient method for discretizing 3D fractured media for subsurface flow and transport simulations. <i>International Journal for Numerical Methods in Fluids</i> , 2011, 67, 651-670.	0.9	51
99	High-order Statistics of Spatial Random Fields: Exploring Spatial Cumulants for Modeling Complex Non-Gaussian and Non-linear Phenomena. <i>Mathematical Geosciences</i> , 2010, 42, 65-99.	1.4	113
100	High-order Stochastic Simulation of Complex Spatially Distributed Natural Phenomena. <i>Mathematical Geosciences</i> , 2010, 42, 457-485.	1.4	75
101	A new approach for geological pattern recognition using high-order spatial cumulants. <i>Computers and Geosciences</i> , 2010, 36, 313-334.	2.0	40
102	Generalized Laguerre expansions of multivariate probability densities with moments. <i>Computers and Mathematics With Applications</i> , 2010, 60, 2178-2189.	1.4	16
103	Quantification of fault uncertainty and risk assessment in longwall coal mining: stochastic simulation, back analysis, longwall design and reserve risk assessment. <i>Mining Technology: Transactions of the Institute of Materials, Minerals and Mining Section A</i> , 2010, 119, 59-67.	0.8	4
104	Algorithmic approach to pushback design based on stochastic programming: method, application and comparisons. <i>Mining Technology: Transactions of the Institute of Materials, Minerals and Mining Section A</i> , 2010, 119, 88-101.	0.8	32
105	Discretizing Complex Fractured Media for Flow and Transport Simulations. , 2010, , .		0
106	Block Simulation of Multiple Correlated Variables. <i>Mathematical Geosciences</i> , 2009, 41, 215-237.	1.4	86
107	Two-dimensional Conditional Simulations Based on the Wavelet Decomposition of Training Images. <i>Mathematical Geosciences</i> , 2009, 41, 679-701.	1.4	31
108	Stope design and geological uncertainty: Quantification of risk in conventional designs and a probabilistic alternative. <i>Journal of Mining Science</i> , 2009, 45, 152-163.	0.1	18

#	ARTICLE	IF	CITATIONS
109	Mathematical Geosciences – Forty and Still Modeling!. Mathematical Geosciences, 2008, 40, 1-2.	1.4	2
110	Pseudo-full-waveform inversion of borehole GPR data using stochastic tomography. Geophysics, 2007, 72, J43-J51.	1.4	33
111	Evaluating mine plans under uncertainty: Can the real options make a difference?. Resources Policy, 2007, 32, 116-125.	4.2	73
