#	ARTICLE	IF	CITATIONS
1	Thunderstorm wind load evaluation on storm shelters using wind tunnel testing. Engineering Structures, 2022, 262, 114350.	5.3	5
2	Designing a multi-purpose wind tunnel suitable for limited spaces. Results in Engineering, 2022, 14, 100458.	5.1	4
3	Real-time Wind Predictions for Safe Drone Flights in Toronto. Results in Engineering, 2022, 15, 100534.	5.1	14
4	Run-Time and Statistical Pedestrian Level Wind Map for Downtown Toronto. Frontiers in Built Environment, 2021, 7, .	2.3	3
5	Evaluation of Peak Transmission Line Conductor Reactions Under Downburst Winds Using Optimization and Simplified Approaches. Frontiers in Built Environment, 2019, 5, .	2.3	1
6	Designing a blade-system to generate downburst outflows at boundary layer wind tunnel. Journal of Wind Engineering and Industrial Aerodynamics, 2019, 186, 169-191.	3.9	20
7	Aero-elastic testing of multi-spanned transmission line subjected to downbursts. Journal of Wind Engineering and Industrial Aerodynamics, 2017, 169, 194-216.	3.9	59
8	Review on dynamic and quasi-static buffeting response of transmission lines under synoptic and non-synoptic winds. Engineering Structures, 2016, 112, 23-46.	5.3	67
9	LES evaluation of wind-induced responses for an isolated and a surrounded tall building. Engineering Structures, 2016, 115, 179-195.	5.3	84
10	Engineering method for estimating the reactions of transmission line conductors under downburst winds. Engineering Structures, 2015, 99, 272-284.	5.3	27
11	Consistent inflow turbulence generator for LES evaluation of wind-induced responses for tall buildings. Journal of Wind Engineering and Industrial Aerodynamics, 2015, 142, 198-216.	3.9	127
12	LES of ABL flow in the built-environment using roughness modeled by fractal surfaces. Sustainable Cities and Society, 2015, 19, 46-60.	10.4	13
13	Turbulence characterization of downbursts using LES. Journal of Wind Engineering and Industrial Aerodynamics, 2015, 136, 44-61.	3.9	58
14	Dynamic response of transmission line conductors under downburst and synoptic winds. Wind and Structures, an International Journal, 2015, 21, 241-272.	0.8	22
15	Effective technique to analyze transmission line conductors under high intensity winds. Wind and Structures, an International Journal, 2014, 18, 235-252.	0.8	22
16	Span Reduction Factor of Transmission Line Conductors Under Downburst Winds. , 2013, , .		5
17	Capacity of Electrical Transmission Towers Under Downburst Loading. , 2012, , .		5
18	Dynamic behaviour of pre-stressed concrete transmission poles under synoptic wind loading. Advances in Structural Engineering, 0, , 136943322110220.	2.4	1
