## C Reyes-Vazquez

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/11200097/publications.pdf Version: 2024-02-01

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 1  | Lateral hypothalamus: Site involved in pain modulation. Neuroscience, 1996, 70, 449-460.  | 2.3 | 124       |
| 2  | Does the immune system communicate with the central nervous system?. Journal of Neuroimmunology, 1985, 9, 1-12.   | 2.3 | 112       |
| 3  | Nociceptive responses in nucleus parafascicularis thalami are modulated by dorsal raphe stimulation<br>and microiontophoretic application of morphine and serotonin. Brain Research Bulletin, 1989, 23,<br>405-411.                                     | 3.0 | 55        |
| 4  | Alteration of morphine withdrawal to naloxone by interferon. Neuropeptides, 1983, 3, 453-463.   | 2.2 | 52        |
| 5  | Melatonin modulates cholinergic transmission by blocking nicotinic channels in the guinea-pig submucous plexus. European Journal of Pharmacology, 1996, 312, 319-325.   | 3.5 | 46        |
| 6  | Modification of nociceptively identified neurons in thalamic parafascicularis by chemical stimulation of dorsal raphe with glutamate, morphine, serotonin and focal dorsal raphe electrical stimulation.<br>Brain Research Bulletin, 1990, 24, 717-723. | 3.0 | 44        |
| 7  | The parafasciculus thalami as a site for mediating the antinociceptive response to GABAergic drugs.<br>Brain Research, 1986, 383, 177-184.  | 2.2 | 42        |
| 8  | Dorsal raphe stimulation, 5-HT and morphine microiontophoresis effects on noxious and nonnoxious identified neurons in the medial thalamus of the rat. Brain Research Bulletin, 1989, 22, 937-943.  | 3.0 | 39        |
| 9  | Three different types of α-interferons alter naloxone-induced abstinence in morphine-addicted rats.<br>Immunopharmacology, 1985, 9, 13-17.  | 2.0 | 37        |
| 10 | Does interferon exert its actions through opiate receptors. Life Sciences, 1984, 35, 1015-1021.   | 4.3 | 33        |
| 11 | Alpha-interferon suppresses food intake and neuronal activity of the lateral hypothalamus.<br>Neuropharmacology, 1994, 33, 1545-1552.   | 4.1 | 31        |
| 12 | Galphimine-B Modifies Electrical Activity of Ventral Tegmental Area Neurons in Rats. Planta Medica,<br>1998, 64, 309-313.   | 1.3 | 31        |
| 13 | Apamin blocks the direct relaxant effect of melatonin on rat ileal smooth muscle. Journal of Pineal<br>Research, 1997, 22, 1-8.   | 7.4 | 30        |
| 14 | Galphimine B Modulates Synaptic Transmission on Dopaminergic Ventral Tegmental Area Neurons.<br>Planta Medica, 2003, 69, 38-43.   | 1.3 | 28        |
| 15 | Novel effects of interferon on the brain: Microiontophoretic application and single cell recording in the rat. Neuroscience Letters, 1982, 34, 201-206.   | 2.1 | 20        |
| 16 | Differential effects of interferon on ventromedial hypothalamus and dorsal hippocampus. Journal of<br>Neuroscience Research, 1983, 10, 273-278.   | 2.9 | 19        |
| 17 | Rat Pineal Exhibits Two Electrophysiological Patterns of Response to Microiontophoretic<br>Norepinephrine Application. Journal of Pineal Research, 1986, 3, 213-222.  | 7.4 | 16        |
| 18 | Melatonin modifies the spontaneous multiunit activity recorded in several brain nuclei of freely<br>behaving rats. Brain Research Bulletin, 1991, 27, 595-600.  | 3.0 | 15        |

C Reyes-Vazquez

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 19 | Interferon modulates glucose-sensitive neurons in the hypothalamus. Experimental Brain Research, 1997, 116, 519-524.  | 1.5 | 15        |
| 20 | Single Injection of Three Different Preparations of α-Interferon Modifies Morphine Abstinence Signs for a Prolonged Period. International Journal of Neuroscience, 1987, 32, 953-961.   | 1.6 | 12        |
| 21 | Noxious and non-noxious responses in the medial thalamus of the rat. Neurological Research, 1989, 11, 177-180.  | 1.3 | 12        |
| 22 | Microiontophoretically applied morphine and naloxone on single cell activity in the parafasciculus<br>nucleus of naive and morphine-dependent rats. Journal of Pharmacology and Experimental<br>Therapeutics, 1984, 229, 583-8. | 2.5 | 11        |
| 23 | Response characteristics of thalamic neurons to microiontophoretically applied morphine.<br>Neuropharmacology, 1982, 21, 733-738.   | 4.1 | 8         |
| 24 | Microiontophoretic application of morphine and naloxone to neurons in hypothalamus of rat.<br>Neuropharmacology, 1984, 23, 1081-1089.   | 4.1 | 8         |
| 25 | Microiontophoretically Applied THIP Effects upon Nociceptive Responses of Neurons in Medial<br>Thalamus. Stereotactic and Functional Neurosurgery, 1983, 46, 254-260.   | 1.5 | 5         |
| 26 | Persistence of Photic Evoked Responses in Pineal Gland After Its Pedunculotomy Superior Cervical<br>Ganglionectomy. Journal of Pineal Research, 1987, 4, 287-294.   | 7.4 | 5         |
| 27 | Does naloxone have functional significant activity on medial thalamic neurons?<br>microiontophoretical study. Life Sciences, 1983, 32, 1443-1448.   | 4.3 | 3         |
| 28 | Interaction of norepinephrine and superior cervical ganglion input in the rat pineal body.<br>Experimental Neurology, 1985, 90, 522-528.  | 4.1 | 2         |
| 29 | Facilitation of conditioned motor suppression by microinjections of dopamine in the caudate nucleus of cats. Pharmacology Biochemistry and Behavior, 1979, 10, 771-775.   | 2.9 | 1         |
| 30 | Facilitation of the suppressing effect of dopamine upon a motor conditioned response by<br>6-hydroxydopamine applied into the caudate nucleus in cats. Pharmacology Biochemistry and Behavior,<br>1980, 13, 97-101.             | 2.9 | 1         |
